But though the reductions of duty in 1844 and 1845 effected a great improvement in the old system, they were inadequate to place it on a satisfactory footing. The reduction of the duty on foreign sugar applied to that only which was produced by free labour, the sugar produced by the labour of slaves (unless we happened to be bound by treaty to admit it at the low duty) continuing subject to the old prohibitory duty of 66s. per cwt. Nothing, however, could be more inexpedient than this distinction, on which we took the liberty to animadvert as follows in the last edition of this work :—

"We take, without any scruple, the cotton, tobacco, rice, and other products of slave-holding countries; and such being the case, it is not very easy to see on what principle we refuse to take their sugar. There is no reason to think that we are at all likely to hasten, by this refusal, the emancipation of their slaves (even if that were certainly desirable), or to improve their condition: our policy in this respect is injurious to ourselves, without being of the smallest advantage to any one else.

"But the truth is, if we look a little narrowly into the circumstances, we shall find that we do the very thing we pretend not to do. We annually export large quantities of British produce to Cuba and Brazil; but the sugar of those countries, the principal article they have to send us, being excluded from our markets, we cannot bring it direct to this country, but we carry it to Hamburgh and other continental emporiums, and there exchange it for wool, flax, and other articles we are allowed

to import ; so that, in effect, we transmute the slave-grown sugar into other things, and consume it under its new form. We do not employ it to sweeten tea and coffee ; but we clothe ourselves with wool and flax, manure our lands with bones, and manufacture our paper of rags, which are all bought by it ! But suppose we were a little more Quixotic, and that after getting the sugar we threw it into the sea, the result, as respects Cuba and Brazil, would be the same. We give, by buying their sugar, all the encouragement in our power to the slavery that exists in them ; what we shall do with the sugar is our own affair ; and whether we use it, sell it to others, or destroy it, is, as far as slavery is concerned, quite immaterial. But it is by no means immaterial as respects our trade with slave-holding countries ; inasmuch as the preference we give to the sugars of others tempts them to lay discriminating duties on our products, and to discourage and embarrass our trade. And even were it otherwise desirable, it may be doubted whether it be in our power to exclude slave-grown sugar. Certificates of origin will, we apprehend, be rather a slender security for this result. But supposing them to be effectual, the consequence will be that a greater quantity of Java and Manilla sugar being consumed in England, less of it will remain to be sent to the Continent, where, by means of our policy, a corresponding market will be opened for slave-grown sugar !

“ But admitting that something might be found to say in favour of the policy of wholly excluding slave-grown sugar, we, in effect, abandon it, by admitting the slave-grown sugar of the U. States and other countries with which we have treaties of reciprocity ; so that, after all, our policy, in this respect, is prohibitive only of the sugars of Cuba, Porto-Rico, and Brazil ! If the Americans chose to send us the whole sugar grown in Louisiana, every ounce of which is the produce of slave labour, importing in its stead sugar from the Havannah and Bahia, it would be freely admitted to our markets. Hence it is that, while we exclude the slave-grown sugar of those friendly countries of whose trade we might, if we chose, have a virtual monopoly, we admit the slave-grown sugar of our rivals, of the only people whose commercial marine can come into competition with our own ! And to show that this contradiction is not imaginary, we may mention that, during the present year (1845) about 300 tons of the sugar of Louisiana\* and Venezuela have been admitted to consumption under the new act ! Is it, we beg to ask, possible to speak too harshly of such a policy ? to imagine anything more perverse, contradictory, and absurd ?

“ It were really, therefore, to be wished that we should cease to rave, as we have done for the last 20 years, about slavery ; and that we should allow our merchants to buy sugar, as we allow them to buy cotton and other things, without inquiring how, or by whom, it is produced. We may be assured that we should give as little encouragement to slavery by so doing as we give by our present system, while we should, at the same time, give greater facilities to our trade, and full scope to the late, and in other respects, wise and liberal measures.”

We are glad to have to state that the principle contended for in the above paragraphs has since been fully admitted by the legislature ; the act of 1846, 9 & 10 Vict. c. 63., having equalised the duty on all descriptions of foreign sugars.

It will farther be observed that under the system adopted in 1845, a discriminating duty of 9s. 4d. per cwt. was imposed on foreign muscovado sugar admitted to consumption over and above the duty (14s. per cwt.) imposed on British sugar. Inasmuch, however, as the latter was inadequate to the supply of the U. Kingdom, the effect of this regulation was to add 9s. 4d. per cwt. to the price of all the sugar, British as well as foreign, entered for consumption. And it was hardly to be supposed, after the striking recognition of the principles of free trade given by the legislature in passing the act for the abolition of the corn laws, that the protective system would be permitted to continue for the sake of the sugar colonies. The abolition of the former was, in truth, all but equivalent to the abolition of the latter. And the 9 & 10 Vict. c. 63., referred to above, which put an end to the distinction between free and slave-grown sugar, provided also for the equalisation of the duties on British and foreign sugars, which, had it been maintained, would have been finally effected on the 5th of July, 1851.

This last act has, however, been since superseded by the 11 & 12 Vict. c. 97. of this year (1848), which, exclusive of some changes in the duties, defers their complete equalisation till 1854.

*Comparative Efficiency of Free and Slave Labour in the Production of Sugar.*— But though it was not to be expected that a discriminating duty in favour of the sugar of our colonies would be tolerated, it is by no means clear that its abolition will not be an injustice to the latter. The equalisation of the duties would be in all respects unobjectionable, were the circumstances under which the planters in our colonies are placed identical with or similar to those under which their competitors are placed in Cuba, Brazil, and Java. Such, however, is not the case. The instruments of production possessed by the latter are totally different from those possessed by the

\* The quality of the latter is not, as now prepared, well suited to our markets.

former. In Brazil and Cuba the planters are furnished with slave labour, and in Java the population, though not enslaved, is subjected to compulsory service. Unless, therefore, it can be shown that free labour is as efficient in the production of sugar in the West Indies and Demerara as slave or compulsory labour, it will necessarily follow that the equalisation of the duties on British and foreign sugars is an injustice to our colonists.

It has been alleged over and over again in vindication of this equalisation, that free labour is at once cheaper and more efficient than slave labour; and without inquiring into the truth of this allegation, we shall admit the greater cheapness of free labour in countries where freemen and slaves are equally suited to the employments carried on in them, and where these employments would be spontaneously followed by the slaves were they emancipated. But the conditions under which the production of sugar is carried on in the intertropical regions of the New World are entirely different from those now stated. Whites are not capable of field labour in such climates; and the raising of sugar is not an employment that would be voluntarily undertaken by free blacks. The latter have few wants. They reckon as useless incumbrances many articles indispensable in cold or temperate climates. Hence the *curis acens mortalia corda*, so powerful in Europe, has but little influence in Jamaica and Trinidad. Men are not instinctively laborious or enterprising. Industry is with them merely a means to an end, a sacrifice they make to obtain supplies of the necessities and conveniences of human life. Wherever the sacrifices required to procure food, clothes, and other necessary accommodations is considerable, the population is generally industrious; and a taste for labour being widely diffused, those who are not obliged to apply themselves to the production of necessities, engage in the production of superfluities. But wherever the principal wants of man may be supplied with but little exertion, indolence becomes the distinguishing characteristic of the population; and, instead of employing their spare time in the production of articles of ostentation and luxury, they usually waste it in idleness and apathy. Now this is the precise state of the blacks in the W. Indies. Their necessities and desires are of a very limited description; and are generally indeed fully satisfied by the produce of a small patch of land, requiring but little labour in its cultivation: and such being the case it would be contradictory to suppose that they should voluntarily employ themselves in the hard labour necessary to produce sugar. Consistently with what is now stated, we find that Hayti, or St. Domingo, though the most fruitful of the West Indian islands, and though, when a colony of France, it furnished immense supplies of sugar, does not export, now that it is occupied by free blacks, a single ton! This, also, is the case in Mexico: and what reasonable ground have we for supposing that the result would be different in Jamaica, Cuba, or Brazil, were the blacks free and able (which is not the case in our islands) easily to obtain patches of land? The possession of the latter is requisite to enable them to exist without engaging in laborious service; and in the event of their not being able to obtain land, they may be forced to employ themselves in the culture of sugar; though, as it is against their inclination, they will withdraw from their work on the first opportunity, and will, while employed, indulge as much as possible in idleness.

Hence it would seem that, whether slave and compulsory labour be cheaper or dearer than free labour, it is indispensable to the production of sugar. We do not presume in making this statement to give any opinion in regard to the policy or impolicy of the suppression of slavery in our colonies. The freedom of the blacks may be a more than sufficient compensation for the cessation of supplies of sugar from them. But, whether it be so or not, we regard it as the merest illusion to suppose that the severe drudgery of sugar planting will ever be efficiently carried on in the W. Indies by really free labourers.

If this be a well-founded conclusion, the justice of making some compensation to our planters for the ruin that will be entailed on them by their exposure to the unfettered competition of those who have ample supplies of compulsory labour, is too obvious to admit of any question. The freedom of the blacks and the advantage of our own population, how desirable soever, should not be purchased by the ruin of the planters. Justice is too valuable to be sacrificed to our humanity or our palates.

The mere exclusion of slave-grown sugar would not, however, as many seem to suppose, in any degree obviate the hardships to which our planters are exposed. It would merely force a larger quantity of the sugars of Java and China upon our markets, and open a larger field for the consumption of slave-grown sugar on the Continent. Justice to our colonists requires that either a discriminating duty of 8s. or 10s. a cwt. should be imposed in their favour on all foreign sugars, or that they should be compensated in some other way. The former method of dealing fairly by them would, however, be repugnant to the national feeling and highly objectionable, at the same time that it is more than doubtful whether it would be of any real service to the planters, or would enable them to continue their business: and such being the case some less offensive and more efficient alternative should be resorted to. We subjoin an

ABSTRACT OF THE ACT 11 & 12 VICT. C. 97., REMODELLING AND EQUALISING THE DUTIES ON SUGAR.

*Duties on Sugar and Molasses.* — Clause 1. repeals the duties on sugar and molasses imposed by the Act 9 & 10 Vict. c. 63., and imposes in their stead the following duties, viz.

On sugar or molasses the growth and produce of any British possession into which the importation of foreign sugar is prohibited, being imported from any such possession, the duties following, viz. from and after

Articles.	10 July 1848 to 5 July 1849 inclusive.	5 July 1849 to 5 July 1850 inclusive.	5 July 1850 to 5 July 1851 inclusive.	5 July 1851 to 5 July 1852 inclusive.
Candy, brown or white, refined sugar, or sugar rendered by any process equal in quality thereto, for every cwt. -	£ s. d.	£ s. d.	£ s. d.	£ s. d.
White clayed sugar, or sugar rendered by any process equal in quality to white clayed, not being refined, or equal to refined, for every cwt. -	0 17 4	0 16 0	0 14 8	0 13 4
Muscovado, or any other sugar, not being equal in quality to white clayed, for every cwt. -	0 15 2	0 14 0	0 12 10	0 11 8
Molasses, for every cwt. -	0 13 0	0 12 0	0 11 0	0 10 0
	0 4 10	0 4 6	0 4 2	0 3 9

And so in proportion for any greater or less quantity than 1 cwt.

And from and after the respective days next hereinafter mentioned, —

On sugar or molasses the growth and produce of any other British possession, being imported from any such possession, the duties following, viz. from and after

Articles.	10 July 1848 to 5 July 1849 inclusive.	5 July 1849 to 5 July 1850 inclusive.	5 July 1850 to 5 July 1851 inclusive.	5 July 1851 to 5 July 1852 inclusive.	5 July 1852 to 5 July 1853 inclusive.	5 July 1853 to 5 July 1854 inclusive.	5 July 1854 to 5 July 1855 inclusive.
Candy, brown or white, refined sugar, or sugar rendered by any process equal in quality thereto, for every cwt. -	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
White clayed sugar, or sugar rendered by any process equal in quality to white clayed, not being refined, or equal to refined, for every cwt. -	1 2 0	1 0 4	0 18 8	0 17 0	0 16 4	0 15 4	0 14 4
Brown clayed sugar, or sugar rendered by any process equal in quality to brown clayed, and not equal to white clayed, for every cwt. -	0 18 4	0 16 11	0 15 5	0 14 0	0 13 5	0 12 10	0 12 4
Muscovado, or any other sugar, not being equal in quality to brown clayed sugar, for every cwt. -	0 17 0	0 15 8	0 14 4	0 13 0	0 12 5	0 11 10	0 10 8
Molasses, for every cwt. -	0 15 9	0 14 6	0 13 5	0 12 0	0 11 6	0 11 0	0 10 7
	0 5 10	0 5 5	0 4 11	0 4 6	0 4 6	0 4 2	0 3 7

And so in proportion for any greater or less quantity than 1 cwt.

On sugar or molasses the growth and produce of any foreign country, and on all sugar or molasses not otherwise charged with duty, the duties following, viz. from and after

Articles.	10 July 1848 to 5 July 1849 inclusive.	5 July 1849 to 5 July 1850 inclusive.	5 July 1850 to 5 July 1851 inclusive.	5 July 1851 to 5 July 1852 inclusive.	5 July 1852 to 5 July 1853 inclusive.	5 July 1853 to 5 July 1854 inclusive.	5 July 1854 to 5 July 1855 inclusive.
Candy, brown or white, refined sugar, or sugar rendered by any process equal in quality thereto, for every cwt. -	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
White clayed sugar, or sugar rendered by any process equal in quality to white clayed, not being refined, or equal to refined, for every cwt. -	1 6 8	1 4 8	1 2 8	1 0 8	0 19 4	0 17 4	0 15 4
Brown clayed sugar, or sugar rendered by any process equal in quality to brown clayed, and not equal to white clayed, for every cwt. -	1 1 7	0 19 10	0 18 1	0 16 4	0 15 2	0 14 0	0 12 8
Muscovado, or any other sugar, not being equal in quality to brown clayed sugar, for every cwt. -	1 0 0	0 18 6	0 17 0	0 15 6	0 14 6	0 13 0	0 11 8
Molasses, for every cwt. -	0 18 6	0 17 0	0 15 6	0 14 0	0 13 0	0 12 0	0 10 8
	0 6 11	0 6 4	0 5 9	0 5 3	0 4 10	0 4 6	0 3 9

And so in proportion for any greater or less quantity than 1 cwt.

Bounties or drawbacks upon the exportation from the U. Kingdom of the several descriptions of refined sugar hereinafter mentioned: — viz. from and after

Articles.	10 July 1848 to 5 July 1849 inclusive.	5 July 1849 to 5 July 1850 inclusive.	5 July 1850 to 5 July 1851 inclusive.	5 July 1851 to 5 July 1852 inclusive.
Upon refined sugar in loaf, complete and whole, or lumps duly refined, having been perfectly clarified and thoroughly dried in the stove, and being of an uniform whiteness throughout, or such sugar pounded, crushed, or broken, or sugar candy, the cwt. -	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Upon bastard or refined sugar, broken in pieces, or being ground or powdered sugar, or such sugar pounded or crushed or broken, for every cwt. -	0 16 4	0 15 0	0 13 9	0 12 8
	0 13 0	0 12 0	0 11 0	0 10 0

And so in proportion for any greater or less quantity than 1 cwt.

*Sugar and Molasses may be imported from British Possessions in the East Indies at the lower Rate of Duty when Importation of Foreign Sugar is prohibited.*—If at any time satisfactory proof shall have been laid before H. Majesty in Council, that, as respects any British possession the importation of foreign sugar has been prohibited, it shall be lawful for H. Majesty, and she is hereby empowered by any order or orders in Council, to declare that sugar and molasses the growth or produce of any such British possession may be imported from thence into the U. K., and entered at the lower rates of duty hereinbefore imposed on sugar and molasses the growth or produce of British possessions into which the importation of foreign sugar is prohibited; and from and after the publication of such order, whilst the same shall continue in force, the sugars and molasses therein mentioned may be so imported and entered accordingly.—§ 2.

*Such Sugar and Molasses to be entered at the lower Rates of Duty, upon the Conditions on which Bengal Sugar was admissible under 6 & 7 W. 4. c. 26.*—Any sugars or molasses the produce of any British possession within the limits of the East India Company's charter in which the importation of foreign sugar is or shall be prohibited, which shall be entered for home use at the lower rates of duty imposed on sugar and molasses the produce of such possessions, shall be entered under the same or the like conditions, under which sugar the growth of the presidency of Bengal might be entered for home use, under the provisions of the Act 6 & 7 Will. 4. c. 26.—§ 3.

*Collection of Duties to be under the Management of the Customs.*—The several duties, bounties, and allowances imposed and allowed by this Act shall be under the management of the commissioners of customs, and shall be ascertained, collected, paid, allowed, &c., and applied or appropriated under the provisions of the Acts 8 & 9 Vict. c. 50, and 8 & 9 Vict. c. 92.—§ 4.

*Commissioners of Customs to provide Standard Samples of White Clayed Sugar.*—The commissioners of customs shall provide samples of white clayed sugar, and of sugar rendered by any process equal in quality to white clayed sugar, with reference to colour, grain, and saccharine matter, which shall be deemed to be standard samples for the purpose of comparing therewith such white clayed sugar, or sugar rendered by any process equal in quality to white clayed sugar, as from and after the passing of this Act may be entered for home consumption; and such standard samples shall from time to time be renewed whenever the said commissioners may deem it expedient; and no sugar shall, as regards the payment of duty, be deemed or taken to be white clayed sugar, or sugar rendered by any process equal in quality to white clayed, unless it shall, with reference to colour, grain, or saccharine matter, equal the standard samples provided by the said commissioners.—§ 5.

Clause 6. directs commissioners of customs to provide standard samples of brown clayed sugar.

*Sugar or Molasses Imported or in Warehouse liable to the Duties imposed by this Act.*—All sugar or molasses imported, but not entered, or which shall have been warehoused without payment of duty on the first importation thereof, and which shall be in port or warehouse at the respective periods at which the duties imposed by this Act shall become chargeable, shall be deemed and taken to be liable to the duties imposed by this Act; and the rate or rates of duty chargeable by this Act upon sugar or molasses, from the 10th of July, 1848, to the 5th of July, 1849, shall be taken to be applicable to sugar or molasses delivered for home consumption prior to the passing of this Act, and subsequently to the 10th day of July, 1848.—§ 7.

*Orders in Council to be published in the Gazette.*—§ 8.

*Orders in Council may be revoked.*—§ 9.

*Copies of Orders in Council to be laid before Parliament.*—§ 10.

The quantity of sugar consumed in Great Britain, previously to the change in 1845, allowing for the quantity sent to Ireland, was more than double what it was in 1790. But had the duty continued at 12s. 4d., its amount in that year, there cannot, we think, be much doubt, provided foreign sugars had also been admitted under a reasonable duty, that the consumption would have been trebled or more. During the intervening period the population had been little less than doubled; and the proportion which the middle classes bear to the whole population had been decidedly augmented. The consumption of coffee—an article in the preparation of which a great deal of sugar is used in this country, by all who can afford it—is more than 36 times as great now as in 1790; that is, it has increased from under 1,000,000 lbs. to above 36,000,000 lbs. The consumption of tea has about doubled; and there has been a great increase in the use of home-made wines, preserved and baked fruits, &c. Instead, therefore, of having done little more than increase proportionally to the increase of population, it may be fairly presumed that the consumption of sugar would, had there not been some powerful countervailing cause in operation, have increased in a far greater degree. Instead of amounting, in 1844, to little more than 4,000,000 cwt., the consumption of Great Britain should have amounted, as it now (1848) does, to from 5,000,000 to 6,000,000 cwt.

Taking the aggregate consumption of sugar in Great Britain previously to 1845 at 400,000,000 lbs., and the population at 20,000,000, the average consumption of each individual has been about 20 lbs., ex. molasses. This, though a far greater average than that of France, or any of the continental states, is but small compared with what it probably will be now that it is supplied under a more liberal system. In workhouses, the customary annual allowance for each individual is, we believe, 34 lbs.; and, in private families, the smallest separate allowance for domestics is 1 lb. a week, or 52 lbs. a year. These facts strongly corroborate what we have already stated as to the extent to which the consumption of sugar will probably be increased under the new system; and others may be referred to, that are little less conclusive. Mr. Huskisson stated, in his place in the House of Commons, on Mr. Grant's motion for a reduction of the sugar duties, 25th of May, 1829, that "in consequence of the present enormous duty on sugar, the poor working man with a large family, to whom pence were a serious consideration, was denied the use of that commodity; and he believed he did not go too far when he stated that two-thirds of the poorer consumers of coffee drank that beverage without sugar. If, then, the price of sugar were reduced, it would become an article of his consumption, like many other articles—woollens, for example, which are now used for their cheapness—which he was formerly unable to purchase."—(*Speeches*, vol. iii. p. 455.) Mr. Huskisson's conclusions are now in the way of being fully realised. The period that

has elapsed since the late changes is too short to admit of their having exercised their full influence. But, as already seen, the consumption of the U. Kingdom has increased from about 207,000 tons in 1844, to no fewer than 290,000 tons, *ex. molasses*, in 1847! And as the consumption of the first 9 months of the current year (1848) has exceeded by more than 15,000 tons that of the corresponding period of 1847, there can be no doubt that its total consumption will considerably exceed 300,000 tons. We may further state, in illustration of the beneficial influence of the reduction of the duties, that while, in London and other parts of the country, the sales of sugar by the grocers who supply the higher classes have been but little extended, the sales of those who principally deal with the lower classes have augmented from 40 to 50, and, in some cases, to 80 and 100 per cent. This is the best possible proof of the salutary as well as of the powerful influence of the reduction of the duties.

In Ireland, provided that country is ever to escape from beggary and agitation, we should anticipate highly beneficial effects from the reduction of the duties on sugar. The direct importations of sugar into Ireland did not, previously to the late changes, exceed 18,500 tons; and, adding to these 6,500 tons for the second-hand importations (including bastards) from Great Britain, which, we believe, was quite as much or more than they amounted to, the entire consumption of that country would be 25,000 tons, or 57,000,000 lbs., which, taking the population at 8,000,000, gives 7.125 lbs. to each individual; or nearly 1-3d part of the average consumption of each individual in Great Britain. So singular a result must, no doubt, be principally ascribed to the poverty of the Irish; but there can be no doubt that it was partly, also, owing to over-taxation. And we are well convinced that the late reduction of the duty, though it may occasion a considerable immediate loss of revenue in Ireland, will, in the end, be productive of its increase, besides being attended with other and still more beneficial consequences. Next to the suppression of agitation, the "one thing needful" in Ireland is to inspire the population with a taste for the conveniences and enjoyments of civilised life; and the first step towards supplying this desideratum is, if possible, to make articles of convenience and luxury attainable by the mass of the people. If this be done, whether by a reduction of duties or otherwise, we may expect that the desire inherent in all individuals of improving their condition, will impel them to exert themselves to obtain them. A taste for such articles will be gradually diffused among all ranks; and ultimately, it may be presumed, it will be thought discreditable to be without them. And we are glad to have to state that these anticipations are in the way of being realised, to a greater extent than we could have supposed. "The annual returns from Ireland," say Messrs. Trueman and Cook, "have not yet been completed, but from those already received, it appears that the deliveries in 1846, notwithstanding the national distress, have steadily and progressively increased, as compared with the preceding year, and there will probably be an excess of consumption in that part of the U. Kingdom of about 4,000 tons!" (*Circular, 1st January, 1847.*)

*Use of Sugar in Distilleries and Breweries.*—In the last edition of this work we expressed ourselves on this subject as follows: "The use of sugar in these establishments, though not absolutely prohibited, is at present placed under restrictions which are equivalent to a prohibition. There can, however, be no doubt that these restrictions should be abolished, and free leave given to the growers and importers of sugar and molasses, and, indeed, of everything else, to convert them to any purpose to which they may be applicable. This has hitherto been objected to, except in periods of scarcity, partly from a wish to promote the interests of the barley growers and maltsters in this country, and partly from the alleged risk of smuggling and loss to the revenue. But now that the policy, or rather impolicy, of protection has been renounced by the legislature, and that foreign barley may be imported and employed in any way, under a nearly nominal duty, there is plainly no ground or pretence on which the agriculturists can object to the use of sugar; and as respects the risk of fraud and loss to the revenue, we do not think it amounts to much. In cases where sugar only is to be used in distilleries and breweries, the risk of fraud could hardly amount to anything; and in the cases in which it is partly used along with malt or raw grain, or both, it would be easy, seeing that the capacity of sugar to produce spirits and beer, as compared with malt and grain, is well known, to take such precautions as would prevent any amount of fraud worth talking about. But, however it may be carried into effect, it would seem to be indispensable that the distilleries and breweries, as well as every other legitimate channel of consumption carried on in the kingdom, should be open to all who raise or import sugar, or anything else, on their paying the customary rates of duty. This is the only way in which the interests of the consumers, which are identical with those of the public, can be effectually secured; and it is obvious that, to carry out the great principle of the freedom of industry, it is not merely necessary to permit the free importation of colonial and other products, but to allow them, after being imported, to be employed in any way their owners may think fit. Under this system justice will be done to all parties, and the public be supplied with the best and the cheapest articles." And we are glad to have to state that this principle has since been fully

carried into effect by the acts 10 Vict. c. 5., and 11 & 12 Vict. c. 100., abstracts of which are given in the Supplement to this work.

*Adulteration.*—Sugar is an article which is especially liable to adulteration; and its high price during the last few years, coupled with the high duty, has given a powerful stimulus to this nefarious practice. Perhaps, we might not be far from the mark, were we to estimate the quantity of foreign matters intentionally mixed up with sugar, and sold as such in this country, previously to the late reduction of duties, at 10,000 or 12,000 tons a year! Sage and potato flour are the articles which have been most extensively used for this purpose. When mixed with sugar they give it a whiter and finer appearance; and, unless the dose be overdone, increase its price about 4s. a cwt. It is extremely difficult to deal with an abuse of this sort. No doubt the fall in the price of sugar following the placing of the trade on a proper footing, and the reduction of the duty, have lessened the temptation to adulterate. But they have not wholly removed it, the materials employed to adulterate being decidedly cheaper than sugar, however supplied. In this, as in most cases of the sort, the best security against adulteration is to deal only with grocers of the highest character.

*Refining of Sugar for Home Consumption.*—It will be immediately seen that of late years the refining of British colonial sugar for exportation has almost ceased; but the refining of colonial sugar for home consumption is carried on to a great extent, and has increased considerably since the late reduction of the duty. There are at present (October, 1848) about 26 establishments, with an aggregate capital of nearly 1,000,000*l.*, for refining sugar for the home market, which use about 130,000 tons of raw sugar, yielding from 90,000 to 95,000 tons of refined do., exclusive of bastards and treacle. Hence, if we deduct the 130,000 tons of raw sugar converted into refined from the total quantity of about 290,000 tons taken for consumption in 1847, we have 160,000 tons for the quantity consumed in a raw state, the consumption of refined sugar amounting, in consequence of its comparative cheapness, to nearly a half of the whole, ex. bastards and molasses. Refined sugar is now used by many by whom it was formerly never tasted.

The act of 1846, the 9 & 10 Vict. c. 63., made a distinction between, and imposed different duties upon, single and double refined sugar, and it, also, admitted only of their importation from countries of which they were the growth or produce. But, in consequence of the difficulty of distinguishing between them, and of the facilities that were thereby afforded for the commission of frauds, all sorts of refined sugar, and of sugar equal to refined, are now charged with the same duty, without regard to their origin. At this moment (October, 1848), owing to the low price of British sugar, none but the finest sorts of foreign refined sugars can be introduced; though it is clear that any considerable rise in the price of raw or refined sugar in this country, which did not also extend to the Continent, would occasion the importation of increased quantities of refined, as well as of raw sugar. That, however, cannot, as was contended, be injurious to our planters, for it must be indifferent to them whether raw or refined sugar be imported; and it must, at the same time, be advantageous to the consumer by making refined as well as raw sugar be sold at its necessary price, which of late years has not always been the case.

*Drawback or Bounty on the Exportation of Refined British Colonial Sugar.*—It may be doubted whether the business of refining sugar for exportation has often been productive of any material national advantage to us. It was long suspected—and the fact seems to have been sufficiently established—that the drawback formerly allowed on the exportation of refined sugar was greater than the duty charged on the raw sugar used in its manufacture; the excess being, in fact, a bounty paid to those engaged in the trade. Previously to 1826, the drawback on double refined sugar was 46*s.* a cwt.: it was then reduced to 43*s.*; but there is reason to think that that was still considerably above the mark. The average price of sugar in bond in this country was, for several years, from 5*s.* to 6*s.* a cwt. above what sugar of the same quality brought on the Continent; a difference which, as we then exported sugar, could not have been maintained, had it not been for the bounty. The same conclusion was established by the trials made under the superintendence of Dr. Ure at a sugar-house taken for the purpose by government; and in consequence the drawback was reduced to what was supposed to be the fair equivalent of the duties paid on the raw sugar; a measure, of the expediency of which no doubt can be entertained. It has been the practice, in making up returns to parliament, to reduce the refined sugar exported into raw sugar, by allowing 34 cwt. of the latter to 20 of the former. But the export of sugar is thus made to appear greater than it really is: for, though 34 cwt. of raw may be required to produce 20 cwt. of refined sugar, the whole of the molasses and bastards that remain (about 13 cwt.) are consumed at home.

The existing bounties (drawbacks) on refined British colonial sugar are specified in the 11 & 12 Vict. c. 97. (See *ante*, 1252.)

The following clauses of the act 8 & 9 Vict. c. 92. refer to the refining of British sugar for bounty.  
*Bond to be given for the due Exportation.*—The exporter of any goods in respect of which any bounty is claimed under this act, or the person in whose name the same are entered outwards, shall at the time of entry, and before cocket be granted, give security by bond in double the amount of such bounty, with 1 sufficient surety, that the same shall be duly exported to the place for which they are entered, or be otherwise accounted for to the satisfaction of the commissioners of customs, and shall not be re-landed in the U. K., or landed in the Isle of Man unless expressly entered to be carried thereto.—§ 2.

**Candy in Packages of  $\frac{1}{2}$  cwt.** — No bounty shall be given upon the exportation of any refined sugar called candy unless it be properly refined and manufactured, and free from dirt and scum, and packed in packages each of which shall contain  $\frac{1}{2}$  cwt. such candy at the least. — § 4.

**Sugar crushed for Exportation.** — If any sugar in lumps or loaves is to be pounded, crushed, or broken before the same be exported for the bounty payable thereon, such lumps or loaves shall, after due entry thereof, be lodged in some warehouse provided by the exporter, and approved by the commissioners of customs for such purpose, to be then first examined by the officers of customs while in such lumps or loaves as if for immediate shipment, and afterwards to be there pounded, crushed, or broken, and packed for exportation in the presence of such officers and at the expence of the exporter; and such sugar shall be kept in such warehouse, and be removed from thence for shipment, and be shipped under the care and in the charge of the searchers, in order that the shipment and exportation thereof may be duly certified by them upon the debenture, according to the quality ascertained by them of the same while in such lumps or loaves. — § 5.

**Different Sorts of crushed Sugar to be kept separate.** — The different sorts of such sugar shall be kept apart from each other, in such manner and in such distinct rooms or divisions of such warehouse as shall be directed and appointed by the commissioners of customs; and if any sort of such sugar shall be found in any part of such warehouse appointed for the keeping of sugar of a sort superior in quality thereto, the same shall be forfeited; and if any sort of such sugar shall be brought to such warehouse to be pounded, crushed, or broken, which shall be of a quality inferior to the sort of sugar expressed in the entry for the same, such sugar shall be forfeited. — § 6.

**Sample Loaves to be provided.** — There shall be provided by and at the expence of the committee of sugar refiners in London, and in like manner by and at the expence of the committee of merchants in Dublin, as many loaves of double refined sugar prepared in manner herein-after directed, and as many loaves or lumps of sugar made upon the patent principle, and equal in quality to double refined sugar, as the commissioners of customs shall think necessary; which loaves or lumps, when approved of by the said commissioners, shall be deemed and taken to be standard samples; one of which loaves or lumps shall be lodged with the said committees respectively, and one other with such person or persons as the said commissioners shall direct, for the purpose of comparing therewith double refined sugar, or sugar equal in quality to double refined sugar entered for exportation for the bounty; and from standard samples shall in like manner be again furnished by such committees respectively, and in like manner lodged, whenever it may be deemed expedient by the said commissioners: provided always, that no loaf of sugar shall be deemed to be a proper sample loaf of double refined sugar as aforesaid, if it be of greater weight than 14 lbs., nor unless it be a loaf complete and whole, nor unless the same shall have been made by a distinct second process of refinement from a quantity of single refined sugar, every part of which had first been perfectly clarified and duly refined, and had been made into loaves or lumps which were of an uniform whiteness throughout, and had been thoroughly dried in the stove: provided also, that no loaf or lump of sugar shall be deemed to be a proper sample loaf or lump of sugar equal to double refined, unless it be a loaf or lump complete, nor unless the same shall have been prepared after the patent principle. — § 7.

**Sugar entered not equal to the Standard shall be forfeited.** — In case any sugar which shall be entered in order to obtain the bounty on double refined sugar or sugar equal in quality to double refined sugar shall, on examination by the proper officer, be found to be of a quality not equal to such standard sample, all sugar so entered shall be forfeited and may be seized.

**Exports of British Refined Sugar.** — The business of refining colonial sugar, though, as already seen, it was for a lengthened period carried on in this country with the aid of a bounty, never attained to any very considerable magnitude, and has lately all but ceased. Its extinction has been principally occasioned by the falling off in the imports of such sugar into England, and the consequent rise of its price, which wholly unfitted it for exportation, whether in a raw or refined state; and partly by the high duties laid on refined sugar when imported in most foreign states, which has put an end to the refining of foreign sugar. We subjoin

I. An Account, showing, 1st. the Total Quantity of Sugar entered for Home Consumption in the U. Kingdom, in each Year from 1830 to 1843, both inclusive; and 2dly, the Deductions to be made from such Total, for each Year, in respect of Over-Entries, and of Quantities exported subsequently to the payment of Duty, either in the Raw State or in the Form of refined Sugar, Bastards, or Molasses, so as to exhibit, 3dly, the actual Quantity retained for Consumption in the U. Kingdom. — (*Parl. Paper, No. 153. Sess. 1844.*)

Years.	Quantities charged with Duty for Home Consumption.	Over-Entries.	Exportation in the Raw State (on Drawback).	Exportations of Refined Sugar reduced to their Equivalent in Raw Sugar.*	Aggregate of the 3 preceding Heads.	Net Quantities actually retained for Home Consumption.

Most foreign countries have endeavoured to bolster up the refining business, not merely by excluding foreign refined sugars from their markets, but by granting the most lavish bounties on the exportation of sugar refined at home. In France, this sort of policy, if we may so call it, was carried so far, that out of a gross revenue of about 40,000,000 francs (1,870,000*l.*) paid into the treasury on account of the sugar duties in 1832, about 19,000,000 (760,000*l.*) were returned as drawback on the export of refined sugar. As the French government could not afford to lose the sugar duties, which would very speedily have been swallowed up by the drawback, necessity has compelled them to modify their system, by making the allowance to the ex-

porter more nearly correspond with the duty. The refining of sugar has been carried on within the last few years to a very great extent in Holland. But here also the business has been forced into existence, or received an unnatural extension, by artificial encouragement.

Prussia, and most parts of Germany, to which we formerly exported large quantities of refined sugar, no longer admit it except at a high duty.

*Refining of Foreign Sugar in Bond.*— This has been permitted since 1834 under the provisions of the act 3 & 4 Will. 4. c. 61. (of which an abstract is subjoined), and at present (1848) employs 5 or 6 establishments, and is carried on to a considerable extent. The consumption of raw sugar by the refiners in bond may be estimated at about 18,000 tons, producing about 12,000 tons of refined sugar for exportation. It is principally sent to Trieste, and to Constantinople and other markets in the Levant, where our refiners undersell the Dutch. It may be worth while remarking, that there has never been any sort of restriction on the employment of the sugar of Brazil and Cuba for refining in bond. And, though parliament would not permit this sugar, notwithstanding its comparative cheapness, to be used for home consumption, it permitted our merchants and capitalists to employ themselves in bringing it to Europe, and in manufacturing and preparing it for the use of others! We might not taste slave-grown sugar, but we might get rich by manufacturing it and selling it to the foreigner!

We subjoin an abstract of the act 3 & 4 Will. 4. c. 61.

*Commissioners of Customs may approve Premises for Bonded Sugar Houses.*— Upon application to the commissioners of customs of any person actually carrying on the business of a sugar refiner in the ports of London, Liverpool, Bristol, Hull, Greenock, or Glasgow, or any other port approved of by any 3 Lords of the Treasury, it shall be lawful for the commissioners of customs to approve of such premises as bonded sugar houses for the refining of sugar for exportation only, on it being made appear to the satisfaction of said commissioners that the said premises are fit in every respect for receiving such sugar, and wherein the same may be safely deposited.—§ 1.

*Officers of Customs empowered to deliver Sugars Duty-free, to be there refined for Exportation only.*— On the approval of any premises as bonded sugar houses, it shall be lawful for the officers of the customs at the ports where such premises are situated to deliver, without payment of duty, to the party or parties so applying as aforesaid, on entry with the proper officer of customs, any quantity of foreign sugar, or of sugar the produce of any British possession, for the purpose of being there refined, under the locks of the Crown, for exportation only; and all sugars so delivered shall be lodged and secured in such premises, under such conditions, regulations, and restrictions as the said commissioners shall from time to time direct; provided that it shall be lawful for the commissioners to revoke or alter any order of approval of any such premises.—§ 2.

*Refiner to give Bond that Sugar received be refined and exported, or delivered into Bonded Warehouse.*— Upon the entry of sugar to be refined in any premises approved of under the authority of this act, the refiner on whose premises the same is to be refined shall give bond, to the satisfaction of the officers of the customs, in the penalty of double the amount of duty payable upon a like quantity of sugar of the British plantations, with a condition that the whole of such sugar shall be actually subjected to the process of refinement upon the said premises, and that within 4 months from the date of such bond the whole of the refined sugar and treacle produced by such process shall be either duly exported from the said premises, or delivered into an approved bonded warehouse, under the locks of the Crown, for the purpose of being eventually exported to foreign parts.—§ 3.

*Regulations as to Importation, &c. of Sugar.*— No allowance is to be made for damage or increase of weight by water, on sugar without special permission. For rates on British plantation sugar, see *Pro forma* accounts of sales.

There are, according to Mr. Cook, about 50 wholesale grocers in Great Britain, with an aggregate capital of about 1,000,000*l.*; and he justly adds, that “the importance of sugar, viewed as an article of commerce, is altogether very striking. The value of the 240,000 tons annually consumed may be stated at from 10 to 12 millions sterling; yet the London, Liverpool, and Bristol markets are supported by a system of credit so unique in its operations and extent, that the sugar trade of England exhibits a steadiness and solidity scarcely to be paralleled in any other department.”

**BEET-ROOT SUGAR.**— The manufacture of sugar from beet-root is carried on to a very considerable extent in several parts of the Continent, particularly in France and the N. of Germany. It began in France during the exclusion of colonial products in the reign of Napoleon, and received a severe check at the return of peace, by the admission of West Indian sugars at a reasonable duty. It is probable, indeed, that it would long since have been entirely extinguished, but for the oppressive additions made to the duties on colonial and foreign sugars in 1820 and 1822. After the last-mentioned epoch, however, the production of beet-root sugar began rapidly to increase; and such was its progress, that though, in 1828, its produce did not exceed 4,000,000 kilogs., it amounted, in 1838, to 39,199,408 kilogs.! But this extension of cultivation, instead of being of any advantage, entailed a heavy loss on the public, inasmuch as the beet-root growers sold their sugar, which paid no duty, at the same rate that the colonists sold theirs, which paid a large revenue to the treasury! It was not possible that such a system could be permanent. And the well-founded complaints of the colonists of the injustice of which they were the victims, enforced by the rapid decline of the revenue derived from sugar, which, indeed, was threatened with total extinction, occasioned the imposition, in 1838, of a duty of 16 fr. 50 cents per 100 kilogs. (about 6*s.* 9*d.* a cwt.) on beet-root sugar, which, in 1840, was increased to 27 fr. 50 cents (about 11*s.* a cwt.). But even this last increase left a differential duty (or bounty) of 20 fr. per 100 kilogs, in favour

of beet-root sugar, as compared with colonial raw sugar; so that, while the beet-root cultivators affirmed they would be ruined, the colonists vehemently complained of the preference given to the latter. It was, indeed, known, from the facility with which the beet-root growers had previously contrived to evade the duty, that its increase would not be so injurious to them as was supposed; but the manufacture sustained notwithstanding a severe check, and sundry plantations were abandoned.

But farther and still more considerable changes have since been made in the conditions under which the culture of beet-root is carried on. In 1842, it was proposed, in order to get rid of the difficulties in which it had involved the country, to grub up the plantations, paying the planters 40,000,000 fr. (1,600,000*l.*) as an indemnity for their loss! And, harsh as it may appear, we incline to think that this proposal was, on the whole, the best that could have been made, inasmuch as it would have terminated the matter at once on an equitable principle. It was not, however, adopted: but in the course of next session it was resolved annually to raise the duty on beet-root sugar by 5 fr. per 100 kilogs. till the duty on it should be equalised with the duty on colonial sugar. This system came into operation on the 1st of August 1844; and in August 1848, the nominal equalisation of the duties was effected. It was supposed that this measure, if fully carried out, would go far to annihilate the growth of beet-root sugar in France. This, however, has not been the case, partly because of the important improvements that have been made in the growth of beet-root and its manufacture into sugar, and partly and principally because the duty on it has not been, and, perhaps, could not be, fairly collected. Latterly, indeed, it has been to a great extent evaded; and the beet-root plantations are, in consequence, carried on more extensively than ever.

But, though the beet-root sugar of France and the Continent generally were loaded with the same duty as colonial sugar, and though its culture were notwithstanding extensively prosecuted, that would give no countenance to the opinion of those who contend that free labour is universally as effective in the production of sugar as slave or compulsory labour. The question which the legislature and people of England have to consider, is not between the efficiency of free and slave labour in Europe, but between free and slave labour in the intertropical regions of the New World. Admitting that the free labourers of France and Prussia should raise sugar as cheaply as the slaves of Cuba and Brazil, does that afford any solid ground for concluding that the free blacks of Jamaica and Trinidad will be equally successful in their competition with them? There is plainly no analogy between the cases. And our firm conviction is, as previously stated, that without slave or compulsory labour of some sort or other, not a pound of sugar will be raised either in our colonies or anywhere else in America.

The same cause which has extended the growth of beet-root sugar in France, viz. its exemption from all duty, while it comes into competition with an article loaded with a heavy duty, has introduced its culture into Belgium, Germany, Prussia, and even Russia. Beet-root plantations have increased most in Silesia and Saxony, and supply a very considerable portion of the sugar made use of in those countries.

When the 2d edition of this dictionary was published in 1834, we said, "We understand that a few small parcels of beet-root sugar have recently been produced in this country; and with the present enormous duty on colonial sugar, we are not sure that the manufacture may not succeed. But, as the preservation of the revenue from sugar is of infinitely more importance than the introduction of this spurious business, the foundations of which must entirely rest on the miserable machinery of custom-house regulations, sound policy would seem to dictate that the precedent established in the case of tobacco should be followed in this instance, and that the beet-root sugar manufacture should be abolished. Inasmuch, too, as it is better to check an evil at the outset, than to grapple with it afterwards, we trust that no time may be lost in taking vigorous measures, should there be any appearance of the business extending." This plan was not, however, adopted; but the act 1 Vict. c. 57. imposed a duty of 9*4s.* (now reduced to 13*s.*) a cwt. on all sugar made from beet-root in the U. Kingdom; and the 3 & 4 Vict. c. 57. imposed the like duty, with the additional 5 per cent., on all sugars made in the U. Kingdom.

**MAPLE SUGAR.**—A species of maple (*Acer saccharinum*, Lin.) yields a considerable quantity of sugar. It grows plentifully in the U. States and in Canada; and in some districts furnishes the inhabitants with most of the sugar they make use of. Though inferior both in grain and strength to that which is produced from the cane, maple sugar granulates better than that of the beet-root, or any other vegetable, the cane excepted. It is produced from the sap, which is obtained by perforating the tree in the spring, to the depth of about 2 inches, and setting a vessel for its reception. The quantity afforded varies with the tree and the season. From 2 to 3 gallons may be about the daily average yield of a single tree; but some trees have yielded more than 20 gallons in a day, and others not more than a pint. The process of boiling the juice does not differ materially from what is followed with the cane juice in the West Indies. It is necessary that it should be boiled as soon after it is drawn from the tree as possible. If it be allowed to stand above 24 hours, it is apt to undergo the vinous and acetous fermentation, by which its saccharine quality is destroyed.—(*Bouchette's British America*, vol. i. p. 371.; *Timber Trees and Fruits*, *Library of Entertaining Knowledge*.)

[illegible]

The following very complete set of *Pro forma* sales of sugar have been compiled by a gentleman extensively engaged in the trade, and may be relied on.

Per Forward Sales of 100 Hogsheads Jamaica Sugar, per "A" Cane, Captain Smith, sold by Order and for Account of Messrs. William Henry and Co.									
1848. Nov. 1.	100 hhd. landed	Cwt. grs. lbs.	- 16 2 14 each						\$ s. d.
	100 do. reweighed	- 16 2 4 do.	probable loss 10 lb. each.						
	Cwt. grs. lbs.				Cwt. grs. lbs.				
	1,653 2 8			Average market tare	- 1 2 14				
	165 1 4 tare and draft.			Draft	- 0 0 2				
	1,489 1 4 nett					at 35s. per cwt.			2,894 15
		Charges.							
	Warehousing entry								0 4 6
	Sea Insurance, valuing at 16d. per hhd.	50s. per cent. on 1,400l.			- 35 0 0				
	Folio 5s. 6d. per cent. 2l. 9s. Commission	per cent., 7l.			- 9 9 0				
	Fire insurance on 1,850l. 3 months at 5s.							44 9 0	
	Casks duty on 1,504 cwts. 3 qrs. 18 lbs. nett at 15s., and entries							2 15 6	
	Freight on 1,512 cwts. 2 qrs. nett at 4s. 6d. per cwt.				- 340 6 2			978 17 4	
	Primage at 6d. each, 2d. 1lb. Pirage at 4½d., 1l. 17s. 6d.				- 4 7 6				
	Consolidate dock rates on 1,512 cwts. 2 qrs., at 8d. per cwt.*							314 12 9

	Brokerage at ¼ per cent.							14 2 6	
	Del credere at 1 per cent.							28 4 11	
	Commission at 2½ per cent.							70 12 4	
									1,547 17 5
		Nett proceeds.							
		Cash, January 18th, 1849.							£ 1,275 15 5
		London, 1st of January, 1849.							
		* This charge includes reweighing and 18 weeks' rent, but should the importer keep the sugar on hand beyond that period, he would be liable in a rent of 5d. per ton per week. The buyer has also the sugar delivered to him free of expense.							
		All sugar from our West India Colonies is sold at reweights. The purchaser is allowed 8 months to take delivery in, during which period it lies at the seller's risk unless paid for. The rent, if any, during the 2 months is paid by the seller.							
		The duty is payable on the weight delivered from the warehouse, adding 14 lb. per hhd. and three, and ½ lb. per barrel for samples.							
		The taxes allowed to the buyer and by the customs are as follows; they are calculated on the landing weights.							
		To the Buyer.							
		Cwt. grs. lbs.							
	On all casks under 8 cwt.	- 0 0 14 lb. per cwt.							
	" weighing 8 cwt. and under 9 cwt.	- 1 0 7							
	" 9 "	- 1 0 14							
	" 10 "	- 1 1 0							
	" 11 "	- 1 1 7							
	" 12 "	- 1 1 14							
	" 13 "	- 1 1 21							
	" 14 "	- 1 2 0							
	" 15 "	- 1 2 7							
	" 16 "	- 1 2 14							
	" 17 "	- 1 2 21							
	" 18 "	- 1 3 0							
	" 19 "	- 0 0 7							
	And on each cwt. above 19 an additional								
	A draft of 2 lbs. per hhd. and three, and 1 lb. per barrel is allowed to the buyer, and if he has any suspicion of there being a heavier super tube, he has the right, within 30 days from the date of sale, and before the removal of half the purchase money, to send the dock company to re-weigh a proportion as follows:—Of 5 casks the middle number, of 6 to 20 casks the first and last numbers, of 21 to 30 the first, middle, and last numbers, of 31 casks the upwards the last number of each ten; the casks average 7 lbs. and upwards above the scale, he is entitled to the increased tare; but if less than 7 lbs., he gets no allowance, and has to pay the expense.								

Pro Forma Sales of 1000 Bags Bengal Sugar, per "Vernon," Captain Hawke, sold by Order and for Account of W. S. Warwick, Esq.									
1818. Nov. 1.	1000 bags (weighing	Cwt. grs. lbs. 1 5 10	each gross, sold at landing weight; revenue tare (which is an average one), and 1 lb. per bag draft.						£ s. d.

			Nett proceeds.	Cash, January 15th, 1849.	-	£			1,508 12 6
			London, 1st of January, 1849.	Errors excepted.					

\* This charge includes 12 weeks' rent, but should the importer keep the sugar on hand beyond that period, he would be liable to rent at the rate of 4d per ton per week. The buyer has also the sugar delivered to him free of expense.

The buyer has 2 months to take delivery in, during which period the rent, if any, is paid by the seller, and the sugar lies for that time at the seller's risk unless paid for; but the sugar when sold at the bonded price for exportation is payable on delivery without discount, or at the expiration of 3 months, the purchasers having paid a deposit of 15 per cent. within 3 days of the sale. The goods are then rent free for the 3 months, and are at the seller's risk. Of course there would be no charge for duty or interest on duty. Brokerage and commission would be charged on the selling price, but other charges would remain the same.

*Pro Permed Sales of 1,600 Bags Manila Sugar, received per "Alfred," Roberts, Master, sold for Home Consumption, by Order of Samuel Williams, Esquire.*

1848. Nov. 1.	1,600 bags weighing 54 lbs. each, sold at landing weights, revenue tare (which is an average one), and 1 lb. per bag draft.	Cwt. gr. lb.	Revenue tare 3 lbs. Draft 1 lb.	£ s. d.

	Brokerage, at 11. per cent.			36 15 11
	Commission at $\frac{2}{3}$ per cent.			91 19 9
	Nett proceeds.		Cash, January 13th, 1849.	2,581 1 9
	<i>London, 1st of January, 1849.</i>			Errors excepted.

\* This charge includes 12 weeks' rent; but should the importer keep the sugar on hand beyond that period, he would be liable to rent at the rate of 4d. per ton per week. The buyer also has the sugar delivered to him free of expense.

The purchaser is entitled to have the sugar reweighed; but it must be done within 2 months. On the white there will hardly be any loss; on the yellow and brown it will average 3 or 4 lbs. per chest. The above account is made out at the landing weight.

The sugar is rent free to the buyer to the prompt day, and lies at the seller's risk, unless paid for.

When Havannah sugar is sold in bond for exportation it is sold at a prompt of 1 month, allowing  $\frac{2}{3}$  per cent. discount; and the same rule applies to Brazil and all foreign sugar, not East India, when sold in bond.

**SULPHUR, or BRIMSTONE** (Fr. *Soufre*; Ger. *Schwefel*; It. *Zolfo*, *Solfo*; Sp. *Azufre*; Arab. *Kibreet*), a crystallised, hard, brittle substance, commonly of a greenish yellow colour, without any smell, and of a weak though perceptible taste; its specific gravity is from 1·9 to 2·1. It burns with a pale blue flame, and emits a great quantity of pungent suffocating vapours. In some parts of Italy and Sicily it is dug up in a state of comparative purity. That which is manufactured in this country is obtained by the roasting of pyrites. It is denominated *rough* or *roll sulphur*, from its being cast in cylindrical moulds, and contains 7 per cent. of orpiment. The Italian roll sulphur does not contain more than 3 per cent. of a simple earth; and is, therefore, in higher estimation than the English. When roll sulphur is purified, it receives the name of *sublimed sulphur*, and is in the form of a bright yellow powder. — (*Thomson's Chemistry*, &c.)

Sulphur is of great importance in the arts. It is used extensively in the manufacture of gunpowder, and in the formation of sulphuric acid, or oil of vitrol. It is also used extensively in medicine, and for other purposes. The entries for home consumption amounted, on an average of the 3 years ending with 1842, to 333,731 cwt. a year. The duty on refined or roll brimstone was reduced in 1842 to 2s. a cwt.; but as the duty on rough brimstone is only 6d. a cwt., the imports consist almost wholly of the latter. The price of rough brimstone in the London market, in 1843, varied from 5s. 10s. to 7l. 10s. a ton.

Our supplies of brimstone are almost wholly derived from Sicily. The mines of sulphur in that island have been wrought for several centuries; but it is only since 1820 that any considerable quantity has been prepared for exportation. Subsequently to 1833, the trade with this country increased so much that the export of sulphur to the U. Kingdom rose from 19,122 tons in that year to 26,654 tons in 1838. We have elsewhere (see art. *PALESTINE*) noticed the way in which this important and rapidly growing trade was interfered with by the Neapolitan government. Luckily, however, the monopoly established in favour of the French company was abolished in 1841, and the trade has since reverted to its old channels.

**SYDNEY**, the capital of New South Wales, and of the British settlements in New Holland, or Australia, on a cove on the south side of Port Jackson, about 7 miles from its mouth, lat. 33° 55' S., lon. 150° 10' E. Population, in 1841, 29,973. The water is of sufficient depth to allow the largest ships to come close to the shore. The inlet or harbour, denominated Port Jackson, is one of the finest natural basins in the world. It stretches about 15 miles into the country, and has numerous creeks and bays; the anchorage is everywhere excellent, and ships are protected from every wind. The entrance to this noble bay is between 2 gigantic cliffs not quite 2 miles apart. On the most southerly, in lat. 33° 51' 30" S., lon. 151° 16' 30" E., is a lighthouse, the lantern of which is elevated 67 feet above the ground, and about 345 above the sea. Owing to a want of attention at first, the streets of Sydney were laid out and the houses built, according to the views of individual: without any fixed or regular plan. But latterly this defect has been to a considerable degree remedied in the old streets; and the new ones are systematically laid out. The town covers a great extent of land; almost every house having a considerable piece of ground attached to it. There are different joint stock banks in Sydney; and there is also a savings bank. Schools for the instruction of poor children have been established; and there are, besides two establishments dignified with the pompous title of colleges, numerous seminaries, some of them said to be very well conducted, for the education of the middle and upper classes. There are several periodical publications.

*Population, &c.* — The British settlements in New South Wales were originally intended to serve as penal establishments, to which convicts might be transported, and employed in public and private works; and are still used for this purpose. The first vessel with convicts arrived at Botany Bay in January, 1788: but it having been found to be quite unsuitable as a site for a colony, the establishment was removed to Port Jackson. The progress of the colony has been much more rapid than might have been anticipated, considering the character and habits of the convicts annually landed upon its shores, the difficulties which the great distance from England interpose in the way of an emigration of voluntary settlers, and the inferiority of the soil. Owing to the circumstance of the great majority of the convicts and other emigrants being males, a great disproportion has always existed between the sexes in the colony, which has materially retarded its progress, and been, in other respects, productive of very pernicious results. Government, however, availing itself of the assistance of benevolent individuals at home, and in the colony, has within these few years endeavoured to lessen the disproportion referred to, by sending out considerable numbers of young unmarried females, free of expense. Much, it was obvious, of the influence of this measure, would depend on the discrimination with which the female emigrants were selected; and various precautions were taken, by the organisation of committees, and otherwise, to exclude from amongst them all whose character was in any degree suspicious. It was not, however, to be expected that these precautions should be completely successful; and the most conflicting accounts have been received as to the conduct of the females on their landing, and the influence of their immigration on the colony. There can be no question, indeed, that the latter fell in many respects, short of the anticipations of the promoters of the scheme, and that, whether from want of due care in the selection, or from the force of circumstances, many of the immigrants fell into vicious courses. On the whole, however, there can be no doubt that the measure has been decidedly advantageous; and that it has tended both to increase the population, and to improve the morals of the colony.

It appears from the returns previously given (*ansr.* p. 334.), that the population of New South Wales, including Port Philip, amounted in 1842 to 153,222, of whom about 130,000 were free. The emigrants from the U. Kingdom to the Australian colonies, during the 18 years ending with 1842, amounted in all to 115,456 individuals. Of these no fewer than 38,164 emigrated in 1841.

Emigration to New South Wales holds out several advantages to the industrious emigrant, which, however, are partially at least, if they be not wholly, counterbalanced by sundry disadvantages. There is at all times a pretty brisk demand for additional labour; wages, though not extravagant, are high; provisions, except in years of drought, are moderately cheap; and above all, the climate is mild, healthy, and suitable for European constitutions. The great drawbacks are, — the immense distance from Europe, and the consequent cost of the voyage; the general inferiority and exorbitant price of the land; the frequent recurrence of droughts; and the large amount of convict population. The greater mildness and salubrity of the

climate appears to be the principal, or rather perhaps the only, recommendation in favour of emigrating to Australia rather than to Canada or the United States. Whether, however, this be a sufficient counterpoise to the peculiar disadvantages attending it, is a point which we do not presume to decide, but which deserves the most serious consideration from intending emigrants. It seems to be the unanimous opinion of every one acquainted with the colony, and entitled to be heard upon such a subject, that "in every case, emigrants of every sort will find it for their interest to come out married."—(*Carmichael's Tract*, Sydney edit. p. 87.)

**Climate.**—The climate of such parts of New South Wales as have been explored by the English is particularly mild and salubrious. The high summer heat indicated by the thermometer has not the relaxing and enfeebling effect that a similar high temperature has in India and many other countries. Fearless of damps, and unmolested by noxious insects, the traveller may throw himself under the shade of the first tree that invites him, and sleep in safety. On the other hand, however, the climate has the serious defect of being too dry. It seems to be subject to the periodical recurrence of severe droughts. These prevail sometimes for 2, 3, or even 4 years together. The last "great drought" began in 1826, and did not terminate till 1829. Very little rain fell during the whole of this lengthened period, and for more than 6 months there was not a single shower! In consequence, the whole surface of the ground was so parched and withered, that all minor vegetation ceased; and even culinary vegetables were raised with much difficulty. It well nigh ruined many of the settlers; nor is the colony as yet quite recovered from its effects.—(*Bretton's Excursions in New South Wales*, p. 296; *Sturt's Southern Australia*, vol. i. p. 2.) There was also a pretty severe drought in 1835. This is, in fact, the great drawback upon the colony; and were it more populous, the droughts would expose it to still more serious difficulties.

**Soil, Products, &c.**—The fertility of the soil in most parts of New Holland that have been explored with any care is very far, indeed, from corresponding with the glowing descriptions of some of its casual visitors, whose imaginations seem to have been dazzled by the magnificence of its botanical productions, and the clearness and beauty of the climate. The truth is, that the bad land seems to bear a much greater proportion to the good in New Holland, than in almost any other country with which we are acquainted. Different theories have been framed to account for the fact; but of the fact itself there seems no manner of doubt. Of course, it is not to be supposed but that in a country of such vast extent there must be some fertile districts; but along the east coast, with which we are best acquainted, these seem to be much more confined than might have been expected; and the little experience we have had on the west side, at Swan River and other places, does not seem to lead to any more favourable conclusions. It is true that only a comparatively small part of the interior has as yet been explored; and it is not improbable that in the hitherto undiscovered regions of this vast continent, land suitable for tillage may be found. At present, however, it would appear that the soil and climate, not of New South Wales only, but of New Holland generally, are much better fitted for pastoral than for agricultural pursuits. The colony is mainly indebted for the introduction of the sheep farming system to the example and exertions of John Macarthur, Esq. Its success has exceeded the expectations of the most sanguine. The growth and exports of wool have increased with a rapidity hitherto unexampled in the history of industry. In 1822, only 152,890 lbs. of wool were exported; in 1826, the exports amounted to 411,600 lbs.; in 1830, to 899,750 lbs.; in 1835, to 3,273,353 lbs.; and in 1840, to no fewer than 7,668,960 lbs. Indeed, the best informed individuals belonging to the colony are of opinion that the inhabitants would equally consult their security and their profit, were they to devote their entire attention to their flocks, fisheries, and commerce, depending for supplies of corn, flour, &c. on the imports from America, Madagascar, India, the Philippine Islands, Van Diemen's Land, &c.

**Monies, Weights, and Measures.**—Accounts are kept in sterling money; but Spanish dollars are most abundant. They pass current at 5s. each. The weights and measures are the same as those of England.

**Rates of Agency, Commission, and Warehouse Rent, agreed to at a Meeting of the New South Wales Chamber of Commerce, 1828.**

**Commission.**

1. On all sales or purchases of ships and other vessels, houses, or lands, where no advance on them has been made,  $\frac{1}{2}$  per cent.
- On all other sales, purchases, or shipments, 5 per cent.
- On goods consigned and afterwards withdrawn, or sent to public auction, if no advance on them has been made,  $\frac{1}{4}$  per cent.
- On giving orders for the provision of goods,  $\frac{1}{2}$  per cent.
- On guaranteeing sales, bills, bonds, or other engagements,  $\frac{1}{4}$  per cent.
- On the management of estates for others, 5 per cent.
- On procuring freight or charter, and on freight collected, 5 per cent.
- On insurances effected,  $\frac{1}{4}$  per cent.
- On settling loans, partial or general, 1 per cent.
- On effecting remittances, or purchasing, selling, or negotiating bills of exchange, 1 per cent.
- On the recovery of money,  $\frac{1}{4}$  per cent. If by law or arbitration, 5 per cent.

10. On collecting house rent, 5 per cent.
11. On attending the delivery of contracts goods, 2 per cent.
12. On becoming security for contracts, 5 per cent.
13. On ships' disbursements, 5 per cent.
14. On obtaining money on respondents, 2 per cent.
15. On letters of credit granted,  $\frac{1}{4}$  per cent.
16. On purchasing, selling, receiving from any of the public offices, lodging in ditto, delivering up or exchanging government paper or other public securities, 4 per cent.
17. On all items on the debit or credit side of an account, on which a commission of 5 per cent. has not been previously charged in the same account, including government paper, 1 per cent.
18. On entering and clearing ships at the Custom-house, each, 1 guinea.
19. On the dishonour of foreign bills, exclusive of protest and other law expenses, a re-exchange of 5 per cent.

**Warehouse Rent.**

- On all measurement goods, 1s. per ton of 40 cubic feet, per week.
- On liquids, 1s. 1d. per tun of 252 gallons (old measure) per week.
- On sugar, rice, salt, and similar articles, 6d. per ton per week.
- On grain, 6d. per bushel for first month, and 4d. per bushel per month afterwards.
- On iron, lead, &c. 6d. per ton per week.

**Trade of Sydney.**—Wool is the great article of export, and next to it are whale oil and whalebone, the produce of the southern whale fishery. Timber is also exported in considerable quantities; but the exports of other articles are inconsiderable.

The colony being much more suitable for sheep pasture than for tillage, but little corn is raised. In consequence grain and provisions form very important articles of import from Van Diemen's Land and other places. Considering the character of a large proportion of the population, one need not be surprised at the circumstance of drunkenness being a prevalent vice, and, consequently, that spirits and wines are largely imported. The other great articles of importation are manufactured goods and apparel of all sorts, hardware, earthenware, saddlery, and carriages, &c., from England. (For an account of the articles exported from England to the Australian colonies, see *ante*, p. 334.)

The value of the imports into Sydney has, for a lengthened period, uniformly exceeded the value of the exports, the balance being met by the expenditure on account of government, the disbursements of ships visiting the port, &c. But during the three years ending with 1840, in consequence of the great overtrading at Sydney, the value of the imports greatly exceeded the means of payment, and the real wants of the colony. We subjoin some statements illustrative of the trade of Sydney for some years past.

**Account of the Value of the Imports into New South Wales, nine-tenths being into Sydney, during each of the Three Years ending with 1840.**

	1838.	1839.	1840.
Liquors of all kinds, or spirits, wine, ale, beer, cider, and perry	168,510	200,734	534,494
Grain, provisions, and other edibles, including sugar, tea, &c.	250,173	470,517	594,169
Other articles of consumption, as salt, soap, candles, tobacco, &c.	71,917	106,689	158,972
Foodstuffs	4,505	32,328	6,551
Wearing apparel, clothing, and bedding	481,904	565,955	787,359
Articles for domestic or personal use, as furniture, carriages, plate, &c.	112,259	106,545	174,149
Ditto for intellectual purposes, as books, prints, instruments, printing materials, &c.	64,811	49,248	56,073
Ditto for use in agriculture, manufactures, trade, and commerce	205,048	246,130	450,956
Coin	36,860	24,445	6,607
<b>Totals</b>	<b>1,583,759</b>	<b>1,755,381</b>	<b>2,467,536</b>

Among other articles, the imports of spirits in 1838 amounted to 1,161,583 galls.; in 1839, to 1,744,674 do.; and in 1840 to 2,360,774 do. The total quantity of wheat imported during the above 3 years amounted to 539,773 bush.

During the year 1840, the value of the exports from Sydney amounted to 1,251,544.; of which wool and other colonial articles amounted to 662,172.; the produce of the fisheries to 265,920.; and British and foreign goods re-exported, to 423,452. We subjoin

**A Statement of the Quantities of Wool, Whale Oil, and Whalebone exported from New South Wales during each of the Five Years ending with 1840.**

Years.	Wool.	Sperm Whale Oil.	Black Whale Oil.	Whalebone.
1836	5,611,118 lbs.	1,682 tons	1,149 tons	79 tons
1837	4,775,715	2,259	1,566	78
1838	5,428,993	1,891½	3,035	174
1839	6,597,981	1,879	1,229	153
1840	7,668,960	1,854	4,298	250

In 1840, wool was valued for export at 15d. per lb.; sperm whale oil at 85s. per tun; black whale oil at 18s. per do.; and whalebone at 100s. per ton.

*Existing Depression in Sydney, and its Causes.* — Banking has been for a lengthened period one of the principal businesses carried on in Sydney. Four or five joint stock associations have been established in the town for carrying on banking business, exclusive of several joint stock banking associations in London, which have branches in Sydney. The oldest of the native establishments, the bank of New South Wales, was founded in 1816. The banks have frequently divided at the rate of 20 and 22 per cent. per annum of profit! But, as might have been anticipated, this success, by tempting too many competitors into the field, led to an extraordinary over-issue of paper, and has been a principal cause of the wide-spread embarrassment and distress in which the colony has latterly been involved. It has been estimated, apparently on good grounds, that the bank notes afloat in Sydney, and bills discounted in March, 1837, amounted to about 1,000,000*l.* sterling, and that they amounted, in March, 1841, to 2,600,000*l.*! Such an extraordinary increase in the amount of the currency led to all manner of wild speculations, and to a rapid rise of prices. But this state of over-issue and excitement was as brief as it was signal; and the revulsion by which it was necessarily followed has been of the most severe description. In proof of this we may mention that the revenue from the sale of crown lands, which, at an average of the 4 years ending with 1839, had amounted to about 130,000*l.* a year, and which rose in 1840 to 316,626*l.*, fell, in 1842, to 7,541*l.*, and was, we believe, still less in 1843. In addition to this, there were 600 bankruptcies in the colony, between the 1st of February and the 31st of December, 1842; sheep that had cost 30*s.* have been sold for 3*s.* and 4*s.*; and even the fable of the goose and the golden eggs has been realised, large flocks of sheep having been slaughtered, and their carcases boiled down to raise an additional 2*s.* or 2*s.* 6*d.* by the sale of the tallow!

But though a large proportion of this unparalleled revulsion must be ascribed to the abuse of banking and of credit, much also must be ascribed to the regulations enforced in Australia with respect to the sale of land. The reader will find these regulations in another part of this work (*antè*, p. 337). Had they been intended to occasion the ruin of the colony, they might have been truly said to be well fitted to attain their object; but, otherwise, they are in the last degree contradictory and absurd. The lowest upset price of land has been fixed at 20*s.* an acre; and such is its inferiority, that it is affirmed that it requires in most parts 3 acres to feed a sheep; but supposing 2 acres to suffice, and the ordinary rate of interest to be 10 per cent., it follows that the cost of feeding a sheep would be 4*s.* a year, exclusive of the original cost of the animal, the expense of watching, &c. Now, supposing a sheep to produce annually 2½ lbs. of wool, worth in Sydney, 1*s.* 3*d.* per lb., it follows that its yearly produce will be about 2*s.* 10*d.*, being 1*s.* 2*d.* less than the interest of the money expended on the land! The fact is, that if the upset price of land in New South Wales were fixed at 2*s.* 6*d.* an acre, it would be, if anything, too high. The existing system as to the sale of land in the Australian colonies is nothing, in truth, but a clumsy compound of fraud and quackery; and its abolition is indispensable to their real and continued prosperity.

SYRA, the ancient Scyros, one of the islands of the Greek Archipelago, in the group called the Northern Cyclades, its port, on the east side of the island, being in lat. 37° 26' 30" N., lon. 24° 55' E. It is from 9 to 10 miles in length, and 5 in breadth. Though rugged, it is well cultivated, and produces corn, wine, cotton, olives, figs, &c. The population, in 1830, was set down by Mr. Urquhart at 4,500; but we have been assured that it is at present (1843) little, if at all, short of 25,000.

It is indebted for this extraordinary increase of population to the convenience and excellence of its port and its central situation, which have made it a considerable commercial *entrepôt*. Most part of the trade that formerly centred at Scio is now carried on here; and the island has not only received numerous immigrants from that island, but also from many other parts of Greece. Great Britain and most European powers have consuls in Syra; and it also is the principal seat of the Protestant missionaries to the Levant. The town, which is in part old, has many new streets and houses, and an appearance of great bustle and animation. Pherycides, one of the most celebrated of the ancient Greek philosophers, the disciple of Pittacus, and the master of Pythagoras, was a native of this island. We subjoin an

Account exhibiting the Number of Ships, their Tonnage, and the Value of their Cargoes, that arrived at Syra in 1839, specifying also the different Countries to which they respectively belonged.

A few miles to the east of Syria, lies Delos. This island, regarded in antiquity with peculiar veneration from its being the birthplace of Apollo and Diana, is no less celebrated in the commercial than in the religious history of ancient Greece. Its sacred character, by insuring its immunity from hostile attacks, and its central situation, made it a favourite mart for the products of the states of Greece, Asia Minor, Phœnicia, Egypt, &c. Religion, pleasure, and trade had all their votaries at its festivals; which were famous throughout the ancient world for the splendour of the rites and processions, and the magnitude of the business transacted. It were too much to expect that Syria should ever attain to equal importance, even as an *emporion*. But as she enjoys most of those advantages of position that contributed to render Delos one of the principal emporiums of antiquity, it may be hoped, now that there is a reasonable prospect of good order and freedom being again established in Greece, that she may also acquire some commercial celebrity. It may be worth while mentioning, as strikingly evincing the mutability of human affairs, that, at present, both the great and the little Delos are uninhabited. As Tournefort states, that the inhabitants of Mycone were, in the early part of last century, in the habit of holding the greater Delos, for the purposes of pasturage, paying to the Grand Seigneur a rent of 20 crowns a year for that famous island!—(*Tournefort, Voyage du Levant*, 4to ed. tome i. pp. 290—325. There is a good account of the religious rites celebrated at Delos, though but a very indifferent one of its commerce, in the *Travels of Anacharsis*.)

## T.

**TACAMAHAC**, a resin obtained from the *Fagara octandra*; and likewise, it is supposed, from the *Populus balsamifera*. It is imported from America in large oblong masses wrapt in flag leaves. It is of a light brown colour, very brittle, and easily melted when heated. When pure, it has an aromatic smell, between that of lavender and musk; and dissolves completely in alcohol, water having no action upon it.—(*Thomson's Chemistry*.)

**TAGANROG**, a city of European Russia, on the north coast of the sea of Azof, near the mouth of the river Don, lat. 47° 12' 48" N., lon. 38° 39' E. Population 18,000. It has a naval hospital, a lazaretto, &c.; and there are annual fairs in May, August, and November. Taganrog is a place of considerable commercial importance. It was intended by its illustrious founder, Peter the Great, to replace Azof, the ancient emporium of the Don, the port of which had become all but inaccessible; and its whole consequence is derived from this circumstance, or from its being the entrepôt of the commerce of the countries traversed by that great river. The largest portion by far of the trade is carried on with Constantinople, Smyrna, and other Turkish ports: but a good deal is also carried on with the Italian and other foreign ports; and there is an extensive coasting trade with Odessa and other Russian ports. In 1836 the total value of the exports from Taganrog to foreign ports amounted to 7,422,277 paper roubles, and that of the imports to 7,864,118 do., the value of the exports to Russian ports amounting during the same year, to 3,089,525 roubles, and that of the imports to 1,829,233 do. In 1841 the exports to foreign countries comprised, among other articles, 334,957 chetwerts of wheat, 7,464 poods tallow, 4,012 poods wool, 25,483 poods cordage, &c.: the total value of these exports amounted to 2,375,551 silver roubles, equal to 8,314,428 paper do.

Seeing that Taganrog was built to obviate the difficulties that had to be encountered by vessels entering the Don, through the shallowness of the water, it might have been supposed that care would be taken to place it in a position in which it should be, as far as possible, free from this defect. This important consideration seems, however, to have been to a great degree overlooked. The gulph of the Don is seldom navigable by vessels drawing more than from 10 to 11 ft. water, and even these cannot approach within less than about 700 yards of the town. They are principally loaded by carts, drawn each by a single horse, the expenses being so very considerable that it costs from 120 to 150 copecks to ship a chetwert of wheat. Without, however, altering the position of the town, these defects might be obviated with but little difficulty, by constructing a wooden pier by which vessels in the roads might be sheltered, and from which they might be laden.

*Sea of Azof.* Any one who takes up a map of Russia in Europe, will at once perceive the vast importance of this sea (the *Palus Mæotis* of the ancients) as an outlet for the products of the most fertile provinces of the empire. At its N. E. extremity it receives the Don (an *Tanais*), which with its navigable tributaries the Donetz, and Medveditza, &c., flows through an immense extent of fruitful territory. Peter the Great was fully sensible of the paramount importance of this channel of communication; and he not only, as stated above, founded Taganrog on the estuary of the Don, but joined the latter to the Wolga by means of a canal, uniting in this way the Caspian with the sea of Azof. It is singular, however, that the Russian government, which has, in other respects, so sedulously followed up the plans of the great father of his country, would seem of late years rather to have discouraged the trade of the sea of Azof. As evidence of this, we may mention that no efforts have been made to deepen the channel over the bar at the mouth of the Don, to remove the other obstructions to the easy navigation of the river, or to improve any of the ports on the sea; and farther, all vessels entering the sea are obliged to perform a lengthened quarantine at Kertsch on the W. side of the Straits of Yenikalé. We believe, indeed,

that this measure was chiefly dictated by a wish to make Kertsch a dépôt for the produce of the various ports on the sea of Azof, which it was supposed would be conveyed to it in lighters. But the experience of the last twelve years has shown that this expectation is not destined to be realised; the charges attending the bringing of produce to the Straits of Yenikalé by means of lighters, and its transshipment, being so very heavy that more than  $\frac{1}{4}$ ths of the shipping that arrive at Kertsch, proceed, after performing quarantine there, to load at Taganrog, Marioupol, and other ports on the sea.

It is not surely too much to expect that the Russian government will see the advantage of making an end of these proposterous arrangements, the only effect of which is to obstruct one of the principal channels for the commerce of the empire; and to hinder its subjects from availing themselves of those gigantic means of production which a less illiberal policy would enable them fully to command. It is plain that ships may load and unload at Taganrog with as little danger to the health of the contiguous provinces as at Kertsch; and such being the case, why should they not be permitted to sail direct for the former?

The sea of Azof is usually shut by frost for about 3 months in winter, and it is besides shallow, and in parts incumbered with sand banks. But it may, notwithstanding, be navigated by vessels of considerable burden with but little risk or difficulty. Its greatest depth in the middle is about 7 fathoms: but it shoals gradually to the sides, and at Taganrog there is only from 10 to 11 feet water. Its depth is, however, materially affected by the direction and strength of the winds. The only entrance to this sea is by the Straits of Yenikalé, the *Bosphorus Cimmerius* of the ancients, a narrow and difficult passage, having in some places not more than 13 feet water. Owing to the great quantity of fresh water poured into the sea of Azof, and its limited magnitude, its water is brackish merely. (*Norie's Sailing Directions for the Mediterranean and Black Seas; Annuaire du Commerce Maritime* for 1833, p. 161, &c.)

It is impossible to form any estimate of the future magnitude of the trade of this sea, were it placed under a more liberal policy, and reasonable facilities afforded for its extension. No doubt, however, it would be very great; it being the natural seat of the commerce of some of the most extensive and fertile countries of Eastern Europe. The subjoined returns show that even now it is of the first importance; and with a little encouragement, or with the mere absence of obstruction, it would no doubt rapidly increase. It may, indeed, be fully concluded that sooner or later Taganrog is destined to become one of the first corn-shipping ports in the world, if not the very first.

We subjoin an

Account of Exports from the Ports of the Sea of Azof, in 1845, and in the Six preceding Years.

It is seen from this table that the exports of wheat have not been so great in any subsequent year as in 1839, which is to be ascribed partly to deficient harvests in the interval, and partly to the demand being less. But were the navigation of the Don improved, and facilities given to foreigners entering the sea, the exports might be largely increased, even with the late prices, which have been nearly the same as those of Odessa (which see). The reader will not fail to remark the great increase that has taken place in the exports of linseed, tallow, and wool. The latter, indeed, is becoming one of the principal articles of export from the empire.

The imports into the sea of Azof are but inconsiderable, principally consisting of Greek wines, oils, dry salteries, and such like articles.

In 1845, 613 ships of the burden of 146,691 tons arrived at Kertsch, of which 125 measuring 25,188 tons were British, and of these only 27 loaded at Kertsch, the rest entering the sea after performing quarantine. The few that did land at Kertsch did so because of the lateness of the season. The British ships were mostly all in ballast.

The emperor Alexander, whose reign will always form a memorable and brilliant era in the history of Russia, expired at Taganrog on the 19th of November, 1825. — (For further particulars see Schnitzler, *La Russie*, p. 717.; *Hagemester on the Trade of the Black Sea*, p. 31, &c.; *Russian Official Accounts; and Reports*, by Mr. Yeames, the intelligent British consul at Odessa.

*Monies, Weights, and Measures*, same as those of PETERSBURG; which see.

*Caspian Sea, Magnitude, Ports of, &c.* — The Caspian Sea, or rather Lake (the *Mare Hyrcanum* of the ancients), extends lengthwise from N. to S. about 740 miles, varying in breadth from 112 to 275 miles. In some parts, particularly on the southern shores, it is so very deep that a line of 450 fathoms will not reach the bottom; whereas in the northern parts, and opposite to the mouths of the Wolga, it is comparatively shallow; and owing to the frequent occurrence of shoals, it is not safely navigated by vessels drawing more than 10 or 12 feet water. Its level had been variously estimated by Olivier and Lowitz at from 64 to 53 feet below that of the Black Sea; but the observations of M. Humboldt made the difference of level between them no less than 300 feet! This, however, was supposed to involve some mistake; and its level has since been ascertained by an expedition fitted out by the Russian government to be 116 feet below the level of the Black Sea. The water of the Caspian is not salt, but brackish merely; it has no tides, but gales of wind raise a very heavy sea. It is extremely prolific of fish and seals. The value of the sturgeon caught in the Russian fisheries amounts to a very large sum. — (See STURGEON FISHERY.) They proceed in shoals up the rivers, where they are captured without the least apparent diminution of their numbers. The salmon is remarkably fine; and herrings are in such abundance, that, after a storm, the shores of the Persian provinces of Ghilan and Mazanderan are nearly covered with them. — (*Kinneir's Memoir of the Persian Empire*, p. 6.; *Memoir on the Caspian Sea*, in *Malte Brun's Geography*; *Humboldt, Fragmens de Géologie*, &c.)

Astrakhan is situated on an island of the Wolga, more than 50 miles from the mouth of that river; and owing to the extensive command of internal navigation it possesses, it is a place of very considerable commercial importance. Baku, acquired by the Russians in 1801, is, however, the best port on the western side of the Caspian. It is situated on the southern shore of a peninsula that projects far into the sea, in lat. 40° 22' N., lon. 51° 10' E. The harbour is spacious and convenient; and its central and advanced position gives it superior advantages as a trading station. Prodigious quantities of naphtha are procured in the vicinity of Baku. It is drawn from wells, some of which yield from 1,000 to 1,500 lbs. a day. It is used as a substitute for lamp oil; and when ignited, emits a clear light, with much smoke and a disagreeable smell. Large quantities are exported in skins to the Persian and Tartar ports on the south and east shores of the sea.

*Vessels.* — The largest class of vessels by which the Caspian Sea is navigated are called by the Russians *schuyts*, and belong wholly to Astrakhan and Baku; their burden varies from 90 to 150, and, in some instances, 200 tons. They are not built on any scientific principle, and are constructed of the worst materials, that is, of the timber of the barks that bring grain down the Wolga to Astrakhan. There are supposed to be, in all, about 100 sail of these vessels. There is a second class of vessels employed in the trade of the Caspian, called *razzhives*. They carry from 70 to 140 tons, and sail better than the *schuyts*. Their number is estimated at about 50. Exclusive of the above, there are great numbers of small craft employed in the coasting trade, in the rivers, in the fisheries, and in acting as lighters to the *schuyts*. Steam boats have been introduced upon the Wolga; and one has been launched on the Caspian itself. The masters and crews of the vessels employed on this sea are, for the most part, as ignorant as can well be imagined. They are generally quite incapable of making an observation, or of keeping a reckoning; so that accidents frequently occur, that might be avoided by the most ordinary acquaintance with the principles of navigation. — (These statements are made, partly upon official, and partly upon private authority: the latter may, however, be safely relied on.)

The trade of this great sea is entirely in the hands of the Russians; by whom it is carried on from the ports of Astrakhan and Baku, with the Persian ports of Astrabad, Balfroosh, &c. on the south; and with the Tartar ports of Mangishlak, Balkan, &c. on the east. It is very insignificant, compared with what it ought to be; the value of the Russian produce exported by it in 1841 being only 435,219 silver roubles; and that of the imports 1,053,606 do. On the whole, however, a gradual improvement is taking place; and whatever objections may, on other grounds, be made to the encroachments of Russia in this quarter, there can be no manner of doubt, that, by introducing comparative security and good order into the countries under her authority, she has materially improved their condition, and accelerated their progress to a more advanced state.

**TALC**, a species of fossil nearly allied to mica. It is soft, smooth, greasy to the feel, and may be split into fine plates or leaves, which are flexible, but not elastic. It has a greenish, whitish, or silver-like lustre. The leaves are transparent, and are used in many parts of India and China, as they were used in ancient Rome—(*Plin. Hist. Nat. lib. xxxvi. c. 22.*)—in windows instead of glass. In Bengal, a seer of talc costs about 2 rupees, and will sometimes yield a dozen panes 12 inches by 9, or 10 by 10, according to the form of the mass, transparent enough to allow ordinary subjects to be seen at 30 or 30 yards' distance. It should be chosen of a beautiful pearl colour; but it has, in general, either a yellowish or faint blue tinge. Its pure translucent flakes are frequently used by the Indians for ornamenting the baubles employed in their ceremonies. Talc is employed in the composition of *rouge végétal*. The Romans prepared with it a beautiful blue, by combining it with the colouring fluid of particular kinds of testaceous animals. Talc is met with in Aberdeenshire, Perthshire, and Banffshire in Scotland; and in various parts of the Continent, where rocks of serpentine and porphyry occur. The talc brought from the Tyrolean mountains is called in commerce Venetian talc. Several varieties are found in India and Ceylon.—(*Thomson's Chemistry; Rees's Cyclopædia; Milburn's Orient. Com.; Ainslie's Mat. Indica.*)

**TALLOW** (Fr. *Suif*; Ger. *Talg*; It. *Sevo, Sego*; Rus. *Salo, toplenoe*; Sp. *Sebo*), animal fat melted and separated from the fibrous matter mixed with it. Its quality depends partly on the animal from which it has been prepared; but more, perhaps, on the care taken in its purification. It is firm, brittle, and has a peculiar heavy odour. When pure, it is white, tasteless, and nearly insipid; but the tallow of commerce has usually a yellowish tinge; and is divided, according to the degree of its purity and consistence, into candle and soap tallow.

Tallow is an article of great importance. It is manufactured into candles and soap; and is extensively used in the dressing of leather, and in various processes of the arts. Besides our extensive supplies of native tallow, we annually import a very large quantity, principally from Russia. The exports of tallow from Petersburg amount, at an average, to between 3,000,000 and 4,000,000 poods, of which the largest portion by far is brought to England; the remainder being exported to Prussia, France, the Hanse Towns, Turkey, &c.

We borrow from the work of Mr. Borrisow, on the commerce of Petersburg, the following details with respect to the tallow trade of that city:—

Tallow is divided into different sorts; namely, white and yellow *candle tallow*, and common and Siberian *soap tallow*; although it is allowed that the same sort often differs in quality.

Tallow is brought to Petersburg from the interior; and the best soap tallow from Siberia, by various rivers, to the lake Ladoga; and thence, by the canal of Schlüsselburg, to the Neva.

An *ambare*, or warehouse, is appropriated to the reception of tallow, where, on its arrival, it is selected and assorted (*bracketed*). The casks are then marked with three circular stamps, which state the quality of the tallow, the period of selecting, and the name of the selector (*bracker*).

The casks in which white tallow is brought have a singular appearance: their form being conical, and their diameter at one end about 2½ feet, and at the other only 1½ foot: the casks of yellow tallow are of the common shape. There are also others, denominated *½ casks*.

To calculate the tare, the tallow is removed from a certain number of casks, which are weighed, and an average tare is thence deducted for the whole lot. A cask weighs 8½, 9, 10, or 11 per cent., but the average is generally about 10 per cent., of the entire weight of tallow and cask.

Yellow candle tallow, when good, should be clean, dry, hard when broken, and of a fine yellow colour throughout. The white candle tallow, when good, is white, brittle, hard, dry, and clean. The best white tallow is brought from Woronesch. As for soap tallow, the more greasy and yellow it is, the better the quality. That from Siberia is the purest, and commonly fetches a higher price than the other sorts.

Formerly the oil and tallow warehouses were the same; and this occasioned great difficulties in shipping, because all vessels or lighters taking in tallow or oil were obliged to haul down to the *ambare*, and wait in rotation for their cargoes. The consequence was, that when much business was doing, a vessel was often detained for several weeks at the *ambare* before she could get her cargo on board. Now the tallow and oil warehouses are separated, and every article has its own place. When a shipment of tallow is made, the agent is furnished by the selector (*bracker*) with a sample from each cask.

Captains, in order to obtain more freight, usually load some casks of tallow upon deck; but it is more for the interest of the owner to avoid this, if possible, because the tallow loses, through the heat of the sun, considerably both in weight and quality.

One hundred and twenty poods of tallow, gross weight, make a Petersburg last, and 63 poods an English ton.

We subjoin an official account of the export of tallow from Russia in 1841, specifying the quantities shipped from the different ports, the countries for which the shipments were made, and the quantities shipped for each.

The price of tallow fluctuated very much during the war. This was occasioned, principally, by the obstacles that were at different periods thrown in the way of supplies from Russia. The price of tallow is also affected by the state of the seasons. Some very extensive speculations have at various periods been attempted in tallow; but seldom, it is believed, with much advantage to the parties.

Account of the Price of Tallow in the London Market, in July 1843.

**TALLY TRADE**, the name given to a system of dealing carried on in London and other large towns, by which shopkeepers furnish certain articles on credit to their customers, the latter agreeing to pay the stipulated price by certain weekly or monthly instalments.

In the metropolis there are about 60 or 70 tally-shops of note; and from 500 to 600 on a smaller scale. They are also spread over the country to a considerable extent, particularly in the manufacturing districts. The customers of the tally-shops are mostly women; consisting, principally, of the wives of labourers, mechanics, porters, &c., servant girls, and females of loose character. Few only of the more respectable classes have been infatuated enough to resort to them. Drapery goods, wearing apparel, coals, household furniture, hardware, &c. are furnished; and even funerals are performed; but few or no articles of food, except tea, are sold upon the tally plan.

We believe that this is the very worst mode in which credit is afforded. The facility which it gives of obtaining an article when wanted, and the notion so apt to be entertained that the weekly or monthly instalments may be paid without difficulty, make those who resort to the tally-shops overlook the exorbitant price, and usual bad quality, of the articles they obtain from them; and generates habits of improvidence that seldom fail to involve the parties in irretrievable ruin. It is not going too far to say that nine tenths of the articles supplied by tally-shops might be dispensed with. As already observed, women are the principal customers; and it is not easy to exaggerate the mischief that has been entailed on the families of many industrious labourers by their wives having got entangled with tally-shops. They buy goods without the knowledge of their husbands; and these are not unfrequently pawned, and the proceeds spent in gin. So destructive, indeed, is the operation of the system, that the establishment of a tally-shop in any district is almost certain to occasion an increase in the paupers belonging to it. Even the unmarried females who do not pay are demoralised and ruined by the system; because, if a woman who buys 3 gowns pays for the 2 first, and runs away from the payment of the last, she gains nothing *in point of saving*, while she becomes indifferent to an act of dishonesty. As tally debts can only be collected whilst a supply of goods is kept up, as soon as that supply is stopped, the debtor either flies to another district, or awaits a summons. Where the wife has contracted the debt, she usually appears before the commissioners, who in general order the debt to be paid by weekly or monthly instalments. But it often occurs, from the wife not being able to keep up such payments, that execution issues, and the poor husband is frequently arrested and lodged in prison for a debt, of the existence of which he was entirely ignorant. In this way, numbers of the working classes are completely ruined; they lose their employment, and themselves and families are reduced to beggary. The intelligent keeper of Whitecross-street prison (Mr. Barrett) stated, that from 150 to 200 persons are annually imprisoned there for tally-shop debts, in sums of from 10s. to 5*l.*, and that in one year 30 prisoners were at the suit of one tally-shop alone! Such imprisonments, however, are now much decreased, in consequence, as is believed, of the Court of Requests discouraging the tally system, by ordering claims of *this kind* to be paid by *extremely small* instalments, and these at *very distant* intervals; and also in consequence of no composition being allowed by the charities for the relief of poor prisoners with reference to such debts.

It is estimated that in London alone about 850,000*l.*, or nearly 1,000,000*l.* sterling, is annually returned in this trade. From his large profits (generally from 25 to 40

per cent.), it is obvious that in a few transactions the tally-shop keeper becomes independent of the existing debt; and with capital and good management, it is said that some have realised considerable sums of money in this business.

According to the custom of the trade, Mondays, Tuesdays, Wednesdays, and Thursdays are the days set apart for collecting money from the customers. The tally-man sends round his collector through the different "walks," and the amount of a collection which keeps the collector engaged from morning till night, even in a good tally concern, seldom exceeds 4l. a day. The payments are invariably made in *skillings* and *sixpences*—but the people seldom or never pay at the tally-shops; they rarely call there unless something else is wanted. The tally-shop keeper trusts one party on the recommendation of another; but guarantees are never required—certainly no *written* guarantees; and a verbal guarantee is, according to Lord Tenterden's act, not binding. It is part of the collector's business, besides getting money, to beat up for fresh customers in his walk.

The greater number of the small tally concerns are kept by Scotchmen; it is a curious fact, that when a "Tally-walk" is to be sold, which is often the case, a Scotchman's walk will bring 15 per cent. more than an Englishman's! It is believed to contain a better description of customers.

From the causes above mentioned, assisted, perhaps, by the salutary influence of Savings Banks, this obnoxious trade is understood to be rather on the wane. It will never, however, be completely rooted out, except by adopting the plan we have previously suggested—(see *CASSETT*)—for placing all small debts beyond the pale of the law; and the fact, that the adoption of this plan would have so beneficial a result, is an additional and powerful recommendation in its favour. In cases where failures take place, the creditors of a tally-shop keeper are in general *terrified* into the acceptance of a small composition. The very sight of the tally Ledgers, from 10 to 90 in number, containing debts from 5s. to 5l., dotted over the pages like a small pattern on a piece of printed cotton, and spread over every district in and round London, determines the creditors to accept of any offer, however small, rather than encounter the collection of such disreputable assets. In an affair of this kind, concluded a few years since, where the business was under the management of a respectable accountant in the city, the whole debts due to the concern, good, bad, and doubtful, amounted to 8,700*l.*, while the number of debtors was 7,600! giving an average of 22s. 10*d.* each.

*N.B.*—This article has been compiled wholly from *private*, but *authentic*, information.

**TAMARINDS** (Ger. *Tamarinden*; Fr. *Tamarins*; It. and Sp. *Tamarindo*; Arab. *Umblic*; Hind. *Tintiri*), the fruit of the *Tamarindus Indica*, a tree which grows in the East and West Indies, in Arabia, and Egypt. In the West Indies the pods or fruit, being gathered when ripe, and freed from the shelly fragments, are placed in layers in a cask, and boiling syrup poured over them, till the cask be filled; the syrup pervades every part quite down to the bottom; and when cool, the cask is headed for sale. The East India tamarinds are darker coloured and drier, and are said to be preserved without sugar. When good, tamarinds are free from any degree of mustiness; the seeds are hard, flat, and clean; the strings tough and entire; and a clean knife thrust into them does not receive any coating of copper. They should be preserved in closely covered jars.—(*Thomson's Dispensatory*.) The duty on tamarinds produced, in 1840, 572*l.* It was fixed, in 1842, at 3*d.* per lb. on those from a foreign country, and at 1*d.* on those from a British possession.

**TAPIOCA**, a species of starch or white coarse powder derived from the roots of the bitter cassava (*Jatropha manihot*), an American plant, raised all over South America, but principally in Brazil, where it is called *mandioc* or *manioc*. The roots of the plant, being peeled, are subjected to pressure in a kind of bag made of rushes; the juice which is forced out by this process being a deadly poison, and employed as such by the Indians to poison their arrows! But the residuum, or farinaceous matter remaining after the expulsion of the juice, is perfectly wholesome, and makes excellent bread. Tapioca, as stated above, is prepared from this residuum; and being nutritious, and easy of digestion, is extensively used in the making of puddings. When dressed, it is not easily distinguished from sago. Tapioca is almost wholly brought from Brazil, the imports thence having amounted, at an average of the 10 years ending with 1842, to 1,541 cwts. a year. (See *anté*, p. 1065.)

**TAR** (Fr. *Goudron*; Ger. *Theer*; It. *Catrame*; Pol. *Smola gesta*; Rus. *Degot*, *Smola shikhaja*; Sw. *Tjara*), a thick, black, unctuous substance, chiefly obtained from the pine, and other turpentine trees, by burning them in a close smothering heat.

The tar of the north of Europe is very superior to that of the United States, and is an article of great commercial importance. The process followed in making it has been described as follows by Dr. Clarke:—"The inlets of the gulph (Bothnia) everywhere appeared of the grandest character; surrounded by noble forests, whose tall trees,

flourishing luxuriantly, covered the soil quite down to the water's edge. From the most southern parts of Westro-Bothnia, to the northern extremity of the gulph, the inhabitants are occupied in the manufacture of tar; proofs of which are visible in the whole extent of the coast. The process by which the tar is obtained is very simple: and as we often witnessed it, we shall now describe it, from a tar-work we halted to inspect upon the spot. The situation most favourable to the process is in a forest near to a marsh or bog; because the roots of the fir, from which tar is principally extracted, are always most productive in such places. A conical cavity is then made in the ground (generally in the side of a bank or sloping hill); and the roots of the fir, together with logs and billets of the same, being neatly trussed in a stack of the same conical shape, are let into this cavity. The whole is then covered with turf, to prevent the volatile parts from being dissipated, which by means of a heavy wooden mallet, and a wooden stamper, worked separately by two men, is beaten down and rendered as firm as possible above the wood. The stack of billets is then kindled, and a slow combustion of the fir takes place, without flame, as in making charcoal. During this combustion the tar exudes; and a cast iron pan being at the bottom of the funnel, with a spout which projects through the side of the bank, barrels are placed beneath this spout to collect the fluid as it comes away. As fast as the barrels are filled, they are bunged and ready for immediate exportation. From this description it will be evident that the mode of obtaining tar is by a kind of distillation *per descensum*; the turpentine, melted by fire, mixing with the sap and juices of the fir, while the wood itself, becoming charred, is converted into charcoal. The most curious part of the story is, that this simple method of extracting tar is precisely that which is described by Theophrastus and Dioscorides; and there is not the smallest difference between a tar-work in the forests of Westro-Bothnia and those of ancient Greece. The Greeks made stacks of pine; and having covered them with turf, they were suffered to burn in the same smothered manner; while the tar, melting, fell to the bottom of the stack, and ran out by a small channel cut for the purpose."

Of 14,146 lasts of tar imported in 1840, 12,233 were brought from Russia, 608 from Sweden, and 1,305 from the U. States. The last contains 12 barrels, and each barrel 3½ gallons.

Tar produced or manufactured in Europe is not to be imported for home consumption, except in British ships, or in ships of the country of which it is the produce, or from which it is imported, under penalty of forfeiting the same, and 100*l.* by the master of the ship.—(3 & 4 Will. 4. c. 54.)

TARE, an abatement or deduction made from the weight of a parcel of goods, on account of the weight of the chest, cask, bag, &c. in which they are contained. Tare is distinguished into *real tare*, *customary tare*, and *average tare*. The first is the actual weight of the package; the second, its supposed weight according to the practice among merchants; and the third is the medium tare, deduced from weighing a few packages, and taking it as the standard for the whole. In Amsterdam, and some other commercial cities, tares are generally fixed by custom: but in this country, the prevailing practice, as to all goods that can be unpacked without injury, both at the Custom-house and among merchants, is to ascertain the real tare. Sometimes, however, the buyer and seller make a particular agreement about it. We have, for the most part, specified the different tares allowed upon particular commodities, in the descriptions given of them in this work.—(For the tares at Amsterdam, Bordeaux, &c., see these articles; see also ALLOWANCES.)

TARE, VETCH, or FITCH, a plant (*Vicia sativa* Lin.) that has been cultivated in this country from time immemorial; principally for its stem and leaves, which are used in the feeding of sheep, horses, and cattle; but partly, also, for its seed. Horses thrive better upon tares than upon clover and rye grass; and cows that are fed upon them give most milk. The seed is principally used in the feeding of pigeons and other poultry. The entries for consumption amount to about 230,000 bushels a year.

TARIFF, a table, alphabetically arranged, specifying the various duties, drawbacks, bounties, &c. charged and allowed on the importation and exportation of articles of foreign and domestic produce.

The first two columns of the subjoined Table contain an account of the duties existing on the 1st January, 1849, on the various articles charged with duties on being imported for consumption into the U. Kingdom, distinguishing between the duties when the articles come from foreign countries and from colonial possessions.

Those who compare the following tariff, with the tariffs in the copies of this work issued previously to 1842, will be forcibly struck with the vast difference between them. Notwithstanding the improvements effected by Mr. Huskisson, the tariff continued down to the epoch now referred to, on a most objectionable footing. Hundreds of articles were loaded with duties, which, while they brought little revenue into the public treasury, opposed formidable obstacles to the extension of commerce; a host of other articles, including live cattle and fresh provisions, were wholly prohibited; high duties were laid on various articles of consumption, and on others that were necessary to the prosecution of some of our principal manufactures; and some most important

articles, including corn, sugar, and timber, were burdened with duties, imposed not so much for the sake of revenue as of protection. But the change in these respects since 1842 has been greater than any one, however sanguine, could have anticipated. It was then that Sir Robert Peel began that course of commercial reform that will, for ever, distinguish his administration; and such were the energy, skill, and success with which he prosecuted his plans, that in the brief space of 4 years, he obviated, with but little sacrifice of revenue, almost all the defects alluded to above, and effected a great and most salutary change in our commercial policy.

Sir Robert Peel's commercial reforms were principally embodied in the acts 5 & 6 Vict. c. 47., 8 Vict. c. 12., 9 & 10 Vict. c. 22., and 9 & 10 Vict. c. 23. The *first* of these acts permitted cattle, sheep, hogs, beef, salmon, and other articles that had previously been prohibited, to be imported under reasonable duties: the *second*, or the 8 Vict. c. 12., repealed the duties on no fewer than about 420 different articles; and though many of these were of comparatively trifling importance, the list comprised others of a very different class, such, for example, as ashes, barilla, bark, flax and tow, cotton wool, hemp, hides, indigo, madder, palm, olive, and train oil, sago, saltpetre, raw silk, all sorts of skins and furs, straw for plaiting, all sorts of fancy woods, with a host of others: the *third* of the above mentioned statutes, or the 9 & 10 Vict. c. 22., is the famous act for the modification and repeal of the corn laws: and the *fourth* and last, the 9 & 10 Vict. c. 23., is the tariff act of 1846, which entirely repealed the duties on cattle, sheep, hogs, beef, bacon, and other leading products; at the same time that it reduced the duties on silks, butter, cheese, and nearly 100 other articles!

Sir Robert Peel also reduced the duty on muscovado sugar from a British possession, from 25s. 2d. to 14s. a cwt., at the same time that he made a very great reduction in the duty on certain descriptions of foreign sugar. And Lord John Russell has since successfully followed up the policy of his predecessor in this respect, by making an end of the distinction between free and slave grown sugars; and providing for the gradual equalisation of the duties on sugars, without regard to their origin.

Independent of the powerful influence which the repeal and reduction of the duties on so many important articles must have on the well-being and industry of the people, it must always be borne in mind that owing to the reciprocity which is of the essence of all commercial transactions, it is impossible to increase the importation of foreign articles, without at the same time proportionally increasing the exportation of the native products with which the former must be paid. It is, therefore, no easy matter to estimate the influence of such extensive changes on the trade and future prosperity of the U. Kingdom. There can, however, be no doubt that it will be very great; and besides contributing to improve our manufactures, it can hardly fail to deepen and enlarge the existing channels of commercial intercourse, and gradually to open others with which we may now, perhaps, be wholly unacquainted.

Sir Robert Peel left but little for others to do in the way of commercial reform. The duty on tea is now the only very objectionable one in our tariff. It, however, is as bad as can well be imagined; and its reduction to 1s. or 10d. per lb. on black teas, would be a vast boon to the bulk of the people of the U. Kingdom, and would greatly extend our commerce with China, at the same time that the fair presumption is, it would not, in a year or two, occasion any very considerable loss of revenue. Tobacco is, also, decidedly over taxed; but, except in the check it would give to smuggling and adulteration, the reduction of the duty on it, is, in other respects, of minor importance.

We have excluded from the following table most articles which are at this moment (1st January, 1849) duty free; and we have annexed to the table of existing duties two additional columns; the first exhibiting the amount of the customs duties in 1819, as fixed by the act 59 Geo. 3. c. 52.; and the second, their amount in 1787, as fixed by Mr. Pitt's Consolidation Act, the 27 Geo. 3. c. 13. The reader has, therefore, before him, and may compare the present customs duties with the duties on the same articles as they existed after the termination of the last war, and of the American war.\* No table of this sort is to be met with in any other publication, unless it be purloined from this. It was furnished for a former edition of this work, by Mr. J. D. Hume, late of the Board of Trade.

The duties in the following table were principally imposed by the 8 & 9 Vict. c. 90., and by the 9 & 10 Vict. c. 23. The former authorised the levy of an additional duty of 5 per cent. on all the articles mentioned in it with the exception of corn and a few others; but this rule having been interfered with to a great extent by the 9 & 10 Vict. c. 23., we have, to prevent mistakes, marked the different articles to the duties on which 5 per cent. is to be added with asterisks, thus \*. — The following clauses of the 8 & 9 Vict. c. 90. are still in force:—

\* It must, however, be carefully borne in mind that this table does not fully represent the customs duties as they existed in 1787 and 1819. It exhibits those duties only which were charged at the epochs in question on the articles now (1 Jan. 1849) subject to customs duties; whereas the tariff embraced in 1787 and 1819 more than 400 articles not included in the present tariff.

*Goods having paid Duties imposed by former Acts to be entitled to Drawbacks.*—The amount of drawbacks granted, allowed, and made payable upon goods, wares, and merchandise exported from or used or consumed in Great Britain or Ireland, under or by virtue of any act or acts in force in Great Britain or Ireland, on or immediately before the passing of this act, shall remain and continue payable with respect to such goods, wares, and merchandise as, having paid the duties imposed upon the importation thereof by any such act or acts, shall, from and after the passing of this act, be exported from or be so used or consumed in Great Britain or Ireland respectively.—§ 6.

*Goods in Warehouse to be liable to the Duties imposed by this Act.*—All goods whatsoever which shall have been warehoused without payment of duty upon the first importation thereof, and which shall be in the warehouse at the commencement of the duties imposed by this act, shall be deemed and taken to be liable to such duties.—§ 6.

Clause 7. enacts that duties and drawbacks shall be under the management of the commissioners of customs.

*Additional Duties to be levied on Foreign Merchandise, &c.*—It shall be lawful for H. M., by and with the advice of her privy council, by order in council, from time to time to order and direct that there shall be levied and collected any additional duty, not exceeding one fifth of the amount of any existing duty, upon all or any goods, wares, or merchandise, the growth, produce, or manufacture of any country which shall levy higher or other duties upon any article the growth, produce, or manufacture of any of H. M.'s dominions than upon the like article the growth, produce, or manufacture of any other foreign country, and in like manner to impose such additional duties upon all or any goods when imported in the ships of any country which shall levy higher or other duties upon any goods when imported in British ships than when imported in the national ships of such country, or which shall levy higher or other tonnage or port or other duties upon British ships than upon such national ships, or which shall not place the commerce or navigation of this kingdom upon the footing of the most favoured nation in the ports of such country, and either to prohibit the importation of any manufactured article the produce of such country in the event of the export of the raw material of which such article is wholly or in part made being prohibited from such country to the British dominions, or to impose an additional duty, not exceeding one fifth as aforesaid, upon such manufactured article, and also to impose such additional duty in the event of such raw material being subject to any duty upon being exported from the said country to any of H. M.'s dominions; and all duties imposed by any such order shall be deemed to be duties imposed by this act.—§ 8.

59 G. 3. c. 54. *to apply to all Foreign Powers, and to Duties on Goods as well as on Ships.*—Whereas by the act 59 Geo. 3. c. 54, intituled "An Act to carry into effect a Convention of Commerce concluded between his Majesty and the U. S. of America, and a Treaty with the Prince Regent of Portugal," divers provisions were made respecting the duties payable and the bounties and allowances to be granted upon the importation and exportation of goods, wares, and merchandise into or from the U. K. in vessels of the U. S. and in Portuguese vessels, and respecting the repayment to certain corporations, bodies politic and corporate, and sundry other persons, of the amount of the sums of money of which they would be deprived by means of the said act, and it was thereby enacted that the said act should continue in force so long as the convention therein recited between his said late majesty and the U. S. of America, and the treaty therein recited between his said late majesty and his royal highness the prince regent of Portugal, and so long as any treaty to be made with any foreign power with the similar provisions therein-before recited, should respectively continue in force: And whereas, subsequently to the enactment of the said recited act, H. M. and her royal predecessors have made and concluded with divers foreign powers treaties containing provisions similar to those recited in the said recited act, and doubts have arisen whether, according to the true construction thereof, the said act doth apply and extend to the trade and shipping of such other foreign powers, and whether the same applies to differential duties or charges on goods imported or exported in foreign ships as well as to differential duties and charges on foreign ships, and it is expedient that such doubts be removed; be it therefore enacted and declared, that from and after the ratification of any treaty heretofore made by H. M. or any of her royal predecessors subsequently to the enactment of the said act, or of any treaty which may hereafter be made by H. M., her heirs and successors, with any such foreign power, in which treaty has been or shall be contained provisions similar to those recited in the said recited act, all and every the provisions, clauses, matters and things in the said recited act contained shall apply and extend to the trade and shipping of such foreign powers respectively as fully and effectually to all intents and purposes as to the trade and shipping of the said U. S. and of the said kingdom of Portugal, and also shall apply and extend to differential duties or charges on goods imported or exported in the ships of such foreign powers as well as to differential duties on the ships of such foreign powers.—§ 9.

*Recited Act not to be construed as granting Powers beyond subsisting Treaties.*—The said recited act doth not extend, and shall not be construed to extend to grant to or to confer upon the trade or shipping of the said U. S., or of the said kingdom of Portugal, or of any other foreign power, or to the subjects of such states or kingdom, or of any such foreign power as aforesaid, any other or greater advantage than such as shall have been stipulated for by and granted to the said U. S., the said kingdom of Portugal, or any such other foreign power, by the respective treaties subsisting and in force between them respectively and H. M., her heirs and successors, or her royal predecessors, but that the said act shall be so construed and applied as to give full and complete effect to such respective treaties so long as the same shall respectively remain in force, and is to provide such, and only such, indemnity as therein mentioned to such bodies politic and corporate, and other persons, as are therein mentioned, for such losses as they shall respectively sustain by the execution of such respective treaties.—§ 10.

*Her Majesty, with Advice of Privy Council, to declare the Powers with whom Treaties are subsisting.*—And for the prevention of uncertainty herein, be it enacted, that it shall and may be lawful for H. M., her heirs and successors, by any order or orders to be by her or them made, with the advice of her or their privy council, and published in the London Gazette, from time to time to declare what are the foreign powers with which any such treaty or treaties as aforesaid is or are subsisting, and this present act and the said recited act shall apply and shall be deemed from the time of the ratification of any such treaties to have been applicable to the trade and shipping of such foreign countries as shall be so mentioned in any such order or orders in council as aforesaid, so long as any such order or orders shall continue unrevoked, and no longer.—§ 11.

*Lords of Treasury may reduce Duties on Ships or Goods of Countries under Reciprocity.*—In any case where any treaty is in force between H. M., and any foreign state containing any stipulations that no higher duties or charges shall be levied on the vessels or produce of such foreign state, or upon goods exported or imported in the vessels of such foreign state than on British vessels or produce, or upon the like goods exported or imported in British vessels, or any direct or indirect stipulations to the like effect or for the like objects, or any of them, it shall be lawful for the Lords of the Treasury, or any two or more of them, from time to time to give directions that all duties or charges imposed by any act passed after the 10th day of July, 1842, upon the vessels of such foreign state entering or leaving any port of H. M.'s dominions, or upon articles of the growth, produce, or manufacture of the dominions of such foreign state, or upon any articles imported into the U. K. in vessels of such foreign state, or upon any articles (or any particular classes of articles) exported from the U. K. (or exported from the U. K. to any particular place or places), shall be reduced to the same rates as are in the like cases imposed upon British vessels, or upon the like articles of British growth, produce, or manufacture, or upon the like articles imported into or exported from the U. K. in British vessels, or to give so much of the said directions as the case may require.—§ 12.

*Manufactures of Gibraltar, &c.*—All manufactures of Gibraltar, Malta, and Heligoland, made of materials of foreign produce liable to duty upon importation into the U. K. upon which no such duty has been paid, or upon which drawback of such duty has been allowed in the U. K., shall for the purposes of duty, be deemed and taken to be the produce of and imported from a foreign country.—§ 13.

*Certain Produce of the State of Maine to be treated as the Produce of New Brunswick.*—Whereas a treaty has been concluded between H. M. and the U. S. of America, dated the 9th of August, 1842, whereby it is stipulated that all the produce of the forest in logs, lumber, timber, timber boards, staves, or shingles, or of agriculture, not being manufactured, grown on any of those parts of the states of Maine watered by the river St. John or by its tributaries, of which fact reasonable evidence shall, if required, be produced, shall have free access into and through the said river and its tributaries having their source within the state of Maine to and from the seaport at the mouth of the river St. John, and to and round the falls of the said river, either by boats, rafts, or other conveyance, and that when within the province of New Brunswick the said produce shall be dealt with as if it were the produce of the said province: and whereas it is the intention of the high contracting parties to the said treaty that the aforesaid produce should be dealt with as if it were the produce of the province of New Brunswick; be it therefore enacted, that the produce in the said recited treaty and herein-before described shall, so far as regards all laws relating to duties, navigation, and customs in force in the U. K. or in any of H. M.'s dominions, be deemed and taken to be and be dealt with as the produce of the province of New Brunswick: provided nevertheless, that in all cases in which declarations and certificates of production or origin, and certificates of clearance, would be required in respect of such produce if it were the produce of New Brunswick, similar declarations and certificates shall be required in respect of such produce, and shall state the same to be the produce of those parts of the state of Maine which are entered by the river St. John or by its tributaries.—§ 14.

*Drawback on the Exportation of Foreign Rice or Paddy.*—Upon the exportation from the U. K. of any foreign rice or paddy which shall have been cleaned therein, and which shall have paid the duties payable on the importation thereof, there shall be allowed and paid for every hundred weight thereof a drawback equal in amount to the duty paid on every 4 bushels of the rough rice or paddy from which the same shall have been cleaned.—§ 15.

*Conditions on which such Drawback is to be paid.*—Such drawback upon rice so exported shall be paid and allowed only upon such clean rice as shall be deposited for the purpose of exportation, within 1 calendar month from the day on which the duty thereon had been paid, in some warehouse in which rice may be warehoused on importation without payment of duty, and shall there remain secured until duly shipped to be exported from such warehouse: provided also, that the exporter of such rice shall make declaration before the collector or comptroller that the rice so warehoused for exportation was cleaned from the rough rice or paddy upon which the duties had been so paid.—§ 16.

*Warehousing of Goods.*—It shall be lawful for the importer of any goods subject to any duties of customs to warehouse such goods upon the first entry thereof, under the laws in force for the warehousing of goods, without payment of duty upon such first entry, and that all goods which shall have been so warehoused before the commencement of any such duties, and shall remain so warehoused after the commencement of the same, shall become liable to such duties in lieu of all former duties.—§ 17.

*Cape of Good Hope deemed to be within Limits of Charter; Mauritius as West Indies.*—For the purposes of this act the Cape of Good Hope, and the territories and dependencies thereof, shall be deemed to be within the limits of the E. I. Company's charter, and the island of Mauritius shall be deemed to be one of H. M.'s sugar colonies, and placed upon the same footing in all respects as H. M.'s islands in the West Indies.—§ 18.

*Produce of Limits of Charter imported from Malta or Gibraltar.*—All goods the produce of places within the limits of the E. I. Company's charter having been imported into Malta or Gibraltar from those places in British ships shall, upon subsequent importation into the U. K. direct from Malta or Gibraltar, be liable to the same duties as the like goods would respectively be liable to if imported direct from some place within the limits of the said charter.—§ 19.

Clause 30. enacts that a separate account is to be kept of the amount of the hereditary customs revenue of the crown; and clause 21. enacts that nothing in this act shall affect the hereditary revenue of the crown in Scotland.

*Duties to be paid into the Exchequer and carried to the Consolidated Fund.*—All the monies arising by the duties imposed by this act (the necessary charges of raising and accounting for the same excepted) shall from time to time be paid into the receipt of H. M.'s exchequer in Great Britain, and shall be carried to and made part of the consolidated fund of the U. K. of Great Britain and Ireland, except only as by this act is specially provided, and shall be appropriated in like manner and to the same services as the duties by this act repealed would have been if this act had not been passed.—§ 22.

*Duties due before the passing of this Act, but levied after, to be deemed Duties under this Act, and appropriated as such.*—All monies arising from any duties of customs, or any arrears thereof, shall be raised, levied, collected, paid, or received from and after the passing of this act, for or on account of any goods, wares, or merchandise whatever, imported or brought into the U. K. of Great Britain and Ireland, or exported from the said U. K., although the amount of the said duties may have been computed and ascertained as such duties have been computed and ascertained before the passing of this act, and although the goods, wares, or merchandise whereon any such duties of customs may have been charged or may be charged may have been imported into or exported from the U. K. before the passing of this act, and although any duties of customs due and payable, or charged or chargeable thereon, may have been secured by bond or otherwise on or before the passing of this act; and all such monies shall from and after the passing of this act be appropriated and applied in like manner and to the same purposes, as the duties of customs by this act granted are directed to be appropriated and applied, except as is in this act provided, any act or acts of parliament, law, usage, or custom, to the contrary notwithstanding; and all the monies arising by any of the revenues of customs hereafter to be paid or allowed, either upon bond or otherwise, either by way of drawback, bounty, certificate, premium, or allowance, or by any other legal document whatever, from and after the passing of this act, although the amount of the same shall have been computed and ascertained in like manner in which they have heretofore been usually computed and ascertained, or shall have become due before the passing of this act, shall and may be paid or allowed in like manner by the proper officer or officers of the customs out of any monies in their hands arising from the duties of customs respectively.—§ 23.

The act 9 & 10 Vict. c. 23. modifying the duties on corn, directs that they shall be levied, collected, paid, and applied according to the provisions in this act.—§ 2.

Table exhibiting the Duties payable on the 1st of January, 1849, on Goods, Wares, and Merchandise imported into the U. Kingdom, from Foreign Parts, and from British Possessions; and those payable on the same Articles in 1819 and 1787, when imported from Foreign Parts.

TABLE (B.)

Duties of Customs payable on Goods the Produce of the U. Kingdom exported to Foreign Countries.

Articles.	Rate of Duty.
Coals, culm, or cinders in a foreign ship, per ton	£ 0 4 0

The excise or inland duties, are repaid, or, as it is termed, drawn back, on the goods being exported; and countervailing duties are imposed in the case of articles exempted from duty in Ireland and charged with it in Great Britain, being imported from the former into the latter. The drawback on the malt used in brewing is computed at the rate of 5s. the barrel of 36 Imperial gallons.

*Duties repealed.* We subjoin a list of the articles the duties on which were repealed in 1845 and 1846 by the acts 8 Vict. c. 12. and 9 & 10 Vict. c. 23.

 pelts, undressed, of goats.  
 of all other sorts.  
 racoon, undressed.  
 sable, undressed.  
 sable tails or tips, undressed.  
 squirrel or calabar, tails of, undressed.  
 swan, undressed.  
 tiger, undressed.  
 weasel, undressed.  
 wolf, undressed.  
 Wolverines, undressed.  
 furs, pelts, and tails, tanned, tawed, or dressed: viz.  
 deer, Indian, half dressed, tanned, tawed, or in any way dressed.  
 ermine, dressed.  
 kid, dressed and dyed or coloured.  
 lamb, tanned or tawed.  
 lamb, dyed or coloured.  
 dressed in oil.  
 mink, dressed.  
 pelts of all sorts, tanned, tawed, or in any way dressed.

Skins, deer, — Indian, undressed or shaved.  
 goat, tanned, tawed, or in any way dressed.  
 lamb, in the wool.  
 sheep, in the wool.  
 tanned or tawed, dressed in oil.  
 squirrel, or calabar, tawed.  
 wolf, tawed.  
 kid, dressed, not dyed or coloured and furs, or pieces thereof, unenumerated, tawed, curried, or dressed.  
 and furs, or pieces thereof, raw or undressed, unenumerated.  
 Specimens of minerals, fossils, or ores, unenumerated, exceeding fourteen pounds weight each.  
 Speckled wood.  
 Splitter or zinc, rolled, but not otherwise manufactured.  
 crude, in cakes.  
 Spermaceti: 1st of January, 1849.  
 Sperm oil of foreign fishing: 1st January 1849.  
 Sponge.  
 Squilla, dried or not dried.  
 Stavesacre.  
 Staves, not exceeding 72 inches in length, nor 7 inches in breadth, nor 3½ inches in thickness.  
 Steel, unwrought.  
 scrapes.  
 Straw or grass for plaiting.  
 Sweet-wood.  
 Stone in blocks, shaped or rough scalped.  
 Sulphur casts.  
 Talc.  
 Tar.  
 Barbadoes.  
 Tarras.  
 Tartaric acid.  
 Teasels.  
 Teeth, elephants'.  
 sea-cow, sea-horse, or sea-morse.  
 Telescopes.  
 Terra Japonica, and Cutch.  
 Sienna.  
 verde.  
 umbra.  
 Thread, not otherwise enumerated or described.  
 Tin ore, and regulus of.  
 Tormal.  
 Tortoise-shell or turtle shell unmanufactured.  
 Train oil or blubber of foreign fishing, 1st January, 1847.  
 Tulip-wood.  
 Turnerio.  
 Turpentine of Venice, Scio, or Cyprus.  
 Turpentine, unless above the value of 10s. per cwt.  
 Valonia.  
 Vases, ancient, not of stone or wood.  
 Vegetables, all, not otherwise enumerated or described.  
 Veilum.  
 Vermilion.  
 Ultramarine.  
 Walnut wood.  
 Water, mineral.  
 Wax, bees', in any degree bleached.  
 unbleached.  
 myrtle.  
 vegetable.  
 Weld.  
 Whale fins, of British taking, and imported direct from the fisheries or from any British possession in a British ship.  
 Whale fins of foreign taking, and not prohibited: 1st January, 1847.  
 Wood.  
 Wood for ship-building, now admitted at the same duty as teak wood.  
 birch, hewn, not exceeding 3 feet long, nor exceeding 8 inches square, imported for the sole purpose of making herring barrels for the use of the fisheries.  
 teak.  
 Wool, beaver.  
 cut and combed.  
 coney.  
 hare's.  
 cotton.  
 Woollens: viz. manufactures of wool, not being goats' wool, or of wool mixed with cotton, not particularly enumerated or described, not otherwise charged with duty, not being articles wholly or in part made up.  
 Yarn.  
 camel or mohair.  
 raw linen.  
 Zaffre.  
 Zebra wood.

The 8 Vic. c. 12. s. 4. directs, in the view of preserving exact accounts of the value of the goods entered inwards, upon which the duties have been repaid: "That upon the entry inwards of any such goods, the value thereof shall be stated in the entry, and shall be affirmed by the declaration of the importer or his known agent, written upon the entry and attested by his signature, and if such declaration be false, the person signing the same shall forfeit a sum not exceeding 20*l*.; and it shall be lawful for the landing waiter or other officer appointed to examine such goods to call for the invoice, bills of parcels, and such other documents relating thereto as he may think necessary for ascertaining the true value of the same."

## TARTAR. See ARGAL.

**TATTA**, a town in the territory of Sinde, situated about 60 miles in a direct line from the sea, at a short distance from the western bank of the river Indus, in lat. 24° 44' N., lon. 68° 17' E. Population uncertain, probably about 8,000. The streets are narrow and dirty; but the houses, though built of mud, chopped straw, and timber, are superior to the low huts seen in the adjoining towns and villages.

*Trade.*—Being situated a little above the part where the Indus divides into the two great branches by which its waters are poured into the Indian Ocean, it might be supposed that Tatta would be a place of great trade. But, owing to the unwholesomeness of the climate, the barbarism of the tribes on its banks, and other causes, its commerce has never corresponded with what might have been anticipated, looking at its position on the map. It had probably attained the acme of its prosperity in the beginning of the 16th century. In 1555, the Portuguese, by way, as they stated, of avenging the treachery of the king of Sinde, inhumanly massacred 8,000 of the inhabitants, and burned the town.—(*Comptes des Portugais*, tome iv. p. 183.) It is probable that Tatta never fully recovered from this dreadful blow; but Mr. Hamilton mentions, that in the 17th century it was extensive and populous, possessing much commerce, with manufactures of silk, wool, and cabinet ware. The decayed state in which we now find it, has been a consequence of the misgovernment and rapacity of its present rulers, the Amers of Sinde, under whose sway it fell more than 50 years ago.

In 1638, the English established a factory at Tatta, in the view of facilitating the disposal of woollens and other goods in the countries traversed by the Indus; and the building occupied by the factory, though far from magnificent, was recently, if it be not still, the best, not in Tatta only, but in the whole country of Sinde.

The chief exports are rice, shawls from Cashmere, opium from Malwah, hides, ghee, cotton, goats' wool, carpets, drugs, &c. Putchcock, an article largely consumed in China, is a peculiar export of Sinde. The imports comprise a variety of articles, but the quantities are trifling: they consist principally of spices, dye stuffs, hardware, tin, iron, &c., broad cloths, English cottons, silks, &c. But at present the trade is quite inconsiderable; and no one could believe, *a priori*, that the natural emporium of so great a river as the Indus, traversing many extensive countries, would cut so insignificant a figure in the trading world.

*Navigation and Trade of the Indus.*—The navigation of this magnificent river by the fleet of Alexander the Great, has conferred on it a classical celebrity not to be matched by any other river of the East. Its magnitude, too, is worthy of its fame. It may be navigated by flat-bottomed boats as far as Attock, and its tributary stream the Ravee is navigable to Lahore, both places being above 1,000 miles from the sea. But, unfortunately, its navigation is extremely difficult, and it may be doubted whether it will ever realise any considerable portion of the advantages which have of late years been anticipated from its being opened. The mouths of the river are ill-defined, shallow, and infested with moveable sand-banks, while the violence of the *bore*, or tide\* makes their entrance at all times a matter of difficulty for vessels of the small draught of water suitable to their navigation, and during the period of the western monsoon they are all but impracticable. This, no doubt, is the reason that for centuries past the navigation from and to the sea through the delta of the Indus has been almost wholly abandoned; and that all products brought down the river and destined for exportation by sea are conveyed from Tatta overland to Curachee, a sea-port a little to the north of the most northerly mouth of the river, about 60 miles in a direct line from Tatta; and that all those coming from parts beyond sea and destined for countries on the Indus are conveyed from Curachee to Tatta by the same route.

Even after it has been entered, the navigation of the river is peculiarly difficult, partly from the strength of the current during the period of the inundation, and partly from shallows, and the sudden and constant shifting of the channel: what was a navigable passage one day is not unfrequently quite unnavigable a day or two after. The *doondees*, or native craft, by which the river is navigated, though of very small burden, frequently get aground.

If the Indus should ever become a considerable commercial highway, it will, most probably, be brought about by the intervention of suitable steamers; and it seems to be the opinion of the best judges, that, provided the steamers employed be flat-bottomed, and do not draw more than 28 or 30 inches water, they might, with proper precautions, be navigated from the sea for nearly 1,000 miles inland. But, exclusive of the physical obstacles to the navigation of the river, the backward state of the country through which it flows, and the poverty and barbarism of the inhabitants, are formidable obstacles to its becoming of much importance as a commercial highway. The inhabitants along its banks have little taste for foreign commodities; and even if they had, they have few products suitable for export to exchange for them. No doubt, should regular government, industry, and civilisation be introduced into the Punjab, Cabul, and the contiguous countries, the case might be very different, and the trade of the Indus might become of very considerable importance. But this, if it be ever effected, must require a lengthened period to bring it about; so that those who look for any material addition being speedily made to our trade, or to that of India, by the opening of the Indus, will, there is too much reason to think, be entirely disappointed. (See,

\* Whatever other changes may have taken place in the river, the tides at its mouth would seem to have been nearly the same in antiquity as at present. Their violence created the greatest alarm in the fleet of Alexander; and occasioned, indeed, the loss of several vessels!—(*Arrian*, lib. vi. cap. 19.)

for farther particulars, the art. *Indus* in the *Geographical Dictionary*, and the authorities there referred to; see also Captain Postan's work on *Sinde*; and especially the memoir in the appendix (p. 361.) of Captain Carless, *On the Navigation of the Indus*.)

A very well-informed party, Dr. Buist, editor of the *Bombay Times*, has, in his work on the late expedition into Afghanistan, made the following observations on the trade of the Indus:—

"The glowing descriptions of Burnes appear to have given a very exaggerated idea of the value of the internal traffic of the countries beyond the Indus. It was forgotten that where there was no industry, no manufactures or mineral wealth, no sea-coast or rivers to permit exportation, there could be little or nothing to give in exchange for imports; and that the wants of a population purely nomade must at all times be simple and singularly few. The whole of our commerce with Persia has never exceeded two millions sterling a year, rarely above one; the total of our trade with Afghanistan certainly never exceeded a million annually, and has very rarely amounted to much more than the half of one. Besides this, the Indus in reality was never closed save by its own dangerous entrances and shallow depth of water. Lord Ellenborough has opened the Indus as far as Mithen Kot; and the Sutlej, in continuation of this, to the Markunda, where it ceases to be navigable for the smallest craft. Yet the gross value of the British goods consumed by the countries adjoining does not at present amount to a quarter of a million sterling, and will not in all likelihood be doubled for 10 years to come; the expense of maintaining troops betwixt Kurrachee and Bukkur, both stations included, exceeding 600,000*l.* a year; with a less force it would be unwise to think of keeping these stations at all. The great line of traffic was not along but across the Indus, by the Delhi frontier, or parallel to it at a distance of 100 miles, by Sonmeenee and Kelat. The countries beyond the Indus, besides, have always been open to the free admission of every variety of foreign imports on paying a moderate fixed duty. The chief obstructions in reaching these are irremediable by treaty; and arise from the attacks of the plundering tribes in the passes, which cannot be restrained save by the payment of a black mail or subsidy."

The delta of the Indus has little in common with the delta of the Nile, except its shape. Not a fourth part of it is cultivated, and its few inhabitants principally lead a pastoral life. It is overgrown with tamarisks and other wild shrubs; and though intersected by the numerous mouths of the river, its surface is dry and arid, and it is in a great degree destitute of fresh water.

*Money, Weights, and Measures.*—Accounts are kept in rupees, carwals, and pice: 12 pice = 1 carwal; 50 carwals = 1 rupee. Cowries are current in Sind, 48 cowries = 1 pice.  
*Small Weights.*—34 Moons = 1 Ruttee.  
 6 Ruttees = 1 Maund.  
 12 Maunds = 1 Toah.  
*Gross Weights.*—4 Pice = 1 Anna.  
 16 Annas = 1 Pucca soer.  
 40 Soers = 1 Maund, or 74 lbs. 5 oz.  
 7 dwts. avoirdupois.

*Long Measure.*—1 Garce = 2 inches.  
 16 Garces = 1 Guz; but 1 Guz cloth = 34 inches at Tatta.  
*Grain Measure.*—4 Puttoes = 1 Twier.  
 4 Twiers = 1 Cosa.  
 60 Cosas = 1 Carval of wheat; or 72 Pucca maunds, or 21 Bombay parabs.  
 Diamonds and pearls are sold by rubbes and ruttees.—8 rubbes = 1 ruttee, about 2 gr. Troy.—(*Milburn's Orient. Commerce.*)

TEA (in one Chinese dialect *Cha*, in another *Te*; Du. *Te*; Fr. *Thé*; It. *Te*; Rus. *Tchai*; Hind. *Cha*; Malay, *Teh*), the leaves of the tea tree or shrub (*Thea viridis* Lin.).

- I. DESCRIPTION OF THE TEA PLANT.—TEA TRADE OF CHINA.
- II. RISE AND PROGRESS OF THE BRITISH TEA TRADE.—CONSUMPTION OF TEA.
- III. EAST INDIA COMPANY'S MONOPOLY.—INFLUENCE OF, ON THE PRICE OF TEA.—CONDITIONS UNDER WHICH IT WAS HELD.—ABOLITION OF.
- IV. DUTIES ON TEA.—CONSUMPTION OF, IN THE U. KINGDOM, THE CONTINENT, THE UNITED STATES, ETC.

## I. DESCRIPTION OF THE TEA PLANT.—TEA TRADE OF CHINA.

*Description of the Plant.*—*Places where it is cultivated.*—The tea plant ordinarily grows to the height of from 3 to 6 feet, and has a general resemblance to the myrtle, as the latter is seen in congenial situations in the southern countries of Europe. It is a polyandrous plant, of the natural order *Colummaifera*, and has a white blossom, with yellow style and anthers, not unlike those of a small dog-rose. The stem is bushy, with numerous branches, and very leafy. The leaves are alternate, on short, thick, channelled footstalks, evergreen, of a longish elliptic form, with a blunt, notched point, and serrated except at the base. These leaves are the valuable part of the plant. The *Camellias*, particularly the *Camellia Sasanqua*, of the same natural family as the tea tree, and very closely resembling it, are the only plants liable to be confounded with it by a careful observer. The leaves of the particular camellia just named are, indeed, often used in some parts of China, as a substitute for those of the tea tree.

The effects of tea on the human frame are those of a very mild narcotic; and, like those of many other narcotics taken in small quantities,—even of opium itself,—they are exhilarating. The green varieties of the plant possess this quality in a higher degree than the black; and a stronger infusion of the former will, in most constitutions, produce considerable excitement and wakefulness. Of all narcotics, however, tea is the least pernicious: if, indeed, it be so in any degree, which we very much doubt.

The tea shrub may be described as a very hardy evergreen, growing readily in the open air, from the equator to the 45th degree of latitude. For the last 60 years it has been reared in this country, without difficulty, in greenhouses; and thriving plants of it

are to be seen in the gardens of Java, Singapore, Malacca, and Penang; all within 6 degrees of the equator. The climate most congenial to it, however, seems to be that between the 25th and 23d degrees of latitude, judging from the success of its cultivation in China. For the general purposes of commerce, the growth of good tea is confined to China; and is there restricted to 5 provinces, or rather parts of provinces, viz. Fokien and Canton, but more particularly the first, for black tea; and Kiang-nan, Kiang-si, and Che-kiang, but chiefly the first of these, for green. The tea districts all lie between the latitudes just mentioned, and the 115th and 122d degrees of East longitude. However, almost every province of China produces more or less tea, but generally of an inferior quality, and for local consumption only; or when of a superior quality, like some of the fine wines of France, losing its flavour when exported. The plant is also extensively cultivated in Japan, Tonquin, and Cochin-China; and in some of the mountainous parts of Ava; the people of which country use it largely as a kind of *pickle preserved in oil*!

Botanically considered, the tea tree is a single species; the green and black, with all the diversities of each, being mere varieties, like the varieties of the grape, produced by difference of climate, soil, locality, age of the crop when taken, and modes of preparation for the market. Considered as an object of agricultural produce, the tea plant bears a close resemblance to the vine. In the husbandry of China, it may be said to take the same place which the vine occupies in the southern countries of Europe. Like the latter, its growth is chiefly confined to hilly tracts, not suited to the growth of corn. The soils capable of producing the finest kinds are within given districts, limited, and partial. Skill and care, both in husbandry and preparation, are quite as necessary to the production of good tea, as to that of good wine.

The best wine is produced only in particular latitudes, as is the best tea; although, perhaps, the latter is not restricted to an equal degree. Only the most civilised nations of Europe have as yet succeeded in producing good wines; which is also the case in the East with tea; for the agricultural and manufacturing skill and industry of the Chinese are there unquestionably pre-eminent. These circumstances deserve to be attended to, in estimating the difficulties which must be encountered in any attempt to propagate the tea plant in colonial or other possessions. These difficulties are obviously very great; and, perhaps, all but insuperable. Most of the attempts hitherto made to raise it in foreign countries were not, indeed, of a sort from which much was to be expected. Within the last few years, however, considerable efforts have been made by the Dutch government of Java, to produce tea on the hills of that island; and having the assistance of Chinese cultivators from Fokien, who form a considerable part of the emigrants to Java, a degree of success has attended them, beyond what might have been expected in so warm a climate. The Brazilians have made similar efforts; having also, with the assistance of Chinese labourers, attempted to propagate the tea shrub near Rio de Janeiro; and a small quantity of tolerably good tea has been produced. But owing to the high price of labour in America, and the quantity required in the cultivation and manipulation of tea, there is no probability, even were the soil suitable to the plant, that its culture can be profitably carried on in that country.

It may, perhaps, succeed in Assam, where its culture is now being attempted; for labour is there comparatively cheap, and the hilly and table lands are said to bear a close resemblance to those of the tea districts of China; but we are not sanguine in our expectations as to the result.

*Species of Tea.* — *Manner in which they are manufactured.* — The black teas usually exported by Europeans from Canton are as follows, beginning with the lowest qualities: — Bohea, Congou, Souchong, and Pekoe. The green teas are Twankay, Hyson skin, young Hyson, Hyson, Imperial, and Gunpowder. All the black teas exported (with the exception of a part of the bohea, grown in Woping, a district of Canton) are grown in Fokien—a hilly, maritime, populous, and industrious province, bordering to the north-east on Canton. Owing to the peculiar nature of the Chinese laws as to inheritance, and probably, also, in some degree, to the despotic genius of the government, landed property is much subdivided throughout the empire; so that tea is generally grown in gardens or plantations of no great extent. The plant comes to maturity and yields a crop in from 2 to 3 years. The leaves are picked by the cultivator's family, and immediately conveyed to market; where a class of persons, who make it their particular business, purchase and collect them in quantities, and manufacture them in part; that is, expose them to be dried under a shed. A second class of persons, commonly known in the Canton market as "the tea merchants," repair to the districts where the tea is produced, and purchase it in its half-prepared state from the first class, and complete the manufacture by garbling the different qualities; in which operation, women and children are chiefly employed. A final drying is then given, and the tea packed in chests, and divided, according to quality, into parcels of from 100 to 600 chests each. These

parcels are stamped with the name of the district, grower, or manufacturer, exactly as is practised with the wines of Bordeaux and Burgundy, the indigo of Bengal, and many other commodities; and, from this circumstance, get the name of *chops*, the Chinese term for a seal or signet. Some of the leaf-buds of the finest black tea plants are picked early in the spring, before they expand. These constitute pekoe, or black tea of the highest quality; sometimes called "white-blossom" tea, from there being intermixed with it, to give it a higher perfume, a few blossoms of a species of olive (*Olea fragrans*), a native of China. A second crop is taken from the same plants in the beginning of May, a third about the middle of June, and a fourth in August; which last, consisting of large and old leaves, is of very inferior flavour and value. The younger the leaf, the more high flavoured, and consequently the more valuable, is the tea. With some of the congous and souchongs are occasionally mixed a little pekoe, to enhance their flavour; and hence the distinction, among the London tea dealers, of these sorts of tea, into the ordinary kinds and those of "Pekoe flavour." Bohea, or the lowest black tea, is partly composed of the lower grades; that is, of the fourth crop of the teas of Fokien, left unsold in the market of Canton after the season of exportation has passed; and partly of the teas of the district of Woping in Canton. The green teas are grown and selected in the same manner as the black, to which the description now given more particularly refers; and the different qualities arise from the same causes. The gunpowder here stands in the place of the pekoe; being composed of the unopened buds of the spring crop. Imperial, hyson, and young hyson, consist of the second and third crops. The light and inferior leaves, separated from the hyson by a winnowing machine, constitute hyson skin, an article in considerable demand amongst the Americans. The process of drying the green teas differs from that of the black; the first being dried in iron pots or vases over a fire, the operator continually stirring the leaves with his naked hand. The operation is one of considerable nicety, particularly with the finer teas; and is performed by persons who make it their exclusive business.

*Tea Trade in China.* — The tea merchants commonly receive advances from the principal merchants and other capitalists of Canton; but, with this exception, are altogether independent of them; nor have the latter any exclusive privilege or claim of pre-emption. They are very numerous; those connected with the green tea districts alone being about 400 in number. The black tea merchants are less numerous but more wealthy. The greater part of the tea is brought to Canton by land carriage or inland navigation, but chiefly by the first: it is conveyed by porters; the roads of China, in the southern provinces, not generally admitting of wheel carriages, and beasts of burden being very rare. A small quantity of black tea is brought by sea, but probably smuggled; for this cheaper mode of transportation is discouraged by government, which it deprives of the transit duties levied on inland carriage. The length of land carriage from the principal districts where the green teas are grown to Canton is probably not less than 700 miles; nor that of the black tea, over a mountainous country, less than 200 miles. The tea merchants begin to arrive in Canton about the middle of October, and the busy season continues until the beginning of March; being briskest in November, December, and January. Tea, for the most part, could, previously to the late changes, only be bought from the Hong or licensed merchants; but some of these, the least prosperous in their circumstances, were supported by wealthy *outside* merchants, as they are called; and thus the trade was considerably extended. The prices in the Canton market vary from year to year with the crop, the stock on hand, and the external demand, as in any other article, and in any other market. After the season is over, or when the westerly monsoon sets in, during the month of March, and impedes the regular intercourse of foreigners with China, there is a fall in the price of tea, not only arising from this circumstance, but from a certain depreciation in quality, from the age of the tea; which, like most other vegetable productions, is injured by keeping, particularly in a hot and damp climate.

*Foreign Trade in Tea* — There seems to be little mystery in the selection and purchase of teas; for the business is both safely and effectively accomplished, not only by the supercargoes of the American ships, but frequently by the masters; and it was ascertained by the sales at the East India House, that there was no difference between the qualities of the teas purchased by the commanders and officers of the Company's ships, without any assistance from the officers of the factory, and those purchased for the Company by the latter. An unusual degree of good faith, indeed, appears to be observed, on the part of the Chinese merchants, with respect to this commodity; for it was proved before the select committee of the House of Commons, in 1830, that it was the regular practice of the Hong merchants to receive back, and return good tea for, any chest or parcel upon which any fraud might have been practised, which sometimes happens in the conveyance of the teas from Canton on board ship. Such restitution has occasionally been made even at the distance of 1 or 2 years. The Company enjoyed no advantage over other purchasers in the Canton market, except that which the largest

purchaser has in every market, viz. a selection of the teas, on the payment of the same prices as others; and this advantage they enjoyed only as respects the black teas; the Americans being the largest purchasers of green teas.

We subjoin a Table for calculating the cost of tea : —

Comparison of the Cost on Tea per Picul (133½ lbs. Avoirdupois), with the Rate per Pound and Ton, of 9 Cwt. or 1,008 Pounds per Ton.

## II. RISE AND PROGRESS OF THE BRITISH TEA TRADE. — CONSUMPTION OF TEA.

The late rise and present magnitude of the British tea trade are among the most extraordinary phenomena in the history of commerce. Tea was wholly unknown to the Greeks and Romans, and even to our ancestors previously to the end of the 16th or the beginning of the 17th century. It seems to have been originally imported in small quantities by the Dutch; but was hardly known in this country till after 1650. In 1660, however, it began to be used in coffee houses; for, in an act passed in that year, a duty of 8d. is laid on every gallon of "coffee, chocolate, sherbet, and tea," made and sold. But it is abundantly evident that it was then only beginning to be introduced. The following entry appears in the Diary of Mr. Pepys, secretary to the Admiralty: — "September 25. 1661. I sent for a cup of tea (a China drink), of which I had never drunk before." In 1664, the East India Company bought 2 lbs. 2 oz. of tea as a present for his Majesty. In 1667, they issued the first order to import tea, directed to their agent at Bantam, to the effect that he should send home 100 lbs. of the best tea he could get! — (See the reference in *Milburn's Orient. Com.* ii. 530; *Macpherson's Hist. of Com. with India*, pp. 130—132.) Since then, the consumption seems to have gone on regularly though slowly increasing. In 1689, instead of charging a duty on the decoction made from the leaves, an excise duty of 5s. per lb. was laid on the tea itself. The importation of tea from 1710 downwards is exhibited in the following Tables.

The reductions made in the duties on tea in 1745 and 1784, strikingly evince the superior productiveness of low duties on articles in general demand, and are, in that respect, especially worth attention. Previously to 1745, tea was charged with an excise duty of no less than 4s. per lb., and with a customs duty of 14 per cent. *ad valorem*: and it appears that at an average of the 5 years ending Midsummer, 1745, the teas entered for consumption amounted to 768,520 lbs. a-year, yielding an average excise and customs revenue of 175,222l. a-year. But though the taste for tea was then comparatively little diffused, it was well known that its clandestine importation was extensively carried on, and that its real was much greater than its apparent consumption. To check this illegitimate traffic, which enriched the smuggler at the expense of the revenue and of the fair trader, a bill was carried through parliament in 1745, in pursuance of the recommendation of a Committee of the House of Commons, by which the excise duty on tea was reduced from 4s. to 1s. per lb. and 25 per cent. *ad valorem*: and as the price of the teas sold at the Company's sales was then about 4s. per lb., the 25 per cent. was, in fact, equivalent to 1s. per lb. making the new excise duty 2s. per lb., being a reduction of 50 per cent. This measure, which had in a great degree the merit of originality, was eminently successful. In the year immediately after the

reduction of the duty, the entries of tea for consumption amounted to about 1,800,000 lbs., being nearly three times as much as they had amounted to in the last year of the high duties; and the increase in the second and third years of the new system was also most striking. But to set the operation of this well-considered measure in the clearest point of view, we subjoin

An Account of the Quantities of Tea entered for Consumption, and of the Produce of the Excise and Customs Duties thereon during each of the Five Years preceding, and subsequent to Midsummer, 1745, when the Excise Duty on Tea was reduced from 4s. to 2s. per lb. (McCulloch on Taxation, p. 332.)

Years.	Quantities.	Duties.	Years.	Quantities.	Duties.
	Lbs.	£ s. d.		Lbs.	£ s. d.
1741	880,700	200,799 0	1746	1,800,000	230,400
1742	836,800	190,633 10	1747	2,000,000	256,000
1743	797,200	181,761 10	1748 *	2,600,000	326,400
1744	708,500	161,238 0	1749	2,700,000	372,600
1745	620,000	141,260 0	1750 †	2,700,000	372,600
Totals.	5,842,600	876,112 0	Totals.	11,800,000	1,590,400
Average of 5 years.	768,520	175,222 8	Average of 5 years.	2,360,000	318,080

But notwithstanding this unanswerable demonstration of the superior productiveness of low duties, they were again increased in 1759; and fluctuated, between that epoch and 1784, from about 65 to 120 per cent. *ad valorem*. The effects which followed this inordinate extension of the duties are equally instructive with those which followed their reduction. The revenue was not increased in anything like a corresponding proportion; and as the use of tea had become comparatively general, smuggling was carried to an infinitely greater extent than at any former period. In the nine years preceding 1780, above 118 millions lbs. of tea were exported from China to Europe in ships belonging to the continent, and about 50 millions lbs. in ships belonging to England. But from the best information attainable, it appears that the real consumption was almost exactly the reverse of the quantities imported; and that while the consumption of the British dominions amounted to above 13 millions lbs. a-year, the consumption of the continent did not exceed 5½ millions. If this statement be nearly correct, it follows that an annual supply of about eight millions lbs. must have been clandestinely imported into this country, in defiance of the revenue laws. But this was not the worst effect of the high duties; for many of the retail dealers who purchased tea at the East India Company's sales, being in a great measure beaten out of the market, were, that they might put themselves in a condition to stand the competition of the smugglers, tempted to adulterate their teas by mixing them with sloe and ash leaves. ‡ At length, in 1784, ministers, having in vain tried every other resource for the suppression of smuggling, resolved to follow the precedent of 1745, and reduced the duty on tea from 119 to 12½ per cent. This measure was as successful as the former: smuggling and the practice of adulteration were immediately put an end to. The following statement shows that the quantity of tea sold by the East India Company was about trebled in the course of the two years immediately following the reduction.

	Lbs.
In 1781 the quantity of tea sold at the East India Company's sales amounted to	5,023,419
1782	6,383,664
1783	5,857,883
1784 (duties reduced)	10,148,257
1785	16,207,433
1786	15,088,962
1787	16,692,426 †

While the quantity of tea sold at the Company's sales was thus rapidly augmented, in consequence of the reduction of the duty, the quantity of tea imported into the continent from China, which had, in 1784, amounted to 19,027,300 lbs. declined with still greater rapidity, and, in 1791, was reduced to only 2,291,500 lbs. ‖

The duties on tea, at an average of the 5 or 6 years preceding 1784, produced about 700,000*l.* a-year. And, on their being reduced to 12½ per cent, an additional duty, estimated to produce 600,000*l.*, was laid on windows, as a *commutation* tax, to compensate for the deficiency which it was supposed would take place in the revenue derived from tea. But, instead of the duties falling off in the proportion of 119 to 12½, or from 700,000*l.* to 73,000*l.*, they only fell off, in consequence of the increased consumption, in the proportion of about two to one, or from 700,000*l.* to 340,000*l.* The Commutation Act has been always regarded as one of the most successful financial measures of Mr. Pitt's administration. The plan was generally understood at the time to have been suggested by Mr. Richardson, accountant-general of the East India Company; but the popularity of the measure was so great as to induce several other individuals to claim this honour, and even to occasion some hot disputes on the subject

\* In 1748, 5 per cent was added to the customs duty on dry goods; but its influence on tea was next to imperceptible.

† In 1783 the entries increased to 3,000,000 lbs.

‡ Macpherson's "Commerce with India," p. 208. Millburn's "Oriental Commerce," vol. ii. p. 540.

§ Macpherson's "Commerce with India," p. 416. || Ibid, p. 210

in the House of Commons. In point of fact, however, the merit of originally suggesting the plan neither belonged to Mr. Richardson, nor to any of those who then claimed it; and such of our readers as will take the trouble to look into a pamphlet ascribed to Sir Matthew Deaker ("Serious Considerations on the present High Duties"), published in 1743, will find that the measure adopted in 1784 had been strenuously recommended 40 years before.

But the principle of the Commutation Act, and the striking advantage that had resulted from the reduction of the duty, were soon lost sight of. In 1795 the duty was increased to 25 per cent; and, after successive augmentations in 1797, 1798, 1800, and 1803, it was raised, in 1806, to 96 per cent., *ad valorem*, at which it continued till 1819, when it was raised to 100 per cent. on all teas that brought above 2s. per lb. at the Company's sales.

The following statements show the progress of the consumption of tea in this country from a very remote epoch down to the present time:—

Account of the Quantity of Tea retained for Home Consumption in Great Britain from 1780 to 1838, and of the Quantity that paid Duty for Home Consumption in Ireland from 1789 to 1837; specifying the Nett Produce of the Duties in each Country, and the Rates of Duty.

N. B.—We have made up this account from the accounts given in *Müller's Oriental Commerce* (vol. ii. p. 684.), and *Postlethway's Dictionary*, Art. *Tea*. There is an account, furnished by the Excise, of the quantities of tea retained for home consumption from 1725 to 1839, in the *Appendix to the First Report of the Commissioners of Excise Inquiry*. It, however, involves some very material errors. Thus, it represents the consumption from 1768 to 1774, both inclusive, as under 200,000 lbs. a year, at the same time that it makes the consumption, in the immediately preceding and subsequent years, above 4,000,000 lbs. A statement of this sort is obviously inaccurate; and yet it is not accompanied by a single remark or explanation of any sort.

A Return of the Quantities and Prices of the several Sorts of Tea sold by the East India Company, in each Year during the present Charter (1st of May to 1st of May).

### III. EAST INDIA COMPANY'S MONOPOLY — INFLUENCE OF, ON THE PRICE OF TEA — CONDITIONS UNDER WHICH IT WAS HELD — ABOLITION OF.

From its origin down to 1834, the trade in tea was monopolised by the East India Company. Considerable quantities of tea were, indeed, at different times, smuggled into the country; but no British subject, not authorised by the Company, was ever allowed openly to import tea. Being thus the *only sellers*, they had it in their power, by limiting the quantity brought to market, to raise its price above its natural elevation, and to realise immense profits at the expense of the public. They might, no doubt, have declined availing themselves of this power; but no such forbearance could be rationally expected from the Company, or from any other body of men. All individuals and associations exert themselves to obtain the highest price for whatever they have to sell: and it is found that those who are protected from the competition of others, or who have obtained a monopoly of any market, invariably raise the price of their commodities to a very high pitch. The East India Company did this, probably, to a less extent than most other bodies that have enjoyed such exclusive privileges. Still, however, it is an undoubted fact, that the teas sold by them during the last years of the monopoly cost the people of Britain upwards of 1,500,000*l.* a year more than they would have cost had they been sold at the price at which teas of equal quality were sold, under a system of free competition, in New York, Hamburg, Amsterdam, &c. ! — (For proofs of this statement, see 1st edition of this *Dictionary*, p. 1031.)

The legislature endeavoured, at different periods, to prevent the Company from abusing their monopoly, by enacting regulations as to the sale of tea; and though no longer of any practical importance, it may be worth while briefly to notice some of the more important, and the means by which they were defeated. In 1745, for example, when the great deduction was made from the amount of the tea duties, it was enacted, by a statute passed in that year (18 Geo. 2. c. 26.), in order to prevent the Company from depriving the public of the benefit of this reduction, that in case the tea imported by the East India Company shall not always be sufficient to answer the consumption thereof in Great Britain, and to keep the price of tea in this country upon an equality with the price thereof in the neighbouring Continent of Europe, it shall be lawful for the said Company, and their successors, to import into Great Britain such quantities of tea as they shall think necessary from any part of Europe: and by another section of the same statute, it is enacted, that if the East India Company shall, at any time, neglect to keep the British market supplied with a sufficient quantity of tea at reasonable prices, it shall be lawful for the Lords of the Treasury to grant licences to any other person or persons, body politic or corporate, to import tea into Great Britain from any part of Europe.

Had this statute been enforced, it would certainly have restrained the demands of the Company within reasonable limits; but it was very soon forgotten, and the Company continued, as before, to sell their teas at an enormous advance as compared with their prices in Hamburg and Amsterdam.

The same well-founded jealousy, which dictated the act of 1745, was again displayed in the proceedings at the reduction of the duties in 1784. It was then enacted (24 Geo. 3. c. 38.), that the East India Company should make 4 sales of tea every year, as near as conveniently may be at equal distances of time from each other, and should put up at such sales such quantities of tea as may be judged sufficient to supply the demand; and at each sale the tea to be put up shall be sold without reserve to the highest bidder, provided an advance of 1*d.* per pound be bid upon the price at which the same is put up. By another clause it was enacted, that it should not be lawful for the East India Company "to put up their teas for sale at any price which shall, upon the whole of the teas so put up at any sale, exceed the prime cost thereof, with the freight and charges of importation, together with lawful interest from the time of arrival of such teas in Great Britain, and the common premium of insurance as a compensation for the sea risk incurred thereon." The Company were further ordered to keep a stock, equal to at least 1 year's consumption, according to the sales of the preceding year, always beforehand. And they were bound to lay before the Lords of the Treasury, copies of the accounts and estimates upon which their orders for importation, prices for sale, and quantities put up to sale, should be grounded.

The object of these conditions is obvious. They were intended to secure a plentiful supply of tea to the public, and to prevent its being sold at an oppressive increase of price. But monopoly and low prices are altogether incompatible. The conditions now referred to were, as to all practicable purposes at least, quite inoperative.

1. In the first place, the Company made various additions to the prime cost, and consequently to the putting up price of their tea, which they ought not to have made, but which the Lords of the Treasury, had they been so disposed, could hardly disallow. They always, for example, charged the cost of the factory at Canton to the price of tea. This establishment consisted of about 20 persons, and cost at an average about 100,000*l.*

a year! We do not presume to say that it was altogether useless. Undoubtedly, however, it might have been conducted at half the expense. It is a fact, that the whole American business at Canton has been transacted by the captains of the ships; and every one knows that they have had fewer disturbances with the natives than the English.

2. In the second place, it was established by the evidence taken before the select committee of 1830, that the Company had for many years thrown the whole losses arising from their outward investment upon tea, by estimating the value of the tael, or Chinese money in which the accounts are kept, at the price which it cost for the purpose of being vested in tea. This was a complete evasion of the provisions of the statute; but it was one which it was very difficult, if not impossible, to defeat.

3. In the third place, the obligation imposed on the Company, of keeping a year's supply of tea in their warehouses, contributed both to raise its price, and deteriorate its quality. From a return made to an order of the select committee of the House of Commons in 1830 (*First Report*, App. p. 23.), it appears that the shortest time any tea sold by the Company had been in store was 14 months; and that, at an average, all the teas sold during the 3 years ending with 1829 had been 17 months in store. But, according to the evidence of the most respectable American witnesses, the black and coarser kinds of tea are depreciated at least 5 per cent. by being kept a twelvemonth, and are, indeed, hardly saleable after the arrival of fresh teas from China. Adding, therefore, warehouse rent, interest of capital, and insurance for 17 months, to the deterioration in point of quality, we may estimate the loss to the public, by this well-meant but most injudicious interference of the legislature, at 15 per cent. upon the price of all the teas sold.

4. In the fourth place, it is obvious, even supposing the prime cost of the Company's teas had not been improperly enhanced, that the regulation obliging them to be sold at an advance of 1d. per lb. if offered, on the putting-up price, could not be otherwise than nugatory. Had the trade been open, private merchants would have undersold each other, until the price of tea, like that of sugar or coffee, had been reduced to the very lowest point that would yield the sellers the customary rate of profit. But the Company was in an entirely different situation. Being the *only sellers*, they invariably *understocked* the market. Instead of bringing forward such quantities of tea as might have occasioned its sale at a small advance upon the upset price, they adjusted the supply so that the price was raised to a much higher elevation. Now, it will be observed, that all that this system of management put into the Company's coffers consisted of *extra profit*; for the putting-up price embraced every item that could fairly enter into the cost of the tea, including both *interest* on capital and insurance, and including also, as we have seen, several items that had but little to do with it. To show the extent to which this source of profit was cultivated, we may mention, that at the June sale in 1830, the Company put up congou at 1s. 8d. and 2s. 1d. per lb.; the lowest sort, or that put up at 1s. 8d., being sold partly at 2s. 1½d., being an advance of *twenty-two and half* per cent., and partly at 2s. 5d., being an advance of *forty-five* per cent.; while the highest sort, or that put up at 2s. 1d., was sold partly at 2s. 2d., being an advance of *four* per cent., and partly at 3s. 7d., being an advance of no less than *seventy-two* per cent. above the upset price; that is, above a price calculated to yield *ordinary profits*. Mr. Mills, an intelligent tea merchant, in a paper laid before the committee of the House of Lords on East India affairs, showed, that the advance on teas sold at the Company's June sale in 1830, above the putting-up price, amounted to 122,177l. 18s. 1d.; and as there are 4 such sales in the year, the total advance must have been about 500,000l.; and this was considerably under what it had been a few years previously.

These statements show generally how the Company defeated the provisions of the act of 1784, and, indeed, turned them to its own advantage. But, as already observed, nothing else could be expected. It is nugatory to attempt to combine monopoly with low prices and good qualities. They never have existed, and it is not possible they ever should exist, together. Monopoly is the parent of dearth and scarcity; freedom, of cheapness and plenty.

Great, however, as was the sacrifice entailed on the people of Britain by the Company's monopoly, it is doubtful whether it yielded any considerable amount of revenue to the Company. Every one, indeed, must be satisfied, on general grounds, that it was impossible for the Company to make anything like the same profits by the privileges conceded to them, that would have been made by private individuals enjoying similar advantages. "The spirit of monopolists," to borrow the just and expressive language of Gibbon, "is narrow, lazy, and oppressive. Their work is more costly and less productive than that of independent artists; and the new improvements so eagerly grasped by the competition of freedom, are admitted with slow and sullen reluctance, in those proud corporations above the fear of a rival, and below the confession of an error." We have no doubt that the directors of the East India Company were disposed to extend

its commerce, and to manage it according to the most approved principles, but they were wholly without the means of giving effect to their wishes. They had to operate through servants; and is it to be imagined that the *employés* of such bodies will ever display that watchful attention to their interests, or conduct the business intrusted to their care with the unsparing economy practised by private merchants trading on their own account, superintending their own concerns, and responsible in their own private fortunes for every error they may commit? The affairs of the Company, notwithstanding the efforts of the directors to introduce activity and economy, have always been managed according to a system of routine. Their captains and mercantile agents were, we doubt not, "all honourable men;" but it were an insult to common sense to suppose that they may be compared for a moment with individuals trading on their own account, in the great requisites of zeal, conduct, and skill.

Several gentlemen of great knowledge and experience, who carefully inquired into the state of the Company's affairs in 1830, expressed their decided conviction that they made nothing by the tea trade! — the increased price at which they sold the article not being more than sufficient to balance the immense expenses incident to the monopoly! Perhaps this statement may be somewhat exaggerated, though we incline to think it is not far from the mark. Taking, however, the accounts laid by the Company before the late committee on Indian affairs, as they stand, it would appear that the profits realised by them during the 3 years ending with 1827-28 amounted to 2,542,569*l.*, being at the rate of 847,523*l.* a year. — (*Appen. to Second Report of Select Committee of 1830, p. 95.*) But we have already seen that the excess of price received by the Company for their teas, over the price of similar teas sold at New York and Hamburg, has been above 1,500,000*l.* a year; so that, according to the Company's own showing, their monopoly occasioned an *absolute loss* of 652,477*l.*, exclusive of its mischievous influence in lessening the consumption of tea, and in confining our trade with China to less than a third of what it will probably amount to under a system giving free scope to the energies of individual enterprise.

The renewal of a monopoly productive of such results was, therefore, wholly out of the question. There was hardly, indeed, in 1833, an individual in the empire out of the pale of the Company who was not anxious for the opening of the trade to China; and the act 3 & 4 Will. 4. c. 85. — (see *ante*, p. 529.) — abolishing the Company's monopoly, and making it lawful for all individuals to import tea, was passed with almost no opposition.

#### IV. DUTIES ON TEA. — CONSUMPTION OF TEA IN THE UNITED KINGDOM, THE CONTINENT, THE UNITED STATES, ETC.

Down to the 22d of April, 1834, the duty on tea was an *ad valorem* one of 96 per cent. on all teas sold under 2*s.* a pound, and of 100 per cent. on all that were sold at or above 2*s.* charged on the prices which they brought at the Company's sales. This was, certainly, a high duty; though, as a large amount of revenue must be raised, we do not know, had the trade been free, that it could have been fairly objected to on that ground. But under the monopoly system, the duty was, in fact, about 200 per cent. *ad valorem*! For, the price of the tea sold by the Company being forced up to nearly double what it would have been under a free system, it followed, inasmuch as the duty varied directly as the price, that it also was doubled when the latter was doubled. The price of congou in Hamburg, for example, varied, during the latter years of the monopoly, from 1*s.* 2*d.* to 1*s.* 4*d.* per lb.; and had the Company supplied our markets with congou at the same rate, it would have cost us, duty included, nearly 2*s.* 4*d.* and 2*s.* 8*d.* per lb. But instead of this, the congou sold by the Company was, at an average, a good deal above 2*s.* per lb.; and, the duty being as much, it invariably cost from 4*s.* to 5*s.* per lb. Hence, though the duty was only 100 per cent. on the Company's price, it was really above 200 per cent. on the price of tea in an open market! The mischief of the monopoly was thus greatly aggravated; inasmuch as every addition made by it to the cost of the article, made an equal addition to the duty on it.

The *ad valorem* duties ceased on the 22d of April, 1834; and, under the act 3 & 4 Will. 4. c. 101. all tea imported into the U. Kingdom for home consumption was charged with a customs duty as follows: —

Bohea	-	-	-	-	-	1 <i>s.</i> 6 <i>d.</i> per lb.
Congou, twankay, hyson skin, orange pekoe, and campol	-	-	-	-	-	2 <i>s.</i> 2 <i>d.</i>
Souchong, flowery pekoe, hyson, young hyson, gunpowder, imperial, and other teas not enumerated	-	-	-	-	-	2 <i>s.</i> 0 <i>d.</i>

If we compare these duties with the wholesale prices of tea, they will be seen to have been exceedingly heavy, particularly on bohea and congou. Bohea may be sold, exclusive of duty, at or under 1*s.* per lb.; so that the fixed duty was equivalent to an *ad valorem* duty of 150 per cent.! But to impose such a duty on an article fitted to enter largely into the consumption of the lower classes, seems to be in the last degree oppres-

sive, and, indeed, absurd. It went far to neutralise the beneficial effects that would otherwise have resulted from the abolition of the monopoly; and by confining the consumption of the article within comparatively narrow bounds, rendered the duty less productive than it would have been had it been lower. Nothing can be more injurious, both in a commercial and financial point of view, than the imposition of oppressive duties on articles, the consumption of which would be materially extended by a fall of price; and that such is the case with bohea, is beyond all question. The Company, by reducing its sale price from about 2s. 6d. to 1s. 10½d. per lb. (which was, of course, accompanied by a corresponding reduction of duty) increased the consumption from 1,873,881 lbs. in 1822-23, to 6,474,838 lbs. in 1831-32. Here we have the consumption more than trebled by a fall of about 1s. 3d. per lb. And there can be no doubt that a still further fall, by bringing the article fairly within the command of a greater number of consumers, would have extended the demand for it in a still greater degree.

We regret, however, to have to state that in consequence of the complaints of the importers of tea that the discriminating duties were not fairly assessed, and that teas were sometimes charged at 2s. 2d. or 3s. per lb. that should only have paid 1s. 6d., the duty was repealed in about two years, by the act 5 & 6 Will. 4. c. 32., which enacted that an equal duty of 2s. 1d. per lb. should be charged, after the 1st of July 1836, on all teas entered for consumption in the U. Kingdom.

We incline to think that this is the most objectionable duty in the English tariff. We do not, indeed, deny that the impossibility of fairly assessing a discriminating duty may justify its abandonment in this or any other case. But, seeing that the quality and price of small beer do not differ more from those of strong ale than the quality and price of some sorts of teas differ from those of others, the impossibility of levying discriminating duties must be clearly established to justify a measure so obviously oppressive as the imposing of the same duty on articles which differ so very widely. It is probably true that the statements as to the unfair operation of the discriminating duty were, to a considerable extent, well-founded; and every reasonable person might have anticipated that difficulties would have to be encountered at the outset of the new system. We believe, however, that these were grossly exaggerated; and it is all but certain that a little change in the arrangement of the duties, and additional experience, would have gone far to obviate the inconveniences in question. But government, influenced partly by a wish to get rid of the clamour and outcry raised by the importers, and partly, perhaps, by a doubt whether the duties could ever be fairly collected, unfortunately consented to their abolition, and imposed in their stead the equal duty of 2s. 1d. per lb. specified above.

There can, however, be no manner of doubt that the act 5 & 6 Will. 4. c. 32., repealing the *ad valorem*, and imposing the equal duty, was introduced without due consideration, and that it has been and is most hostile to the public interests. The only considerable difficulty that had to be incurred in assessing the discriminating duties consisted in distinguishing between boheas and congous. But, to obviate this difficulty, it was not necessary to interfere with the duties on other teas; and had the duty on bohea and congou been fixed at the same reasonable amount of 10d. or 1s. per lb., and the duties on other descriptions of teas been allowed to remain as before, the grievance complained of by the importers would have been sufficiently redressed, at the same time that a vast boon would have been conferred on the public.

Tea, in this country, is not a luxury, but a necessary of life, which is decidedly more indispensable to the poor than the rich. Bohea and the lower congous may also be said to be the teas of the former; and, even under the old monopoly system, as many as from 6,000,000 to 7,000,000 lbs. bohea have been sold for consumption in a single year. If we take the average price of bohea in bond in London at 10d. or 1s. per lb., it is seen that the duty we have ventured to suggest would be equivalent to an *ad valorem* duty of 100 per cent., which is as high, certainly, as any duty on a necessary consumed by the poor should be. But, even with a duty of this amount, bohea might be retailed for 2s. or 2s. 4d. per lb.; and, at this price, there can be no question the consumption would amount to several millions of pounds. The reduction of the duty on congou to 1s. per lb. would, also, be of the greatest importance to the lower and middle classes; and the stimulus it would give to consumption makes it all but certain that in no very lengthened period the revenue would lose little, if anything, by the change.

In proof of what has now been stated, we may mention that in 1836, when the quantity of tea entered for consumption amounted to no fewer than 40,490,667 lbs. (exclusive of 8,651,569 lbs. bohea entered to escape the increase of duty), the prices of lower congous, the great article of consumption, amounted, duty paid, to about 3s. per lb., and those of superior congous to about 5s. per do. But, in 1840, when the price of lower congous, duty paid, was about 4s. per lb., and superior congous about 5s. 6d., the consumption fell off to no more than 32,252,628 lbs.; showing clearly that a rise of 1s. per lb. in the price of the teas most generally consumed, and of 6d. in those of the next higher

class, reduced the consumption about 20 per cent. In like manner, in 1842, when prices were about 12½ per cent. lower than in 1840, the consumption rose, notwithstanding the depression that then prevailed, to 37,355,912 lbs.; and a farther fall having taken place in the course of last year (1843), the consumption is understood to have amounted to about 38,000,000 lbs. These facts demonstrate the vast influence of a low price of tea over consumption; and supposing the prices of bohea and congou had, during the last half dozen years, been 35 per cent. lower than the prices which they have actually brought, as would have been the case had the duty on them been fixed at 10d. or 1s. per lb., there can hardly be a doubt that the consumption of tea would at present (1844) have amounted to from 50,000,000 to 60,000,000 lbs. !—(See, for the further proof of what has now been stated, the valuable Circulars of Messrs. Lloyd, Stewart, and Brodrib, 3d of January, 1843, and 2d of January, 1844.)

But, supposing the revenue were to lose, at the outset, some 300,000*l.* or 400,000*l.* a year by the proposed change; is the getting rid of the injustice of the present tax, and the effectual encouragement of the trade with China, not worth a considerably greater sacrifice? Taking the price of Bohea and low congou in bond in London at 1s. per lb. (and it is frequently less), the duty of 2s., with which they are at present charged, is equivalent to an *ad valorem* one of more than two hundred per cent.; whereas, taking the price of the hyson and other superior teas consumed by the rich at from 3s. to 4s. per lb., the duty on them does not exceed from 50 to 66 per cent. *ad valorem*, that is, it does not amount to more than from ¼ to ½ part of the duty laid on the teas consumed by the poor! Surely, however, this is neither an age nor a country in which an anomaly of this sort can be safely maintained. The public necessities require that the tea, sugar, and other necessities of the poor should be taxed; but the most obvious principles of justice require that the duties on them should, if not lower, be, at all events, no higher than those laid on the necessities or luxuries of the rich. The existing tea duties contradict this plain principle, and are at once unjust, exorbitant, and oppressive. The duty on bohea and the lower congous should not, in fact, exceed 6d. per lb.; and we trust that at no distant period means may be found of reducing it to that amount.

We have already endeavoured to show (see art. CANTON) that, without an effectual reduction of the duties on tea, the anticipations so generally entertained of an immense increase of the trade with China, will, most likely, be wholly disappointed. Except tea, the Chinese possess few articles suitable for our markets that we may not import at a cheaper rate from others; and, unless we reduce the oppressive duty now laid on tea in some such way as has been previously suggested, it is idle to look for any considerable increase of its consumption.

We are glad to have to state that these views have been approved by the highest mercantile authorities. Among others, they have been ably set forth by the East India Association of Glasgow, in a memorial which we take leave to subjoin:—

*To the Right Hon. Sir Robert Peel, Bart., First Lord of Her Majesty's Treasury, &c.*

The memorial of the East India Association of Glasgow sheweth—

That your memorialists, being deeply interested in the trade with the East, beg to submit to your lordship the following considerations, arising from the treaty just formed with the emperor of China, and the excitement caused thereby in our markets, in expectation of a very enlarged trade with the Chinese empire.

Your memorialists, in common with all Her Majesty's subjects, heartily rejoice in the treaty thus made, but have many misgivings as to the immediate beneficial effects so generally and ardently anticipated, for the following reasons:—

1st. The direct trade of this country to China has seldom exceeded 1,300,000*l.* per annum.

2d. The annual trade from China has seldom exceeded 4,000,000*l.*, both sums being exclusive of what passes through the medium of America and Australia.

3d. The difference between these has hitherto been made good chiefly by the opium and cotton exported from British India, the former to the annual value of 3,000,000*l.*, and the latter of upwards of 1,000,000*l.*, while the balance of trade against China has been paid in bullion.

4th. The supply of opium and cotton is not likely to be materially reduced under the new arrangements.

5th. The silk of China is constantly losing ground in competition with that of Italy; the miscellaneous articles admit of little increase; and tea, the great staple of China, is already imported to as great an extent as the consumption, limited by high price, requires.

6th. Great Britain, therefore, already exports about as much to China, direct, and from India, as she receives, or can receive, of the produce of the latter.

7th. It is accordingly evident that as yet there is no room for an additional export trade to any considerable extent; because, although there be such an immense territory, and such an almost boundless population in China, and admitting also their entire willingness to accept our productions, yet they have not produce to give which we can at present take in return, as is clearly proved by the large quantity of bullion required from China in order to adjust the balance of trade.

8th. The duty charged by our tariff on tea is equal to 200 per cent. on the shipping cost, viz., 2s. 1d. per lb. on an article which, at an average, costs on board about 1s.; and while a tariff is negotiating in China for the admission of our productions, it is but reasonable to expect that the Chinese will keep in view the monstrous duty charged in England on their staple.

9th. The duty so charged in England falls chiefly on the poor, who are the largest consumers, and it falls the more heavily that they use the low-priced teas.

From these premises your memorialists draw the following inferences:—

1st. That the present high duty on tea restricts very materially the consumption, and by thus limiting the quantity which can be imported, limits also the amount of our exports, which can scarcely, therefore, under existing circumstances, be extended beyond the point already attained; and shows the existing excitement to be founded in delusion, and certain to produce the most ruinous results.

2d. That our high duties are sure to have a corresponding effect in China, not only in the duty chargeable on our manufactures, but probably also in an increased export duty on tea, besides the chance of future troubles arising from such an unnatural position of affairs.

3d. That the intercourse with China having heretofore been confined to a single inconvenient port, and even thereto only to a few Hong merchants, could not be so extended as to increase the quantity of tea taken in return so much as might enable Her Majesty's government to reduce the duty and yet maintain the revenue; but, seeing that these hindrances are removed, that the article can probably be supplied to a very large extent, and that we are now to have access to Fuchoo, the nearest port to the principal place of growth, it is evident that the period has arrived when such a reduction is imperatively called for; and that, unless it be made, there is little prospect of commercial advantage to Great Britain from her late achievements.

4th. That a reduction of the duty on black teas by one half would not only facilitate the formation of a fair tariff with China and increase the amount of our exports, but would greatly add to the comfort, especially, of the poorer class of British subjects; would not (at least it would only partially, and for a time) injure the revenue; and would, moreover, materially increase the consumption of sugar, another article of vast importance to the exchequer.

Your memorialists do therefore humbly, but earnestly commend this subject to your lordship's most serious consideration; and further entreat that Her Majesty's Government will instruct the plenipotentiary to pay most particular attention to the subject of inland or transit duties, as provided for by the treaty, seeing that this has hitherto been one great hindrance to our trade, and that, without a well-arranged system of transit duties, any system of direct import duties (however excellent in itself) will avail but little.

May it therefore please your lordship to consider this subject, with a view to a material reduction in the duty on tea, and the establishment of a fair reciprocity between this country and China; and your memorialists will ever pray.

And the Association have since followed up this memorial by another addressed to Mr. Goulburn, in which they truly state —

"That a trifling reduction of duty would be a mere throwing away of revenue, because, unless it be to such an extent as sensibly to affect the price of the small quantities bought by the poor, it would not accomplish the object of greatly increasing the consumption; but your memorialists are humbly of opinion that if the duty were reduced to 1s. per pound, it would materially increase the consumption, and thereby help to redeem the proportion of revenue given up; which effect would be further aided by the increased consumption of sugar, inasmuch as from four to five pounds of that article are used with every pound of tea."

"When, in addition, therefore, to the increased quantity of manufactures that would be exported, with all the relative benefits attached thereto, your memorialists consider the increase which must necessarily take place in the carrying trade, and all others dependent on it, together with the moral welfare and physical comfort of the people consequent on such a change of habits as would substitute tea for spirits, they cannot but feel that this is a subject of no ordinary importance, and that it ought not to be hastily dismissed on account of a financial difficulty, which may after all be more apparent than real."

And memorials to the same effect have also been laid before government by the East India Association of Liverpool and other important trading bodies.

The reader will perceive that the East India Association of Glasgow do not limit the desired reduction of the duty to boheas and congous, but propose to extend it to all black teas, without exception. And provided there be any considerable difficulty in discriminating between bohea and congou and other teas, we should approve of the proposal. It is of great importance to deprive the importers of all pretence for setting up a fresh clamour. And though we believe there would be little difficulty in distinguishing bohea and congou from other black teas, there can plainly be none in distinguishing between the latter and green teas, at the same time that the revenue will be but little by the indiscriminate reduction of the duty on black teas.

**Capacity of China to furnish additional Supplies of Tea.**—It has been sometimes contended, that were the duties on tea materially reduced, the increased demand of this country could not be supplied, and that the reduction of the duty would not really benefit the British consumer, but the Chinese. Our readers will hardly expect that we should enter at any length into the refutation of so absurd a notion. At the commencement of last century, the entire annual consumption of tea in this country, the Continent, and America, did not certainly amount to 500,000 lbs.; whereas the consumption of Great Britain, the Continent, the U. States, and Australia, amounts at present to about 70,000,000 lbs.; and yet every one acquainted with the history of the trade is aware that, though the consumption has increased more than a hundred and forty times, the prices in all open markets have, with few exceptions, been regularly declining. We may, therefore, rest quite easy upon this point. The production of tea is rapidly extending in China; and the vast extent of that empire, its capacities for raising unlimited quantities of tea, and the extent to which it is there used, negative the idea that any conceivable increase of the consumption of this country should have any perceptible or permanent influence on its cost price.

**Retail Dealers in Tea.**—Retailers of tea are obliged to take out a licence, whose costs 11s. a year. In 1842 their numbers were, in England 82,895, in Scotland 13,368, in Ireland 8,837; making, for the U. Kingdom, a grand total of 105,150.

**ADULTERATION OF TEA.**—It might have been fairly enough anticipated, from the high price, and the high duty on tea, and the facility with which it may be mixed up with foreign substances, that it would not escape adulteration; and the records of the courts of justice show that such is the case; several dealers having been convicted of this pernicious practice. The adulteration is usually effected either by the intermixture of sloe or ash leaves with fresh teas; or by mixing the latter with tea that has been already used. The penalties on such offences are stated below; but the best, or rather the only, security on which any reliance can be placed, is to be found in the character and respectability of the parties dealing in tea. Even were he influenced by nothing else, it would be extreme folly in any person carrying on an extensive business, to engage in such dishonest practices; for they can hardly fail of being detected; and the ruin of his business, that would follow such exposure, would far more than balance whatever gains he could hope to make by his fraudulent schemes.

**Penalties on Adulteration.**—If any dealer in or seller of tea dye or fabricate any sloe or other leaves in imitation of tea, or mix or colour any tea with terra Japonica or other ingredient, or vend or expose to sale, or have in possession the same, he shall forfeit for every pound of such adulteration, 10s.—(4 Geo. 3. c. 14. s. 11.)

Every person, whether a dealer in or seller of tea, or not, who shall dye or fabricate any sloe leaves, liquorice leaves, or the leaves of tea that have been used, or the leaves of the ash, elder, or other tree, shrub, or plant, in imitation of tea, or who shall mix or colour such leaves with terra Japonica, cop-peras, sugar, molasses, clay, logwood, or other ingredient, or who shall sell or expose to sale, or have in custody, any such adulterations in imitation of tea, shall for every pound forfeit, on conviction, by the oath of 1 witness, before 1 justice, 5s.; or on nonpayment, be committed to the house of correction for not more than 12 nor less than 6 months.—(17 Geo. 3. c. 29. s. 1.)

Any person having in possession any quantity exceeding 6 pounds of sloe, ash, or elder leaves, or the leaves of any other tree, plant, or shrub, green or manufactured, and shall not prove to the satisfaction of the justice hearing the matter that the same were gathered with the consent of the owner of the

tree, &c., and that they were gathered for some other purpose than that of being fabricated in imitation of tea, shall forfeit 1s. for every pound in his possession, or, on nonpayment, be committed to prison.—Sect. 2.

If an officer of excise, or other person, make oath that he suspects herbs dyed, or otherwise prepared in imitation of tea, are hid or lodged in any place, a justice may issue a warrant for seizing the same by day or night, (in the night, in presence of a constable,) together with all wagons, carts, and pack-saddles in which they may be contained; the herbs may be directed to be burnt, and the wagons, &c. sold, and after deducting expenses the proceeds to be shared, 1 to the informer, and 1 to the parish. Obstructing such seizure subjects the offender to a penalty of 50s., or not less than 6 nor more than 17 months imprisonment.—Sect. 3.

Herbs not to be burnt, if owner can prove, within 94 hours, that they were gathered with consent of proprietor of trees, plants, or shrubs, and that they were not intended to be fabricated in imitation of tea.—Sect. 4.

Occupier of premises, where herbs are found, liable to the penalties, unless he can prove they were lodged without his consent.—Sect. 5.

**Consumption of Tea on the Continent and in the U. States.**—Of the Continental states, Russia and Holland are the only ones in which the consumption of tea is considerable. In 1841, the imports of tea into Russia amounted to 173,540 pounds, or 6,247,440 lbs. in chests, and 76,104 pounds in bricks. The former consists almost entirely of the

finest varieties of black tea. The consumption of tea in Holland amounts to about 3,000,000 lbs. a year; the duty on which varies from 1½d. to 4½d. per lb. The consumption of France does not exceed 350,000 lbs. The importations into Hamburg vary between 1,500,000 and 2,000,000 lbs., the greater part of which is forwarded to the interior of Germany. The imports into Venice and Trieste do not exceed a few cwt. a year.

The consumption of the U. States amounts to from 15,000,000 to 16,000,000 lbs. a year. Duties on tea used to form one of the largest items of American revenue, having in some years produced 650,000l. Their magnitude, however, was justly complained of; and it is probably owing to this circumstance that, while the consumption of tea was for several years pretty stationary in the U. States, that of coffee increased with even greater rapidity than in England. The secretary of the treasury of the U. States, in his Report for 1827, observed, — "The use of tea has become so general throughout the U. States, as to rank almost as a necessary of life. When to this we add that there is no rival production at home to be fostered by lessening the amount of its importation, the duty upon it may safely be regarded as too high. Upon some of the varieties of the article it considerably exceeds 100 per cent., and is believed to be generally above the level which a true policy points out. A moderate reduction of the duty will lead to an increased consumption of the article, to an extent that, in all probability, would, in the end, rather benefit than injure the revenue. Its tendency would be to enlarge our trade and exports to China; a trade of progressive value, as our cottons and other articles of home production (aside from specie) are more and more entering into it. It would cause more of the trade in teas to centre in our ports; the present rate of duty driving our tea ships, not unfrequently, to seek their markets in Europe, not in the form of re-exportation, but in the direct voyage from China. It would also serve to diminish the risk of the U. States losing any portion of a trade so valuable, through the policy and regulations of other nations." These judicious suggestions could not fail to command attention; and the flourishing state of the revenue in subsequent years having admitted of a very great reduction of duties, those on tea were wholly repealed. As was to be expected, the consumption has since rapidly increased.

**TEAK WOOD, or INDIAN OAK**, the produce of the *Tectona grandis*, a large forest tree, that grows in dry and elevated districts in the south of India, the Burman empire, Pegu, Ava, Siam, Java, &c. Teak timber is by far the best in the East; it works easily, and, though porous, is strong and durable; it is easily seasoned, and shrinks very little; it is of an oily nature, and, therefore, does not injure iron. Mr. Crawford says, that in comparing teak and oak together, the useful qualities of the former will be found to preponderate. "It is equally strong, and somewhat more buoyant. Its durability is more uniform and decided; and to insure that durability, it demands less care and preparation; for it may be put in use almost green from the forest, without danger of dry or wet rot. It is fit to endure all climates and alternations of climate." — (See *Tredgold's Principles of Carpentry*, p. 206.; *Crawford's East. Archip.*, vol. i. p. 451.; *Rees's Cyclopædia*, &c.)

The teak of Malabar, produced on the high table land of the south of India, is deemed the best of any. It is the closest in its fibre, and contains the largest quantity of oil, being at once the heaviest and the most durable. This species of teak is used for the keel, timbers, and such parts of a ship as are under water: owing to its great weight, it is less suitable for the upper works, and is not at all fit for spars. The teak of Java ranks next to that of Malabar, and is especially suitable for planking. The Rangoon or Burman teak, and that of Siam, is not so close grained or durable as the others. It is, however, the most buoyant, and is, therefore, best fitted for masts and spars. Malabar teak is extensively used in the building-yards of Bombay. Ships built wholly of it are almost indestructible by ordinary wear and tear; and instances are not rare of their having lasted from 80 to 100 years; they are said to sail indifferently; but this is probably owing as much to some defect in their construction, as to the weight of the timber. Calcutta ships are never wholly built of teak; the timbers and framework are always of native wood, and the planking and deck only of teak. The teak of Burma, being conveyed with comparatively little difficulty to the ports of Rangoon and Maulmain, is the cheapest and most abundant of any, and it is mainly owing to the facility with which supplies of it are obtained that ship-building is now carried on so very extensively at Maulmain. It is largely exported to Calcutta and Madras. — (See *Rangoon*.) — (*Private information*.)

A species of timber called African teak is pretty largely imported into England, from the west coast of Africa. But, in point of fact, it is not teak, and it is destitute of several of its most valuable properties. It is, however, for some purposes, a useful species of timber.

**TEASEL, or FULLERS' THISTLE** (Ger. *Weberdistel*, *Krotzdistel*; Fr. *Cardon d'carder*; It. *Cardo da cardare*; Sp. *Cardeucha*, *Cardo peinador*). This plant, which is cultivated in the north and west of England, is an article of considerable importance to clothiers, who employ the crooked awns of the heads for raising the nap on woollen cloths; for this purpose they are fixed round the periphery of a large broad wheel, against which the cloth is held while the machine is turned. In choosing teasels, the preference should be given to those with the largest bur, and most pointed, which are generally called *male teasels*. They are mostly used in preparing and dressing stockings and coverlets; the smaller kind, commonly called the fullers' or drapers', and sometimes the *female teasels*, are used in the preparation of the finer stuffs, as cloths, ratens, &c.

**THREAD** (Ger. *Zwirn*; Du. *Garen*; Fr. *Fil*; It. *Refè*; Sp. *Hilo*, *Torzal*; Rus. *Nitki*), a small line made up of a number of fibres of some vegetable or animal substance, such as flax, cotton, or silk; whence its names of linen, cotton, or silk thread.

**TILES** (Ger. *Dachziegel*; Fr. *Tuiles*; It. *Tegole*, *Embrici*; Sp. *Tejas*; Rus. *Tscherepiza*), a sort of thin bricks, dried in kilns, and used in covering and paving different kinds of buildings. The best brick earth only should be made into tiles, — (See **BRICKS AND TILES**.)

**TIMBER** (Ger. *Bauholz*, *Zimmer*; Du. *Timmerhout*; Fr. *Bois de charpente*, *Bois à bâtir*; It. *Legname da fabbricare*; Sp. *Madera de construccion*; Rus. *Strévoi Gess*; Pol. *Cembrowina*), the term used to express every large tree squared, or capable of being squared, and fit for being employed in house or ship building. In the language of the customs, when a tree is sawn into thin pieces, not above 7 inches broad, it is called batten; when above that breadth, such thin pieces are called deal. Wood is the general term, comprehending under it timber, dye woods, fire wood, &c.

Timber is generally sold by the load.

The following are the contents of the loads of different species of timber, hewn and unhewn: —

A load of timber unhewn	-	-	40 cubic feet.	A load of 2½ inch plank	-	-	240 square feet.
squared timber	-	-	50	8 inch plank	-	-	300
1 inch plank	-	-	600 square feet.	3½ inch plank	-	-	170
1½ inch plank	-	-	400	4 inch plank	-	-	150
2 inch plank	-	-	300				

56½ Russian stand. deals 12 feet long, 1½ inch thick, 11 inch broad, make 1 load timber.

56½ Christiana ditto 11 — 1½ — 9 — 1 —

53½ Dram ditto 10 — 1½ — 9 — 1 —

5 Riga logs — — — — 1 —

The price of timber has, owing to the reduction of freight and the greater facility of importation, fallen very materially since the peace of 1815. We subjoin an account of the wholesale prices of the principal species of timber in Liverpool on the 1st of February, 1848: the duties are given in the Tariff.

**TIMBER TRADE.** Having, in separate articles, described those species of timber most in demand in this country, we mean to confine ourselves in this article to a few remarks on the policy of the regulations under which the trade in timber is conducted.

1. *Importance of a cheap Supply of Timber.* — It is surely unnecessary to enter into any lengthened statements on this head. If there be one article more than another with which it is of primary importance that a great commercial and manufacturing nation like England should be abundantly supplied on the lowest possible terms, that article is timber. Owing to the deficiency of our home supplies, most part of the timber, with the exception of oak, required for building ships and houses; and most part, also, of that employed in the construction of machinery; is imported from abroad. Any individual acquainted with the purposes to which timber is applied, but ignorant of our peculiar policy with respect to it, would never, certainly, imagine that such an article could be made the subject of oppressive duties, and of still more oppressive preferences. Timber is not to be looked at in the same light as most other commodities. It is against all principle to impose duties on materials intended to be subsequently manufactured; but timber is the raw material of the most important of all manufactures — that of the instruments of production. Suppose it were proposed to lay a heavy tax on ships, waggons, looms, or work shops when completed; would not such a monstrous proposal be universally scouted? And yet this is what is really done. The finished articles are not, indeed, directly taxed; but the principal material of which they are made, and without which they could not be constructed, is burdened with an exorbitant duty! To dwell on the impolicy of such a tax would be worse than useless. Of all things essential to the prosperity of manufacturing industry, improved and cheap machinery is the most indispensable.

Most individuals amongst us are ready enough to ridicule the contradictory conduct of the French government, who, at the very moment that they are endeavouring to bolster up a manufacturing interest, lay enormous duties on foreign iron, and thus double or treble the price of some of the most important manufacturing implements. Timber is, however, of quite as much importance in this respect as iron; and our conduct in having burdened it with exorbitant duties partakes as largely of the *felo-de-se* character as that of our neighbours! Indeed, as will be immediately seen, it is decidedly less defensible. Some plausible, though inconclusive, reasonings might be urged in defence of duties on iron and timber, were they imposed for the sake of revenue: but even this poor apology for financial ignorance and rapacity cannot be set up in defence of the iron duties of France or the timber duties of England. The former, however, are the least objectionable; they were imposed, and are still kept up, to encourage the production of iron in France: whereas the duties on timber in England have been imposed for the sake, principally, of promoting the lumber trade of Canada, and of forcing the employment of a few thousand additional tons of shipping! We do not sacrifice the goose for the sake of the golden eggs, but for the sake of the offal she has picked up.

2. *Origin and Operation of the discriminating Duty in favour of American Timber.*—The practice of encouraging the importation of the timber of Canada and our other possessions in North America in preference to that of foreign countries, is but of recent growth. It took its rise during the administration of Mr. Vansittart, and bears in every part the impress of his favourite policy. The events that took place in 1808 having seriously affected our previous relations with the Baltic powers, a deficiency in the accustomed supply of timber began to be apprehended; and the ship owners and Canada merchants naturally enough availed themselves of this circumstance, to excite the fears of the ministry, and to induce them to change the fair and liberal system on which the trade in timber had been conducted down to that time, by granting extraordinary encouragement to its importation from Canada. Even as a temporary expedient, applicable to a peculiar emergency, the policy of giving any such encouragement is extremely doubtful. Supposing timber not to have been any longer obtainable from the north of Europe, its price would have risen, and it would, of course, have been imported from Canada, the U. States, or wherever it could be had, without any interference on the part of government. But, in 1809, a large addition was made to the duties previously charged on timber from the north of Europe, at the same time that those previously charged on timber from Canada and our other possessions in America were almost entirely repealed; and in the very next year (1810), the duties thus imposed on Baltic timber were *doubled*! Nor did the increase of duties on such timber stop even here. In 1813, after Napoleon's disastrous campaign in Russia, and when the free navigation of the Baltic had been restored, 25 per cent. was added to the duties on European timber! The expediency of increasing the revenue was, no doubt, pleaded in justification of this measure; but we believe it was really intended to augment the preference in favour of Canada timber; for how could it be supposed that an increase of the duties on an article imported from a particular quarter of the world, that was already taxed up to the very highest point, could add any thing considerable to the revenue, when a convertible article might be imported from another quarter duty free? The various duties laid on European timber amounted, when consolidated by the act 59 Geo. 3. c. 52., to 34 5s. per load.

Admitting, for the moment, that the peculiar and unprecedented aspect of things in 1808 and 1809 warranted the giving of some preference to the importation of timber from Canada, such preference should plainly have ceased in 1813. So long as the communication with the bridge is interrupted, we may be forced to use a boat to cross the river; but when the communication is again opened, and when there is not the remotest chance of its future interruption, it would be a singular absurdity to refuse to resume the use of the bridge, and to continue the costly and inconvenient practice of being ferried over! This, however, is exactly what we did in the case of the Canada trade. Because a fortuitous combination of circumstances obliged us, upon one occasion, to import inferior timber at a comparatively high price, we resolved to continue the practice in all time to come! The history of commerce affords few such displays of gratuitous folly.

The absurdity of this conduct will appear still more striking, if we reflect for a moment on the peculiar situation of the countries in the north of Europe. The nations round the Baltic have made little progress in manufacturing industry. They abound in valuable raw products; but they are wholly destitute of the finer species of manufactured commodities, and of colonies. Nor have they any real inducement to attempt supplying themselves directly with the former, or to establish the latter. Their iron and copper mines, their vast forests, and their immense tracts of fertile and hitherto unoccupied land, afford far more ready and advantageous investments for their deficient capital, than could be found in manufactures or foreign trade. Russia and Prussia have,

indeed, been tempted, by our corn and timber laws, to exclude some species of manufactured goods; but it is not possible that they should succeed in materially limiting our exports to them, provided we did not second their efforts by refusing to admit their products.

Of all the countries in the world, there is obviously none which has so many facilities for carrying on an advantageous trade with the North as Great Britain. We have a surplus of all those products of which Russia, Prussia, Sweden, Denmark, and Norway stand most in need; and, on the other hand, they have a surplus of many of those of which we are comparatively destitute. The immense traffic we carry on with the Baltic does not, therefore, depend, in any considerable degree, on artificial or accidental circumstances. It does not rest on the wretched foundation of Custom-house regulations or discriminating duties, but on the gratification of mutual wants and desires. It has been justly remarked by the Marquis Garnier, the excellent translator of the "Wealth of Nations," that no inconsiderable portion of the increased power and wealth of England may be traced to the growing opulence of Russia. But the Russian empire is yet only in the infancy of civilisation; she must continue for a very long period to advance in the career of improvement; and it will be our own fault if we do not reap still greater advantages from her progress.

Such is the nature of that commerce against which the discriminating duties on timber from the north of Europe aimed a severe blow! In 1809, when this system began, 428,000 tons of British shipping entered inwards from the Baltic. In 1814, the year after the 25 per cent. of additional duty had been imposed on Baltic timber, and when all the ports of that sea were open to our ships, only 242,000 tons of British shipping entered inwards, being little more than the half of what it amounted to when the system began. And notwithstanding the vast increase, in the interval, of population and wealth in the countries round the Baltic, our trade with the different ports on that sea has not even now (1843) recovered from the blows inflicted on it in 1809 and 1813! It is seen from the statements previously laid before the reader (see art. *ELSIKKA*), that in 1842 only 295,435 tons of British shipping left the Baltic for the U. Kingdom.

The following extract from the evidence of Mr. Edward Patzcker, a merchant of Memel, given before the committee of the House of Commons on the foreign trade of the country, in 1821, shows the effect that the increased duties on timber had on the commerce with Prussia:—

"Has there been a great alteration in the timber trade between Memel and this country of late years?"—"Since the war, a great alteration; before the war we used to have 950 to 1,000 English ships in a year, and since the war we have had from 200 to 300 only."

"When you talk of 900 ships, do you mean 900 ships trading between Great Britain and Memel?"—"Yes."

"Do you mean that number of cargoes were loaded in the year for England?"—"Yes."

"How many cargoes were loaded for Great Britain during the last year (1820)?"—"About 270 or 300 cargoes; there have not been more."

"To what cause do you attribute that diminution in the trade?"—"To the high duties in England; for formerly the duties were only 16s. and some pence; now they are 3l. 5s. in a British, and 3l. 8s. in a foreign ship."

"Has that diminished trade in timber produced a great alteration in the circumstances of the people of Prussia?"—"Yes: for it is the only trade which we can carry on; wheat and all the rest of our articles cannot be brought here; timber is the only one that can be brought, and the trade from Poland has very much ceased in consequence of the diminished demand for it; the people cannot sell their goods, and we cannot take such quantities of timber as we used to do; and, therefore, they cannot take English goods from us."

"If such an alteration was to take place in the duties on timber in this country, as to give the Prussians a larger share of the trade than they at present enjoy, do you think that would produce increased friendly feelings on the part of the people of your country to the people of this country?"—"It would. They would certainly take far more goods from hence, as they could get better rid of them. The Poles, also, would take more of them."—(*Report*, 9th of March, 1821, p. 107.)

The effect that the increased duties had on the trade with Norway and Sweden, aggravated as they in some degree were by the method of charging the duty on deals, was still more striking and extraordinary. These countries had few products, except timber and iron, to exchange for our commodities; and as neither of these could be advantageously imported into England under the new system, the trade with them almost entirely ceased; and they were reluctantly compelled to resort to the markets of France and Holland for the articles they had formerly imported from us. In proof of this, we may mention, that the exports to Sweden, which amounted in 1814 to 511,818*l.*, declined in 1819 to 46,656*l.*, and even in 1842 were only 199,913*l.*; while the exports to Norway, which had, in 1815, amounted to 199,902*l.*, fell in 1819 to 64,741*l.*, and in 1842 had only increased to 134,704*l.*

This extraordinary falling off in so very important a branch of our commerce having been established beyond all question by evidence taken before the committees of Lords and Commons on the foreign trade of the country in 1820, an approach to a better system was made in 1821, when the duty on timber from the north of Europe was reduced from 3*l.* 5*s.* to 2*l.* 15*s.* per load, at the same time that a duty of 10*s.* per load was laid on timber from British America. This, however, was a comparatively inefficient measure. It was stated, to be sure, at the time, that the

21. 5s. per load of excess of duty that was thus continued on Baltic timber over that laid on timber imported from Canada, was not more than enough to balance the higher prime cost, the greater freight, and other charges consequent upon the importation of the latter; and that it would, therefore, be in future indifferent to a merchant whether he imported timber from Memel or Miramichi! In point of fact, however, the discriminating duty continued in favour of Canada timber was far too high to allow of this equalisation being effected. So much so has this been the case, that there have been instances of ships loading with timber in the north of Europe, carrying that timber to Canada, and then bringing it to England as Canada timber; the difference of duty having been about sufficient to indemnify the enormous expense of this round-about voyage! We do not mean to say that this has been a common practice; but what are we to think of a commercial regulation that admitted of such an adventure being undertaken with any prospect of success? Admitting, however, that the duty had been adjusted so as to have had the anticipated effect, could any thing be more preposterous and absurd than to impose it on such a principle? There are mines of coal in New Holland; but what should we think, were an attempt made to impose such duties on coals from Newcastle as should render it indifferent to a London merchant whether he imported a cargo of coal from the Tyne or Botany Bay? Now, the case of the timber duties is, in point of principle, precisely the same. We may obtain timber from countries so near at hand that our ships may make 3, 4, 5, and even 6 voyages a year to them\*; and we refused to admit it unless loaded with a duty that raised its price to a level with what was brought from the other side of the Atlantic—a voyage which our ships cannot, at most, perform above twice a year!

3. *Comparative Quality of Baltic and Canada Timber.*—Had the timber of Canada been decidedly superior to that of the north of Europe, something might have been found to say in favour of the discriminating duty; for it might have been contended, with some show of reason, that it was of the utmost consequence, considering the application of timber to ship and house building, and other important purposes, to prevent the importation of an inferior species, even though it might be cheaper. But the system we adopted is of a totally different character. We did not attempt to shut out an article which, though cheap, was inferior; but committed the twofold absurdity of shutting out one that was at once *cheap and superior*!

The committee of the House of Lords observe, in their *First Report on the Foreign Trade of the Country*, that “the North American timber is more soft, less durable, and every description of it more liable, though in different degrees, to the dry rot, than timber of the north of Europe. The red pine, however, which bears a small proportion to the other descriptions of timber, and the greater part of which, though imported from Canada, is the produce of the U. States, is distinguished from the white pine by its greater durability. On the whole, it is stated by one of the commissioners of his Majesty’s navy, most distinguished for practical knowledge, experience, and skill, that the timber of Canada, both oak and fir, *does not possess, for the purpose of ship building, more than half the durability of wood of the same description, the produce of the north of Europe.* The result of its application to other purposes of building is described by timber merchants and carpenters to be nearly similar.”—(p. 4.)

We subjoin the following extracts from the evidence of Sir Robert Seppings, the commissioner alluded to by the committee, whose great intelligence and experience render his opinion of the highest authority:—

“Can you state to the committee the result of any observations that you or others in his Majesty’s service have made, on the durability of timber, the produce of the North American colonies, or timber imported from the north of Europe, applied to the same purposes?”—“About the year 1796, there were a certain number of frigates built of the fir of the Baltic, and their average durability was about *eight years*. About the year 1812, there were a considerable number of frigates built, also of fir of the growth of North America, and their average durability was not *half* that time.”

“You have stated that Canada timber is peculiarly subject to the dry rot, and the dry rot is known to have prevailed lately to a great degree in the navy; has that prevailed principally since the application of Canada timber to the uses of the navy?”—“I believe the navy has suffered very considerably from the introduction of Canada timber, or timber of the growth of North America; and in consequence, from experience, we have entirely discontinued the use of it, except for deals and masts.”—(p. 56.)

Mr. Copland, an extensive builder and timber merchant, being asked by the committee what was his opinion with respect to the comparative qualities of American and Baltic timber, answered,—“The timber of the Baltic in general, speaking of Norway, Russian, Prussian, and Swedish timber, is of a very superior quality to that imported from America; the bulk of the latter is very inferior in quality, much softer in its nature, not so durable, and very liable to dry rot; indeed, it is not allowed by any professional man under government to be used, nor is it ever used in the best buildings in London; it is only speculators that are induced to use it, from the price of it being much lower (in

\* According to the evidence of Mr. J. D. Prowse, secretary to the London Dock Company, ships can make six voyages from Norway, 3 or 4 from Prussia, and 2 from Russia, in a season.—(*Commons’ Report*, p. 89.)

consequence of its exemption from duty) than the Baltic timber; if you were to lay two planks of American timber upon each other, in the course of a twelvemonth they would have the dry rot, almost invariably, to a certain extent."—(p. 56.) And many passages to the same effect might be produced, from the evidence of persons of the greatest experience in building.

Now, we would beg leave to ask whether any thing could be more monstrous, than to force, by means of a system of discriminating duties, a large proportion of the public to use that very timber in the construction of their ships and houses, which government would not use for either of these purposes, and which the most experienced engineers and builders pronounce to be utterly unfit for them? This was not imposing duties on a fair and equal principle for the sake of revenue, but for the sake of securing a preference to a worthless article: it was not imposing them in the way in which they might be least, but in which they were certain to be *most injurious* to those who had to pay them.

It appears from accounts that have been repeatedly published, that, previously to the late alterations, the revenue would have gained considerably more than 1,500,000*l.* a year, had the same duty been laid on Canada timber that was laid on timber from the north of Europe; and this, therefore, may be considered as the amount of the pecuniary sacrifice we consented to make, in order that our ships and houses might be inoculated with dry rot!

4. *Apologies for the discriminating Duty.*—If any thing ought, more than another, to make legislators pause before enacting a restrictive regulation, it is the difficulty of receding from it. After it has been enforced for a while, a variety of interests usually grow up under its protection, which may be materially injured by its repeal. *All*, however, that the persons so interested can justly claim, is, that sufficient time, and every possible facility, should be afforded them to prepare for a change of system. Because the interests of a comparatively small portion of the community may be injuriously affected by the abolition of a regulation ascertained to be in the last degree inimical to the public, is it, therefore, to be contended that we should, at all hazards, continue to enforce the regulation we have so unwisely enacted? To maintain the affirmative, would be to give perpetuity to the worst errors and absurdities; and would be an effectual bar to every sort of improvement. No change, even from a bad to a good system, should be rashly set about: but when once the expediency of an alteration has been clearly established, it ought to be resolutely carried into effect.

It has been objected to the abolition of the discriminating duties on timber, that it would be injurious to Canada and the shipping interest. We believe, however, that the injury would not be nearly so great as has been represented; that it would, in fact, be quite inconsiderable. So far from the *lumber trade*—or the trade of felling wood, squaring it, and floating it down the rivers to the shipping ports—being advantageous to a colony, it is distinctly and completely the reverse. The habits which it generates are quite subversive of that sober, steady spirit of industry, so essential to a settler in a rude country: to such a degree, indeed, is this the case, that lumberers have been described as the pests of a colony, "made and kept vicious by the very trade by which they live."—But, abstracting altogether from the circumstances now alluded to, it has been shown, over and over again, that the abolition of the lumber trade would materially benefit the real interests of the colonies. It is ludicrous, indeed, seeing that not one tree in a hundred is fit for the purposes of being squared for timber, to suppose that the discontinuance of the trade could be any serious loss. But the fact is, that when trees are cut down by lumberers, for export as timber, instead of being burnt down, so great a growth of brushwood takes place, that it actually costs more to clear the ground where the lumberers have been, than where they have not been. Mr. Richards, who was sent out by government to report on the influence of the lumber trade, represented it as most unfavourable; and observed, that, "when time or chance shall induce or compel the inhabitants to desist from this employment, agriculture will begin to raise its head." The statements of Captain Moorsom, in his *Letters from Nova Scotia*, are exactly similar. He considers the depression of the timber market, although a severe loss to many individuals, a "decided gain to the colony," from the check it has given to the "lumbering mania."—(p. 53.)

The statements that have been made as to the amount of capital expended on saw mills, and other fixed works for carrying on the lumber trade, have been singularly exaggerated. Mr. P. Thomson (afterward Lord Sydenham), who had the best means of acquiring accurate information on this point, made the following statement with respect to it in his speech on the 18th of March, 1831:—"From the means I have had of calculating the amount of capital embarked in these saw mills, I believe it is about 300,000*l.*: I am sure I may say that if 500,000*l.* were taken as the amount, it would be a great deal above rather than under the real value; but after all, this description of property is not to be sacrificed by the arrangements proposed, even if they were

carried to the fullest extent. I am ready at once to admit that the consequence of the proposed alteration may be, that it will diminish the exports of timber from Canada to England, and affect the productiveness of the capital vested in the mills to which I have referred; but the committee ought not to lose sight of the fact, that though in this one branch of industry there will be a great falling off, yet the same amount of labour might be applied to much greater advantage on land in the colonies; and the mills, which will be rendered useless for their original purposes, may be converted into useful auxiliaries to the agricultural and other pursuits of the colonists; so that the enormous losses that have been placed in so frightful a point of view, will, as I have shown, be absolutely next to nothing."

The fact is, that in so far as the interests of the colonies are concerned, it is plain they would not really lose, but gain, by a repeal of the discriminating duties on foreign timber. They would still continue to possess a respectable share of the trade; for their timber, though unfit for many important purposes, is well suited, by its freedom from knots, for the finishing of rooms and cabins, the manufacture of boxes, &c.; and in the mast trade, it is believed, that they would be able to maintain a successful competition with Riga.

The ship owners would undoubtedly have more cause to complain of injury from the equalisation of the duties; but even as respects them, it would not be nearly so great as is commonly supposed. From a half to a third part of the timber now brought from Canada would most probably continue to be brought from it were the duties equalised; and a large proportion of the ships thrown out of the Canada trade would be turned into the trade with the north of Europe, whence a much larger quantity of timber would henceforth be brought. It is material, too, to observe, that whatever temporary inconvenience the shipping interest might sustain from the change, its future consequences would be singularly advantageous to it. The high price of timber employed in the building of ships is at present the heaviest drawback on the British ship owners; but the equalisation of the duties would materially reduce this price; and we have the authority of the best practical judges for affirming, that, were the duty repealed, ships might be built decidedly cheaper in England than in any part of the world.

*Changes proposed in the Timber Duties in 1831 and 1835, and effected in 1842.*—Considering the vicious principle on which the duties on timber have been imposed, and their pernicious influence, the tenacity with which they have been supported, and the little opposition made to them, may well excite surprise. In 1831, Lord Althorp (now Earl Spencer) moved that the duties on foreign timber should be reduced 6s. a load on the 1st of January 1832; 6s. more on the 1st of January 1833; and 3s. on the 1st of January 1834; making the whole reduction 15s. a load, and leaving a protection in favour of Canada timber of 30s. a load. The only real objection to this proposal is, that it did not go far enough, that it "scotched the snake without killing it." But, moderate as it was, it was rejected by a large majority, and the project fell to the ground.

In 1835 a committee of the House of Commons, appointed to inquire into the operation of the duties on timber, agreed to the following resolutions:—

1. That it is the opinion of this committee, that the present mode of taking the duties on deals is susceptible of improvement, and that this committee would recommend that a mode be adopted which shall approach more nearly to a payment according to the contents of the deals.
2. That it is the opinion of this committee, that the difference of 45s., now imposed by law upon timber the produce of Europe, as compared with timber the produce of our North American colonies, is too great, and may be reduced.
3. That it is the opinion of this committee, that, having a due regard to the interests which have been created in the British North American colonies by the system hitherto pursued, and to the representations of the shipping interest, a reduction of the protective duty, not exceeding 15s. per load, appears to them to be a fair arrangement.
4. That it is the opinion of this committee, that such reduction be made, so far as may be consistent with the interest of the revenue, without any augmentation on the duty on colonial timber.
5. That it is the opinion of this committee, that, in any alteration made, such alteration should not affect the shipments made in the year 1836.
6. That it is the opinion of this committee, that there should be a uniform mode of taking the duty on deals throughout the U. Kingdom.

But no step was taken to give effect to these resolutions. No private member, unless supported by government, could have expected to succeed in an attempt to accomplish any material modification of the timber duties; and government, influenced perhaps, by a dread of the difficulties in the way of such an attempt, and not, perhaps, having any strong feeling on the subject, did nothing; so that the trade continued on its old footing down to 1842!

Happily, however, the differential duty of 45s. a load in favour of Canada timber has been reduced, by the Tariff Act of the above year, from the 10th of October 1843, to 24s. a load on timber properly so called, and to 30s. on deals. But, though this be a signal improvement on the previous system, it leaves much to be desired; and we do not know that the way in which the change was effected was the best that might have been selected. It was brought about by reducing the previous duties on foreign timber

from 55s. to 35s. and 32s. the load, and the previous duty on British colonial timber from 10s. to 1s. and 2s. per load. While, however, every one must admit that the reduction of the duty on foreign timber was most proper, it is not easy to see why any reduction should have been made in the duty on Canada timber. Had it been allowed to remain as it was, or at 10s. a load, the discriminating duty in favour of colonial timber would still have amounted to 15s. and 22s. a load; and admitting (though we have yet to learn how the principle is in this case to be maintained) that it may be sound policy to give a preference to the timber of our colonies, surely the amount now specified would have been more than ample. And it is material to observe, that, had the duties been arranged in the way pointed out, it is all but certain there would have been little or no loss of revenue, whereas the scheme that has been adopted will, most probably, occasion the loss of 500,000*l.* a year. However, we are grateful for what has been done; and we have little doubt that in no very lengthened period the precedent set in 1842 will be fully carried out, and an end put to the practice of laying high differential duties on a most important article for the sake of colonial possessions that have never been of the smallest advantage to this country.

TIN (Ger. *Blech*, *Weisblech*; Fr. *Fer blanc*; It. *Latta*, *Banda stagnata*; Sp. *Hoja de lata*; Rus. *Blächa*, *Shest*; Arab. *Resas*; Sans. *Trapsu* and *Ranga*), a metal which has a fine white colour like silver; and when fresh, its brilliancy is very great. It has a slightly disagreeable taste, and emits a peculiar smell when rubbed. Its hardness is between that of gold and lead. Its specific gravity is 7.29. It is very malleable; tin-foil, or tin leaf, is about  $\frac{1}{1000}$ th part of an inch thick; and it might be beat out into leaves as thin again, if such were required for the purposes of art. In ductility and tenacity it is very inferior. A tin wire 0.078 inch in diameter is capable of supporting a weight of 34.7 pounds only without breaking. Tin is very flexible, and produces a crackling noise when bent. It may be readily alloyed with copper, zinc, &c., forming very valuable compounds. — (*Thomson's Chemistry*.)

The ores of this metal are found in comparatively few places; the principal, and perhaps the only, ones are Cornwall, Galicia, Erzgebirge in Saxony, Bohemia, the Malay countries, China, and Banca in Asia. They are peculiar to primitive rocks, generally in granite, either in veins or beds, and are often associated with copper and iron pyrites.

Tin is much used as a covering to several other metals: iron is tinned, to prevent its rapid oxidation when exposed to air and moisture; and the same process is applied to copper, to avoid the injurious effects to which those who are in the habit of employing cooking utensils made of this metal are always liable. The solutions of tin in the nitric, muriatic, nitro-sulphuric, and tartaric acids, are much used in dyeing, as giving a degree of permanency and brilliancy to several colours, to be obtained by the use of no other mordants with which we are at present acquainted: tin forms the basis of pewter, in the composition of which it is alloyed with lead; when rolled into thin sheets, it is called tin-foil, and is applied, with the addition of mercury, to cover the surface of glass, thus forming looking-glasses, mirrors, &c.; and in combination with sulphur, it constitutes what is called mosaic gold. — (*Joyce's Chem. Min.*)

Tin PLATES, known in Scotland by the name of *white iron*, are applicable to a great variety of purposes, and are in very extensive demand. They are formed of thin plates of iron dipped into molten tin. The tin not only covers the surface of the iron, but penetrates it completely, and gives the whole a white colour. It is usual to add about 1-10th of copper to the tin, to prevent it from forming too thick a coat upon the iron. — (*Thomson's Chemistry*.)

*Historical Notices of the British Tin Trade.* — The tin mines of Cornwall have been worked from a very remote æra. The voyages of the Phœnicians to the Cassiterides, or tin islands, are mentioned by Herodotus (lib. iii. c. 115.), Diodorus Siculus (lib. iv. p. 301. ed. 1604), and Strabo (*Geog.* lib. iii.). Some difference of opinion has, indeed, been entertained as to the particular islands to which the Phœnicians applied the term Cassiterides; but Borlase (*Account of the Scilly Islands*, p. 72.), Larcher (*Herodote*, tome iii. p. 384. ed. 1802), and the ablest critics, agree that they are the Scilly Islands, and the western extremity of Cornwall. After the destruction of Carthage, the British tin trade, which was always reckoned of peculiar importance, was carried on by the merchants of Marseilles, and subsequently by the Romans. Besides Britain, Spain furnished the ancients with considerable quantities of tin. We have no very precise information as to the purposes to which they applied this metal. It has been supposed that the Phœnicians, so famous for their purple dyes, were acquainted with the use of the solution of tin in nitro-muriatic acid in fixing that colour. The best of the ancient mirrors, or *specula*, were also made of a mixture of copper and tin; and tin was used in the coating of copper vessels. — (*Watson's Chemical Essays*, vol. iv.)

In modern times, the tin mines of Cornwall and Devon have been wrought with various degrees of energy and success. Queen Elizabeth brought over some German miners, by whom some of the processes were improved. During the civil wars, the mines were much neglected. At the commencement of last century, however, the business of mining was carried on with renewed vigour; and from 1720 to 1740 the annual produce was about 2,100 tons. The produce went on gradually increasing, till it amounted, in the 10 years from 1790 to 1800, to 3,254 tons a year. During the next 15 years the produce fell off; and for the 5 years ending with 1815 it was always considerably under 3,000 tons a year. But in the last-mentioned year, a considerable increase took place; and since 1816, the produce has been, with the exception of 1820, always above 3,000

tons a year. The present (1843) average produce of the mines may be estimated at above 5,000 tons a year.

The price of British tin, at an average, from 1811 to 1815, inclusive, was about 72. a cwt. Its fall from 1815 to 1820, and its comparative low price since, have been owing to a variety of causes; partly to improvements in the art of working the mines, partly to the increased supply of metal obtained from them, and partly and principally to the competition of the tin of Banca and of the Malay countries. Previously to 1814, we had in some measure a monopoly of the market of the world. But since then the Banca mines have been wrought with unusual spirit; and their produce has been so much increased, as not only fully to supply the market of China, to which we formerly exported from 600 to 1,000 tons, but to meet us in every European market. Malay tin is now very extensively imported, for warehousing, into England, at the same time that large quantities are carried direct to Holland, where there are refining houses; but, notwithstanding these circumstances, our exports of tin have increased considerably of late years.

*Duty on British Tin.*—All tin produced in Cornwall was subject, from a very remote period down to 1837, to a coinage duty of 4*l.* a ton, payable to the Duke of Cornwall: the tin raised in Devonshire was subject to a similar duty of 1*l.* 13*s.* 4*d.* a ton. This duty produced from 16,000*l.* to 20,000*l.* a year: and was felt to be a serious grievance, not only from its amount, but from the vexatious regulations under which it was collected. Luckily, however, the duty on tin, and all regulations with respect to its coinage, were abolished by 1 & 2 Vict. c. 120. Compensation was made to the duchy of Cornwall for the loss arising from this abolition, by settling on its possessors a perpetual annuity equal to the nett average amount of the duties during the 10 years ending with 1837.

*Tin, ORIENTAL (Malay, Timu; Hind. Kalai; Siamese, Dibuk; Burmese, Kye-p'kyu, white copper),* in commercial language usually called Banca tin. It is found in several provinces of China; but the most extensive and, probably, richest tin district in the world, exists in the Malay countries. This comprehends the whole of the peninsula, from the extreme cape to the latitude of 14° on its western side, and to 11° on its eastern, and comprehends several of the small islands lying in the route between the peninsula and Java, as far as the latitude of 3° south; so that the whole of this tin district has an extreme length of near 1,300 miles. By far the greater number of the mines within these limits are as yet unwrought and unexplored. It was only in the beginning of last century that the mines of Banca, the most productive at present worked, were accidentally discovered. The whole tin of the Malay countries is the produce of alluvial ores, or what is called, in Cornwall, "Stream-work;" and from the abundance in which the mineral has been found by the mere washing of the soil, no attempt has hitherto been made at regular mining, or obtaining the ore from its rocky matrix. Malay tin, consequently, is grain tin, or tin in a very pure state; that being the species which alluvial ore uniformly produces. The mines, or rather excavations, are perpendicular pits of from 15 to 25 feet deep; and when the soil and a superstratum of common clay are removed, the bed containing the ore, consisting of quartz and granitic gravel, is reached. The sand and gravel are separated from the ore by passing a stream of water through the whole materials. The ore so obtained is preserved in heaps, and smelted periodically with charcoal in a blast furnace. The mine or pit is kept clear of water by the Chinese wheel. No cattle are used in any part of the process; human labour being had recourse to throughout the whole of its stages. The most imperfect part of the process is the smelting. The stream ores of Cornwall, which are generally poor, afford from 65 to 75 per cent. of grain tin; whereas, owing to the imperfection of the process, from those of Banca not more than 55 or 60 are usually obtained. The difference in the produce suggested, a few years ago, the practicability of sending the ore to England for the purpose of being smelted; and the experiment was tried; but our customs regulations not allowing the produce to be bonded and re-exported without duty, rendered the scheme abortive.

With very trifling exceptions, the whole tin of the Malay islands is mined and smelted by Chinese settlers; and before their skill and enterprise were applied to its production, the metal seems to have been obtained by the inhabitants of the countries which produced it, by processes hardly more skillful than those by which the precious metals were procured by the native inhabitants of America, prior to the introduction of European skill and machinery. The following estimate has been given of the annual produce of the principal states and places producing tin:—

Piculs.				Piculs.			
East coast of the Malay peninsula.—				West coast of the Malay peninsula and islands.—			
Sumatra	-	-	5,000	Sungora and Pagan	-	-	5,000
Java	-	-	2,000	Tringana	-	-	7,000
Pera	-	-	3,000	Pahang	-	-	3,000
Selangore	-	-	3,000	Singkep	-	-	3,000
Malacca	-	-	4,000	Banca	-	-	35,000
Total	-	-	Piculs 17,000	Total	-	-	Piculs 55,000

This can be considered only as a rough estimate; but we believe it is not far wide of the truth. The most considerable port of exportation is Batavia; from which there is sent annually, either directly or through orders from the Dutch government or the authorities at Banca, 2,000 tons. From Prince of Wales Island there is also a considerable quantity exported; and a smaller direct to China, junks, from several of the native ports on the eastern shore of the Malay peninsula. The great marts for the consumption of tin are China, Hindostan, and the continent of Europe. The quality of the different descriptions of Malay tin, although there may be some inconsiderable difference in the quality of the original ores, seems to be derived chiefly from the greater or less skill with which the process of smelting is conducted; and this, again, necessarily depends upon the extent of capital and goodness of the machinery employed. The mining operations of Banca have long been conducted upon a larger scale, and with more skill, than in any other of the Malay countries; and, consequently, the metal produced in this island is superior by from 10 to 12 per cent.: in the market of Canton it is called "old tin," in contradistinction to "new tin," the produce of the other Malay countries. Next, in point of quality, to the produce of Banca, are those of Tringana and Singkep, which are not more than 5 per cent. inferior to it. The tin of the state of Pera, a considerable part of which is produced by the natives themselves, without Chinese assistance, is the worst, and usually about 15 per cent. below that of Banca. The native tin of China is 10 per cent. inferior to that of Banca, and is probably block tin, like the greater part of that of Cornwall; and, like it, the produce of regular mining operations, and not alluvial. The produce of the Chinese mines is said of late years to have greatly decreased; probably owing to the great increase which has recently taken place in the produce of the Malay countries, and the cheapness and abundance with which it finds its way to China. It should be added, that of late years, and chiefly owing to the very low price and abundance of German spelter (zinc) in the Indian market, this commodity has occasionally been fraudulently mixed with tin. The Chinese brokers of Canton, however, are sufficiently expert to detect the adulteration; and it is believed that this discreditable practice has lately ceased.

The price of tin, taking the market of Singapore as the standard, has fluctuated of late years from 14 to 20 Spanish dollars per picul; equal, at the exchange of 4*s.* per dollar, to 47*s.* and 67*s.* per cwt. At an average of these prices, the annual value of the whole Malay tin will be about 240,000*l.* per annum.—(*Crawford's History of the Indian Archipelago; Dr. Horsfield's MS. Statistical View of the Island of Banca; Singapore Chronicle; Canton Register, &c.*)

**TOBACCO** (Da. *Tobak*; Du. *Tobak*; Fr. *Tabac*; Ger. *Taback*; It. *Tubacco*; Pol. *Tobaka*; Rus. *Tabak*; Sp. *Tubaco*; Arab. *Bujjerbharg*; Hind. *Tumbakū*; Malay,

*Tambriscoo*), the dried leaves of the *Nicotiana Tabacum*, a plant indigenous to America, but which succeeds very well, and is extensively cultivated, in most parts of the Old World. The recent leaves possess very little odour or taste; but when dried, their odour is strong, narcotic, and somewhat fetid; their taste bitter and extremely acid. When well cured, they are of a yellowish green colour. When distilled, they yield an essential oil, on which their virtue depends, and which is said to be a virulent poison. The leaves are used in various ways; being chewed, smoked, and ground and manufactured into snuff. It is in the last mentioned form that tobacco is principally used in Great Britain; and, though the contrary has been often asserted, its use does not seem to be productive of any perceptible bad consequence.

1. *Historical Sketch of Tobacco.* — The taste for tobacco, though apparently administering only to a frivolous gratification, has given birth to a most extensive commerce, and been a powerful spur to industry. Being a native of the New World, its introduction into Europe dates only from the early part of the 16th century. Seeds of the plant were sent, in 1560, from Portugal, to Catherine de' Medici, by Jean Nicot, the French ambassador in that country, from whom it has received its botanical name. The notion, at one time so general, that the specific appellation tobacco was derived from its having been imported from Tobago, is now universally admitted to be without foundation. Humboldt has shown, that tobacco was the term used in the Haytian language to designate the pipe, or instrument made use of by the natives in smoking the herb; and the term, having been transferred by the Spaniards from the pipe to the herb itself, has been adopted by the other nations of the ancient world. — (*Essai Politique sur la Nouvelle Espagne*, vol. iii. p. 50. 2d. edit.) Tobacco is believed to have been first introduced into England by the settlers who returned, in 1586, from the colony which it had been attempted to found in Virginia, under the auspices of Sir Walter Raleigh, in the preceding year. Harriott, who accompanied this expedition, gives, in his description of Virginia, an account of the tobacco plant, and of the manner in which it was used by the natives; adding, that the English, during the time they were in Virginia, and since their return home, were accustomed to smoke it after the fashion of the Indians, "and found many rare and wonderful experiments of the virtue thereof." — (*Hakluyt*, vol. i. p. 75.)

Raleigh, and other young men of fashion, having adopted the practice of smoking, it spread amongst the English; as it had previously spread amongst the Spaniards, Portuguese, French, and other Continental nations. But it made its greatest progress in this country after the foundation of the colony at James Town in Virginia, in 1607. The soil of the colony being found particularly well fitted for the culture of tobacco, considerable quantities were raised and sent home; and the numerous individuals interested in the colony contributed to introduce that taste for it which was diffused amongst all classes with astonishing rapidity.

James I. attempted, by repeated proclamations and publications, some of them couched in very strong terms, to restrain the use of tobacco. But his efforts had very little effect; and the settlers in Virginia continued to experience a more rapidly increasing and better demand for tobacco than for any other product of the colony.

During the earlier part of the reign of Charles I., the trade in tobacco was monopolised by the Crown. This monopoly was not, however, of long continuance, and totally ceased at the breaking out of the civil war.

Tobacco plants had been early introduced into England, and were found to answer remarkably well. Their cultivation was, indeed, prohibited by James, and afterwards by Charles, but apparently without effect. At length, however, the growing consumption of tobacco having excited the attention of the government financiers, it was seen that, by imposing a duty on its importation, a considerable revenue might be raised; but that, were it allowed to be freely cultivated at home, it would be very difficult to collect a duty upon it. In 1643, the Lords and Commons imposed a moderate duty, for the sake of revenue, on plantation tobacco; but instead of directly prohibiting the use of native tobacco, they burdened it with such a duty as, it was supposed, would occasion its culture to be abandoned. The facility, however, with which the duty was evaded, soon satisfied the republican leaders that more vigorous measures were required to stop its cultivation, and consequently to render its importation a source of revenue. Hence, in 1652, an act was passed, prohibiting the growth of tobacco in England, and appointing commissioners to see its provisions carried into effect. This act was confirmed at the Restoration, by the act Charles 2. c. 34., which ordered that all tobacco plantations should be destroyed. These measures were believed, at the time, to have been principally brought about by the solicitations of the planters; but their real intention was not so much to conciliate or benefit the latter, as to facilitate the collection of a revenue from tobacco; and, considered in this point of view, their policy seems quite unexceptionable.

This act did not, however, extend to Ireland; and of late years, the cultivation of

tobacco made considerable progress in that country. Had this been allowed to continue, there can be no question that, in a few years, the revenue from tobacco, amounting to about 3,000,000*l.* a year, would have been materially diminished; for it would be quite visionary to suppose that any plan could have been devised for collecting a duty even of 100 per cent. upon tobacco — (see *post*) — supposing it to have been generally cultivated in Ireland. No one, therefore, can question the wisdom of the act prohibiting its growth in that country, and the rigorous enforcement of its provisions. Any advantage Ireland might have gained by its cultivation, would have been but a poor compensation for the sacrifice of revenue it must have occasioned.

In some countries, as England, tobacco is principally used in the form of snuff; in others it is principally chewed; but, in one form or other, it is every where made use of. So early as 1624, Pope Urban VIII. issued a bull, excommunicating those who smoked in churches! The practice of smoking was at one time exceedingly prevalent in this country; but during the reign of George III. it was well nigh superseded, at least amongst the higher and middle classes, by the practice of snuff-taking. Latterly, however, smoking has been in some measure revived, though it is still very far from being so extensively practised as formerly.

We quote the following statement as to the universality of the use of tobacco from a learned paper on its "Introduction and Use," in the 22d volume (p. 142.) of the *Asiatic Journal*: — "In Spain, France, and Germany, in Holland, Sweden, Denmark, and Russia, the practice of smoking tobacco prevails amongst the rich and poor, the learned and the gay. In the United States of America, smoking is often carried to an excess. It is not uncommon for boys to have a pipe or cigar in the mouth during the greatest part of the day. The death of a child is not unfrequently recorded in American newspapers, with the following remark subjoined: — 'supposed to be occasioned by excessive smoking.' If we pass to the East we shall find the practice almost universal. In Turkey, the pipe is perpetually in the mouth; and the most solemn conferences are generally concluded with a friendly pipe, employed like the *calumet of peace* amongst the Indians. In the East Indies, not merely all classes, but both sexes, inhale the fragrant steam; the only distinction among them consisting in the shape of the instrument employed, and the species of the herb smoked. In China, the habit equally prevails; and a modern traveller in that country (Barrow) states, that every Chinese female, from the age of 8 or 9 years, wears, as an appendage to her dress, a small silken purse or pocket to hold tobacco, and a pipe, with the use of which many of them are not unacquainted at this tender age. This prevalence of the practice, at an early period, amongst the Chinese, is appealed to by M. Pallas as an evidence that 'in Asia, and especially in China, the use of tobacco for smoking is more ancient than the discovery of the New World.' He adds — 'Among the Chinese, and amongst the Mongol tribes who had the most intercourse with them, the custom of smoking is so general, so frequent, and has become so indispensable a luxury; the tobacco pipe affixed to their belt so necessary an article of dress; the form of the pipes, from which the Dutch seem to have taken the model of theirs, so original; and, lastly, the preparation of the yellow leaves, which are merely rubbed to pieces and then put into the pipe, so peculiar; that they could not possibly derive all this from America by way of Europe; especially as India, where the practice of smoking is not so general, intervenes between Persia and China.'"

This, however, is a very doubtful proposition. It seems sufficiently established that the tobacco plant was first brought from Brazil to India about the year 1617; and it is most probable that it was thence carried to Siam, China, and other Eastern countries. The names given to it in all the languages of the East are obviously of European, or rather American, origin; a fact which seems completely to negative the idea of its being indigenous to the East.

*Sources of Supply. Importation into Great Britain.* — Tobacco is now very extensively cultivated in France and other European countries, in the Levant, and in India; but the tobacco of the U. States is still very generally admitted to be decidedly superior to most others. It is much higher flavoured than the tobacco of Europe; its superiority attributable in some degree, perhaps, to a different mode of treatment; but far more, it is believed, to differences of soil and climate.

Previously to the American war, our supplies of tobacco were almost entirely derived from Virginia and Maryland; and they are still principally imported from these states: of 36,680,887 lbs. of unmanufactured tobacco imported in 1840, no fewer than 34,628,886 lbs. came from the U. States. Mr. Jefferson, in his *Notes on Virginia*, has given a very unfavourable view of the effects of the tobacco culture. It was, indeed, well known to be a crop that speedily exhausted all but the very best lands; and in addition to this, Mr. J. says that "it is a culture productive of infinite wretchedness. Those employed in it are in a continued state of exertion, beyond the powers of nature to support. Little food of any kind is raised by them; so that the men and

animals on these farms are badly fed, and the earth is rapidly impoverished."— (English ed. p. 278.)

Tobacco is extensively cultivated in Mexico, but only for home consumption. It might probably, however, were it not for the restrictions under which it is placed, form a considerable article of export from that country. Under the Spanish government, the tobacco monopoly was one of the principal sources of revenue; yielding from 4,000,000 to 4,500,000 dollars, exclusive of the expenses of administration, amounting to about 800,000 dollars. No tobacco was allowed to be cultivated, except in a few specified places. Commissioners, or *guardas de tabaco*, were appointed, whose duty it was to take care that all tobacco plantations without the privileged districts should be destroyed. The government fixed the price at which the cultivators of tobacco were obliged to sell it to its agents. The sale of the manufactured tobacco was farmed out; and *cigars* were not allowed to be sold, except at the royal *estancos*. No one was allowed to use cigars of his own manufacture. This most oppressive monopoly was established in 1764. It has been continued, from the difficulty of supplying the revenue which it produces, by the present government. — (*Humboldt, Nouvelle Espagne*, iii. 49; *Poinsett's Notes on Mexico*, note 116. Lond. ed.)

Cuba is celebrated for its tobacco, particularly its cigars. These consist of the leaves, formed into small rolls, for the purpose of smoking. Formerly their importation into this country was prohibited; but they may now be imported on paying the exorbitant duty of 9s. per lb. Havannah cigars are usually reckoned the best. Previously to 1820, the cultivation and sale of tobacco were subjected to the same sort of monopoly in Cuba as in Mexico; but, at the period referred to, the trade was thrown open. In consequence of the freedom thus given to the business, the production and exportation of tobacco are both rapidly increasing, though hardly, perhaps, so much as might have been expected; the culture of sugar and coffee being reckoned more profitable. In 1842, the declared value of the tobacco and cigars exported from Cuba amounted to 2,211,572 dollars; but there is good reason to think that its real value considerably exceeded this sum.

*Consumption of Duty-paid Tobacco in the U. Kingdom.* — It appears from the following official account, that the consumption of duty-paid tobacco in Great Britain has increased from about 8,000,000 lbs. in 1789, to 16,976,000 lbs. in 1842; the duty having fluctuated during the same period from 1s. 3d. to 4s. and 3s. per lb. There are, however, sufficient grounds for thinking that the consumption would have been at least doubled had the duty continued at 1s. 3d. per lb. But, whatever difference of opinion may exist as to the influence of the duty in Great Britain, there can be none as to its influence in Ireland. The subjoined Table shows that during the 5 years ending with 1798, when the duty was 8d. per lb., the annual average consumption of duty-paid tobacco was 7,337,217 lbs. Since 1798, the population of Ireland has been a good deal more than doubled; and yet, during the 5 years ending with 1842, when the duty was 3s. per lb., the annual average consumption has been only 5,312,020 lbs.; which, making allowance for the increase of population, shows that the consumption has sunk to little more than a fourth part of what it amounted to at the former period! This statement warrants the conclusion, that were the duty on tobacco in Ireland reduced to 1s. per lb., the consumption would be so much increased, that the revenue would gain, and not lose, by the reduction.

*Smuggling.* — The price of tobacco in bond varies from 3d. to 6d. per lb.; so that the duty of 3s. amounts to 1,200 per cent. on the inferior, and to 600 per cent. on the superior qualities. Now, though the use of tobacco be a frivolous, it is, at the same time, an innocent gratification; and we do not really see any reason whatever for loading it with such oppressive duties, even supposing it were possible to collect them. The more the wants and desires of men are multiplied, the more inventive and industrious they become; and so far from preventing luxurious indulgences, a wise government should exert itself to increase their number, and to diffuse a taste for them as widely as possible. But supposing it to be otherwise, still the magnitude of the tobacco duty is altogether indefensible: it is neither calculated to produce the largest amount of revenue, nor to eradicate the taste for the article. Its exorbitancy is advantageous to the smuggler, and to him only. If, as one might be half inclined to suspect, the duty were intended to give life and activity to the nefarious practices of the illicit traders, it has completely answered its object; but in every other point of view, its failure has been signal and complete. "According," said Mr. Poulett Thomson (afterwards Lord Sydenham), in his speech on the taxation of the empire, on the 26th of March, 1830, "according to all accounts laid before the house on this subject, smuggling in this article, in England, Ireland, and Scotland, is carried on to the greatest possible extent. I have heard it stated, and I have the fact upon the best authority, that numbers of vessels are constantly leaving the ports of Flushing, Ostend, &c., carrying contraband tobacco to this country. It is a fact which was established in evidence before a committee of this house, that seventy cargoes of tobacco, containing 3,644,000 lbs., were

smuggled in 1 year, on the coast of Ireland, from the port of Waterford to the Giant's Causeway alone! In Scotland, smuggling in this article is also carried on to a great extent. There is no doubt," he added, "that the only mode of meeting this system of smuggling consists in *fairly reducing the duty upon the article*. I believe that, were the duty upon it reduced to 1s. or 1s. 6d. per lb., the public would be greatly served, and smuggling put down."

We question, indeed, whether, allowing for the clandestine importation, the consumption be relatively less at this moment, in Ireland, than at any former period. Under the present system, government collects an exorbitant duty upon about a *half* of the tobacco consumed in Ireland, the other *half* being supplied by the smuggler; the duty being at once an incentive to his energies, and a premium to indemnify him for his risks! A *third part* of the demand of Great Britain is, probably, supplied in the same way. The smuggler is, in fact, at this moment (1844), able to supply tobacco, in any part of the U. Kingdom, for from 2s. 6d. to 2s. 9d. per lb., whereas the duty on tobacco legitimately imported is no less than 3s.

Account of the Number of Pounds Weight of Leaf Tobacco, manufactured Cigars, and Snuff, that paid Duty in the U. Kingdom, for the Year ending the 5th of January, 1842; with the Gross Amount of Duty received therefrom.

**Regulations as to Importation.**—Tobacco is not to be imported in a vessel of less than 120 tons burden; nor unless in hogheads, casks, chests, or cases, containing at least 100 lbs. nett weight, if from the East Indies; or 400 lbs. weight, if from any other place; or 100 lbs. weight, if cigars; except tobacco from Turkey, which may be packed in separate bags or packages, provided the outward package be a hoghead, cask, chest, or case, containing 450 lbs. nett at least; and except Colombian tobacco, which may be imported in packages made up in rolls of not less than 220 lbs. Tobacco is not allowed to be imported, unless into the following ports; viz. London, Liverpool, Bristol, Lancaster, Cowes, Falmouth, Whitehaven, Hull, Glasgow, Port Glasgow, Greenock, Leith, Newcastle, Plymouth, Belfast, Cork, Drogheda, Dublin, Galway, Limerick, Londonderry, Newry, Sligo, Waterford, and Wexford. A rent of *few* shillings is charged upon every hoghead, cask, chest, or case of tobacco, warehoused in every warehouse provided by the Crown; *2s.* being paid immediately upon depositing the tobacco in the warehouse, and *2s.* more before the tobacco is taken out for home consumption, or exportation; it may remain for *five* years in the warehouse without any additional charge for rent. No abatement is made from the tobacco duties on account of damage; but the merchant may, if he choose, abandon the tobacco, which is to be destroyed. The allowance of duty-free tobacco for each sailor on board his Majesty's navy, and for each soldier on foreign service, is fixed at 2 lbs. per lunar month. Tobacco that has been exported, cannot be re-imported without being subject to the same duty as if it were imported for the first time. Tobacco cannot be entered for exportation in any vessel of less than 70 tons burden. When tobacco is re-shipped for exportation, an allowance is made for shrinkage, from the seller to the buyer, of 20 lbs. per hhd. on Virginia and Kentucky, and 15 lbs. per hhd. on Maryland, on the landing weights; the draft of the former 8 lbs. and of the latter 4 lbs., with a tret on all sorts of 4 lbs. per 104 lbs.

TON, an English weight containing 20 cwt.

**TONNAGE**, in commercial navigation, the number of tons burden that a ship will carry.

The mode in which the tonnage of British ships was formerly ascertained may be seen in the Registry Act, 3 & 4 Will. 4. c. 55. §§ 16. and 17. This mode, however, led to very inaccurate conclusions; and as most shipping charges depend on the tonnage, it occasioned the building of ships of an improper form for the purposes of navigation, in order that, by measuring less than their real burden, they might evade part of the duties. It was, therefore, long felt to be desirable that some change should be made in the plan of measuring ships; but the practical obstacles in the way of the change were greater than might have been supposed. The accurate estimation of the tonnage of a ship is a difficult problem; and it is indispensable that any system to be adopted in practice be not very complex; for if so, it will either be wholly inapplicable, or it will be sure to be incorrectly applied. At best, therefore, only an approximative measurement can be obtained. A committee of scientific and practical gentlemen having been appointed in 1834 to consider the subject, a bill was introduced into parliament, at their recommendation, embodying a plan for the more correct measurement of ships, and was subsequently passed into a law, the 5 & 6 Will. 4. c. 56. The rules it lays down are not so simple or easily applied as those that were previously used; but they give the tonnage of all ships, however built, with tolerable accuracy, and consequently take away the temptation, that till then existed, to build ships of such a form that they might measure less than their true burden. The existing regulations, in regard to the determination of the tonnage, are embodied in the following clauses of the registry act, the 8 & 9 Vict. c. 89.

**The Rule by which Tonnage of Vessels is to be ascertained.**—From and after the commencement of this act the tonnage of every ship or vessel required by law to be registered shall, previous to her being registered, be measured and ascertained while her hold is clear, and according to the following rule; viz. divide the length of the upper deck between the after part of the stem and the fore part of the stern-post into 6 equal parts. Depths: at the foremost, the middle, and the aftermost of those points of division, measure in feet and decimal parts of a foot the depths from the under side of the upper deck to the ceiling at the timber stake; in the case of a break in the upper deck the depths are to be measured from a line stretched in a continuation of the deck. Breadths: divide each of those 3 depths into 5 equal parts, and measure the inside breadths at the following points; viz. at 1-5th and at 4-5ths from the upper deck of the foremost and aftermost depths, and at 2-5ths and 4-5ths from the upper deck of the midship depth. Length: at  $\frac{1}{3}$  the midship depth measure the length of the vessel from the after part of the stem to the fore part of the stern-post; then to twice the midship depth add the foremost and the aftermost depths for the sum of the depths; add together the upper and lower breadths at the foremost division, 3 times the upper breadth and the lower breadth at the midship division, and the upper and twice the lower breadth at the after division, for the sum of the breadths; then multiply the sum of the depths

by the sum of the breadths, and this product by the length, and divide the final product by 3,500, which will give the number of tons for register. If the vessel have a poop or half deck or a break in the upper deck, measure the inside mean length, breadth, and height of such part thereof as may be included within the bulkhead; multiply these 3 measurements together, and dividing the product by 92.4, the quotient will be the number of tons to be added to the result as above found. In order to ascertain the tonnage of open vessels the depths are to be measured from the upper edge of the upper strake. — § 16.

*Mode of ascertaining Tonnage of Steam Vessels.* — In each of the several rules herein-before prescribed when applied for the purpose of ascertaining the tonnage of any ship or vessel propelled by steam, the tonnage due to the cubical contents of the engine room shall be deducted from the total tonnage of the vessel as determined by either of the rules aforesaid, and the remainder shall be deemed the true register tonnage of the said ship or vessel; the tonnage due to the cubical contents of the engine room shall be determined in the following manner; viz. measure the inside length of the engine room in feet and decimal parts of a foot from the foremost to the aftermost bulkhead, then multiply the said length by the depth of the ship or vessel at the midship division as aforesaid, and the product by the inside breadth at the same division at 2-5ths of the depth from the deck, taken as aforesaid, and divide the last product by 92.4, and the quotient shall be deemed the tonnage due to the cubical contents of the engine room. — § 17.

*Length and Cubical Contents of Engine Room to be set forth in Description of Steam Vessel.* — The tonnage due to the cubical contents of the engine room, and also the length of the engine room, shall be set forth in the certificate of registry as part of the description of the ship or vessel, and any alteration of such tonnage due to the cubical contents of the engine room, or of such length of the engine room after registry, shall be deemed to be an alteration requiring registry *de novo* within the meaning of this act. — § 18.

*Rule for measuring Ships with Cargoes on board.* — For the purpose of ascertaining the tonnage of all such ships as there shall be occasion to measure while their cargoes are on board, the following rule shall be observed, and is hereby established; viz. measure first the length on the upper deck between the after part of the stem and the fore part of the stern-post; 2dly, the inside breadth on the under side of the upper deck at the middle point of the length; and, 3dly, the depth from the under side of the upper deck down the pump well to the skin; multiply these 3 dimensions together, and divide the product by 130, and the quotient will be the amount of the register tonnages of such ships; if the vessel have a poop or half deck or a break in the upper deck, measure the inside mean length, breadth, and height of such part thereof as may be included within the bulkhead, multiply these 3 measurements together, and, dividing the product by 92 and 4-10ths, the quotient will be the number of tons to be added to the result above found. — § 19.

*Amount of registered Tonnage to be carved on Main Beam.* — The true amount of the register tonnage of every ship or vessel required by law to be registered, ascertained according to the rule by this act established, shall be deeply carved or cut in figures at least 3 inches in length on the main beam of every such ship or vessel prior to her being registered. — § 20.

*Not to alter Tonnage of Vessels already registered.* — Nothing herein contained shall extend to alter the present measure of tonnage of any ship or vessel which shall have been registered prior to the commencement of this act, unless in cases where the owners of any such ships shall require to have their tonnage established according to the rule herein-before provided, or unless there shall be occasion to have any such ship admeasured again on account of any alteration which shall have been made in the form or burden of the same, in which cases only such ships shall be re-admeasured according to the said rule, and their tonnage registered accordingly. — § 21.

*Tonnage when so ascertained to be ever after deemed the Tonnage.* — Whenever the tonnage of any ship or vessel shall have been ascertained according to the rules herein prescribed, such account of tonnage shall ever after be deemed the tonnage of such ship or vessel, and shall be repeated in every subsequent registry of such ship or vessel, unless it shall happen that any alteration has been made in the form and burden of such ship or vessel, or it shall be discovered that the tonnage of such ship or vessel had been erroneously taken and computed. — § 22.

**TOOLS AND MACHINES.** Under this designation are comprised all sorts of instruments employed to assist in the performance of any undertaking, from the rudest and simplest to the most improved and complex. But we only mention them here for the purpose of making one or two remarks on the restrictions to which the trade in them has been subjected.

*Importation and Exportation of Tools and Machines.* — Tools and machines being instruments of production, it is obviously of the utmost importance that they should be as much improved as possible; and hence the expediency of allowing their free importation. Their exclusion, or the exclusion of the articles of which they are made, would obviously lay every branch of industry carried on in a nation less advanced than others in their manufacture, under the most serious disadvantages. And supposing the implements it employed to be superior to those of other countries when the exclusion took place, the absence of foreign competition, and of the emulation which it inspires, would most probably, in a very short time, occasion the loss of this superiority. The injury arising from the prohibition of most other articles is comparatively limited, affecting only the producers and consumers of those that are prohibited. But a prohibition of machines strikes at the root of every species of industry: it is not injurious to one, or a few branches, but to all.

The question, whether the exportation of machinery ought to be free, is not so easy of solution. It is the duty of a nation to avail itself of every fair means for its own aggrandisement; and supposing the machinery belonging to any particular people were decidedly superior to that employed by their neighbours, and that they had it in their power to preserve this advantage, their generosity would certainly outrun their sense, were they to communicate their improved machinery to others. We do not, however, believe that it is possible, whatever measures may be adopted in that view, for one country to monopolise, for any considerable period, any material improvement in machinery or the arts: and on this ground we think that the late restraints on the exportation of machinery have been wisely abolished. Drawings and models of all sorts of machines used in Manchester, Glasgow, and Birmingham, are to be found in most parts of the Continent; and at Rouen, Paris, &c. numbers of the best English workmen are employed in the manufacture of prohibited ma-

phines. Now, it does certainly appear not a little preposterous to prevent the exportation of a machine, at the same time that we allow (it could not, indeed, be prevented) the free egress of the workmen by whom it is made! The effect of this policy has not been to secure a monopoly of improved machines for the manufacturers of England, but to occasion the emigration of English artisans to the Continent, and the establishment there of machine manufactories under their superintendence. The prejudice that arose from this state of things to the interests of England, is too obvious to require being pointed out. It is plain, therefore, that sound policy would dictate that the exportation of all sorts of machinery, on payment of a moderate duty, should be allowed. A policy of this sort will afford a much more efficient protection to our manufacturers than they have hitherto enjoyed; at the same time that it will tend to keep our artisans at home, and make England the grand seat of the tool as well as of the cotton manufacture; and we are glad to have to announce that this policy has been at length adopted, the act 6 & 7 Victoria, c. 84. having repealed the restraints previously imposed on the exportation of machinery. The total declared value of the machinery and mill-work exported in 1842 amounted to 554,659*l*.

**TOPAZ** (Ger. *Topas*; Fr. *Topase*; It. *Topazio*; Sp. *Topacio*; Rus. *Topas*). The name topaz has been restricted by M. Haüy to the stones called by mineralogists Occidental ruby, topaz, and sapphire; which, agreeing in their crystallisation and most of their properties, were arranged under one species by M. Romé de Lisle. The word topaz, derived from an island in the Red Sea, where the ancients used to find topazes, was applied by them to a mineral very different from ours. One variety of our topaz they denominated Chrysolite. Colour, wine yellow. From pale wine yellow it passes into yellowish white, greenish white, mountain green, sky blue: from deep wine yellow into flesh red and crimson red. Specific gravity from 3.464 to 3.641. — (*Thomson's Chemistry*.)

"**Yellow Topaz.** — In speaking of the topaz, a gem of a beautiful yellow colour is always understood: it is wine yellow of different degrees of intensity; and the fuller and deeper the tinge, the more the stone is esteemed. In hardness it yields to the spinelle.

"There are few gems more universal favourites than the yellow topaz, when perfect: the rich warm tone of its colour, the vivacity of its lustre (which it retains even by the side of the diamond), and its large size, compared with many others, are characters which deservedly entitle it to distinction; it bears accordingly a high price when of good quality.

"It is chiefly employed for necklaces, ear-drops, bracelets, &c. in suit. No little skill and taste are required in cutting and duly proportioning this gem: the table should be perfectly symmetrical, and not too large: the bezel of sufficient depth, and the collet side should be formed in delicate steps. It works easily on the mill, and the lapidaries are in general tolerably well acquainted with it; yet it is uncommon to meet with one well cut.

"The yellow topaz varies in price according to its beauty and perfection. A superlatively fine stone, perfect in colour and workmanship, sufficiently large for an armlet, or any other ornament, and weighing nearly 80 carats, was sold for 100*l*.

"Topazes have become more common since our intercourse with Brazil; consequently they are less in demand, and lower in price. A fine stone of 60 carats may be purchased at from 50*l*. to 85*l*.; and smaller, calculated for ring stones, at from 2*l*. to 4*l*.; but it is not usual to sell them by weight.

"**Pink Topaz.** — This is made from the yellow, which, when of intense colour, is put into the bowl of a tobacco pipe or small crucible, covered with ashes or sand: on the application of a low degree of heat, it changes its colour from a yellow to a beautiful pink. This is performed with little hazard; and if the colour produced happens to be fine, the price is much augmented.

"**Red Topaz.** — This beautiful gem, which very seldom occurs naturally, is of a fine crimson colour, tinged with a rich brown; it is extremely rare, and generally taken to be a variety of ruby, for which I have seen it offered for sale. Its price, from its scarcity, is quite capricious; it has an exquisite pleasing colour, very different from the glare of the artificial pink topaz.

"**Blue Topaz.** — is also a beautiful gem, of a fine celestial blue colour. It has occurred of considerable magnitude; the finest specimen known, I brought in the rough from Brazil; when cut and polished, it weighed about 1½ oz. Smaller specimens are not uncommon, and when light-coloured, are often taken for aqua-marinas, from which they may always be distinguished by their greater weight and hardness, &c.

"**White Topaz.** — is familiarly called *Minas Nova*. It is a beautiful pellucid gem, and is used for bracelets, necklaces, &c. It possesses greater brilliancy than crystal; and, from its hardness, has been used to cover paste, &c., and to form doublets." — (*Mawe on Diamonds*, &c. 2d ed. p. 108—112.)

**TORTOISESHELL** (Fr. *Ecaïlle de Tortue*; It. *Scaglia de Tartaruga*; Ger. *Schilpad*; Malay, *Sirik kurakura*), the brown and yellow scales of the *Testudo imbricata*, or tortoise, a native of the tropical seas. It is extensively used in the manufacture of combs, snuff-boxes, &c., and in inlaying and other ornamental work. The best tortoiseshell is that of the Indian Archipelago; and the finest of this quarter is obtained on the shores of the Spice Islands and New Guinea. When the finest West Indian tortoiseshell is worth, in the London market, 46*s*., the finest East Indian is worth 60*s*. per lb. Under the latter name, however, a great deal of inferior shell is imported, brought from various parts of the East Indies. The goodness of tortoiseshell depends mainly on the thickness and size of the scales, and in a smaller degree on the clearness and brilliancy of the colours. Before the opening of the British intercourse with India, the greater part of the tortoiseshell which eventually found its way to Europe, was first carried to Canton, which then formed the principal mart for the commodity. It is still an article of trade from that city; but the imports and exports are inconsiderable, Singapore being now the chief mart for this article. Its price at

the latter varies from 750 and 900 to from 1,000 to 1,600 dollars per pieul, according to quality.—(*Crawford's Indian Archipelago*; *Singapore Chronicle*; *Canton Register*.)

The imports of tortoiseshell into Great Britain from all places eastward of the Cape of Good Hope amount to about 40,000 lbs. a year. The duty was reduced in 1842 to 1s. per lb.

**TOYS** (Ger. *Spielzeug*, *Speilsachen*; Du. *Speelgoed*; Fr. *Jouets*, *Bimbelots*; It. *Trastulli*; Sp. *Dijes*, *Juguetes de niños*; Rus. *Igrushki*), include every trifling article made expressly for the amusement of children. How frivolous soever these articles may appear in the estimation of superficial observers, their manufacture employs hundreds of hands, and gives bread to many families, in London, Birmingham, &c. The greatness of the demand for them may be inferred, from the fact, that a manufacturer of glass beads, and articles of that description, has received a single order for 500*l.* worth of dolls' eyes!—(*Fourth Report, Artisans and Machinery*, p. 314.) Considerable quantities are also imported from Holland; which supplies us with several sorts of wooden toys on more reasonable terms than we can afford to produce them. But of late years, these have been made in greater abundance in England than formerly. The duty on toys, which down to 1842 was an *ad valorem* one of 20 per cent., produced, in 1840, 4,630*l.*, showing that the value of the toys imported for home use amounted to 23,153*l.* In 1842, the duty was reduced to 10 per cent. *ad valorem*.

**TRAGACANTH**, a species of gum, the produce of the *Astragalus Tragacantha*, a thorny shrub growing in Persia, Crete, and the islands of the Levant. It exudes about the end of June from the stem and larger branches, and soon dries in the sun. It is inodorous; impressing a very slightly bitter taste as it softens in the mouth. It has a whitish colour; is semitransparent; and in very thin, wrinkled, vermiform pieces; it is brittle, but not easily pulverised, except in frosty weather, or in a warmed mortar. It should be chosen in long twisted pieces, white, very clear, and free from all other colours; the brown, and particularly the black pieces, should be wholly rejected.—(*Thomson's Chemistry*; *Dr. A. T. Thomson's Dispensatory*; *Milburn's Orient. Com.*)

The entries of tragacanth for home consumption in 1840 and 1841, were at the rate of 29,435 lbs. a year.

**TREATIES (COMMERCIAL).** By a commercial treaty is meant a treaty between two independent nations, for facilitating, and most commonly, also, regulating the commerce carried on between them.

*Origin, Objects, and Policy of modern Commercial Treaties.*—During the middle ages, and down, indeed, to a comparatively recent period, foreigners resident in a country, whether for commercial or other purposes, were, for the most part, subject to very harsh treatment. At one time, it was usual in England to make aliens liable for the debts and crimes of each other; and the practice, formerly so common, of laying heavier duties on the goods imported and exported by aliens than by British subjects, is not even yet, we grieve to say, altogether abandoned. In France, and some other countries, during the 14th and 15th centuries, a stranger was incapable of bequeathing property by will; and the whole of his personal as well as real estate, fell, at his death, to the king or the lord of the barony. This barbarous law was known by the name of *Droit d'Aubaine*, and was not completely abolished in France till a very late period.—(*Robertson's Charles V.* vol. i. note 29.) Previously to last century, the laws with respect to shipwreck, though infinitely more humane than they had been at a more remote period, were calculated rather to promote the interest of the sovereign of the country, or the feudal lords on whose territories shipwrecked vessels might be thrown, than those of the unfortunate owners or survivors.—(See *WÆCC.*\*) The most serious obstacles were then, also, opposed, by the prevalent insecurity, and the arbitrary nature of the tolls which the lords were in the habit of exacting, to the transit of commodities through the territories of one state to those of another.

Under such circumstances, it became of much importance for commercial states to endeavour to obtain, by means of treaties, that protection and security for the persons and properties of their subjects, when abroad, against unjust treatment and vexatious exactions, which they could not have obtained from the laws of the countries in which they might happen to reside. Thus, it was stipulated by Edward II., in 1325, that the merchants and mariners of Venice should have power to come to England for 10 years, with liberty to sell their merchandise and to return home in safety, "*without having either their persons or goods stopped on account of other people's crimes or debts.*"—(*Anderson, anno 1325.*) The commercial treaties negotiated during the 15th, 16th, and 17th centuries, are full of similar conditions; and there can be no doubt that by

\* The practice of confiscating shipwrecked property continued in France till 1681, when it was abolished by an edict of Louis XIV. It was at one time common in Germany, to use the words of M. Bonchard, "*pour les prédicateurs de prier Dieu en chaire, qu'il se fasse bien des naufrages sur leurs côtes!*"—(*Théorie des Traités de Commerce*, p. 118.) And the fact, that the celebrated jurist Thomasius wrote a dissertation in defence of such prayers, affords, if possible, a still more striking proof of the spirit of the period.

providing for the security of merchants and seamen when abroad, and suspending, with respect to them, the barbarous laws and practices then in force, they contributed materially to accelerate the progress of commerce and civilisation.

Commercial treaties were also negotiated at a very early period for the regulation of neutral commerce during war; and for defining the articles that should be deemed contraband, or which it should not be lawful for neutral ships to convey or carry to either belligerent. These are obviously points that can only be decided by express stipulations.\*

Instead, however, of confining commercial treaties to their legitimate and proper purposes — the security of merchants and navigators, and the facility of commercial transactions — they very soon began to be employed as engines for promoting the commerce of one country at the expense of another. For more than 2 centuries, those engaged in framing commercial treaties have principally applied themselves to secure, either by force or address, some exclusive advantage in favour of the ships and products of their particular countries. Hence these compacts are full of regulations as to the duties to be charged on certain articles, and the privileges to be enjoyed by certain ships, according as they were either produced by or belonged to particular countries. It was in the adjustment of these duties and regulations that the skill of the negotiator was chiefly put to the test. It was expected that he should be thoroughly acquainted with the state of every branch of industry, both in his own country and in the country with which he was negotiating; and he was to endeavour so to adjust the tariff of duties, that those branches in which his own country was deficient might be benefited, and those in which the other was superior might be depressed! The idea of conducting a negotiation of this sort on a fair principle of reciprocity is of very late origin: success in circumventing, in over-reaching, or in extorting from fear or ignorance some oppressive, but at the same time worthless privilege, was long esteemed the only proof of superior talent in negotiators.

In an able tract, attributed to Mr. Eden, afterwards Lord Auckland, published in 1787 (*Historical and Political Remarks on the Tariff of the French Treaty*), there is the following outline of the qualifications necessary to the negotiator of a commercial treaty: — “Besides a general knowledge of the trade and reciprocal interests of the contracting parties, he ought to be precisely acquainted with their several kinds of industry and skill; to discover their wants, to calculate their resources, and to weigh with nicety the state of their finances, and the proportionate interest of their money: nay, further, he should be able to ascertain the comparative population and strength of each country, together with the price and quality both of first materials, and also of the labour bestowed upon them: for this purpose he should inquire into the operations of every class of merchants and manufacturers concerned in the trade; should consult their expectations on each of its several branches; and collect their hopes and fears on the effect of such a commercial revolution, on the competition of rival nations. A good treaty of commerce, independent of the art of negotiation, is pronounced, by one who well knew the extent and difficulty of the subject, to be a ‘*masterpiece of skill*.’” — (p. 10.)

Had Mr. Eden concluded by stating, that no individual, or number of individuals, ever possessed, or ever would possess, the various qualifications which in his estimation were required in negotiating a “good commercial treaty,” he would only have affirmed what is most certainly true. We believe, however, that he had formed a totally false estimate, not only of the qualifications of a negotiator, but of the objects he ought to have in view. It was the opinion of the Abbé Mably — (*Droit Publicque de l’Europe*, tome ii. p. 561.), — an opinion in which we are disposed, with very little modification, to concur, — that when a few general rules are agreed upon for the effectual security of trade and navigation, including the importation and exportation of all commodities not prohibited by law; the speedy adjustment of disputes; the regulations of pilotage, harbour and light-house duties; the protection of the property and effects of merchants in the event of a rupture, &c.; all is done that ought to be attempted in a commercial treaty. It may, indeed, be properly stipulated that the goods of the contracting powers shall be admitted into each other’s ports on the same terms as “those of the most favoured nations,” — that is, that no higher duties shall be charged upon them than on those of others. But here stipulation ought to cease. It is an abuse and a perversion of commercial treaties, to make them instruments for regulating duties or prescribing Custom-house regulations.

We admit, indeed, that occasions may occur, in which it may be expedient to stipulate for a reduction of duties or an abolition of prohibitions on the one side, in return for similar concessions on the other. But all arrangements of this sort should be determined by a convention limited to that particular object; and a fixed and not very distant term should be specified, when the obligation in the convention should expire, and

\* There is a good collection of treaties as to this point. In the Appendix to the excellent work of Lampré, *Del Commercio de l’opoli Neutrali*. — (See CONTRABAND.)

both parties be at liberty to continue or abandon the regulations agreed upon. Generally speaking, all treaties which determine what the duties on importation or exportation shall be, or which stipulate for preferences, are radically objectionable. Nations ought to regulate their tariffs in whatever mode they judge best for the promotion of their own interests, without being shackled by engagements with others. If foreign powers be all treated alike, none of them has just grounds of complaint; and it can rarely be for the interest of any people to show preferences to one over another. Those, for example, by whom we may be most advantageously supplied with foreign products, require no preferences; and if we exclude them, or give a preference to others, we incontestably injure ourselves: and yet 19 out of 20 of the regulations as to duties in commercial treaties have been founded on this preposterous principle. They have been employed to divert trade into channels, where it would not naturally flow; that is, to render it less secure and less profitable than it would otherwise have been.

A great deal of stress has usually been laid upon the advantages supposed to be derived from the privileges sometimes conceded in commercial treaties. But we believe that those who inquire into the subject will find that such concessions have, in every case, been not only injurious to the party making them, but also to the party in whose favour they have been made. The famous commercial treaty with Portugal, negotiated by Mr. Methuen in 1703, was almost universally regarded, for a very long period, as admirably calculated to promote the interests of this country; but it is now generally admitted, by every one who has reflected upon such subjects, that few transactions have taken place by which these interests have been more deeply injured. It stipulated for the free admission of British woollens into Portugal, from which they happened, at the time, to be excluded; but in return for this concession—a concession far more advantageous to the Portuguese than to us—we bound ourselves “for ever hereafter” to admit wines of the growth of Portugal into Great Britain at  $\frac{1}{4}$ ds of the duty payable on the wines of France! Thus, in order to open an access for our woollens to the limited market of Portugal, we consented, in all time to come, to drink inferior wine, bought at a comparatively high price!—(See *WINE*.) This, however, was not all: by excluding one of the principal equivalents the French had to offer for our commodities, we necessarily lessened their ability to deal with us; at the same time that we provoked them to adopt retaliatory measures against our trade. It is owing more to the stipulations in the Methuen treaty than to any thing else, that the trade between England and France—a trade that would naturally be of vast extent and importance—has so long been confined within comparatively narrow limits.

It is visionary to imagine that any nation will ever continue to grant to another any exclusive advantage in her markets, unless she obtain what she reckons an equivalent advantage in the markets of the other. And if a commercial treaty stipulating for an exclusive privilege be really and *bond fide* observed by the country granting the privilege, we may be sure that the concessions made by the country in whose favour it is granted are sufficient fully to countervail it. Those who grasp at exclusive privileges in matters of this sort, or who attempt to extort valuable concessions from the weakness or ignorance of their neighbours, are uniformly defeated in their object. All really beneficial commercial transactions are bottomed on a fair principle of reciprocity; and that nation will always flourish most, and have the foundations of her prosperity best secured, who is a universal merchant, and deals with all the world on the same fair and liberal principles.

The justness of these principles, we are glad to observe, is now beginning to be very generally admitted. Stipulations as to duties and Custom-house regulations are disappearing from commercial treaties; and it is to be hoped that, at no distant period, every trace of them may have vanished.

A good work on the principles, style, and history of commercial treaties is a desideratum. The best we have seen are *Manuel des Pouvoirs des Commerçants*, 4to. Leipzig, 1735; and *Bouchaud, Traité des Traites de Commerce*, 12mo. Paris, 1777. But these are principally works of erudition, and were written before the sound principles of commercial policy had been unfolded. There is no good collection of commercial treaties in the English language; but Mr. Hortalet's work is valuable, as containing the recent treaties in an accessible form.

We subjoin copies of the principal commercial treaties and conventions existing at this moment (January 1844) between Great Britain and other powers.

#### AUSTRIA.

*Treaty of Commerce and Navigation between her Britannic Majesty and the Emperor of Austria, signed at Vienna, July 8. 1808.*

Article 1. From the date of the ratification of this present treaty, British vessels arriving in or departing from the ports of his Majesty the Emperor of Austria, and Austrian vessels arriving in or departing from the ports of the United Kingdom of Great Britain and Ireland, and those of all the possessions of her Britannic Majesty, shall be subject to no other or higher duties or charges, of whatsoever nature they may be, than those which are actually or may hereafter be imposed on national vessels, on their entering into or departing from such ports respectively.

2. All productions of the soil, industry, and art of the states and possessions of his Majesty, the Emperor of Austria, including the said productions which may be exported through the northern outlet of the

Eibe, and the eastern outlet of the Danube, and which may be imported into the ports of the United Kingdom and the possessions of her Britannic Majesty; and also all the productions of the soil, industry, and art of the United Kingdom and possessions of her Britannic Majesty, which may be imported into the ports of his Majesty the Emperor of Austria, shall enjoy reciprocally, in all respects, the same privileges and immunities, and may be imported and exported exactly in the same manner, in vessels of the one as in vessels of the other of the high contracting parties.

3. All commodities which are not the productions of the soil, industry, and art of the two respective states or their possessions, and which may be legally imported from the ports of Austria, including those of the Danube, into the ports of the United Kingdom of Great Britain and Ireland, of Malta, and Gibraltar, and other possessions of her Britannic Majesty, in Austrian vessels, shall be subject to the same duties only which would be paid on the same articles, if they were imported in British vessels.

Her Britannic Majesty extends by this treaty to Austrian navigation and trade, the full benefits of the two British acts of parliament passed on the 28th of August, 1833, regulating the trade and navigation of the United Kingdom and British possessions, as well as all other privileges of commerce and navigation now enjoyed, or to be hereafter granted, by existing laws, by orders in council, or by treaties, to the most favoured nations.

4. All Austrian vessels arriving from the ports of the Danube, as far as Galatz inclusively, shall, together with their cargoes, be admitted into the ports of the United Kingdom of Great Britain and Ireland and of all the possessions of her Britannic Majesty, exactly in the same manner as if such vessels came direct from Austrian ports, with all the privileges and immunities stipulated by the present treaty of navigation and commerce. In like manner, all British vessels, with their cargoes, shall continue to be placed upon the same footing as Austrian vessels, whenever such British vessels shall enter into or depart from the same ports.

5. In consideration of British vessels, arriving direct from other countries than those belonging to the high contracting parties, being admitted with their cargoes into Austrian ports, without paying any other duties whatever than those paid by Austrian vessels, so also the productions of the soil and industry of the parts of Asia or Africa situated within the Straits of Gibraltar, which shall have been brought into the ports of Austria, may be re-exported from thence in Austrian vessels directly into British ports, in the same manner, and with the same privileges, as to all manner of duties and immunities, as if these productions were imported from Austrian ports in British vessels.

6. All commodities and articles of commerce which, according to the stipulations of the present treaty, or by the existing laws and ordinances of the respective states, may be legally imported into or exported from the states and possessions of the two high contracting parties, whether under the British or the Austrian flag, shall in like manner be subject to the same duties, whether imported by national vessels or by those of the other state; and upon all commodities and articles of commerce which may be legally exported from ports of either state, the same premiums, drawbacks, and advantages shall be accorded, whether they are exported by the vessels of the one or by those of the other state.

7. All commodities and articles of commerce, which shall be imported, placed in dépôt, or warehoused in the ports of the states and possessions of the two high contracting parties, so long as they shall remain in dépôt or warehouse, and shall not be used for internal consumption, shall be subject, upon re-exportation to the same treatment and duties, whether that re-exportation shall be made in the vessels of the one or in those of the other state.

8. No priority or preference shall be given, directly or indirectly, by the government of either country, or by any company or corporation, or agent acting on its behalf or under its authority, in the purchase of any article the production of the soil, industry, or art of either of the two states and their possessions, imported into the ports of the other, on account of the nationality of the vessel in which such articles may be imported; it being the true intent and meaning of the high contracting parties, that no difference or distinction whatever shall be made in this respect.

9. In regard to the commerce to be carried on in Austrian vessels with the British possessions in the East Indies, her Britannic Majesty consents to grant the same facilities and privileges to the subjects of his Imperial and Royal Apostolic Majesty, as are or may be enjoyed under any treaty or act of parliament, by the subjects or citizens of the most favoured nations; subject to the laws, rules, regulations, and restrictions, which are or may become applicable to the vessels and subjects of any other foreign country enjoying the like advantages and privileges of trading with the said possessions.

10. The present treaty does not include the navigation and carrying trade between one port and another, situated in the dominions of one contracting party, by the vessels of the other, as far as regards the carrying of passengers, commodities, and articles of commerce; this navigation and transport being reserved to national vessels.

11. The vessels and subjects of the high contracting parties shall, by the present treaty, enjoy reciprocally all the advantages, immunities, and privileges, within the ports of their respective states and possessions, which are now enjoyed by the navigation and commerce of the most favoured nations: the effect hereof being to secure, in the United Kingdom and British possessions, to Austrian vessels and subjects, the full and entire advantages of navigation and commerce allowed by the Navigation Act passed in London on the 28th of August, 1833, and by another act of the same date, regulating the trade of the British possessions abroad; or which may be accorded by orders in council or by treaty to other powers; and in like manner British vessels and subjects shall enjoy, in the ports of the states and possessions of his Imperial and Royal Apostolic Majesty, the full and entire advantages of navigation and commerce granted by existing laws, regulations, and ordinances, or by treaty, to foreign powers; and her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and his Imperial and Royal Apostolic Majesty, engage reciprocally not to grant any favours, privileges, or immunities whatsoever, in matters of commerce and navigation, to the subjects of any other state, which shall not be also at the same time extended to the subjects of the one or of the other of the high contracting parties, gratuitously, if the concession in favour of the other state shall have been gratuitous, or upon giving as nearly as possible the same compensation or equivalent, in case the concession shall have been conditional.

12. The clause of Article VII. of the convention concluded at Paris the 6th November, 1816, between the courts of Great Britain, Austria, Prussia, and Russia, relative to the commerce between the states of his Imperial and Royal Apostolic Majesty and the United States of the Ionian Islands, shall remain in force.

13. The present treaty, after being signed and ratified, shall replace the convention of navigation and commerce concluded the 31st December, 1829, in London, between the governments of his Britannic Majesty and of his Imperial and Royal Apostolic Majesty; and shall continue in force until the 31st of December, 1848; and further, until the expiration of 13 months after one of the high contracting parties shall have notified to the other the intention to terminate its duration. It is further agreed, that in 12 months after one of the high contracting parties has received from the other such notification, this treaty, and all the stipulations it contains, shall cease to be obligatory upon either party.

14. The present treaty shall be ratified, and the ratifications exchanged at Vienna, in the space of one month, or sooner if possible.

In witness whereof, &c. plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at Vienna the 3d day of July, in the year of our Lord 1839.

FREDERIC JAMES LAMB.  
METTERNICH.

*Declaration signed by the respective Plenipotentiaries on the conclusion of the preceding Treaty.*

With a view to prevent beforehand all doubt which might hereafter arise with regard to the true sense of the expressions contained in the treaty of commerce and navigation, signed this day between the plenipotentiaries of her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and of his Majesty the Emperor of Austria, King of Hungary and Bohemia, the high contracting parties have agreed, by common consent, that the French text of the said treaty shall be considered by the Austrian government as the original text.

In witness whereof, the present declaration has been done in duplicate, and signed by the respective plenipotentiaries.

Vienna, 3d July, 1838.

FREDERIC JAMES LAMB.  
METTERNICH.

*Declaration made by the Plenipotentiary of her Britannic Majesty, on the Exchange of the Ratifications of the preceding Treaty.*

In proceeding to the exchange of the ratifications of the treaty of commerce and navigation, between her Majesty the Queen of the United Kingdom of Great Britain and Ireland and his Majesty the Emperor of Austria, King of Hungary and Bohemia, concluded and signed at Vienna on the 3d of July, 1838, the undersigned plenipotentiary of her Britannic Majesty is commanded by her Majesty to explain and declare:—

1. That in the preamble of the said treaty, the words "the commercial relations of their respective states and possessions" shall be understood to mean "the commercial relations between their respective states and possessions," the latter form of words being that adopted in the preamble of the convention of commerce between Great Britain and Austria, signed at London, December 31, 1829.

2. That the stipulations of the third article of the aforesaid treaty of the 3d of July, 1838, relating to goods not the produce of the respective states, shall be understood to be mutual.

3. That by the seventh article of the aforesaid treaty of the 3d of July, 1838, it is understood that goods placed in warehouse shall not be liable to duty unless entered for consumption; and may be exported on the same terms in the ships of the one as in those of the other country.

Her Britannic Majesty's ratification of the aforesaid treaty of commerce and navigation is exchange under the explicit declarations and understandings above mentioned.

Done at Milan, the 14th day of September, 1838.

FREDERIC JAMES LAMB.

*Counter Declaration made by the Austrian Plenipotentiary.*

In consequence of the declaration presented this day by his Excellency, Sir Frederic Lamb, Ambassador of her Britannic Majesty to his Imperial and Royal Apostolic Majesty, on the occasion of the exchange of the ratifications of the treaty of commerce and navigation, concluded and signed at Vienna on the 3d of July, between the plenipotentiaries of his Imperial and Royal Apostolic Majesty, and of her Britannic Majesty, which declaration is conceived in the following terms:—

1. That in the preamble of the said treaty the words "the commercial relations of their respective states and possessions" shall be understood to mean "the commercial relations between their respective states and possessions," the latter form of words being that adopted in the preamble of the convention of commerce signed at London on the 31st of December, 1829, between Austria and Great Britain.

2. That the stipulations of the 3d article of the aforesaid treaty of the 3d of July, 1838, relating to goods not the produce of the respective states, shall be understood to be mutual.

3. That by the 7th article of the treaty of the 3d of July, 1838, it is understood that goods placed in warehouse, shall not be liable to duty, unless entered for consumption; and may be exported on the same terms in the ships of the one as in those of the other country.

The undersigned, chancellor of court and state, is authorised by his Majesty the Emperor, his august master, to accede, in every particular, to this declaration presented by his Excellency the Ambassador of her Britannic Majesty.

Done at Milan, the 14th of September, 1838.

METTERNICH.

## CHINA.

*Treaty between Her Majesty and the Emperor of China, signed, in the English and Chinese Languages, at Nanjing, August 29, 1842. Ratifications exchanged at Hong-Kong, 26th June, 1843.*

Article 1. There shall henceforward be peace and friendship between her Majesty the Queen of the United Kingdom of Great Britain and Ireland and his Majesty the Emperor of China, and between their respective subjects, who shall enjoy full security and protection for their persons and property within the dominions of the other.

2. His Majesty the Emperor of China agrees, that British subjects, with their families and establishments, shall be allowed to reside, for the purpose of carrying on their mercantile pursuits, without molestation or restraint, at the cities and towns of Canton, Amoy, Foo-chow-fu, Ningpo, and Shanghai; and her Majesty the Queen of Great Britain, &c. will appoint superintendents, or consular officers, to reside at each of the above-named cities or towns, to be the medium of communication between the Chinese authorities and the said merchants, and to see that the just duties and other dues of the Chinese government, as hereafter provided for, are duly discharged by her Britannic Majesty's subjects.

3. It being obviously necessary and desirable that British subjects should have some port whereto they may careen and refit their ships when required, and keep stores for that purpose, his Majesty the Emperor of China cedes to her Majesty the Queen of Great Britain, &c. the island of Hong-Kong, to be possessed in perpetuity by her Britannic Majesty, her heirs and successors, and to be governed by such laws and regulations as her Majesty the Queen of Great Britain, &c. shall see fit to direct.

4. The Emperor of China agrees to pay the sum of six millions of dollars, as the value of the opium which was delivered up at Canton in the month of March, 1839, as a ransom for the lives of her Britannic Majesty's superintendents and subjects who had been imprisoned and threatened with death by the Chinese high officers.

5. The government of China having compelled the British merchants trading at Canton to deal exclusively with certain Chinese merchants, called Hong merchants (or Co-Hong), who had been licensed by the Chinese government for that purpose, the Emperor of China agrees to abolish that practice in future at all ports where British merchants may reside, and to permit them to carry on their mercantile transactions with whatever persons they please; and his Imperial Majesty further agrees to pay to the British government the sum of three millions of dollars, on account of debts due to British subjects by some of the said Hong merchants, or Co-Hong, who have become insolvent, and who owe very large sums of money to subjects of her Britannic Majesty.

6. The government of her Britannic Majesty having been obliged to send out an expedition to demand and obtain redress for the violent and unjust proceedings of the Chinese high authorities towards her Britannic Majesty's officer and subjects, the Emperor of China agrees to pay the sum of twelve millions of dollars, on account of the expenses incurred; and her Britannic Majesty's plenipotentiary voluntarily agrees, on behalf of her Majesty, to deduct from the said amount of twelve millions of dollars, any sums which may have been received by her Majesty's combined forces, as ransom for cities and towns in China, subsequent to the 1st day of August, 1841.

7. It is agreed, that the total amount of twenty-one millions of dollars, described in the three preceding articles, shall be paid as follows:—

Six millions immediately.

Six millions in 1843; that is, three millions on or before the 30th of the month of June, and three millions on or before the 31st of December.

Five millions in 1844; that is, two millions and a half on or before the 30th of June, and two millions and a half on or before the 31st of December.

Four millions in 1845; that is, two millions on or before the 30th of June, and two millions on or before the 31st of December.

And it is further stipulated, that interest, at the rate of 5 per cent. per annum, shall be paid by the government of China on any portion of the above sums that are not punctually discharged at the periods fixed.

8. The Emperor of China agrees to release, unconditionally, all subjects of her Britannic Majesty (whether natives of Europe or India), who may be in confinement at this moment in any part of the Chinese empire.

9. The Emperor of China agrees to publish and promulgate, under his Imperial sign manual and seal, a full and entire amnesty and act of indemnity to all subjects of China, on account of their having resided under, or having had dealings and intercourse with, or having entered the service of, her Britannic Majesty, or of her Majesty's officers; and his Imperial Majesty further engages to release all Chinese subjects who may be at this moment in confinement for similar reasons.

10. The Emperor of China agrees to establish at all the ports which are, by the second article of this treaty, to be thrown open for the resort of British merchants, a fair and regular tariff of export and import customs and other dues, which tariff shall be publicly notified and promulgated for general information; and the Emperor further engages, that, when British merchandise shall have once paid at any of the said ports the regulated customs and dues, agreeable to the tariff to be hereafter fixed, such merchandise may be conveyed by Chinese merchants to any province or city in the interior of the empire of China, on paying a further amount as transit duties, which shall not exceed per cent. on the tariff value of such goods.—(See, for Tariff, art. Cawrow.)

11. It is agreed that her Britannic Majesty's chief high officer in China shall correspond with the Chinese high officers, both at the capital and in the provinces, under the term "communication;" the subordinate British officers and Chinese high officers in the provinces, under the term "statement;" on the part of the former, and on the part of the latter, "declaration;" and the subordinates of both countries on a footing of perfect equality: merchants and others not holding official situations, and therefore not included in the above, on both sides, to use the term "representation" in all papers addressed to, or intended for the notice of, the respective governments.

12. On the assent of the Emperor of China to this treaty being received, and the discharge of the first instalment of money, her Britannic Majesty's forces will retire from Nanking and the Grand Canal, and will no longer molest or stop the trade of China. The military post at Chinhae will also be withdrawn; but the islands of Koolangsoo, and that of Chusan, will continue to be held by her Majesty's forces until the money payments, and the arrangements for opening the ports to British merchants, be completed.

13. The ratification of this treaty by her Majesty the Queen of Great Britain, &c. and his Majesty the Emperor of China, shall be exchanged as soon as the great distance which separates England from China will admit; but, in the meantime, counterpart copies of it, signed and sealed by the plenipotentiaries on behalf of their respective sovereigns, shall be mutually delivered, and all its provisions and arrangements shall take effect.

Done at Nanking, and signed and sealed by the plenipotentiaries on board her Britannic Majesty's ship "Cornwallis," this 29th day of August, 1842; corresponding with the Chinese date, twenty-fourth day of the seventh month, in the twenty-second year of Taoukwang.

HENRY POTTINGER,

Her Majesty's Plenipotentiary,

And signed by the seals of four Chinese commissioners.

#### DENMARK.

*Convention of Commerce between Great Britain and Denmark, signed at London, the 16th of June, 1824.*

Article 1. From and after the 1st day of July next, Danish vessels entering or departing from the ports of the United Kingdom of Great Britain and Ireland, and British vessels entering or departing from the ports of his Danish Majesty's dominions, shall not be subject to any other or higher duties or charges whatever, than are or shall be levied on national vessels entering or departing from such ports respectively.

1. All articles of the growth, produce, or manufacture of any of the dominions of either of the high contracting parties, which are or shall be permitted to be imported into or exported from the ports of the United Kingdom and of Denmark respectively, in vessels of the one country, shall, in like manner, be imported into and exported from those ports in vessels of the other.

2. All articles not of the growth, produce, or manufacture of the dominions of his Britannic Majesty, which can legally be imported from the United Kingdom of Great Britain and Ireland into the ports and dominions of the King of Denmark, in British ships, shall be subject only to the same duties as are payable upon the like articles, if imported in Danish ships; and the same reciprocity shall be observed with regard to Danish vessels in the ports of the said United Kingdom of Great Britain and Ireland, in respect to all articles not the growth, produce, or manufacture of the dominions of his Danish Majesty, which can legally be imported into the ports of the United Kingdom in Danish ships.

3. All goods which can legally be imported into the ports of either country, shall be admitted at the same rate of duty, whether imported in vessels of the other country, or in national vessels; and all goods which can be legally exported from the ports of either country, shall be entitled to the same bounties, drawbacks, and allowances, whether exported in vessels of the other country, or in national vessels.

4. No priority or preference shall be given, directly or indirectly, by the government of either country, or by any company, corporation, or agent, acting on its behalf or under its authority, in the purchase of any article the growth, produce, or manufacture of either country imported into the other, on account of or in reference to the character of the vessel in which such article was imported: it being the true intent and meaning of the high contracting parties, that no distinction or difference whatever shall be made in this respect.

5. The high contracting parties having mutually determined not to include in the present convention their respective colonies, in which are comprehended, on the part of Denmark, Greenland, Iceland, and the islands of Ferroe; it is expressly agreed that the intercourse which may at present legally be carried on by the subjects or ships of either of the said high contracting parties with the colonies of the other, shall remain upon the same footing as if this convention had never been concluded.

6. The present convention shall be in force for the term of 10 years from the date hereof; and further, until the end of 13 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same; each of the high contracting parties reserving to itself the right of giving such notice to the other, at the end of the said term of 10 years; and it is hereby agreed between them, that at the expiration of 12 months after such notice shall have been received by either party from the other, this convention, and all the provisions thereof, shall altogether cease and determine.

8. The present convention shall be ratified, and the ratifications shall be exchanged at London, within one month from the date hereof, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at London, the 16th of June, 1834,

GEORGE CANNING.  
W. HURDISON.  
C. E. MOLTER.

*Separate Article.*

The high contracting parties reserve to themselves to enter upon additional stipulations for the purpose of facilitating and extending, even beyond what is comprehended in the convention of this date, the commercial regulations of their respective subjects and dominions, upon the principle either of reciprocal or equivalent advantages, as the case may be. And in the event of any articles or article being concluded between the said high contracting parties, for giving effect to such stipulations, it is hereby agreed, that the article or articles which may hereafter be so concluded shall be considered as forming part of the aforesaid convention.

*Additional Article.*

Their Britannic and Danish Majesties mutually agree, that no higher or other duties shall be levied in either of their dominions (their respective colonies being excepted from the convention of this date), upon any personal property of their respective subjects, on the removal of same from the dominions of their said Majesties reciprocally, either upon the inheritance of such property, or otherwise, than are or shall be payable in each state, upon the like property, when removed by a subject of such state respectively.

**FRANCE.**

*Convention of Commerce between His Britannic Majesty and His Most Christian King, together with two additional Articles thereunto annexed, signed at London, January 26, 1836.*

Article 1. French vessels coming from or departing for the ports of France, or, if in ballast, coming from or departing for any place, shall not be subject, in the ports of the United Kingdom, either on entering into or departing from the same, to any higher duties of tonnage, harbour, light-house, pilotage, quarantine, or other similar or corresponding duties, of whatever nature, or under whatever denomination, than those to which British vessels, in respect of the same voyages, are or may be subject, on entering into or departing from such ports; and, reciprocally, from and after the same period, British vessels coming from or departing for the ports of the U. Kingdom, or, if in ballast, coming from or departing for any place, shall not be subject, in the ports of France, either on entering into or departing from the same, to any higher duties of tonnage, harbour, light-house, pilotage, quarantine, or other similar or corresponding duties, of whatever nature, or under whatever denomination, than those to which French vessels, in respect of the same voyages, are or may be subject, on entering into or departing from such ports; whether such duties are collected separately, or are consolidated in one and the same duty;—his Most Christian Majesty reserving to himself to regulate the amount of such duty or duties in France, according to the rate at which they are or may be established in the U. Kingdom: at the same time, with a view of diminishing the burdens imposed upon the navigation of the two countries, his Most Christian Majesty will always be disposed to reduce the amount of the said burdens in France, in proportion to any reduction which may hereafter be made of those now levied in the ports of the U. Kingdom.

2. Goods which can or may be legally imported into the ports of the U. Kingdom, from the ports of France, if so imported in French vessels, shall be subject to no higher duties than if imported in British vessels; and, reciprocally, goods which can or may be legally imported into the ports of France, from the ports of the U. Kingdom, if so imported in British vessels, shall be subject to no higher duties than if imported in French vessels. The produce of Asia, Africa, and America, not being allowed to be imported from the said countries, nor from any other, in French vessels, nor from France in French, British, or any other vessels, into the ports of the U. Kingdom, for home consumption, but only for warehousing and re-exportation, his Most Christian Majesty reserves to himself to direct that, in like manner, the produce of Asia, Africa, and America, shall not be imported from the said countries, nor from any other, in British vessels, nor from the United Kingdom in British, French, or any other vessels, into the ports of France, for the consumption of that kingdom, but only for warehousing and re-exportation.

With regard to the productions of the countries of Europe, it is understood between the high contracting parties, that such productions shall not be imported, in British ships, into France, for the consumption of that kingdom, unless such ships shall have been laden therewith in some port of the United Kingdom; and that his Britannic Majesty may adopt, if he shall think fit, some corresponding restrictive measure, with regard to the productions of the countries of Europe imported into the ports of the United Kingdom in French vessels: the high contracting parties reserving, however, to themselves the power of making, by mutual consent, such relaxations in the strict execution of the present article, as they may think useful to the respective interests of the 2 countries, upon the principal of mutual concessions, affording each to the other reciprocal or equivalent advantages.

3. All goods which can or may be legally exported from the ports of either of the 2 countries, shall, on their export, pay the same duties of exportation, whether the exportation of such goods be made in British or in French vessels, provided the said vessels proceed, respectively, direct from the ports of the one country to those of the other. And all the said goods so exported in British or French vessels, shall be reciprocally entitled to the same bounties, drawbacks, and other allowances of the same nature, which are granted by the regulations of each country, respectively.

4. It is mutually agreed between the high contracting parties, that in the intercourse of navigation between their 2 countries, the vessels of any third power shall in no case obtain more favourable conditions than those stipulated, in the present convention, in favour of British and French vessels.

5. The fishing-boats on either of the 2 countries, which may be forced by stress of weather to seek shelter in the ports or on the coast of the other country, shall not be subject to any duties or port charges of any description whatsoever; provided the said boats, when so driven in by stress of weather, shall not discharge or receive on board any cargo, or portion of cargo, in the ports or on the parts of the coast where they shall have sought shelter.

6. It is agreed that the provisions of the present convention between the high contracting parties shall be reciprocally extended and in force, in all the possessions subject to their respective dominions in Europe.

7. The present convention shall be in force for the term of 10 years, from the 5th of April of the present year; and further, until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate its operation; each of the high contracting parties reserving to itself the right of giving such notice to the other, at the end of the said term of 10 years: and it is agreed between them, that, at the end of 12 months' extension agreed to on both sides, this convention, and all the stipulations thereof, shall altogether cease and determine.

8. The present convention shall be ratified, and the ratifications shall be exchanged in London, within the space of 1 month, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at London, the 26th day of January, in the year of our Lord 1836.

GEORGE CANNING.  
WILLIAM HURDISON.

LE PRINCE DE POLIGNAC.

*Additional Articles.*

Article 1. French vessels shall be allowed to sail from any port whatever of the countries under the dominion of his Most Christian Majesty, to all the colonies of the United Kingdom (except those possessed by the East India Company), and to import into the said colonies all kinds of merchandise (being productions the growth or manufacture of France, or of any country under the dominion of France), with the exception of such as are prohibited to be imported into the said colonies, or are permitted to be imported only from countries under the British dominion; and the said French vessels, as well as the merchandise imported in the same, shall not be subject, in the colonies of the United Kingdom, to other or higher duties than those to which British vessels may be subject, on importing the same merchandise from any foreign country, or which are imposed upon the merchandise itself.

The same facilities shall be granted, reciprocally, in the colonies of France, with regard to the importation in British vessels of all kinds of merchandise, (being productions the growth and manufacture of the United Kingdom, or any country under the British dominion,) with the exception of such as are prohibited to be imported into the said colonies, or are permitted to be imported only from countries under the dominion of France. And whereas all goods, the produce of any foreign country, may now be imported into the colonies of the United Kingdom, in the ships of that country, with the exception of a limited list of specified articles, which can only be imported into the said colonies in British ships, his Majesty the King of the United Kingdom reserves to himself the power of adding to the said list of excepted articles any other, the produce of the French dominions, the addition whereof may appear to his Majesty to be necessary for placing the commerce and navigation to be permitted to the subjects of each of the high contracting parties with the colonies of the other, upon a footing of fair reciprocity.

3 French vessels shall be allowed to export from all the colonies of the United Kingdom (except those possessed by the East India Company) all kinds of merchandise which are not prohibited to be exported from such colonies in vessels other than those of Great Britain; and the said vessels, as well as the merchandise exported in the same, shall not be subject to other or higher duties than those to which British vessels may be subject, on exporting the said merchandise, or which are imposed upon the merchandise itself; and they shall be entitled to the same bounties, drawbacks, and other allowances of the same nature, to which British vessels would be entitled, on such exportation.

The same facilities and privileges shall be granted, reciprocally, in all the colonies of France, for the exportation in British vessels, of all kinds of merchandise, which are not prohibited to be exported from such colonies in vessels other than those of France.

These 3 additional articles shall have the same force and validity as if they were inserted, word for word, in the convention signed this day. They shall be ratified, and the ratifications shall be exchanged at the same time.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

LE PRINCE DE POLIGNAC.

A Treasury letter, dated 26th of March, 1826, directs that French vessels, and their cargoes legally imported or exported on board the same, according to the terms of the convention in the preceding pages, are, from the 5th of April, 1826, to be charged with such and the like duties only, of whatever kind they may be, that are charged on British vessels, and similar cargoes laden on board thereof; and in like manner the same bounties, drawbacks, and allowances are to be paid on articles exported in French vessels, that are paid, granted, or allowed on similar articles exported in British vessels. And the necessary instructions are to be transmitted to the officers in the colonies for carrying into effect the stipulations contained in the 2 additional articles of the said convention, respecting French vessels and their cargoes, from the 1st of October, 1826.

A convention regulating the respective limits of the British and French oyster and other fisheries was signed at Paris, on the 2nd of August, 1826.

#### Hanse Towns.

*Convention of Commerce between His Britannic Majesty, and the Free Hanseatic Republics of Lubeck, Bremen, and Hamburg, signed at London, Sept. 29. 1826.*

Article 1. From and after the date hereof, British vessels entering or departing from the ports of the free Hanseatic republics of Lubeck, Bremen, or Hamburg; and Lubeck, Bremen, or Hamburg vessels entering or departing from the ports of the United Kingdom of Great Britain and Ireland, shall not be subject to any other or higher ship duties or charges than are or shall be levied on national vessels entering or departing from such ports respectively.

2. All goods, whether the production of the territories of the free Hanseatic republics of Lubeck, Bremen, or Hamburg, or of any other country, which may be legally imported from any of the ports of the said republics into the United Kingdom of Great Britain and Ireland in British vessels, shall, in like manner, be permitted to be imported in Lubeck, Bremen, or Hamburg vessels; and all goods, whether the productions of any of the dominions of his Britannic Majesty, or of any other country, which may be legally exported from the ports of the United Kingdom in British vessels, shall, in like manner, be permitted to be exported from the said ports in Lubeck, Bremen, or Hamburg vessels. And all goods, which may be legally imported into or exported from the ports of Lubeck, Bremen, or Hamburg, in national vessels, shall, in like manner, be permitted to be imported into or exported from the ports of Lubeck, Bremen, or Hamburg, in British vessels.

3. All goods which can be legally imported into the ports of the United Kingdom directly from the ports of Lubeck, Bremen, or Hamburg, or either of them, shall be admitted at the same rate of duty, whether imported in British vessels, or in vessels belonging to either of the said republics; and all goods which can be legally exported from the United Kingdom, shall be entitled to the same bounties, drawbacks, and allowances, whether exported in British or Hanseatic vessels. And the like reciprocity shall be observed, in the ports of the said republics, in respect to all goods which can be legally imported into or exported from any or either of the said ports in vessels belonging to the United Kingdom.

4. No priority or preference shall be given, directly or indirectly, by any or either of the contracting parties, nor by any company, corporation, or agent, acting on their behalf or under their authority, in the purchase of any article, the growth, produce, or manufacture of their states respectively, imported into the other, on account of or in reference to the character of the vessel in which such article was imported; it being the true intent and meaning of the high contracting parties that no distinction or difference whatever shall be made in this respect.

5. In consideration of the limited extent of the territories belonging to the republics of Lubeck, Bremen, and Hamburg, and the intimate connection of trade and navigation subsisting between these republics, it is hereby stipulated and agreed, that any vessel which shall have been built in any or either of the ports of the said republics, and which shall be owned exclusively by a citizen or citizens of any or either of them, and of which the master shall also be a citizen of either of them, and provided 3/4ths of the crew shall be subjects or citizens of any or either of the said republics, or of any or either of the states comprised in the Germanic Confederation, such vessel, so built, owned, and navigated, shall, for all the purposes of this convention, be taken to be and be considered as a vessel belonging to Lubeck, Bremen, or Hamburg.

6. Any vessel, together with her cargo, belonging to either of the three free Hanseatic republics of Lubeck, Bremen, or Hamburg, and coming from either of the said ports to the United Kingdom, shall,

for all the purposes of this convention, be deemed to come from the country to which such vessel belongs; and any British vessel and her cargo trading to the ports of Lubeck, Bremen, or Hamburg, direct, or in succession, shall, for the like purposes, be on the footing of a Hanseatic vessel and her cargo making the same voyage.

7. It is further mutually agreed that no higher or other duties shall be levied, in any or either of the states of the high contracting parties, upon any personal property of the subjects and citizens of each respectively, on the removal of the same from the dominions or territory of such states, (either upon inheritance of such property, or otherwise,) than are or shall be payable, in each state, upon the like property when removed by a subject or citizen of such state respectively.

8. The high contracting parties reserve to themselves to enter upon additional stipulations for the purpose of facilitating and extending, even beyond what is comprehended in the convention of this date, the commercial relations of their respective subjects and dominions, citizens and territories, upon the principle either of reciprocity or equivalent advantages, as the case may be; and, in the event of any article or articles being concluded between the said high contracting parties, for giving effect to such stipulations, it is hereby agreed that the article or articles which may hereafter be so concluded shall be considered as forming part of the present convention.

9. The present convention shall be in force for the term of 10 years from the date hereof; and further, until the end of 12 months after the King of the United Kingdom of Great Britain and Ireland, on the one part, or the governments of the free Hanseatic republics of Lubeck, Bremen, or Hamburg, or either of them, on the other part, shall have given notice of their intention to terminate the same; each of the said high contracting parties reserving to itself the right of giving such notice to the other at the end of the said term of 10 years; and it is hereby agreed between them, that, at the expiration of 12 months after such notice shall have been received by either of the parties from the other, this convention, and all the provisions thereof, shall altogether cease and determine, as far as regards the states giving and receiving such notice; it being always understood and agreed, that, if one or more of the Hanseatic republics aforesaid shall, at the expiration of 10 years from the date hereof, give or receive notice of the proposed termination of this convention, such convention shall, nevertheless, remain in full force and operation as far as regards the remaining Hanseatic republics or republic which may not have given or received such notice.

10. The present convention shall be ratified, and the ratifications shall be exchanged at London, within one month from the date hereof, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

GEORGE CANNING.  
W. HUKKISSON.  
JAMES COLQUHOUN.

*Supplementary Convention to the Treaty of Commerce and Navigation of the 29th of September, 1825, between the Senates of the Free Hanseatic Cities of Lubeck, Bremen, and Hamburg, and her Majesty the Queen of Great Britain and Ireland; signed at London, the 3d of August, 1841.*

Art. 1. The senate of the free Hanseatic cities of Lubeck, Bremen, and Hamburg, hereby agree that British vessels coming from countries not being part of the dominions of her Britannic Majesty, shall henceforward, together with their cargoes, be admitted into the ports of Lubeck, Bremen, and Hamburg, and all vessels shall on their admission pay dues not higher nor other than those which shall be paid in similar circumstances by vessels belonging to Lubeck, Bremen, or Hamburg, and the duties to be paid upon the cargoes of such British vessels shall not be higher nor other than if such cargoes had been imported in vessels belonging to Lubeck, Bremen, or Hamburg. And in consideration thereof, her Britannic Majesty agrees that from and after the date of the exchange of the ratification of this present convention, the vessels of the said free Hanseatic republics of Lubeck, Bremen, and Hamburg, when coming from Hanseatic ports, shall, together with their cargoes, be admitted into the ports of all her Britannic Majesty's possessions; and such vessels shall, on their admission, pay dues not higher nor other than those which shall be paid in similar circumstances by British vessels; and the duties to be paid upon the cargoes of such Hanseatic vessels shall not be higher nor other than if such cargoes had been imported in British vessels.

2. In consideration of the privileges extended to British trade and navigation by the first article of the present convention, her Britannic Majesty further agrees that all goods, being the produce of the states of the free Hanseatic cities of Lubeck, Bremen, and Hamburg, or of the other states of the Germanic Confederation, or of the states comprised in the Germanic Union of Customs, and which may be imported in any foreign vessels from the ports of Lubeck, Bremen, and Hamburg; or from any port situated on the Elbe or Weser, into the ports of the British possessions abroad, including Gibraltar and Malta, shall also be permitted to be imported from the said ports of the free cities of Lubeck, Bremen, and Hamburg, into the ports of the said British possessions abroad, including Gibraltar and Malta, in vessels belonging to Lubeck, Bremen, and Hamburg, built, owned, and navigated as stipulated in the fifth article of the convention of commerce and navigation, concluded on the 29th of September, 1825, between Great Britain on the one part, and the free Hanseatic cities of Lubeck, Bremen, and Hamburg on the other part; and such goods, wares, and merchandise being the produce of the free Hanseatic republics, or of the other states of the German Confederation, or of the states of the Germanic Union of Customs, and so imported in Hanseatic vessels into the ports of the said British possessions abroad, including Gibraltar and Malta; and all goods, wares, and merchandise exported in Hanseatic vessels, built, owned, and navigated as aforesaid, from the ports of the British possessions abroad, including Gibraltar and Malta, to any foreign country whatever, shall pay no other or higher duties than if the same were imported or exported in British vessels.

3. The present convention, which shall be considered as supplementary to the convention concluded between Great Britain and the free Hanseatic republics on the 29th of September, 1825, shall be ratified, and the ratifications shall be exchanged at London as soon as possible within the space of six weeks.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed the seals of their arms.

Done at London, on the 3d day of August, in the year of our Lord 1841.

PALMERSTON.  
BANKS.

By an order in council dated September 14. 1841, her Majesty is pleased to order that all goods being the produce of the states of the free Hanseatic cities of Lubeck, Bremen, and Hamburg, or of the other states of the Germanic Confederation, or of the states comprised in the Germanic Union of Customs, and which may be imported in any foreign vessels from the ports of Lubeck, Bremen, and Hamburg, or from any port situated on the Elbe or Weser into the ports of the British possessions abroad, including Gibraltar and Malta, shall also be permitted to be imported from the said ports of the free cities of Lubeck, Bremen, and Hamburg, into the ports of the said British possessions abroad (including Gibraltar and Malta) in vessels belonging to Lubeck, Bremen, and Hamburg, built, owned, and navigated as stipulated in the fifth article of the convention of commerce and navigation, concluded on the 29th of September, 1825, between Great Britain on the one part, and the free Hanseatic cities of Lubeck, Bremen, and Hamburg on the other part; and such goods, being the produce of the free Hanseatic republics, or of the other states of the Germanic Confederation, or of the states of the Germanic Union of Customs, and so imported in Hanseatic vessels into the ports of the said British possessions abroad

(including Gibraltar and Malta), and all goods exported in Hanseatic vessels, built, owned, and navigated as aforesaid, from the ports of the British possessions abroad (including Gibraltar and Malta) to any foreign country whatever, shall pay no other or higher duties than if the same were imported or exported in British vessels.

## GREECE.

*Convention of Commerce and Navigation between her Britannic Majesty and the King of Greece, signed at London, October 4th, 1837.*

Art. 1. From and after the exchange of the ratifications of the present convention, Greek vessels entering into or departing from the ports of the United Kingdom of Great Britain and Ireland, and British vessels entering into or departing from the ports of the kingdom of Greece, shall not be subject to any other or higher duties or charges whatever, than are or shall be levied on national vessels entering into or departing from such ports, respectively.

2. All articles, the growth, produce, or manufacture of the dominions of either of the high contracting parties, which are or shall be permitted to be imported into or exported from the ports of the United Kingdom of Great Britain and Ireland, and of the kingdom of Greece, respectively, in vessels of the one country, shall, in like manner, be permitted to be imported into and exported from those ports, in vessels of the other country.

3. All articles not the growth, produce, or manufacture of the dominions of her Britannic Majesty, which can legally be imported from the United Kingdom of Great Britain and Ireland into the ports of the kingdom of Greece in British ships, shall be subject only to the same duties as are payable upon the like articles if imported in Greek vessels. And, conversely, similar rule shall be observed in the ports of the United Kingdom in respect of all articles not the growth, produce, or manufacture of the dominions of his Majesty the King of Greece, which can legally be imported into the ports of the United Kingdom in Greek vessels.

4. All goods, wares, and merchandise, which can legally be imported into the ports of either country, shall be admitted at the same rate of duty, whether imported in national vessels or in vessels of the other country; and all goods, wares, and merchandise which can legally be exported from the ports of either country, shall be entitled to the same bounties, drawbacks, and allowances, whether exported in vessels of the one country or in those of the other.

5. Neither of the two governments, and no company, corporation, or agent, acting on behalf of or under the authority of either government, shall, in the purchase of any article which is the growth, produce, or manufacture of one country, and is imported into the other, give, either directly or indirectly, any priority or preference on account of or in reference to the national character of the vessel in which such article may be imported; it being the true intent and meaning of the high contracting parties, that no distinction or difference whatever shall be made in this respect.

6. In order to avoid any misunderstanding with regard to the regulations which may determine the conditions which constitute a British or Greek vessel, it is hereby agreed that all vessels built in the dominions of her Britannic Majesty, and all vessels which, having been captured from an enemy by her Majesty's ships of war, or by the subjects of her said Majesty, furnished with letters of marque by the lords commissioners of the Admiralty, shall have been regularly condemned in one of her said Majesty's prize courts as lawful prize; and all vessels which shall have been condemned in any competent court for a breach of the laws made for the prevention of the slave trade; and which shall be owned, navigated, and registered according to the laws of Great Britain, shall be considered as British vessels; and that all vessels built in the territories of Greece, or which shall have been captured from an enemy by the ships of war of the Greek government, or by Greek subjects furnished with letters of marque, and shall have been regularly condemned in one of the prize courts of the kingdom of Greece as a lawful prize, and which shall be wholly owned by any subject or subjects of Greece, and whereof the master and three-fourths of the crew are subjects of Greece, shall be considered as Greek vessels.

7. If any ships of war or merchantmen of the one nation should be wrecked on the coasts of the other, all such parts of the said ships of war or merchantmen, or of the furniture or appurtenances thereof, as also all goods and merchandise which shall be saved, or the produce thereof, and likewise the papers found on board the vessel, shall be carefully preserved until they are claimed by the proprietors, or their agents duly authorised, or by the respective consuls in whose district such wreck may have taken place, if such claim be preferred within the period fixed by the laws in force in the states of the high contracting parties; and such consul, proprietor, or agent shall pay only the expenses incurred in the preservation of the property, and the rate of salvage which would have been payable, in the like case, upon a national vessel; and the said goods and merchandise saved from the wreck shall not be liable to pay duties, unless cleared for local consumption.

8. Her Britannic Majesty and his Majesty the King of Greece have agreed, that each of the high contracting parties shall have the right to nominate and appoint consuls-general, consuls, and vice-consuls, in all the ports of the dominions of the other contracting party wherein such consular officers are or may be necessary for the advancement of commerce and for the protection of the trade of the subjects of either crown; and it is expressly stipulated that such consuls, of whatever class, shall, in the country in which they are stationed, be placed upon the footing of the consuls of the most favoured nation.

9. Her Britannic Majesty consents to grant to the subjects of his Majesty the King of Greece, the same facilities and privileges, with respect to the commerce to be carried on in Greek vessels with the British dominions in the East Indies, as are or may be enjoyed under any treaty or act of parliament by the subjects or citizens of the most favoured nation; it being always understood that the laws, rules, regulations, and restrictions, which are or may be applicable to the ships and subjects of any other foreign country, enjoying the like facilities and privileges of trading with the said dominions, shall be equally applicable to the subjects of the king of Greece.

10. All subjects of her Britannic Majesty shall, within the dominions of the King of Greece, be as free as native Greeks to manage their own affairs themselves, or to commit the management of those affairs to any other person whom they may please to appoint as broker, factor, agent, or interpreter; nor shall British subjects be restrained in their choice of persons to act in such capacities, nor be called upon to pay any salary or remuneration to any person whom they shall not choose to employ. Absolute freedom shall also be allowed, in all cases, to the buyer and seller to bargain together, and to fix as to them may seem meet, the price of any goods, wares, or merchandise imported into, or to be exported from, the dominions of the King of Greece, observing the law and established customs of the country. The same privileges shall be enjoyed in the dominions of her Britannic Majesty by the subjects of his Majesty the King of Greece, under the same conditions.

11. In all that relates to the police of ports, to the lading and unlading of vessels, and to the safety of merchandise, goods, and effects, the local laws and police regulations of each country shall be applied to the subjects of both, without discrimination or distinction; and, throughout the whole extent of the territories of each contracting party, the subjects of both shall enjoy full and entire protection for their persons and property. They shall have free and easy access to the courts of justice in the prosecution and defence of their rights, and shall be at liberty to employ the lawyers, attorneys, or agents, of whatever denomination, whom they may deem the best qualified to maintain and defend their interests: it being understood that they shall conform, in this respect, to the obligations imposed upon native subjects by the laws of the country. In all that concerns the administration of justice, they shall enjoy the same privileges, rights, and franchises, that belong to natives; and in none of these respects shall they be subject to any other duty or tax than is imposed upon natives. They shall be exempted from all com-

pulsory military service, either by sea or by land; no forced loan shall be imposed upon them; and their property shall be subject to no other charge, requisition, or tax, than those to which the property of natives shall be liable.

12. Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and his Majesty the King of Greece, agree that the subjects of the respective countries shall enjoy, within the dominions of the other, the full benefit of the complete toleration and protection for the professors of all religious opinions, which at present exists in both countries by law.

13. It shall be free for the subjects of her Britannic Majesty residing in the dominions of the King of Greece, and for the subjects of his Majesty the King of Greece residing in the dominions of her Britannic Majesty, to dispose of their property, of every description, by will or testament, as they may judge fit; and if any British subject shall die in the territories of the King of Greece, or any Greek subject shall die in the territories of the Queen of Great Britain, without will or testament, the respective consuls or vice-consuls shall exercise the right of administering to the property of subjects of their nation so dying intestate, for the benefit of the legitimate heirs to such property, and of the creditors upon the estate, so far as the laws of the respective countries shall admit.

14. The high contracting parties agree that the stipulations of the present convention shall be applicable to Gibraltar and to the island of Malta.

15. The present convention shall be in force for 10 years from the date of the exchange of the ratifications thereof; and further, until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same; each of the high contracting parties reserving to itself the right of giving such notice to the other at the end of the 10 years above-mentioned, or at any other period after that time; and it is hereby agreed between them, that at the expiration of 12 months after such notice shall have been received by either party from the other, this convention, and all the provisions thereof, shall altogether cease and determine.

16. The present convention shall be ratified, and the ratifications shall be exchanged at London, within 3 months from the date hereof.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at London, the 4th day of October, in the year of our Lord 1837.

PALMERSTON.  
TRICOURI.

An order in council, dated July 5th, 1838, directs that Greek vessels, entering or departing from the ports of the United Kingdom of Great Britain and Ireland, together with the cargoes on board the same (such cargoes consisting of articles which may be legally imported or exported), shall not be subject to any other or higher duties or charges whatever than are or shall be levied on British vessels entering or departing from such ports, or on similar articles, when imported into or exported from such ports in such vessels; and also, such articles, when exported from the said ports in Greek vessels, shall be entitled to the same bounties, drawbacks, and allowances that are granted on similar articles when exported in British vessels.

#### MEXICO.

*Treaty of Amity, Commerce, and Navigation, between Great Britain and Mexico, signed at London, December 26. 1826.*

Article 1. There shall be perpetual amity between the dominions and subjects of his Majesty the King of the United Kingdom of Great Britain and Ireland, and the United States of Mexico, and their citizens.

2. There shall be, between all the territories of his Britannic Majesty in Europe and the territories of Mexico, a reciprocal freedom of commerce. The inhabitants of the two countries, respectively, shall have liberty freely and securely to come, with their ships and cargoes, to all places and rivers in the territories aforesaid, saving only such particular ports to which other foreigners shall not be permitted to come, to enter into the same, and to remain and reside in any part of the said territories respectively; also to hire and occupy houses and warehouses for the purposes of their commerce; and, generally, the merchants and traders of each nation, respectively, shall enjoy the most complete protection and security for their commerce.

In like manner, the respective ships of war and post-office packets of the 2 countries shall have liberty freely and securely to come to all harbours, rivers, and places, saving only such particular ports (if any) to which other foreign ships of war and packets shall not be permitted to come, to enter into the same, to anchor, and to remain there and redit; subject always to the laws and statutes of the two countries respectively.

By the right of entering the places, ports, and rivers, mentioned in this article, the privilege of carrying on the coasting trade is not understood, in which national vessels only are permitted to engage.

3. His Majesty the King of the United Kingdom of Great Britain and Ireland engages further, that the inhabitants of Mexico shall have the like liberty of commerce and navigation stipulated for in the preceding article, in all his dominions situated out of Europe, to the full extent in which the same is permitted at present, or shall be permitted hereafter, to any other nation.

4. No higher or other duties shall be imposed on the importation into the dominions of his Britannic Majesty, of any article of the growth, produce, or manufacture of Mexico, and no higher or other duties shall be imposed on the importation into the territories of Mexico, of any articles of the growth, produce, or manufacture of his Britannic Majesty's dominions, than are or shall be payable on the like articles, being the growth, produce, or manufacture of any other foreign country; nor shall any other or higher duties or charges be imposed in the territories or dominions of either of the contracting parties, on the exportation of any articles to the territories of the other, than such as are or may be payable on the exportation of the like articles to any other foreign country; nor shall any prohibition be imposed upon the exportation of any articles, the growth, produce, or manufacture of his Britannic Majesty's dominions, or of the said territories of Mexico, to or from the said dominions of his Britannic Majesty, or to or from the said territories of Mexico, which shall not equally extend to all other nations.

5. No higher or other duties or charges on account of tonnage, light or harbour dues, pilotage, salvage in case of damage or shipwreck, or any other local charges, shall be imposed, in any of the ports of Mexico, on British vessels, than those payable in the same ports by Mexican vessels; nor, in the ports of his Britannic Majesty's territories, on Mexican vessels, than shall be payable, in the same ports, on British vessels.

6. The same duties shall be paid on the importation into the territories of Mexico, of any article the growth, produce, or manufacture of his Britannic Majesty's dominions, whether such importation shall be in Mexican or in British vessels; and the same duties shall be paid on the importation into the dominions of his Britannic Majesty, of any article the growth, produce, or manufacture of Mexico, whether such importation shall be in British or in Mexican vessels. The same duties shall be paid, and the same bounties and drawbacks allowed, on the exportation to Mexico of any articles of the growth, produce, or manufacture of his Britannic Majesty's dominions, whether such exportation shall be in Mexican or in British vessels; and the same duties shall be paid, and the same bounties and drawbacks allowed, on the exportation of any articles the growth, produce, or manufacture of Mexico, to his Britannic Majesty's dominions, whether such exportation shall be in British or in Mexican vessels.

\* See additional articles at the end of this treaty.

7. In order to avoid any misunderstanding with respect to the regulations which may respectively constitute a British or Mexican vessel, it is hereby agreed that all vessels built in the dominions of his Britannic Majesty, or vessels which shall have been captured from an enemy by his Britannic Majesty's ships of war, or by subjects of his said Majesty furnished with letters of marque by the Lords Commissioners of the Admiralty and regularly condemned in one of his said Majesty's prize courts as a lawful prize, or which shall have been condemned in any competent court for the breach of the laws made for the prevention of the slave trade, and owned, navigated, and registered according to the laws of Great Britain, shall be considered as British vessels; and that all vessels built in the territories of Mexico, or captured from the enemy by the ships of Mexico, and condemned under similar circumstances, and which shall be owned by any citizen or citizens thereof, and whereof the master and 3-4ths of the mariners are citizens of Mexico, excepting where the laws provide for any extreme cases, shall be considered as Mexican vessels.

And it is further agreed, that every vessel, qualified to trade as above described under the provisions of this treaty, shall be furnished with a register, passport, or sea letter, under the signature of the proper person authorised to grant the same, according to the laws of the respective countries (the form of which shall be communicated), certifying the name, occupation, and residence of the owner or owners, in the dominions of his Britannic Majesty, or in the territories of Mexico, as the case may be; and that he or they is or are the sole owner or owners, in the proportion to be specified: together with the name, burden, and description of the vessel as to build and measurement, and the several particulars constituting the national character of the vessel, as the case may be.

8. All merchants, commanders of ships, and others, the subjects of his Britannic Majesty, shall have full liberty, in all the territories of Mexico, to manage their own affairs themselves, or to commit them to the management of whomsoever they please, as broker, factor, agent, or interpreter; nor shall they be obliged to employ any other persons for those purposes than those employed by Mexicans, nor to pay them any other salary or remuneration than such as is paid, in like cases, by Mexican citizens; and absolute freedom shall be allowed, in all cases, to the buyer and seller, to bargain and fix the price of any goods, imported into or exported from Mexico, as they shall see good, observing the laws and established customs of the country. The same privileges shall be enjoyed in the dominions of his Britannic Majesty, by the citizens of Mexico, under the same conditions.

The citizens and subjects of the contracting parties, in the territories of each other, shall receive and enjoy full and perfect protection for their persons and property, and shall have free and open access to the courts of justice in the said countries, respectively, for the prosecution and defence of their just rights; and they shall be at liberty to employ, in all causes, the advocates, attorneys, or agents of whatever description, whom they may think proper; and they shall enjoy, in this respect, the same rights and privileges therein as native citizens.

9. In whatever relates to the succession to personal estates, by will or otherwise, and the disposal of personal property of every sort and denomination, by sale, donation, exchange, or testament, or in any other manner whatsoever, as also the administration of justice, the subjects and citizens of the 2 contracting parties shall enjoy, in their respective dominions and territories, the same privileges, liberties, and rights, as native subjects; and shall not be charged, in any of these respects, with any higher imposts or duties than those which are paid, or may be paid, by the native subjects or citizens of the power in whose dominions or territories they may be resident.

10. In all that relates to the police of the ports, the lading and unlading of ships, the safety of merchandise, goods, and effects, the subjects of his Britannic Majesty, and the citizens of Mexico, respectively shall be subject to the local laws and regulations of the dominions and territories in which they may reside. They shall be exempted from all compulsory military service, whether by sea or land. No forced loans shall be levied upon them; nor shall their property be subject to any other charges, regulations, or taxes, than such as are paid by the native subjects or citizens of the contracting parties in their respective dominions.

11. It shall be free for each of the 2 contracting parties to appoint consuls for the protection of trade, to reside in the dominions and territories of the other party; but, before any consul shall act as such, he shall, in the usual form, be approved and admitted by the government to which he is sent; and either of the contracting parties may except from the residence of consuls such particular places as either of them may judge fit to be excepted. The Mexican diplomatic agents and consuls shall enjoy, in the dominions of his Britannic Majesty, whatever privileges, exceptions, and immunities are or shall be granted to agents of the same rank belonging to the most favoured nation; and, in like manner, the diplomatic agents and consuls of his Britannic Majesty in the Mexican territories shall enjoy, according to the strictest reciprocity, whatever privileges, exceptions, and immunities are or may be granted to the Mexican diplomatic agents and consuls in the dominions of his Britannic Majesty.

12. For the better security of commerce between the subjects of his Britannic Majesty and the citizens of the Mexican States, it is agreed that if, at any time, any interruption of friendly intercourse, or any rupture, should unfortunately take place between the 2 contracting parties, the merchants residing upon the coasts shall be allowed 6 months, and those of the interior a whole year, to wind up their accounts, and dispose of their property: and a safe-conduct shall be given them to embark at the port which they shall themselves select. All those who are established in the respective dominions and territories of the 2 contracting parties, in the exercise of any trade or special employment, shall have the privilege of remaining and continuing such trade and employment therein, without any manner of interruption, in full enjoyment of their liberty and property, as long as they behave peaceably, and commit no offence against the laws: and their goods and effects, of whatever description they may be, shall not be liable to seizure or sequestration, or to any other charges or demands than those which may be made upon the like effects or property belonging to the native subjects or citizens of the respective dominions or territories in which such subjects or citizens may reside. In the same case, debts between individuals, public funds, and the shares of companies, shall never be confiscated, sequestered, or detained.

13. The subjects of his Britannic Majesty residing in the Mexican territories shall enjoy, in their houses, persons, and properties, the protection of the government; and continuing in possession of what they now enjoy, they shall not be disturbed, molested, or annoyed, in any manner, on account of their religion, provided they respect that of the nation in which they reside, as well as the constitution, laws, and customs of the country. They shall continue to enjoy, to the full, the privilege already granted to them of burying, in the places already assigned for that purpose, such subjects of his Britannic Majesty as may die within the Mexican territories; nor shall the funerals and sepulchres of the dead be disturbed in any way, or upon any account. The citizens of Mexico shall enjoy, in all the dominions of his Britannic Majesty, the same protection, and shall be allowed the free exercise of their religion, in public or private, either within their own houses, or in the chapels and places of worship set apart for that purpose.

14. The subjects of his Britannic Majesty shall on no account or pretext whatsoever be disturbed or molested in the peaceable possession and exercise of whatever rights, privileges, and immunities they have at any time enjoyed within the limits described and laid down in a convention signed between his said Majesty and the King of Spain, on the 14th of July, 1786: whether such rights, privileges, and immunities shall be derived from the stipulations of the said convention, or from any other concession which may at any time have been made by the King of Spain, or his predecessors, to British subjects and settlers residing and following their lawful occupations within the limits aforesaid: the 2 contracting parties reserving, however, for some more fitting opportunity, the further arrangements on this article.

15. The government of Mexico engages to co-operate with his Britannic Majesty for the total abolition

of the slave trade, and to prohibit all persons inhabiting within the territories of Mexico, in the most effectual manner, from taking any share in such trade.

16. The 2 contracting parties reserve to themselves the right of treating and agreeing hereafter, from time to time, upon such other articles as may appear to them to contribute still further to the improvement of their mutual intercourse, and the advancement of the general interests of their respective subjects and citizens; and such articles as may be so agreed upon, shall, when duly ratified, be regarded as forming a part of the present treaty, and shall have the same force as those now contained in it.

17. The present treaty shall be ratified, and the ratifications shall be exchanged at London within the space of 6 months, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto their respective seals.

Done at London, the 26th day of December, in the year of our Lord 1826.

WILLIAM HUSKISSON.  
JAMES J. MORIER.

SEBASTIAN CANACHO.

#### Additional Articles.

1. Whereas, in the present state of Mexican shipping, it would not be possible for Mexico to receive the full advantage of the reciprocity established by the articles 5, 6, 7. of the treaty signed this day, if that part of the 7th article which stipulates that, in order to be considered as a Mexican ship, a ship shall actually have been *built* in Mexico, should be strictly and literally observed, and immediately brought into operation; it is agreed that, for the space of 10 years, to be reckoned from the date of the exchange of the ratifications of this treaty, any ships, *wherever built*, being *owned* *de jure* the property of and wholly owned by one or more citizens of Mexico, and whereof the master and 3/4ths of the mariners, at least, are also natural-born citizens of Mexico, or persons domiciliated in Mexico, by act of the government, as lawful subjects of Mexico, to be certified according to the laws of that country, shall be considered as Mexican ships; his Majesty the King of the United Kingdom of Great Britain and Ireland reserving to himself the right, at the end of the said term of 10 years, to claim the principle of reciprocal restriction stipulated for in the article 7. above referred to, if the interests of British navigation shall be found to be prejudiced by the present exception to that reciprocity, in favour of Mexican shipping.

2. It is further agreed that, for the like term of 10 years, the stipulations contained in articles 5. and 6. of the present treaty shall be suspended; and in lieu thereof, it is hereby agreed that, until the expiration of the said term of 10 years, British ships entering into the ports of Mexico from the United Kingdom of Great Britain and Ireland, or any other of his Britannic Majesty's dominions, and all articles the growth, produce, or manufacture of the United Kingdom, or of any of the said dominions, imported in such ships, shall pay no other or higher duties than are or may hereafter be payable, in the said ports, by the ships, and the like goods, the growth, produce, or manufacture of the most favoured nation; and, reciprocally, it is agreed, that Mexican ships entering into the ports of the United Kingdom of Great Britain and Ireland, or any other of his Britannic Majesty's dominions, from any port of the States of Mexico, and all articles the growth, produce, or manufacture of the said States, imported in such ships, shall pay no other or higher duties than are or may hereafter be payable in the said ports, by the ships, and the like goods, the growth, produce, or manufacture of the most favoured nation; and that no higher duties shall be paid, or bounties or drawbacks allowed, on the exportation of any article the growth, produce, or manufacture of the dominions of either country, in the ships of the other, than upon the exportation of the like articles in the ships of any other foreign country.

It being understood that, at the end of the said term of 10 years, the stipulations of the said 5th and 6th articles shall, from thenceforward, be in full force between the two countries.

The present additional articles shall have the same force and validity as if they were inserted, word for word, in the treaty signed this day. They shall be ratified, and the ratifications shall be exchanged at the same time.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto their respective seals.

Done at London, the 26th day of December, in the year of our Lord 1826.

WILLIAM HUSKISSON.  
JAMES J. MORIER.

SEBASTIAN CANACHO.

An order in council, dated September 3. 1827, orders, that vessels of the United States of Mexico, entering the ports of the United Kingdom of Great Britain and Ireland in ballast, or laden direct from any of the ports of Mexico, or departing from the ports of the said United Kingdom, together with the cargoes on board the same, such cargoes consisting of articles which may be legally imported or exported, shall not be subject to any other or higher duties or charges whatever than are or shall be levied on British vessels entering or departing from such ports, or on similar articles when imported into or exported from such ports in British vessels; and also such articles, when exported from the said ports in vessels of the United States of Mexico respectively, shall be entitled to the same bounties, drawbacks, and allowances that are granted on similar articles when exported in British vessels.

N.B.—Treaties similar to the above have been negotiated with Colombia, Buenos Ayres, &c.

#### NETHERLANDS.

*Treaty of Commerce and Navigation between her Majesty and the King of the Netherlands, signed at the Hague, October 31st, 1837.*

Article 1. There shall be reciprocal liberty of commerce and navigation between and amongst the subjects of the two high contracting parties; and the subjects of the two sovereigns respectively shall not pay in the ports, harbours, roads, cities, towns, or places whatsoever in either kingdom, any other or higher duties, taxes, or imposts, under whatsoever names designated or included, than those which are there paid by the subjects of the most favoured nation; and the subjects of each of the high contracting parties shall enjoy the same rights, privileges, liberties, favours, immunities, and exemptions, in matters of commerce and navigation, that are gratuitously may hereafter be granted, in either kingdom to the subjects of the most favoured nation. No duty of customs or other impost shall be charged upon any goods the produce of one country, upon importation, by sea or by land, from such country into the other, higher than the duty or impost charged upon goods of the same kind, the produce of or imported from any other country; and her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and his Majesty the King of the Netherlands, do hereby bind and engage themselves, not to grant any favour, privilege, or immunity, in matters of commerce and navigation, to the subjects of any other state, which shall not be also, and at the same time, extended to the subjects of the other high contracting party, gratuitously, if the concession in favour of that other state shall have been gratuitous; and on giving as nearly as possible the same compensation or equivalent, in case the concession shall have been conditional.

2. No duties of tonnage, harbour, lighthouses, pilotage, quarantine, or other similar or corresponding duties, of whatever nature or under whatever denomination, shall be imposed in either country upon the vessels of the other, in respect of voyages between the two countries, if laden, or in respect of any voyage if in ballast, which shall not be equally imposed, in the like cases, on national vessels; and in neither country shall any duty, charge, restriction, or prohibition be imposed upon, nor any drawback, bounty, or allowance be withheld from, any goods imported from or exported to the other country, in

the vessel of that other country, which shall not be equally imposed upon or withheld from such goods, when so imported or exported in national vessels.

3. In order to avoid any misunderstanding with regard to the regulations that determine the conditions which constitute a British or a Dutch vessel, it is hereby agreed, that all vessels built in the dominions of her Britannic Majesty, and all vessels which, having been captured from an enemy by her Majesty's ships of war, or by the subjects of her said Majesty, furnished by the lords commissioners of the Admiralty with letters of marque, shall have been regularly condemned in one of her said Majesty's prize courts as a lawful prize; and all vessels which shall have been condemned in any competent court, for a breach of the laws made for the prevention of the slave trade; shall, provided they are owned, navigated, and registered according to the laws of Great Britain, be considered as British vessels; and that all vessels built in the territories of the King of the Netherlands, or which, having been captured from an enemy by his Majesty's ships of war, or by the subjects of his said Majesty furnished with letters of marque, shall have been regularly condemned in one of the prize courts of the kingdom of the Netherlands as a lawful prize; and all vessels which shall have been condemned in any competent court, for a breach of the laws made for the prevention of the slave trade, shall, provided they are wholly owned by any subject or subjects of the King of the Netherlands, and provided that the master and three-fourths of the crew are Netherlands subjects, be considered as Netherlands vessels.

4. It is further agreed, that in all cases where, in either kingdom, the duty to be levied upon any goods imported, shall be, not a fixed rate, but a proportion of the value of the goods, such *ad valorem* duty shall be ascertained and secured in the following manner; that is to say, the importer shall, on making his entry for the payment of duty at the custom-house of either country, sign a declaration, stating the value of the goods at such amount as he shall deem proper; and in case the officers of customs should be of opinion that such valuation is insufficient, he or they shall be at liberty to take the goods, on paying to the importer the value according to his declaration, together with the addition of 10 per cent., and on returning the duty paid.

The amount of these sums to be paid by the officers on the delivery of the goods to them, which must be within 15 days from the first detention of the goods.

5. Forasmuch as all merchandise, of whatever origin, whether admissible for home consumption or not, may be received and warehoused in all the ports of the United Kingdom of Great Britain and Ireland, which are by law appointed to be warehousing ports for such articles, pending the entry of the same either for home consumption or for re-exportation, as the case may be, under the regulations appointed for this purpose, and without such articles being liable, in the meantime, to the payment of any of the duties with which they would be charged, if upon arrival they were entered for consumption within the United Kingdom; in like manner, the King of the Netherlands consents and agrees, that all the ports of his Netherlands Majesty's dominions, which are now or which shall hereafter become warehousing ports by law, shall be free ports for the reception and warehousing of all merchandise imported in British ships, and of all articles whatever, the produce or manufacture of the British dominions, in whatever ships imported, either for home consumption or for re-exportation, as the case may be; and the articles thus received and warehoused, subject to due regulations, shall not be liable, in the meantime, to any of the duties with which they would be charged, if they were entered for consumption on their arrival in the Netherlands.

6. If any ships of war or merchant vessels should be wrecked on the coasts of either of the high contracting parties, such ships or vessels, or all parts thereof, and all furniture and appurtenances belonging thereto, and all goods and merchandise which shall be saved therefrom, or the produce thereof, if sold, shall be faithfully restored to the proprietors, upon being claimed by them or by their duly authorised factors; and if there are no such proprietors or factors on the spot, then the said goods and merchandise or the proceeds thereof, as well as all the papers found on board such wrecked vessels, shall be delivered to the British or Netherlands consul in whose district the wreck may have taken place; and such consul, proprietors, or factors shall pay only the expenses incurred in the preservation of the property, together with the rate of salvage which would have been payable in the like case of a wreck of a national vessel; and the goods and merchandise saved from the wreck shall not be subject to duties, unless cleared for home consumption.

7. The present treaty shall be in force for the term of 10 years from the date hereof, and further, until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same; each of the high contracting parties reserving to itself the right of giving such notice to the other at the end of the said term of 10 years.

And it is hereby agreed between them, that at the expiration of 12 months after such notice shall have been received by either party from the other, this treaty, and all the provisions thereof, shall altogether cease and determine.

8. The present treaty shall be ratified, and the ratifications shall be exchanged at the Hague within one month from the date hereof, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at the Hague, this 27th day of October, in the year of our Lord 1837.

VERSTOLK DE SOELLEN.

EDWARD CROMWELL DISBROWE.

*Declaration made by the Plenipotentiary of her Britannic Majesty, on the exchange of the Ratification of the preceding Treaty.*

In proceeding to the exchange of the ratifications of the treaty of commerce and navigation between her Majesty the Queen of the United Kingdom of Great Britain and Ireland and his Majesty the King of the Netherlands, concluded and signed at the Hague on the 27th of October, 1837, the undersigned plenipotentiary of her Britannic Majesty, is commanded by her Majesty to explain and declare that her Majesty has ratified the said treaty, notwithstanding that the preamble contains the words "In Europe," which her Majesty's government had objected to as redundant; but that her Majesty considers those words to be without meaning, so far as her Majesty's dominions are concerned; because those words appear to establish a distinction between a kingdom in Europe and a kingdom out of Europe, whereas, by the word "kingdom," in the said treaty, her Majesty, as far as regards her own territories, means only the United Kingdom of Great Britain and Ireland, which is well known to be in Europe, and does not mean any of the possessions of her Majesty's crown beyond sea. Her Majesty's ratification of the said treaty is exchanged under the explicit declaration and understanding above mentioned.

Done at the Hague, the 22d day of November, 1837.

EDWARD CROMWELL DISBROWE.

*Counter-Declaration of the Plenipotentiary of his Majesty the King of the Netherlands.*

The plenipotentiary of her Britannic Majesty having, previously to the exchange of the ratifications of the treaty of commerce and navigation, concluded on the 27th of October 1837, between his Majesty the King of the Netherlands and her Majesty the Queen of the United Kingdom of Great Britain and Ireland, delivered to the undersigned plenipotentiary of his Majesty the King of the Netherlands, a declaration stating that her Britannic Majesty had not in view in the said treaty the possessions of her crown beyond sea; the undersigned is charged by his Majesty the King of the Netherlands to declare that his said Majesty accepts the above-mentioned declaration, and that he likewise, on his part, has not meant to comprise in the said treaty the possessions of his crown beyond sea.

With regard to the observations made as to the use of the words "In Europe," the cabinet of the

Hague is of opinion, that their interpretation is to be found in the circumstance, that the phrase "in Europe" applies to the word "ports," and not to the word "kingdom."

The Hague, the 22d of November, 1837.

VERSTOLK DE SOELLEN.

*Treaty between His Britannic Majesty and the King of the Netherlands, respecting Territories and Commerce in the East Indies, signed at London, March 17. 1824.*

Article 1. The high contracting parties engage to admit the subjects of each other to trade with their respective possessions in the Eastern Archipelago, and on the continent of India and in Ceylon, upon the footing of the most favoured nation; their respective subjects conforming themselves to the local regulations of each settlement.

2. The subjects and vessels of one nation shall not pay, upon importation or exportation, at the ports of the other in the Eastern seas, any duty at a rate beyond the double of that at which the subjects and vessels of the nation to which the port belongs are charged.

The duties paid on exports or imports at a British port, on the continent of India, or in Ceylon, on Dutch bottoms, shall be arranged so as in no case to be charged at more than double the amount of the duties paid by British subjects, and on British bottoms.

In regard to any article upon which no duty is imposed, when imported or exported by the subjects or on the vessels of the nation to which the port belongs, the duty charged upon the subjects or vessels of the other shall in no case exceed 6 per cent.

3. The high contracting parties engage, that no treaty hereafter made by either, with any native power in the Eastern seas, shall contain any article tending, either expressly, or by the imposition of unequal duties, to exclude the trade of the other party from the ports of such native power; and that if, in any treaty now existing on either part, any article to that effect has been admitted, such article shall be abrogated upon the conclusion of the present treaty.

It is understood that, before the conclusion of the present treaty, communication has been made by each of the contracting parties to the other, of all treaties or engagements subsisting between each of them, respectively, and any native powers in the Eastern seas; and that the like communication shall be made of all such treaties concluded by them, respectively, hereafter.

4. Their Britannic and Netherland Majesties engage to give strict orders, as well to their civil and military authorities, as to their ships of war, to respect the freedom of trade, established by articles 1, 2, and 3.; and in no case to impede a free communication of the natives in the Eastern Archipelago, with the ports of the 2 governments, respectively, or of the subjects of the 2 governments with the ports belonging to native powers.

5. Their Britannic and Netherland Majesties, in like manner, engage to concur effectually in repressing piracy in those seas: they will not grant either asylum or protection to vessels engaged in piracy, and they will in no case permit the ships or merchandise captured by such vessels, to be introduced, deposited, or sold, in any of their possessions.

6. It is agreed that orders shall be given by the 2 governments, to their officers and agents in the East, not to form any new settlement on any of the islands in the Eastern seas, without previous authority from their respective governments in Europe.

7. The Molucca Islands, and especially Amboyna, Banda, Ternate, and their immediate dependencies, are excepted from the operation of the 1st, 3d, 4d, and 4th articles, until the Netherland government shall think fit to abandon the monopoly of spices; but if the said government shall, at any time previous to such abandonment of the monopoly, allow the subjects of any power, other than the Asiatic native power, to carry on any commercial intercourse with the said islands, the subjects of his Britannic Majesty shall be admitted to such intercourse, upon a footing precisely similar.

8. His Netherland Majesty cedes to his Britannic Majesty all his establishment on the continent of India; and renounces all privileges and exemptions enjoyed or claimed in virtue of those establishments.

9. The factory of Fort Marlborough, and all the English possessions on the island of Sumatra, are hereby ceded to his Netherland Majesty: and his Britannic Majesty further engages that no British settlement shall be formed on that island, nor any treaty concluded by British authority, with any native prince, chief, or state therein.

10. The town and fort of Malacca, and its dependencies, are hereby ceded to his Britannic Majesty; and his Netherland Majesty engages, for himself and his subjects, never to form any establishment on any part of the peninsula of Malacca, or to conclude any treaty with any native prince, chief, or state therein.

11. All the colonies, possessions, and establishments which are ceded by the preceding articles, shall be delivered up to the officers of the respective sovereigns on the 1st of March, 1825. The fortifications shall remain in the state in which they shall be at the period of the notification of this treaty in India; but no claim shall be made, on either side, for ordnance, or stores of any description, either left or removed by the ceding power, nor for any arrears of revenue, or any charge of administration whatever.

12. It is agreed that all accounts and reclamations, arising out of the restoration of Java, and other possessions, to the officers of his Netherland Majesty in the East Indies,—as well those which were the subject of a convention made at Java on the 24th of June, 1817, between the commissioners of the 2 nations, as all others,—shall be finally and completely closed and satisfied, on the payment of the sum of 100,000*l.*, sterling money, to be made in London on the part of the Netherlands, before the expiration of the year 1825.

13. The present treaty shall be ratified, and the ratifications exchanged at London, within 3 months from the date hereof, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and affixed thereto the seals of their arms.

Done at London, the 17th day of March, in the year of our Lord 1824.

GEORGE CANNING. CHARLES WATKINS WILLIAMS WYNN. H. FAGEL. A. R. FALCK.

#### PERSIA.

*Treaty of Commerce between Her Majesty and the Shah of Persia, signed at Tehran, October 28. 1811.*

Article 1. The merchants of the two mighty states are reciprocally permitted and allowed to carry into each other's territories their goods and manufactures of every description, and to sell or exchange them in any part of their respective countries; and on the goods which they import or export, custom duties shall be levied; that is to say, on entering the country the same amount of custom duties shall be levied, once for all, that is levied on merchandise imported by the merchants of the most favoured European nations; and at the time of going out of the country, the same amount of custom duties which is levied on the merchandise of merchants of the most favoured European nations shall be levied from the merchants, subjects of the high contracting parties; and except this, no claim shall be made upon the merchants of the two states in each other's dominions on any pretext or under any denomination; and the merchants or persons connected with or dependent upon the high contracting parties in each other's dominions, mutually, shall receive the same aid and support, and the same respect, which are received by the subjects of the most favoured nations.

2. As it is necessary, for the purpose of attending to the affairs of the merchants of the two parties respectively, that from both governments commercial agents should be appointed to reside in stated places, it is therefore arranged that two commercial agents on the part of the British government shall reside, one

in the capital, and one in Tabreez, and in those places only, and on this condition, that he who shall reside at Tabreez, and he alone, shall be honoured with the privileges of consul-general; and as for a series of years a resident of the British government has resided at Bushire, the Persian government grants permission that the said resident shall reside there as heretofore. And, in like manner, two commercial agents shall reside on the part of the Persian government, one in the capital of London, and one in the port of Bombay, and shall enjoy the same rank and privileges which the commercial agents of the British government shall enjoy in Persia.

3. This commercial treaty, we, the plenipotentiaries of the high contracting parties, have agreed to; and in witness thereof, have set thereto our hands and seals, at the capital city of Tehran, this twenty-eighth day of October, in the year of our Lord 1841, corresponding to the 12th day of the month Ramazan, in the year of the Hejira 1257.

JOHN McNEILL.  
MIRZA ABUL HASAN KHAN.

#### PERU-BOLIVIAN CONFEDERATION.

*Treaty of Amity, Commerce, and Navigation between His Majesty and the Peru-Bolivian Confederation, together with 2 additional Articles thereto annexed.*

Article 1. There shall be perpetual amity between the dominions and subjects of his Majesty the King of the United Kingdom of Great Britain and Ireland, his heirs and successors, and the Peru-Bolivian confederation and its citizens.

2. There shall be, between all the territories of his Britannic Majesty in Europe, and the territories of the Peru-Bolivian confederation, a reciprocal freedom of commerce. The subjects and citizens of the two countries respectively shall have liberty freely and securely to come with their ships and cargoes to all places, ports, and rivers in the territories aforesaid, to which other foreigners are or may be permitted to come, to enter into the same, and to remain and reside in any part of the said territories respectively; also to hire and occupy houses and warehouses for the purpose of their commerce; and, generally, the merchants and traders of each nation, respectively, shall enjoy the most complete protection and security for their commerce; subject always to the laws and statutes of the two countries respectively.

In like manner, the respective ships of war and post-office packets of the 2 countries shall have liberty freely and securely to come to all harbours, rivers, and places to which other foreign ships of war and packets are or may be permitted to come, to enter into the same, to anchor, and to remain there and red; subject always to the laws and statutes of the two countries respectively.

By the right of entering the places, ports, and rivers mentioned in this article, the privilege of carrying on the coasting trade is not understood, in which national vessels only are permitted to engage.

3. His Majesty the King of the United Kingdom of Great Britain and Ireland engages further, that the inhabitants of the Peru-Bolivian confederation shall have the like liberty of commerce and navigation stipulated for in the preceding article, in all his dominions situated out of Europe, to the full extent in which the same is permitted at present, or may be permitted hereafter, to any other nation.

4. No higher or other duties shall be imposed on the importation into the dominions of His Britannic Majesty of any article of the growth, produce, or manufacture of the Peru-Bolivian confederation, and no higher or other duties shall be imposed on the importation into the territories of the Peru-Bolivian confederation of any articles of the growth, produce, or manufacture of his Britannic Majesty's dominions, than are or shall be payable on the like articles, being the growth, produce, or manufacture of any other foreign country; nor shall any other or higher duties or charges be imposed in the territories or dominions of either of the contracting parties, on the exportation of any articles to the territories or dominions of the other, than such as are or may be payable on the exportation of the like articles to any other foreign country; nor shall any prohibition be imposed upon the exportation or importation of any article, the growth, produce, or manufacture of his Britannic Majesty's dominions, or of the said territories of the Peru-Bolivian confederation, to or from the said dominions of his Britannic Majesty, or to or from the said territories of the Peru-Bolivian confederation, which shall not equally extend to all other nations.

5. No higher or other duties or charges on account of tonnage, light or harbour dues, pilotage, salvage in case of damage or shipwreck, or any other local charges, shall be imposed in any of the ports of the Peru-Bolivian confederation, on British vessels, than those payable, in the same ports, by Peru-Bolivian vessels; nor in the ports of his Britannic Majesty's territories, on Peru-Bolivian vessels, than shall be payable in the same ports on British vessels.

6. The same duties shall be paid on the importation into the territories of the Peru-Bolivian confederation of any article the growth, produce, or manufacture of his Britannic Majesty's dominions, whether such importation shall be in Peru-Bolivian or in British vessels; and the same duties shall be paid on the importation into the dominions of his Britannic Majesty, of any article the growth, produce, or manufacture of the territories of the Peru-Bolivian confederation, whether such importation shall be in British or in Peru-Bolivian vessels. The same duties shall be paid, and the same bounties and drawbacks allowed, on the exportation to the ports of the Peru-Bolivian confederation of any articles of the growth, produce, or manufacture of his Britannic Majesty's dominions, whether such exportation shall be in Peru-Bolivian or British vessels; and the same duties shall be paid, and the same bounties and drawbacks allowed, on the exportation of any articles the growth, produce, or manufacture of the Peru-Bolivian confederation, to his Britannic Majesty's dominions, whether such exportation shall be in British or in Peru-Bolivian vessels.

7. In order to avoid any misunderstanding with respect to the regulations which may respectively constitute a British or Peru-Bolivian vessel, it is hereby agreed that no ship shall be admitted to be a ship of either country, unless she shall be of the built of such country, or have been made prize of war to such country, and condemned as such; or have been forfeited to such country under any law of the same made for the prevention of the slave trade, and condemned in any competent court as forfeited for a breach of such law; nor unless she be navigated by a master who is a subject of such country, and by a crew of whom  $\frac{3}{4}$  at least are subjects of such country; nor unless she be wholly owned by subjects of such country, usually residing therein, or under the dominion thereof; excepting where the laws provide for any extreme cases. And it is further agreed, that no ship, admitted to be a ship of either country, shall be qualified to trade as above described, under the provisions of this treaty, unless furnished with a register, passport, or sea-letter, under the signature of the proper person authorised to grant the same, according to the laws of the respective countries, (the form of which shall be communicated), certifying the name, occupation, and residence of the owner or owners, in the dominions of his Britannic Majesty, or in the territories of the Peru-Bolivian confederation, as the case may be; and that he or they be or are the sole owner or owners, in the proportion to be specified; together with the name, burden, and description of the vessel, as to built and measurement, and the several particulars constituting the national character of the vessel, as the case may be.

8. All merchants, commanders of ships, and others, the subjects of his Britannic Majesty, shall have full liberty, in all the territories of the Peru-Bolivian confederation, to manage their own affairs, themselves, or to commit them to the management of whomsoever they please, as broker, factor, agent, or interpreter; nor shall they be obliged to employ any other person for those purposes than those employed by Peru-Bolivians, nor to pay them any other salary or remuneration than such as is paid, in like cases, by Peru-Bolivian citizens; and absolute freedom shall be allowed, in all cases, to the buyer and seller to bargain and fix the price of any goods, wares, or merchandises imported into or exported from, the Peru-Bolivian confederation, as they shall see good, observing the laws and established customs of the country.

The same privileges shall be enjoyed in the dominions of his Britannic Majesty, by the citizens of the Peru-Bolivian confederation, under the same conditions.

The citizens and subjects of the contracting parties, in the territories of each other, shall receive and enjoy full and perfect protection for their persons and property, and shall have free and open access to the courts of justice in the said countries respectively, for the prosecution and defence of their just rights; and they shall be at liberty to employ, in all causes, the advocates, attorneys, or agents, of whatever description, whom they may think proper; and they shall enjoy, in this respect, the same rights and privileges therein as native citizens.

9. In whatever relates to the police of the ports, the lading and unlading of ships, the safety of merchandise, goods, and effects, the succession to personal estates by will or otherwise, and the disposal of personal property of every sort and denomination, by sale, donation, exchange, or testament, or in any other manner whatsoever, as also the administration of justice, the subjects and citizens of the two contracting parties shall enjoy, in their respective dominions and territories, the same privileges, liberties, and rights, as native subjects; and shall not be charged, in any of these respects, with any higher imposts or duties than those which are paid, or may be paid, by the native subjects or citizens of the power in whose dominions or territories they may be resident, subject of course to the local laws and regulations of such dominions or territories. In the event of any subject or citizen of either of the two contracting parties dying without will or testament, in the dominions or territories of the said contracting parties, the consul-general or consul of the said nation, or, in his absence, his representative, shall have the right to nominate curators, to take charge of the property of the deceased, so far as the laws of each country will permit, for the benefit of his lawful heirs and creditors, without interference, giving convenient notice thereof to the authorities of the country.

10. The subjects of his Britannic Majesty residing in the Peru-Bolivian confederation, and the natives and citizens of the confederation residing in the dominions of his Britannic Majesty, shall be exempted from all compulsory military service whatsoever, whether by sea or land; and from all forced loans or military exactions or requisitions; neither shall they be compelled, under any pretext whatsoever, to pay any other ordinary charges, requisitions, or taxes, greater than those that are paid by native subjects or citizens of the territories of the contracting parties, respectively.

11. It shall be free for each of the two contracting parties to appoint consuls for the protection of trade, to reside in the dominions and territories of the other party; but before any consul shall act as such, he shall, in the usual form, be approved and admitted by the government to which he is sent; and either of the contracting parties may except from the residence of consuls such particular places as either of them may judge fit to be excepted. The diplomatic agents and consuls of the Peru-Bolivian confederation shall enjoy, in the dominions of his Britannic Majesty, whatever privileges, exceptions, and immunities are or shall be granted to agents of the same rank belonging to the most favoured nation; and in like manner, the diplomatic agents and consuls of his Britannic Majesty in the territories of the Peru-Bolivian confederation shall enjoy, according to the strictest reciprocity, whatever privileges, exceptions, and immunities are or may be granted to the diplomatic agents and consuls of the most favoured nation in the territories of the Peru-Bolivian confederation.

12. For the better security of commerce between the subjects of his Britannic Majesty and the citizens of the Peru-Bolivian confederation, it is agreed that if, at any time, any interruption of friendly intercourse or any rupture should unfortunately take place between the two contracting parties, the subjects or citizens of either of the two contracting parties residing upon the coasts shall be allowed six months, and those residing in the interior a whole year, to wind up their accounts and dispose of their property; and a safe conduct shall be given them to embark at the port which they shall themselves select. All such subjects or citizens of either of the two contracting parties, who are established in the dominions or territories of the other in the exercise of any trade or special employment, shall have the privilege of remaining and continuing such trade and employment therein without any manner of interruption, in full enjoyment of their liberty and property, as long as they behave peaceably, and commit no offence against the laws; and their goods and effects, of whatever description they may be, whether in their own custody, or intrusted to individuals or to the state, shall not be liable to seizure or sequestration, or to any other charges or demands, than those which may be made upon the like effects or property belonging to the native subjects or citizens of the dominions or territories in which such subjects or citizens may reside. In the same case, debts between individuals, public funds, and the shares of companies, shall never be confiscated, sequestrated, or detained.

13. The subjects of his Britannic Majesty, and the citizens of the Peru-Bolivian confederation, respectively, shall enjoy, in their houses, persons, and properties, the protection of the government; and continue in possession of the privileges which they now enjoy. And the subjects of his Britannic Majesty residing in the territories of the Peru-Bolivian confederation shall furthermore enjoy the most perfect and entire security of conscience, without being annoyed, prevented, or disturbed on account of their religious belief. Neither shall they be annoyed, molested, or disturbed in the proper exercise of their religion, provided that this take place in private houses, and with the decorum due to divine worship, with due respect to the laws, usages, and customs of the country. In the like manner the citizens of the Peru-Bolivian confederation shall enjoy, within all the dominions of his Britannic Majesty, a perfect and unrestrained liberty of conscience, and of exercising their religion publicly or privately, within their own dwelling-houses, or in the chapels and places of worship appointed for that purpose, agreeably to the system of toleration established in the dominions of his said Majesty. Liberty shall also be granted to bury the subjects or citizens of either of the two contracting parties, who may die in the dominions or territories of the other, in burial-places of their own, which, in the same manner, they may freely establish and maintain; nor shall the funerals or sepulchres of the dead be disturbed in any way or upon any account.

14. The government of the Peru-Bolivian confederation engages to co-operate with his Britannic Majesty for the total abolition of the slave trade, and to prohibit all persons inhabiting within the territories of the Peru-Bolivian confederation, or subject to their jurisdiction, in the most effectual manner, and by the most solemn laws, from taking any share in such trade.

15. The two contracting parties reserve to themselves the right of treating and of agreeing hereafter, from time to time, upon such other articles as may appear to them to contribute still further to the improvement of their mutual intercourse, and to the advancement of the general interests of their respective subjects and citizens; and such articles as may be so agreed upon shall, when duly ratified, be regarded as forming a part of the present treaty, and shall have the same force as those now contained in it.

16. The present treaty shall be ratified, and the ratification shall be exchanged in London or at Lima, within the space of twenty months or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto their respective seals.

Done at Lima this 5th day of June, in the year of our Lord 1837.

BELFORD HINTON WILSON.  
LORENZO BAZO.

#### Additional Articles.

Article 1. Whereas, in the present state of Peru-Bolivian shipping, it would not be possible for the said confederation to receive the full advantage of the reciprocity established by the articles 6, 6, and 7, of the treaty signed this day, if that part of the 7th article which stipulates that, in order to be considered as a Peru-Bolivian ship, a ship shall actually have been built in the Peru-Bolivian confederation,

should be strictly and literally observed, and immediately brought into operation; it is agreed that, for the space of 15 years, to be reckoned from the date of the exchange of the ratifications of this treaty, any ships, whosoever built, being *bona fide* the property of and wholly owned by one or more citizens of the Peru-Bolivian confederation, and whereof the masters and three-fourths of the mariners, at least, are also natural-born citizens of the Peru-Bolivian confederation, or persons domiciliated in the Peru-Bolivian confederation by act of the government, as lawful subjects of the Peru-Bolivian confederation, to be certified according to the laws of that country, shall be considered as Peru-Bolivian ships; his Majesty the King of the United Kingdom of Great Britain and Ireland reserving to himself the right, at the end of the said term of 15 years, to claim the principle of reciprocal restriction stipulated for in the article 7. above referred to, if the interests of British navigation shall be found to be prejudiced by the present exception to that reciprocity in favour of Peru-Bolivian shipping.

2. It is further agreed that, for the like term of 15 years, the stipulations contained in the articles 3. and 6. of the present treaty shall be suspended; and, in lieu thereof, it is hereby agreed that, until the expiration of the said term of fifteen years, British ships entering into the ports of the Peru-Bolivian confederation, from the U. Kingdom of Great Britain and Ireland, or any other of his Britannic Majesty's dominions, and all articles, the growth, produce, or manufacture of the U. Kingdom, or of any of the said dominions, imported in such ships, shall pay no other or higher duties than are or may hereafter be payable, in the said ports, by the ships, and the like goods the growth, produce, or manufacture of the most favoured nation; and reciprocally, it is agreed that Peru-Bolivian ships entering into the ports of the U. Kingdom of Great Britain and Ireland, or any other of his Britannic Majesty's dominions, from any port of the Peru-Bolivian confederation, and all articles, the growth, produce, or manufacture of the said confederation, imported in such ships, shall pay no other or higher duties than are or may hereafter be payable, in the said ports, by the ships, and the like goods, the growth, produce, or manufacture of the most favoured nation; and that no higher duties shall be paid, or bounties or drawbacks allowed, on the exportation of any article, the growth, produce, or manufacture of the dominions of either country, in the ships of the other, than upon the exportation of the like articles in the ships of any other foreign country.

It being understood that, at the end of the said term of 15 years, the stipulations of the said 5th and 6th articles shall from thenceforward be in full force between the two countries.

The present additional articles shall have the same force and validity as if they were inserted, word for word, in the treaty signed this day. They shall be ratified, and the ratification shall be exchanged at the same time.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto their respective seals.

#### PORTUGAL.

*Treaty of Commerce between Great Britain and Portugal, signed at Lisbon, December 27. 1708.*

Article 1. His Sacred Royal Majesty of Portugal promises, both in his own name and that of his successors, to admit, for ever hereafter, into Portugal, the woollen cloths, and the rest of the woollen manufactures of the Britons, as was accustomed till they were prohibited by the laws; nevertheless, upon this condition

2. That is to say, that her Sacred Royal Majesty of Great Britain shall, in her own name and that of her successors, be obliged for ever hereafter to admit the wines of the growth of Portugal into Britain; so that at no time, whether there shall be peace or war between the kingdoms of Britain and France, any thing more shall be demanded for these wines, by the name of custom or duty, or by whatsoever other title, directly or indirectly, whether they shall be imported into Great Britain in pipes or hogheads, or other casks, than what shall be demanded from the like quantity or measure of French wine, deducting or abating a third part of the custom or duty: but if at any time this deduction or abatement of customs which is to be made as aforesaid, shall in any manner be attempted and prejudiced, it shall be just and lawful for his Sacred Royal Majesty of Portugal again to prohibit the woollen cloths, and the rest of the British woollen manufactures.

3. The most excellent Lords the plenipotentiaries promise, and take upon themselves, that their above named masters shall ratify this treaty, and that within the space of 3 months the ratifications shall be exchanged.

Given at Lisbon, the 27th of December, 1708.

JOHN METRUEEN.

MARCUS ALEGRETENSIS.

*Treaty of Commerce and Navigation between her Majesty and the Queen of Portugal, signed at Lisbon, July 3. 1842.*

Article 1. The subjects of each of the high contracting parties shall, in the dominions of the other, enjoy all the privileges, immunities, and protection enjoyed by the subjects of the most favoured nation. They shall be entitled to travel, to reside, to occupy dwellings and warehouses, and to dispose of their personal, leasehold, and all other property lawfully held by them, by sale, gift, exchange, or will, or in any other way whatever, without the smallest let, and without any hindrance whatever.

They shall be exempt from forced loans, or any other extraordinary contributions not general, or not by law established, and from all military service by sea or by land. Their dwellings, warehouses, and every thing belonging thereto, shall be respected, and shall not be subjected to any arbitrary visit or search. No examination or inspection shall be made of their books, papers, or accounts, without the legal sentence of a competent court or judge.

The assessment of the amount to be paid by the British subjects in Portugal and its dominions for *manco* or *decima industrial*, and from which they have hitherto enjoyed special exemption, shall in all cases in future be made, if so claimed by them, according to the rate to be given by *informadores*, of whom two shall be Portuguese and two British merchants, to be named by the *Conceição de Distrito*; and in case any objection should be made by the parties assessed to the amount of the said assessment (which shall in all cases bear a just proportion to the rate at which the native subjects of Portugal are assessed), they shall have a right to appeal to the tribunal of the treasury, and to appear in person, or to be heard by counsel, before the said tribunal; and in the meantime no execution shall be made on their property, until an ultimate decision shall have been pronounced by the said tribunal.

It is, however, understood that British subjects resident in Portugal and its dominions, not carrying on trade, or exercising any branch of industry therein, but deriving their incomes from other sources, shall, in like manner with Portuguese subjects, be wholly exempt from the operation of the said *manco* or *decima industrial* tax.

The subjects of each of the high contracting parties shall also, within the dominions of the other, be allowed the free use and exercise of their religion, without being in any manner disturbed on account of their religious opinions: they shall be allowed to assemble together for the purposes of public worship, and to celebrate the rites of their religion in their own dwelling-houses, or in the chapels or places of worship appointed for that purpose, without any the smallest hindrance or interruption whatever, either now or hereafter; and her Most Faithful Majesty does now and for ever graciously grant to the subjects of her Britannic Majesty permission to build and maintain such chapels and places of worship within her dominions. It being always understood that the said chapels and places of worship are not to have steeples and bells.

Her Britannic Majesty's subjects shall likewise have full liberty to bury their dead, after the manner

and with the ceremonies usual in their respective countries, and in the grounds and cemeteries which they shall have purchased and prepared for that purpose; and the sepulchres of the dead, in conformity to ancient and existing practice, shall in no way or on any account be disturbed.

2. The subjects of either of the contracting parties may freely dispose by will of the personal effects which they shall possess in the territories of the other; and their heirs, though subjects of the other contracting party, may succeed to their personal effects, either by will or *ab intestato*, and may obtain possession of the same in due course of law, either in person, or by other persons appointed by them to act on their behalf. In the event of the absence of heirs, or of persons duly appointed to act for them, the consul may be authorised to take charge, in due course of law, of the said effects, until the owner shall have made the necessary arrangements for obtaining possession of the property. If disputes shall arise between several claimants with respect to the title which each may have to the property, such disputes shall be decided by the courts of the country in which the property is situated; and if hereafter any favour as regards the possession or inheritance of landed or funded property (*biens fonds*) shall be granted, in the dominions of either of the high contracting parties, to the subjects of any other nation, the same favour shall extend reciprocally to their respective subjects, as the case may be, either in Portugal or Great Britain.

3. The subjects of either contracting party residing within the dominions of the other, shall be free to manage their own affairs themselves, or to commit those affairs to the management of any persons whom they may appoint as their broker, factor, agent, or interpreter; nor shall any such British subjects be restrained in their choice of persons to act in such capacities, nor shall they be called upon to pay any salary or remuneration to any person whom they shall not choose to employ. Absolute freedom shall be given, in all cases, to the buyer and seller to bargain together, and to fix the price of any goods, wares, or merchandises, imported into, or to be exported from, the dominions of either contracting party, the laws and established customs of the country being duly observed.

The subjects of either of the high contracting parties residing within the dominions of the other shall be at liberty to open retail stores and shops, under the same municipal and police regulations as native subjects; and they shall not, in this respect, be liable to any other or higher taxes or imposts than those which are or may be paid by native subjects.

4. There shall be reciprocal liberty of commerce and navigation between the subjects of the two high contracting parties; and the subjects of the two sovereigns respectively shall not pay, in the ports, harbours, roads, cities, towns, or places whatsoever in either kingdom, any other or higher duties, taxes, rates, or imposts, under whatsoever names designated or included, than those which are there paid by the subjects or citizens of the most favoured nation.

No duty of customs or other impost shall be charged upon any goods, the produce of the one country, upon importation by sea or by land from that country into the other, higher than the duty or impost charged upon goods of the same kind, the produce of and imported from any other country; and no duty, restriction, or prohibition shall be imposed upon the importation and exportation from one country to the other, of the goods and produce of each, which shall not be imposed upon goods of the same kind, when imported from or exported to any other country; and her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and her Majesty the Queen of Portugal, do hereby bind and engage themselves, their heirs and successors, not to grant any favour, privilege, or immunity, in matters of commerce and navigation, to the subjects or citizens of any other state, which shall not also, and at the same time be extended to the subjects of the other high contracting party, gratuitously, if the concession in favour of that other state shall have been gratuitous; and on giving, as nearly as possible, the same compensation or equivalent, if the concession shall have been conditional.

5. No duties of tonnage, and no harbour, light-house, pilotage, quarantine, or other similar or corresponding duties, of whatever nature, or under whatever denomination, shall be imposed in either country upon the vessels of the other, in respect of voyages between the two countries, if laden; or in respect of any voyage, if in ballast, which shall not be equally imposed, in the like cases, on national vessels.

6. All goods, the growth, produce, or manufacture of their respective possessions, which can legally be imported into either country from the other, in ships of that other country, shall, when so imported, be subject to the same duties, whether they be imported in ships of the one country or in ships of the other; and in like manner, all goods which can legally be exported from either country to the other, in ships of that other country, shall, when so exported, be subject to the same duties, and be entitled to the same drawbacks, bounties, and allowances, whether they be exported in ships of the one country or in ships of the other.

7. In order to promote and encourage the commercial intercourse between the dominions of the high contracting parties, and for the mutual benefit of their respective subjects, her Britannic Majesty and her Most Faithful Majesty agree to take into consideration the duties now levied upon articles the produce or manufacture of either country, with a view to make such reductions in those duties as may be consistent with the interest of the high contracting parties respectively.

This matter shall without delay be made the subject of a special negotiation between the two governments.

8. British ships shall be allowed to proceed direct from any port of her Britannic Majesty's dominions to any colony of her Most Faithful Majesty, and to import into such colony any goods the growth, produce, or manufacture of the United Kingdom, or of any of the British dominions, except such goods as are prohibited to be imported into such colony, or which are admitted into it only from the dominions of her Most Faithful Majesty; and such British ships, and such goods so imported in them, shall be liable in such colony of her Most Faithful Majesty to no higher or other duties and charges, than would be there payable on Portuguese ships importing the like sort of goods, or on the like goods, the growth, produce, or manufacture of any foreign country, and allowed to be imported into the said colony in Portuguese ships.

In like manner, Portuguese ships shall be allowed to proceed direct from any port of her Most Faithful Majesty's dominions to any colony of her Britannic Majesty, and to import into such colony any goods the growth, produce, or manufacture of Portugal, or of any of the Portuguese dominions, except such goods as are prohibited to be imported into such colony, or which are admitted into it only from the dominions of her Britannic Majesty; and such Portuguese ships, and such goods so imported in them, shall be liable, in such colony of her Britannic Majesty, to no higher or other duties and charges, than would be there payable on British ships importing the like sort of goods, or on the like goods, the growth, produce, or manufacture of any foreign country, and allowed to be imported into the said colony in British ships.

9. British ships shall be allowed to export from any colony of her Most Faithful Majesty to any place not under the dominion of her said Majesty, any goods not generally prohibited to be exported from such colony; and such British ships, and such goods so exported in them, shall be liable, in such colony, to no other or higher charges than would be payable by, and shall be entitled to the same drawbacks or bounties as would be there allowable on, Portuguese ships exporting such goods, or on such goods exported in Portuguese ships.

In like manner Portuguese ships shall be allowed to export from any colony of her Britannic Majesty to any place not under the dominion of her said Majesty, any goods not generally prohibited to be exported from such colony; and such Portuguese ships, and such goods so exported in them, shall be liable in such colony to no other or higher charges than would be payable by, and shall be entitled to the same drawbacks or bounties as would be there allowable on, British ships exporting such goods, or on such goods exported in British ships.

10. It is hereby declared that the stipulations of the present treaty are not to be understood as applying

to the navigation and carrying trade between one port and another, situated in the dominions of either contracting party, if such navigation and trade should in those dominions be reserved by law exclusively to national vessels. Vessels of either country shall, however, be permitted to discharge part of their cargoes at one port in the dominions of either of the high contracting parties, and then to proceed, with the remainder of their cargo, to any other port or ports in the same dominions, without paying any higher or other duties in such cases, than national vessels would pay in like circumstances; and they shall be permitted to land, in like manner, at different ports in the same voyage onwards.

11. The reciprocal liberty of commerce and navigation declared and stipulated for by the present treaty, shall not extend to contraband of war, or to articles the property of the enemies of either party.

The power granted by former treaties to carry, in the ships of either country, goods and merchandise of any description whatever, the property of the enemies of the other country, is now mutually re-annulled.

12. In all cases in which, in either kingdom, the duty to be levied upon any goods imported from the other kingdom shall be not a fixed rate, but a proportion of the value of the goods, such *ad valorem* duty shall be ascertained and secured in the following manner; that is to say, the importer shall, on making his entry for the payment of duty at the custom-house, sign a declaration, stating the description and value of the goods at such amount as he shall deem proper; and in case the officer or officers of the customs shall be of opinion that such valuation is insufficient, he or they shall be at liberty to take the goods, on paying to the importer the value thereof according to the declaration of the importer, together with an addition of 10 per cent.; and the custom-house officer shall, at the same time, return to the importer any duty which the importer may have paid upon such goods; and the amount of these sums shall be paid to the importer on the delivery of the goods to the said officer or officers, which must not be later than 10 days from the first detention of the goods.

13. Inasmuch as all merchandise, of whatever origin, whether admissible for home consumption or not, may be received and warehoused in all those ports of the United Kingdom of Great Britain and Ireland which are by law appointed to be warehousing ports for such articles, pending the entry of the same, either for home consumption or for re-exportation, as the case may be, under the regulations appointed for this purpose, and without such articles being liable, in the meantime, to the payment of any of the duties with which they would be charged, if upon arrival they were entered for consumption within the United Kingdom;—in like manner the Queen of Portugal consents and agrees that the ports of Her Most Faithful Majesty's dominions, which now are, or which shall hereafter become by law, warehousing ports, shall be free ports for receiving and warehousing, either for home consumption or for re-exportation, as the case may be, all merchandise imported in British ships, and all articles whatever, the produce or manufacture of the British dominions, imported by Portuguese ships; and the articles thus received and warehoused, subject to due regulations, shall not be liable, in the meantime, to any of the duties with which they would be charged, if they were entered for consumption on their arrival in the dominions of Her Most Faithful Majesty.

14. All goods or merchandise found on board of, or which shall have formed the cargo or part of the cargo of a vessel of the one country, which shall be wrecked, or left derelict, on or near the coast of the other country, unless the importation of such goods or merchandise shall be absolutely prohibited by law, shall be admitted for home consumption in the country on or near the coast of which such vessel shall be wrecked, or left derelict, or such goods or merchandise may be found, on payment of the same duty, as if the said goods or merchandise had been imported in a national vessel, even though such goods or merchandise could not by law be imported into the said country in any other than national vessels; and in fixing the amount of duty to be paid on such goods or merchandise, regard shall be had to any damage which the said goods or merchandise may have sustained.

To prevent frauds, the Board of Customs of each nation shall exercise their judgment as to the causes of wrecks; and when they are satisfied that the said wrecks were the result of accident or misfortune, and free from suspicion of collusion, they shall authorise, at the option of the proprietor or agent, if present, or otherwise of the consul, the transhipment, or the sale for home consumption, of the goods or merchandise, provided that such goods and merchandise could have been legally imported by the ships of the one country into the ports of the other country.

If any ships of war or merchant vessels should be wrecked on the coasts of either of the high contracting parties, such ships or vessels, or any parts thereof, and all furniture and appurtenances belonging thereto, and all goods or merchandise which shall be saved therefrom, or the produce thereof if sold, shall be faithfully restored to the proprietors, upon being duly claimed by them, or by their agents duly authorised; or if there are no such proprietors or agents on the spot, by the respective consuls of the nation to which the proprietors of the said ships, vessels, or goods may belong, and in whose district such wreck may have taken place, provided such claim be preferred within a year and a day from the time of such wreck; and such consul, proprietor or agent shall pay only the expenses incurred in the preservation of the property, together with the rate of salvage which would have been payable in the like case of a wreck of a national vessel; and the goods and merchandise saved from the wreck shall not be subject to duties, unless cleared for local consumption.

15. If any merchant vessel of either country should be driven into the ports of the other by stress of weather, for the purpose of effecting necessary repairs, every facility shall be afforded to such vessel for obtaining the assistance it may be in need of.

The strictest reciprocity shall be observed, in the most favourable sense, as to the relief to be afforded to such vessel from the duties, charges, and expenses in the ports of either nation, to which vessels, entering solely for the purposes of trade, are subjected. Sufficient time shall be allowed for the completion of repairs; and while the vessel shall be undergoing repair, its cargo shall not unnecessarily be required to be landed, either in whole or in part; and any difference of opinion which may arise between the custom-house authorities and the masters of the said vessels, as to the necessity of landing all or any part of the cargo, shall be referred to two sworn or public surveyors, one to be named by the chief custom-house authority of the port, and the other by the consul of the nation to which the vessel belongs.

Her Majesty the Queen of Portugal engages that the commerce of British subjects within the Portuguese dominions shall not be restrained, interrupted, or otherwise affected by the operation of any monopoly, contract, or exclusive privilege of sale or purchase whatsoever; but that the subjects of the United Kingdom shall have free and unrestrained permission to buy from and sell to whomsoever they please, and in whatever form and manner may be agreed upon between the purchaser and seller, without being obliged to give any preference or favour in consequence of any such monopoly, contract, or exclusive privilege of sale and purchase. And her Britannic Majesty engages that a like exemption from restraint, in respect to purchases or sales, shall be enjoyed by the subjects of her Most Faithful Majesty trading to or residing in the United Kingdom. But it is distinctly to be understood, that the present article shall not be interpreted as affecting the special regulations now in force, or which may hereafter be enacted, with a view solely to the encouragement and amelioration of the Douro wine trade, (it being always understood that British subjects shall in respect of the said trade be placed on the same footing as Portuguese subjects,) or with regard to the exportation of the salt of St. Ubes.

This article does not invalidate the exclusive right possessed by the crown of Portugal, within its own dominions, to the farm for the sale of Ivory, ursels, gold dust, soap, gunpowder, and tobacco for home consumption: provided, however, that should the above-mentioned articles, generally or separately, ever become articles of free commerce within the dominions of her Most Faithful Majesty, the subjects of her Britannic Majesty shall be permitted to traffic in them as freely and on the same footing as the subjects or citizens of the most favoured nation.

16. It is agreed and covenanted that neither of the high contracting parties shall knowingly receive into, or retain in its service, any subjects of the other party who have deserted from the naval or military service of that other party; but that, on the contrary, each of the contracting parties shall respectively discharge from its service any such deserters, upon being required by the other party to do so.

It is further agreed and declared, that if either of the high contracting parties shall grant to any state any new favour or facility, with respect to the recovery of deserters, such favour or facility shall be considered as granted also to the other contracting party, in the same manner as if the said favour or facility had been expressly stipulated by the present treaty.

And it is further agreed, that if any apprentices or sailors shall desert from vessels belonging to the subjects of either of the high contracting parties, while such vessels are within any port in the territory of the other party, the magistrates of such port and territory shall be bound to give every assistance in their power for the apprehension of such deserters, on application to that effect being made by the consul of the party concerned, or by the deputy or representative of the consul; and no public body, civil or religious, shall protect or harbour such deserters.

17. Her Britannic Majesty, on the representation of her Most Faithful Majesty, and in contemplation of the improving system of law and justice in Portugal, hereby consents to give up the exercise of the rights connected with the Conservatorial Court, so soon and so long as British subjects are admitted in Portugal to the benefit of securities similar or equivalent to those enjoyed by the subjects of her Most Faithful Majesty in Great Britain, as regards trial by jury, protection from arrest without a warrant from a magistrate, and examination within 24 hours after apprehension *in flagrant delicto*, and admission to bail.

It being always understood, that in other respects the subjects of her Britannic Majesty in Portugal shall be placed on the same footing as Portuguese subjects, in all causes, whether civil or criminal; and that they shall not, except in cases *flagrant delicto*, be liable to imprisonment without formal commitment (*casos formados*) under a warrant signed by a legal authority.

18. It is hereby agreed that her Britannic Majesty, relying upon the guarantees which are or may be afforded to British subjects by the law of Portugal under the present constitutional system, henceforward claims for British subjects in Portugal no privileges which are not enjoyed by Portuguese subjects in the Portuguese or British dominions. It being, however, understood, that her Britannic Majesty will be entitled, in the event (which God forbid) of political troubles affecting the operation of the above mentioned guarantees, to claim the re-establishment and observance of the privileges surrendered by the present and preceding article.

19. The present treaty shall be in force for the term of 10 years from the date hereof; and further, until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same; each of the high contracting parties reserving to itself the right of giving such notice to the other at the end of the said term of 10 years, or at any subsequent time.

And it is hereby agreed between them, that, at the expiration of 12 months after such notice shall have been received by either party from the other, this treaty, and all the provisions thereof, shall altogether cease and determine.

It is agreed, nevertheless, that either of the two high contracting parties shall have the right, at the end of 5 years, to require a revision of any articles not affecting the principle of the treaty, on giving 6 months' notice of a desire to make such revision; provided, however, that it be distinctly understood that the power of giving such notice shall not extend beyond, nor be recognised after, the termination of the fifth year.

The present treaty shall be ratified, and the ratifications shall be exchanged at Lisbon at the expiration of two months from the date of its signature, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at Lisbon, the 3d of July, in the year of our Lord 1842.

HOWARD DE WALDEN.  
DUQUE DE PALMEIRA.

*True Intent and Spirit of certain Points of Treaty.*

Lisbon, July 3. 1843.

The undersigned, her Britannic Majesty's plenipotentiary for the negotiation of a treaty of commerce and navigation between Great Britain and Portugal, has the honour to declare to his Excellency the Duke of Palmella, that with reference to article 5. all vessels built in the territory of her Most Faithful Majesty, or which shall be British built, or which shall have been captured from the enemy by the ships of the Portuguese government, and slave vessels condemned under similar circumstances, and which shall be wholly owned by any subject or subjects of her Most Faithful Majesty, and whereof the master and three-fourths of the mariners are subjects of her Most Faithful Majesty, will be considered as Portuguese, and will be entitled to be placed on the footing of national vessels, and to be treated on an equality with the vessels of the most favoured nation, in the ports of her Britannic Majesty, *i. e.*, in Great Britain and Ireland and the colonies hereinafter enumerated.

With reference to article 8., in the words "growth, produce, and manufacture," the wines and brandies of Portugal are comprehended.

With reference to article 14., the jurisdiction of the Cinque Ports does not interfere with the stipulations of this article.

With reference to article 17., in respect to the declaration of her Britannic Majesty regarding the conditional surrender of the rights connected with the Conservatorial Court, whenever the Portuguese government shall have officially communicated to her Majesty's government any law or laws establishing the guarantees in question, her Majesty will recognise the right of the Portuguese government to declare the further jurisdiction and authority of the British Conservatorial Court to have ceased by consent of her Majesty.

The colonies referred to are Canada, Newfoundland, Nova Scotia, Cape Breton, New Brunswick, Prince Edward Island, and all other British possessions in North America, British West India, including the islands and possessions on the continent of South America, Cape of Good Hope, and other possessions in Africa; the Mauritius, the Island of Ceylon, Van Diemen's Land, New South Wales, New Zealand.

Howard de Walden.

Lisbon, July 3. 1843.

The undersigned, her Most Faithful Majesty's plenipotentiary, has the honour to declare, by order of the government, to Lord Howard de Walden, in reference to the article 1. of the treaty of commerce and navigation, by both concluded and signed to-day, between Portugal and Great Britain, that the maxime that can be collected from any British subject for *manco* or *decima* *industrial*, will be 20 per cent. upon the rent of their shops, dwellings, and warehouses, which will serve as an invariable rule to the tribunal of the treasury, for deciding the appeals made by British subjects.

Duke of Palmella.

Lisbon, July 3. 1842.

PRUSSIA.

*Convention of Commerce between his Britannic Majesty and the King of Prussia, signed at London, April 2. 1824.*

Article 1. From and after the 1st day of May next, Prussian vessels entering or departing from the ports of the United Kingdom of Great Britain and Ireland, and British vessels entering or departing from the ports of his Prussian Majesty's dominions, shall not be subject to any other or higher duties or

charges whatever, than are or shall be levied on national vessels entering or departing from such ports respectively.

2. All articles of the growth, produce, or manufacture of any of the dominions of either of the high contracting parties, which are or shall be permitted to be imported into or exported from the ports of the United Kingdom and of Prussia, respectively, in vessels of the one country, shall, in like manner, be permitted to be imported into and exported from those ports in vessels of the other.

3. All articles not of the growth, produce, or manufacture of the dominions of his Britannic Majesty, which can legally be imported from the United Kingdom of Great Britain and Ireland, into the ports of Prussia, in British ships, shall be subject only to the same duties as are payable upon the like articles if imported in Prussian ships; and the same reciprocity shall be observed in the ports of the United Kingdom, in respect to all articles not the growth, produce, or manufacture of the dominions of his Prussian Majesty, which can legally be imported into the ports of the United Kingdom in Prussian ships.

4. All goods, which can legally be imported into the ports of either country, shall be admitted at the same rate of duty, whether imported in vessels of the other country, or in national vessels; and all goods which can be legally exported from the ports of either country, shall be entitled to the same bounties, drawbacks, and allowances, whether exported in vessels of the other country, or in national vessels.

5. No priority or preference shall be given, directly or indirectly, by the government of either country, or by any company, corporation, or agent, acting on its behalf or under its authority, in the purchase of any article, the growth, produce, or manufacture of either country, imported into the other, on account of or in reference to the character of the vessel in which such article was imported; it being the true intent and meaning of the high contracting parties, that no distinction or difference whatever shall be made in this respect.

6. The present convention shall be in force for the term of 10 years from the date hereof; and further, until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same; each of the high contracting parties reserving to itself the right of giving such notice to the other, at the end of the said term of 10 years; and it is hereby agreed between them, that, at the expiration of 12 months after such notice shall have been received by either party from the other, this convention, and all the provisions thereof, shall altogether cease and determine.

7. The present convention shall be ratified, and the ratifications shall be exchanged at London, within one month from the date hereof, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at London, the 2d day of April, in the year of our Lord 1824.

GEORGE CANNING. W. HUKKISON. WERTHER.

An order in council, dated May 25, 1824, directs that, from May 1, 1824, Prussian vessels entering or departing from the ports of the United Kingdom of Great Britain and Ireland, shall not be subject to any other or higher duties or charges whatever than are or shall be levied on British vessels entering or departing from such ports; that all articles of the growth, produce, or manufacture of any of the dominions of his Prussian Majesty, which are or shall be permitted to be imported into or exported from the ports of the United Kingdom of Great Britain and Ireland in British vessels, shall, in like manner, be permitted to be imported into and exported from the said ports in Prussian vessels; that all articles not of the growth, produce, or manufacture of the dominions of his Prussian Majesty, which can legally be imported from Prussia into the ports of the United Kingdom in Prussian vessels, shall be subject only to the same duties as are payable upon the like articles if imported in British ships; that all goods which can legally be imported into the ports of the United Kingdom shall be admitted at the same rate of duty, when imported in Prussian vessels, that is charged on similar articles imported in British vessels; and that all goods which can be legally exported from the ports of the United Kingdom, shall be entitled to the same bounties, drawbacks, and allowances, when exported in Prussian vessels, that are granted, paid, or allowed on similar articles when exported in British vessels.

A Treasury letter, dated October 13, 1824, directs, that with respect to pilotage and all other duties charged on vessels belonging to Prussia, Sweden, and Norway, Denmark, Hanover, and Hamburg, which have entered or which may enter the ports of the United Kingdom, either from stress of weather or from any other causes, it was the intention of the Lords of the Committee of Privy Council for Trade, that such dues should not be higher than are charged upon British vessels, and that it is only to the case of goods imported into this country, and not brought direct from the country to which the vessel belongs, that the equality of duty does not apply.

An order in council, dated May 3, 1823, states, that his Majesty is pleased to declare, that the ships of no belonging to the dominions of his Majesty the King of Prussia are entitled to the privileges granted by the law of navigation, and may import from the dominions of his Majesty the King of Prussia, into any of the British possessions abroad, goods the produce of such dominions, and may export goods from such British possessions abroad, to be carried to any foreign country whatever.

#### PRUSSIA, BAVARIA, &c.

*Convention of Commerce and Navigation between Great Britain, on the one part; and Prussia, Bavaria, Saxony, Württemberg, Baden, the Electorate of Hesse, the Grand Duchy of Hesse, the States forming the Commercial Union of Thuringia, Nassau, and Frankfurt, on the other part.*

Article 1. In consideration of the circumstance that British vessels are admitted, together with their cargoes, to entry in the ports of Prussia, and of the other states of the aforementioned Union of Customs, when coming from the ports of all countries, and in consideration of the concessions stipulated in this recent convention for British trade with all the states of this Union of Customs; in consideration also of the facility which the application of steam power to inland navigation affords for the conveyance of produce and merchandise of all kinds up and down rivers; and in consideration of the new opening which may by these means be given to the trade and navigation between the U. Kingdom and the British possessions abroad on the one hand, and the states now composing the Union of Customs, on the other; and of which states use as the natural outlet of their commerce ports not within their own dominions; it is agreed that, from and after the date of the exchange of the ratifications of this present convention, Russian vessels, and the vessels of the other states forming the said Union of Customs, together with their cargoes, consisting of all such goods as can be legally imported into the U. Kingdom and the British possessions abroad, by the said vessels from the ports of the countries to which they respectively belong, shall, when coming from the mouths of the Meuse, of the Ems, of the Weser, and of the Elbe, or from the mouth of any navigable river lying between the Elbe and the Meuse, and forming the means of communication between the sea and the territory of any of the German states which are parties to this treaty, be admitted into the ports of the U. Kingdom, and of the British possessions abroad, in as full and ample a manner, as if the ports from which such vessels may have come, as aforesaid, were within the dominions of Prussia, or of any other of the states aforesaid; and such vessels shall be permitted to import the goods above mentioned upon the same terms on which the said goods might be imported if coming from the national ports of such vessels; and also that, in like manner, such vessels proceeding from Great Britain and her colonial possessions abroad to the places thus referred to, shall be treated as if returning to a Prussian Baltic port: — it being understood that these privileges are to extend to the vessels of Prussia and of the states aforesaid, and to their cargoes, only in respect to each of the said ports in which British vessels and their cargoes shall, upon their arrival thereat, and depar-

ture therefrom, continue to be placed on the same footing as the vessels of Prussia and of the other states of the union.

2. The King of Prussia, in his own name, and in the name of the states aforesaid, agrees to place, always and in every way, the trade and navigation of the subjects of Her Britannic Majesty, in respect to the importation of sugar and rice, upon the same footing as that of the most favoured nation.

3. In the event of other German states joining the Germanic Union of Customs, it is hereby agreed that such other states shall be included in all the stipulations of the present convention.

4. The present convention shall be in force until the 1st of January, 1842, and further for the term of 6 years, provided neither of the high contracting parties shall have given to the other 6 months' previous notice that the same shall cease to be in force on the said 1st of January, 1842; and if neither party shall have given to the other six months' previous notice that the present convention shall cease on the 1st day of January, 1848, then the present convention shall further remain in force until the 1st of January, 1854, and further, until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same, each of the high contracting parties reserving to itself the right of giving such notice to the other; and it is hereby agreed between them, that at the expiration of 12 months after such notice shall have been received by either party from the other, this convention, and all the provisions thereof, shall altogether cease and determine.

The present convention shall be ratified, and the ratifications thereof shall be exchanged at London, at the expiration of 2 months, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at London, the 3d day of March, in the year of our Lord 1841.

PALMERSTON.  
H. LABOUCHÈRE.

By an order in council, dated August 28. 1841, it is ordered, that Prussian vessels, and the vessels of the other states forming the German Union of Customs, together with their cargoes, consisting of all such goods as can be legally imported into the U. Kingdom and the British possessions abroad, by the said vessels, from the ports of the countries to which they respectively belong, shall, when coming from the mouths of the Meuse, of the Ems, of the Weser, and of the Elbe, or from the mouths of any navigable river, lying between the Elbe and the Meuse, and forming the means of communication between the sea and the territory of any of the German states, which are parties to this treaty, be admitted into the ports of the U. Kingdom and of the British possessions abroad, in as full and ample a manner as if ports from which such vessels may have come as aforesaid, and such vessels shall be permitted to import the goods above-mentioned upon the same terms on which the said goods might be imported if coming from the national ports of such vessels; and also that in like manner such vessels proceeding from Great Britain and her colonial possessions abroad, to the ports or places thus referred to, shall be treated as if returning to a Prussian Baltic port; it being understood that these privileges are to extend to the vessels of Prussia and of the states aforesaid, and to their cargoes only in respect to each of the said states, which British vessels and their cargoes shall, upon their arrival thereat and departure therefrom, continue to be placed upon the same footing as the vessels of Prussia and of the other states of the union.

#### RIO DE LA PLATA (THE STATES OF).

#### *Treaty of Amity, Commerce, and Navigation, between his Majesty and the United Provinces of Rio de La Plata.*

Article 1. There shall be perpetual amity between the dominions and subjects of his Majesty the King of the United Kingdom of Great Britain and Ireland, and the United Provinces of Rio de la Plata and their inhabitants.

2. There shall be, between all the territories of his Britannic Majesty in Europe and the territories of the United Provinces of Rio de la Plata, a reciprocal freedom of commerce; the inhabitants of the two countries, respectively, shall have liberty freely and securely to come, with their ships and cargoes, to all such places, ports, and rivers in the territories aforesaid, to which other foreigners are or may be permitted to come, to enter into the same, and to remain and reside in any part of the said territories respectively; also to hire and occupy houses and warehouses for the purposes of their commerce; and generally, the merchants and traders of each nation respectively shall enjoy the most complete protection and security for their commerce, subject always to the laws and statutes of the two countries respectively.

3. His Majesty the King of the United Kingdom of Great Britain and Ireland engages further, that in all his dominions situated out of Europe, the inhabitants of the United Provinces of Rio de la Plata shall have the like liberty of commerce and navigation stipulated for in the preceding article, to the full extent in which the same is permitted at present, or shall be permitted hereafter, to any other nation.

4. No higher or other duties shall be imposed on the importation into the territories of his Britannic Majesty, of any articles of the growth, produce, or manufacture of the United Provinces of Rio de la Plata, and no higher or other duties shall be imposed on the importation into the said United Provinces, of any articles of the growth, produce, or manufacture of his Britannic Majesty's dominions, than are or shall be payable on the like articles, being the growth, produce, or manufacture of any other foreign country; nor shall any other or higher duties or charges be imposed, in the territories or dominions of either of the contracting parties, on the exportation of any articles to the territories or dominions of the other, than such as are or may be payable on the exportation of the like articles to any other foreign country; nor shall any prohibition be imposed upon the exportation or importation of any articles the growth, produce, or manufacture of his Britannic Majesty's dominions, or of the said United Provinces, which shall not equally extend to all other nations.

5. No higher or other duties or charges on account of tonnage, light, or harbour dues, pilotage, salvage in case of damage or shipwreck, or any other local charges, shall be imposed, in any of the ports of the said United Provinces, on British vessels of the burden of above 120 tons, than those payable in the same ports by vessels of the said United Provinces of the same burden, nor in the ports of any of his Britannic Majesty's territories on the vessels of the United Provinces of above 120 tons, than shall be payable, in the same ports, on British vessels of the same burden.

6. The same duties shall be paid on the importation into the said United Provinces of any article the growth, produce, or manufacture of his Britannic Majesty's dominions, whether such importation shall be in vessels of the said United Provinces, or in British vessels; and the same duties shall be paid on the importation into the dominions of his Britannic Majesty of any article the growth, produce, or manufacture of the said United Provinces, whether such importation shall be in British vessels, or in vessels of the said United Provinces; the same duties shall be paid, and the same drawbacks and bounties allowed on the exportation of any articles of the growth, produce, or manufacture of his Britannic Majesty's dominions to the said United Provinces, whether such exportation shall be in vessels of the said United Provinces, or in British vessels; and the same duties shall be paid, and the same drawbacks and bounties allowed on the exportation of any articles the growth, produce, or manufacture of the said United Provinces to his Britannic Majesty's dominions, whether such exportation shall be in British vessels or in vessels of the said United Provinces.

7. In order to avoid any misunderstanding with respect to the regulations which may respectively constitute a British vessel or a vessel of the said United Provinces, it is hereby agreed, that all vessels built in the dominions of his Britannic Majesty, and owned, navigated, and registered according to the laws of Great Britain, shall be considered as British vessels; and that all vessels built in the territories of the

said United Provinces, properly registered, and owned by the citizens thereof, or any of them, and whereof the master and three-fourths of the mariners, at least, are citizens of the said United Provinces, shall be considered as vessels of the United Provinces.

8. All merchants, commanders of ships, and others, the subjects of his Britannic Majesty, shall have the same liberty in all the territories of the said United Provinces as the natives thereof, to manage their own affairs themselves, or to commit them to the management of whomsoever they please, as broker, factor, agent, or interpreter; nor shall they be obliged to employ any other persons for those purposes, nor to pay them any salary or remuneration, unless they shall choose to employ them; and absolute freedom shall be allowed in all cases to the buyer and seller to bargain and fix the price of any goods imported into or exported from the said United Provinces, as they shall see good.

9. In whatever relates to the lading and unlading of ships, the safety of merchandise, goods, and effects, the disposal of property of every sort and denomination, by sale, donation, or exchange, or in any other manner whatsoever, as also the administration of justice, the subjects and citizens of the two contracting parties shall enjoy, in their respective dominions, the same privileges, liberties, and rights as the most favoured nation, and shall not be charged in any of these respects with any other duties or imposts than those which are paid or may be paid by the native subjects or citizens of the power in whose dominions they may be resident. They shall be exempted from all compulsory military service whatsoever, whether by sea or land, and from all forced loans, or military exactions or requisitions; neither shall they be compelled to pay any ordinary taxes, under any pretext whatsoever, greater than those that are paid by native subjects or citizens.

10. It shall be free for each of the two contracting parties to appoint consuls for the protection of trade, to reside in the dominions and territories of the other party; but before any consul shall act as such, he shall, in the usual form, be approved and admitted by the government to which he is sent; and either of the contracting parties may except from the residence of consuls such particular places as either of them may judge fit to be so excepted.

11. For the better security of commerce between the subjects of his Britannic Majesty and the inhabitants of the United Provinces of Rio de la Plata, it is agreed, that if at any time any interruption of friendly commercial intercourse, or any rupture, should unfortunately take place between the two contracting parties, the subjects or citizens of either of the two contracting parties residing in the dominions of the other shall have the privilege of remaining and continuing their trade therein without any manner of interruption, so long as they behave peaceably and commit no offence against the laws; and their effects and property, whether intrusted to individuals or to the state, shall not be liable to seizure or sequestration, or to any other demands than those which may be made upon the like effects or property belonging to the native inhabitants of the state in which such subjects or citizens may reside.

12. The subjects of his Britannic Majesty residing in the United Provinces of Rio de la Plata shall not be disturbed, persecuted, or annoyed on account of their religion, but they shall have perfect liberty of conscience therein, and to celebrate divine service either within their own private houses, or in their own particular churches or chapels, which they shall be at liberty to build and maintain in convenient places, approved of by the government of the said United Provinces: liberty shall also be granted to bury the subjects of his Britannic Majesty who may die in the territories of the said United Provinces in their own burial places, which, in the same manner, they may freely establish and maintain. In the like manner, the citizens of the said United Provinces shall enjoy, within all the dominions of his Britannic Majesty, a perfect and unrestrained liberty of conscience, and of exercising their religion publicly or privately, within their own dwelling houses, or in the chapels and places of worship appointed for that purpose, agreeably to the system of toleration established in the dominions of his said Majesty.

13. It shall be free for the subjects of his Britannic Majesty residing in the United Provinces of Rio de la Plata, to dispose of their property, of every description, by will or testament, as they may judge fit; and in the event of any British subject dying without such will or testament in the territories of the United Provinces, the British consul-general, or, in his absence, his representative, shall have the right to nominate curators to take charge of the property of the deceased for the benefit of his lawful heirs and creditors, without interference, giving convenient notice thereof to the authorities of the country; and reciprocally.

14. His Britannic Majesty being extremely desirous of totally abolishing the slave trade, the United Provinces of Rio de la Plata engage to co-operate with his Britannic Majesty for the completion of so beneficent a work, and to prohibit all persons inhabiting within the said United Provinces, or subject to their jurisdiction, in the most effectual manner, and by the most solemn laws, from taking any share in such trade.

15. The present treaty shall be ratified, and the ratifications shall be exchanged in London within 4 months, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed their seals therunto.

Done at Buenos Ayres, 2d day of February, in the year of our Lord 1826.

WOODBINE PARISH, H.M. Consul-General.

MANL. J. GARCIA.

An order in council, dated 3d September, 1827, orders that vessels of the United Provinces of Rio de la Plata entering the ports of the United Kingdom of Great Britain and Ireland, in ballast, or laden direct from any of the ports of Rio de la Plata, or departing from the ports of the said United Kingdom, together with the cargoes on board the same, such cargoes consisting of articles which may be legally imported or exported, shall not be subject to any other or higher duties or charges whatever than are or shall be levied on British vessels entering or departing from such ports; or on similar articles when imported into or exported from such ports in British vessels; and also such articles, when exported from the said ports in vessels of the United Provinces of Rio de la Plata, respectively, shall be entitled to the same bounties, drawbacks, and allowances that are granted on similar articles when exported in British vessels.

*Local Dues.*—Provided nevertheless, that nothing herein shall extend to any duties or charges on account of tonnage, light or harbour dues, pilotage, salvage in case of damage or shipwreck, or any other local charges to which any vessels of the United Provinces of Rio de la Plata, of the burden of 120 tons, or of any less burden, are now by law liable in the ports of any of his Majesty's dominions; it appearing to his Majesty and his privy council, that British vessels of the burden of 120 tons, or of any less burden, are subject in the ports of the said United Provinces to higher duties and charges than are levied in those ports on vessels of the said United Provinces of the burden of 120 tons, or of any less burden.

#### RUSSIA.

*Treaty of Commerce and Navigation between Her Majesty and the Emperor of all the Russias, signed at St. Petersburg, January 11. 1843.*

Article 1. There shall be reciprocal freedom of navigation and commerce for the ships and subjects of the two high contracting powers, in all parts of their respective dominions where navigation and commerce are at present allowed, or may hereafter be allowed, to the ships and subjects of any other nation.

2. From the date of the exchange of the ratifications of the present treaty, British vessels arriving in or departing from the ports of his Majesty the Emperor of all the Russias, and Russian vessels arriving in or departing from the ports of the United Kingdom of Great Britain and Ireland, and of all the possessions of her Britannic Majesty, shall be subject to no other or higher duties or charges, of whatsoever

nature they may be, than those which are now or shall hereafter be imposed on national vessels, on their entering into or departing from such ports.

3. In consideration that British ships arriving directly from other countries than those belonging to the high contracting parties are admitted, with their cargoes, into the ports of the Russian Empire, without paying any other duties whatsoever than those payable by Russian vessels; and in consideration of the advantages which, in this respect, the present treaty specifically grants to British commerce in the Grand Duchy of Finland; it is agreed, that from the date of the exchange of the ratifications of the present treaty, Russian vessels arriving from the mouth of the Vistula, the Niemen, or any other river which forms the outlet of a navigable stream having its source in the dominions of his Majesty the Emperor of all the Russias, or passing through the said dominions, shall be admitted, with their cargoes, into the ports of the United Kingdom of Great Britain and Ireland, and of all the possessions of her Britannic Majesty, exactly in the same manner as if those vessels arrived directly from Russian or Finnish ports, with all the privileges and immunities agreed upon by the present treaty of commerce and navigation. In like manner, Russian vessels proceeding from any port of Great Britain, or of the British possessions, for the mouth of any of the above-mentioned rivers, shall be treated as if they were returning to a port of the Empire of Russia, or of the Grand Duchy of Finland. It is, however, understood, that these privileges shall apply to Russian vessels and their cargoes, with respect to places situated at the mouths of the above-mentioned rivers, only so long as British vessels and their cargoes shall be treated at those places, on their arrival and departure, on the same footing with Russian vessels.

4. All productions of the soil, industry, and art of the dominions and possessions of his Majesty the Emperor of all the Russias, including the said productions which may be exported by the rivers or streams mentioned in the preceding article, and which may be imported into the ports of the United Kingdom and the possessions of her Britannic Majesty; and also all the productions of the soil, industry, and art of the United Kingdom and possessions of her Britannic Majesty, which may be imported into the ports of his Majesty the Emperor of all the Russias, shall enjoy reciprocally, in all respects, the same privileges and immunities, and may be imported and exported exactly in the same manner, in vessels of the one as in vessels of the other high contracting party.

5. All articles which are not the productions of the soil, industry, and art of the respective states or of their possessions, and which may be legally imported from the ports of his Majesty the Emperor of all the Russias, as likewise from those of the rivers and streams mentioned in the third article, into the ports of the United Kingdom of Great Britain and Ireland, and of all the possessions of her Britannic Majesty, in Russian vessels, shall be subject to the same duties only as would be payable upon the same articles, if they were imported in British vessels.

In like manner, all articles which are not the productions of the soil, industry, and art of the respective states or of their possessions, and which may be legally imported from the ports of the United Kingdom, and of all the possessions of her Britannic Majesty, into the ports of his Majesty the Emperor of all the Russias, in British vessels, shall be subject to the same duties only which would be payable upon the same articles, if they were imported in Russian vessels.

Her Britannic Majesty grants by this treaty to Russian navigation and trade, all the benefits and privileges of navigation and commerce now enjoyed, or which may hereafter be enjoyed, by the most favoured nations, under existing laws and acts of parliament, or in virtue of orders in council, or treaties.

6. All merchandise and articles of commerce which, according to the stipulations of the present treaty, or according to the laws and ordinances in force in the respective countries, may be legally imported into or exported from the dominions and possessions of the two high contracting parties, either under the British flag, or under the Russian flag, shall, in like manner, be subject to the same duties, whether imported in vessels of the one state, or in national vessels; and the same bounties, drawbacks, and advantages shall be granted upon all merchandise and articles of commerce, which may be legally exported from the ports of either state, whether exported in vessels of the one or in vessels of the other state.

7. All merchandise and articles of commerce which shall be imported into, deposited or warehoused in, the ports of the dominions and possessions of the high contracting parties, shall be subject, while so warehoused, to the same regulations, conditions, and duties, whether imported in British or in Russian vessels. In the same manner, the re-exportation of such merchandise or articles of commerce shall be treated in the same manner, and be liable to the payment of the same duties, whether exported in British or in Russian vessels.

8. No priority or preference shall be given, directly or indirectly, by either of the two governments, or by any company, corporation, or agent acting in its name or under its authority, in the purchase of any production of the soil, industry, or art of either of the two states and their possessions, imported into the ports of the other, on account of the nationality of the vessel in which such article may have been imported; it being the fixed intention of the two contracting parties, that no difference or distinction whatever shall be made in this respect.

9. In regard to the commerce to be carried on in Russian vessels with the British possessions in the East Indies, her Britannic Majesty consents to grant to the subjects of his Majesty the Emperor of all the Russias, the same advantages and privileges as are or may be enjoyed, under any treaty or act of parliament, by the subjects or citizens of the most favoured nation; subject to the laws, rules, regulations, and restrictions which are or may become applicable to the vessels and subjects of any other state enjoying the same advantages and privileges for trading with the said possessions.

10. The stipulations of the present treaty shall not apply to the coasting trade carried on between port and port in the dominions of either contracting party, by the sailing or steam vessels of the other, so far as regards the carrying of passengers, merchandise, or articles of commerce; this trade being reserved exclusively to national vessels.

11. The vessels and subjects of the high contracting parties shall, by the present treaty, reciprocally enjoy all such advantages, immunities, and privileges, in the ports of their respective dominions and possessions, as are now enjoyed by the navigation and commerce of the most favoured nations; the intention being to secure, in the United Kingdom and in the British possessions, to Russian vessels and subjects, the full and entire advantages of navigation and commerce granted by existing laws and acts of parliament, orders in council, or treaties, to other powers, or which may hereafter be granted; and, in like manner, British vessels and subjects shall enjoy, in the ports of the dominions and possessions of his Majesty the Emperor of all the Russias, the full and entire advantages of navigation and commerce granted by existing laws, regulations, and ordinances, or by treaties, to foreign powers, or which may hereafter be granted. And their Majesties the Queen of the United Kingdom of Great Britain and Ireland, and the Emperor of all the Russias, engage reciprocally not to grant any favours, privileges, or immunities whatsoever, in matters of commerce and navigation, to the subjects or citizens of any other state, which shall not be also at the same time granted to the subjects of the other high contracting party, gratuitously, if the concession in favour of the other state shall have been gratuitous, or upon giving as nearly as possible the same compensation or equivalent, in case the concession shall have been conditional.

12. It is understood that, in regard to commerce and navigation in the Russian possessions on the north-west coast of America, the convention concluded at St. Petersburg on the 16<sup>th</sup> February, 1825, continues in force.

13. Any British or Russian vessel which may be compelled by stress of weather or by accident to take

shelter in the ports of either of the high contracting parties, shall be at liberty to refit therein, to procure all necessary stores, and to put to sea again, without paying any other than port and lighthouse dues, which shall be the same as those payable by national vessels. In case, however, the master of such vessel should be under the necessity of disposing of a part of his merchandise in order to defray his expenses, he shall be bound to conform to the regulations and tariffs of the place to which he may have come.

In the event of a vessel being wrecked at a place belonging to either of the high contracting parties, there shall not only be afforded to the persons shipwrecked every kind of assistance, but, moreover, the merchandise and effects which they may have thrown overboard, or which may have been saved, shall not be seized or detained under any pretext whatsoever. The said effects and merchandise shall, on the contrary, be preserved and restored on payment of the same rate of salvage, and of customs or other duties, which would have been payable in the like case of a wreck of a national vessel. In the case either of shipwreck, or of a vessel being driven into port by stress of weather, the respective consuls, vice-consuls, or commercial agents, shall be authorised to interpose in order to afford the necessary assistance to their fellow-countrymen.

14. The consuls, vice-consuls, or commercial agents of each of the two high contracting parties residing in the dominions of the other, shall receive from the local authorities such assistance as can by law be given to them, for the recovery of deserters from ships of war or merchant vessels of their respective countries.

15. The present treaty shall remain in force during the space of ten years, dating from the exchange of the ratifications thereof; and further, until the expiration of twelve months after either of the high contracting parties shall have given notice to the other of its intention to put an end thereto; each of the high contracting parties reserving to itself the right of giving such notice to the other at the expiration of the first nine years: and it is agreed between them, that at the expiration of twelve months after such notice shall have been received by either of the high contracting parties from the other, the present treaty, and all the stipulations contained therein, shall cease to be binding on the two parties.

The present treaty shall be ratified, and the ratifications thereof exchanged at London, at the expiration of one month, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have fixed thereto the seals of their arms.

Done at St. Petersburg, the 11<sup>th</sup> day of January, in the year of our Lord 184<sup>5</sup>.

NESSELEODE.  
CANCRINE.

**Separate Article I.** The commercial intercourse of Russia with the kingdoms of Sweden and Norway being regulated by special stipulations, which may hereafter be renewed, and which do not form part of the regulations applicable to foreign commerce in general, the two high contracting parties, being desirous of removing from their commercial relations every kind of doubt or cause of discussion, have agreed that those special stipulations granted in favour of the commerce of Sweden and Norway, in consideration of equivalent advantages granted in those countries to the commerce of the Grand Duchy of Finland, shall in no case apply to the relations of commerce and navigation established between the two high contracting parties by the present treaty.

**Separate Article II.** It is understood, in like manner, that the exemptions, immunities, and privileges hereinafter mentioned, shall not be considered as at variance with the principle of reciprocity, which forms the basis of the treaty of this date, that is to say:—

1. The exemption from navigation dues during the first three years, which is enjoyed by vessels built in Russia, and belonging to Russian subjects;

2. The exemptions of the like nature granted in the Russian ports of the Black Sea, the sea of Asoff, and the Danube, to such Turkish vessels arriving from ports of the Ottoman Empire situated on the Black Sea, as do not exceed eighty lasts burden;

3. The permission granted to the inhabitants of the coast of the government of Archangel, to import duty free, or on payment of moderate duties, into the ports of the said government, dried or salted fish, as likewise certain kinds of furs, and to export therefrom, in the same manner, corn, rope, and cordage, pitch, and ravenstuck;

4. The privilege of the Russian American Company;

5. The privilege of the Steam Navigation Companies of Lubeck and Havre; and lastly,

6. The immunities granted in Russia to certain English companies, called "Yacht Clubs."

The present separate articles shall have the same force and validity as if they were inserted, word for word, in the treaty signed this day. They shall be ratified, and the ratifications thereof exchanged at the same time.

In witness whereof, the respective plenipotentiaries have signed the same, and have fixed thereto the seals of their arms.

#### *Regulations as to Travellers in Russia.*

St. Petersburg, Jan. 15<sup>th</sup>, 1842.  
27

By order of the minister of finance, the department of foreign commerce has just published a notice consequent on the promulgation of the new tariff of customs for the regulation of the trade by the frontiers of Europe:—

1. In what relates to travellers arriving in Russia, the authorities will conform strictly to the regulations concerning travellers, with this single difference—that, in future, it will not be permitted to each traveller to have more than one fur pelisse; and that the duty lately established, of 25 per cent. *ad valorem*, will be levied upon such articles of silver plate as they may have over and above the number specified. The articles that are not comprised in the category of the regulations relating to travellers cannot be introduced without payment of the duties; and as to those of which the importation is prohibited, they can only be re-exported under the circumstances foreseen by the law. In any other case they will be confiscated, especially if there shall not have been made on their behalf any declaration or previous decision by the superior authorities of the customs authorising their admission.

2. In consequence, articles included in the category of merchandise or provisions of which the importation is permitted by the tariff cannot in any case be introduced duty free.

3. Nothing shall be recognised as the effects of travellers but what they bring with them. Effects separately forwarded shall be considered as merchandise, and be liable to the provisions of the tariff.

4. Nothing shall be recognised as effects for the personal use of travellers—which, under certain circumstances, are admitted free of duty—except those that bear evident marks of the use that has been made of them. Effects not bearing such marks shall be considered as new.

5. The verification, at a private residence, of effects so brought, shall only be permitted in case of works of art.

## SARDINIA.

*Treaty of Navigation between her Majesty and the King of Sardinia, signed at Turin, September 6, 1841.*

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and his Majesty the King of Sardinia, desiring to ameliorate, enlarge, and regulate the commercial relations between their respective kingdoms, and to furnish every sort of facility and encouragement to their respective subjects engaged in commercial operations with each other, and being persuaded that nothing can contribute more to the attainment of this desirable object than a reciprocal abrogation of all differential duties of navigation, of whatever nature, with regard to vessels of one of the two nations in the ports of the other, have named plenipotentiaries to conclude a treaty to this effect.

Article 1. British vessels which shall arrive laden in the ports of the kingdom of Sardinia, coming from the ports of the United Kingdom of Great Britain and Ireland; and reciprocally, Sardinian vessels which shall arrive laden in the ports of the U. Kingdom of Great Britain and Ireland, coming from the ports of Sardinia; as well as British or Sardinian vessels which shall arrive in ballast, in respect of any voyage whatever, in the ports of one or the other of these kingdoms, shall be treated on their entry, during their stay, and on their departure, on the same footing as national vessels, with respect to duties of tonnage, harbour, light-houses, pilotage, quarantine, wharfage, beaconage, signals, and any other duties of navigation whatever, which affect vessels, and are levied in the name and for the profit of government, public functionaries, communes, or establishments of whatever kind.

2. In order to avoid all misunderstanding with regard to the regulations according to which are fixed the conditions which establish the nationality of vessels, it is agreed that all vessels shall be considered as British vessels which are built in the dominions of her Britannic Majesty; and all those which, having been captured from an enemy by her Majesty's ships of war, or by her subjects furnished with letters of marque by the lords commissioners of the Admiralty, shall have been regularly declared a lawful prize by one of the prize courts of her Britannic Majesty; as well as all vessels which shall have been condemned by any competent court for a breach of the laws made for the prevention of the slave trade; provided that they are owned, navigated, and registered according to the laws of Great Britain; and that they are the entire property of one or more of the subjects of her Majesty the Queen of Great Britain and Ireland; and that the master and three fourths of the crew are British subjects.

In the same manner, all vessels shall be considered as Sardinian vessels which are built in the dominions of his Sardinian Majesty; and all those which, having been captured from an enemy by his Majesty's ships of war, or by his subjects furnished with letters of marque, shall have been regularly declared a lawful prize by one of the prize courts of the kingdom of Sardinia; as well as all vessels which shall have been condemned by any competent court for a breach of the laws made for the prevention of the slave trade; provided that they are owned, navigated, and registered according to the laws of the said kingdom; and that they are the entire property of one or more subjects of his Sardinian Majesty; and that the master and three-fourths of the crew are Sardinian subjects.

3. In all that regards the stationing of vessels, their loading and unloading in the ports, basins, roadsteads, and harbours, of one of the two countries, no privilege shall be accorded to national vessels which shall not be equally accorded to the vessels of the other country; the desire of the contracting parties being that in this respect likewise vessels shall be treated on a footing of perfect equality.

4. Vessels of the two countries shall be at liberty to discharge the whole or part of their cargo in the ports of the dominions of either of the high contracting parties, according as the captain or the proprietor, or whoever is duly authorised to act in the port as agent for the vessel or cargo shall consider advisable; and then proceed with the remainder of their cargo to the other ports of the same country.

5. Should any ships of war or mercantile vessels of one of the two countries be wrecked upon the coast of the other, such ships or vessels, or any part thereof, their rigging, and all the appurtenances thereof, as well as all effects and merchandise which shall be saved therefrom, or the proceeds of the sale thereof, shall be faithfully restored to the proprietors, or their duly authorised factors, upon being claimed by them. In the event of such proprietors or factors not being on the spot, the said appurtenances, merchandise, or the proceeds thereof, shall be delivered, together with all papers found on board such vessels, to the British or Sardinian consul in whose district the wreck may have taken place; and such consul, proprietor, or factor shall pay only the expenses incurred in the preservation of the property, together with the rate of salvage which would have been payable in the like case of a wreck of a national vessel. The merchandise and goods saved from the wreck shall not be subject to the established duties, unless cleared for consumption.

6. It is expressly understood that the preceding articles are not applicable to the navigation of the coast, or coasting trade of each of the two countries which is exclusively reserved to each of the high contracting parties.

7. British vessels arriving from Gibraltar or from Malta shall enjoy, in the ports of his Majesty the King of Sardinia, the same advantages as are accorded to British vessels arriving from the ports of the United Kingdom of Great Britain and Ireland; and reciprocally, Sardinian vessels, which shall enter the ports of the Island of Malta or of Gibraltar, shall enjoy all the advantages which are assured to them by the present treaty, when entering the ports of the United Kingdom of Great Britain and Ireland.

8. The present treaty shall be in force for the term of 10 years from the date of the exchange of the ratifications thereof, and further until the expiration of 12 months after one of the contracting parties shall have announced to the other the intention to terminate the same, each of the said high contracting parties reserving to itself the right of giving such notice to the other at the end of the said term of 10 years.

The ratifications of the present treaty shall be exchanged at Turin, within the space of 2 months from the date of the signature thereof, or sooner if possible.

In witness whereof, we have signed the same in double original, and have affixed thereto the seal of our arms.

Done at Turin, the 6th of September, 1841.

RALPH ABERCROMBY.  
SOLAR DE LA MAGUERITE.

## THE TWO SICILIES.

*Treaty of Commerce and Navigation between His Britannic Majesty and the King of the Two Sicilies, signed at London, September 26, 1816.*

Article 1. His Britannic Majesty consents, that all the privileges and exemptions which his subjects, their commerce and shipping, have enjoyed, and do enjoy, in the dominions, ports, and domains of his Sicilian Majesty, in virtue of the treaty of peace and commerce concluded at Madrid on the 10th of May (23d of May), 1667, between Great Britain and Spain; or of the treaties of commerce between the same powers, signed at Utrecht, the 9th of December, 1713, and at Madrid, the 18th of December, 1715; and of the convention concluded at Utrecht, the 8th of March, 1712-1713, between Great Britain and the kingdom of Sicily, shall be *abolished*; and it is agreed upon in consequence, between their said Britannic and Sicilian Majesties, their heirs and successors, that the said privileges and exemptions, whether of persons, or of flags and shipping, are and shall continue for ever abolished.

2. His Sicilian Majesty engages not to continue, nor hereafter to grant, to the subjects of any other power whatever, the privileges and exemptions abolished by the present convention.

3. His Sicilian Majesty promises that the subjects of his Britannic Majesty shall not be subjected, within

his dominions, to a more rigorous system of examination and search by the officers of customs than that to which the subjects of his said Sicilian Majesty are liable.

4. His Majesty the King of the Two Sicilies promises that British commerce in general, and the British subjects who carry it on, shall be treated throughout his dominions upon the same footing as the most favoured nations, not only with respect to the persons and property of the said British subjects, but also with regard to every species of article in which they may traffic, and the taxes or other charges payable on the said articles, or on the shipping in which the importation shall be made.

5. With respect to the personal privileges to be enjoyed by the subjects of his Britannic Majesty, in the kingdom of the Two Sicilies, his Sicilian Majesty promises that they shall have a free and undoubted right to travel, and to reside in the territories and dominions of his said Majesty, subject to the same precautions of police which are practised towards the most favoured nations. They shall be entitled to occupy dwellings and warehouses, and to dispose of their personal property of every kind and description, by sale, gift, exchange, or will, and in any other way whatever, without the smallest loss or hindrance being given them on that head. They shall not be obliged to pay, under any pretence whatever, other taxes or rates than those which are paid, or that hereafter may be paid, by the most favoured nations in the dominions of his said Sicilian Majesty. They shall be exempt from all military service, whether by land or sea; their dwellings, warehouses, and every thing belonging or appertaining thereto for objects of commerce or residence, shall be respected. They shall not be subjected to any vexatious search or visits. No arbitrary examination or inspection of their books, papers, or accounts, shall be made under the pretence of the supreme authority of the state, but these shall alone be executed by the legal sentence of the competent tribunals. His Sicilian Majesty engages on all these occasions to guarantee to the subjects of his Britannic Majesty who shall reside in his states and dominions, the preservation of their property and personal security, in the same manner as those are guaranteed to his subjects and to all foreigners belonging to the most favoured and most highly privileged nations.

6. According to the tenor of the articles 1. and 2. of this treaty, his Sicilian Majesty engages not to declare null and void the privileges and exemptions which actually exist in favour of British commerce within his dominions, till the same day, and except by the same act, by which the privileges and exemptions, whatsoever they are, of all other nations, shall be declared null and void within the same.

7. His Sicilian Majesty promises, from the date when the general abolition of the privileges according to the articles 1, 2. and 6. shall take place, to make a reduction of 10 per cent. upon the amount of the duties payable according to the tariff in force the 1st of January, 1816, upon the total of the merchandise or production of the United Kingdom of Great Britain and Ireland, her colonies, possessions, and dependencies, imported into the states of his said Sicilian Majesty, according to the tenor of article 4. of the present convention; it being understood that nothing in this article shall be construed to prevent the King of the Two Sicilies from granting, if he shall think proper, the same reduction of duty to other foreign nations.

8. The subjects of the Ionian Islands shall, in consequence of their being actually under the immediate protection of his Britannic Majesty, enjoy all the advantages which are granted to the commerce and to the subjects of Great Britain by the present treaty; it being well understood, that to prevent all abuses, and to prove its identity, every Ionian vessel shall be furnished with a patent, signed by the Lord High Commissioner or his representative.

9. The present convention shall be ratified, and the ratifications thereof exchanged in London, within the space of 6 months, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed it, and thereunto affixed the seal of their arms.

Done at London, the 26th of September, 1816.

CASTLEREAGH.

CASTELICOLA.

*Separate and Additional Article.*

In order to avoid all doubt respecting the reduction upon the duties in favour of British commerce which his Sicilian Majesty has promised in the 7th article of the convention signed this day between his Britannic Majesty and his Sicilian Majesty, it is declared, by this present separate and additional article, that by the concession of 10 per cent. of diminution, it is understood that in case the amount of the duty should be 20 per cent. upon the value of the merchandise, the effect of the reduction of 10 per cent. is to reduce the duty from 20 to 18; and so for other cases in proportion. And that for the articles which are not taxed *ad valorem* in the tariff, the reduction of the duty shall be proportionate; that is to say, a deduction of a tenth part upon the amount of the sum payable shall be granted.

The present separate and additional article shall have the same force and validity as if it had been inserted word for word in the convention of this day: it shall be ratified and the ratification thereof shall be exchanged at the same time.

In witness whereof, the respective plenipotentiaries have signed it, and have thereunto affixed the seal of their arms.

Done at London, the 26th of September, 1816.

CASTLEREAGH.

CASTELICOLA.

*Treaty of Commerce and Navigation between Her Majesty and the King of the Kingdom of the Two Sicilies, signed at Naples, April 29, 1845.*

Article 1. Her Britannic Majesty confirms the abolition agreed upon by the first article of the convention of Commerce and Navigation between Great Britain and the Kingdom of the Two Sicilies, signed at London on the 26th of September, 1816, of all the privileges and exemptions which her subjects, their commerce and merchant ships, did enjoy within the dominions, states, and ports of his Sicilian Majesty in virtue of the treaty of peace and commerce between Great Britain and Spain, concluded at Madrid

on the 13<sup>th</sup> May, 1667; of the treaties of commerce between the same powers, signed at Utrecht the

28 November 1713, and at Madrid the 14<sup>th</sup> December, 1715; and of the convention between Great Britain

and the Kingdom of Sicily, concluded at Utrecht the 25 February, 1712; and it is agreed in consequence,

between their said Britannic and Sicilian Majesties, their heirs and successors, that the said privileges and exemptions, whether of persons, flags, or shipping, are and shall continue for ever abolished, even when the present treaty shall cease to be in force.

2. His Sicilian Majesty, on his part, confirms in like manner the engagement contained in the second article of the said convention of the 26th of September, 1816, not to grant for the future, to the subjects of any other power whatever, the privileges and exemptions abolished by that convention, and to which the preceding article refers.

3. With respect to the personal privileges to be enjoyed by the subjects of her Britannic Majesty in the Kingdom of the Two Sicilies, his Sicilian Majesty engages that they shall have a free and undoubted right to travel and to reside in the territories and dominions of his said Majesty, subject to the same precautions of police which are practised towards the subjects or citizens of the most favoured nations.

They shall be entitled to occupy dwellings and warehouses, and to dispose of all their personal property, of every kind and description, by sale, gift, exchange, will, or in any other way whatever, without

the smallest hindrance or obstacle. They shall not be obliged to pay, under any pretence whatever, any taxes or impositions other or greater than those which are paid, or may hereafter be paid, by the subjects or citizens of the most favoured nations in the dominions of his said Sicilian Majesty. They shall be exempt from all military service, whether by land or sea; from forced loans, and from every extraordinary contribution, not general or by law established. Their dwellings, warehouses, and all premises appertaining thereto, destined for purposes of residence or commerce, shall be respected. No arbitrary search of or visit to the houses of British subjects, and no arbitrary examination or inspection whatever of the books, papers, or accounts of their trade shall be made; but such measures shall be executed only in conformity with the legal sentence of a competent tribunal. And generally, his Sicilian Majesty engages that the subjects of her Britannic Majesty residing in his states or dominions shall enjoy their property and personal security in as full and ample manner as his own subjects, and as the subjects or citizens of the most favoured nations.

Her Britannic Majesty, on her part, engages to insure the enjoyment of the like privileges to the subjects of his Sicilian Majesty within her dominions.

4. The subjects of her Britannic Majesty within the dominions of his Sicilian Majesty, shall be free to manage their own affairs themselves, or to commit those affairs to the management of any persons whom they may appoint as their broker, factor, or agent; nor shall such British subjects be restrained in their choice of persons to act in such capacities; nor shall they be called upon to pay any salary or remuneration to any person whom they shall not choose to employ. Absolute freedom shall be given in all cases, to the buyer and seller to bargain together, and to fix the price of any goods or merchandise imported into or to be exported from the dominions of his Sicilian Majesty, save and except generally such cases wherein the laws and usages of the country may require the intervention of any special agents in the dominions of his Sicilian Majesty.

The same privileges shall be enjoyed in the dominions of her Britannic Majesty, by the subjects of his Sicilian Majesty, and upon the same conditions.

5. The subjects of her Britannic Majesty shall not be liable, within the dominions of his Sicilian Majesty, to more rigorous system of examination and search by the officers of the customs, than the subjects of his Sicilian Majesty. And in like manner, the subjects of his Sicilian Majesty shall not be liable, within the dominions of her Britannic Majesty, to a more rigorous system of examination and search than British subjects.

6. There shall be reciprocal liberty of commerce and navigation between the U. Kingdom of Great Britain and Ireland and the Kingdom of the Two Sicilies. No duty of customs or other impost shall be charged upon any goods the produce or manufacture of one country, upon importation by sea or by land from such country into the other, other or higher than the duty or impost charged upon goods of the same kind the produce or manufacture of, or imported from, any other country; and her Majesty the Queen of the U. Kingdom of Great Britain and Ireland, and his Majesty the King of the Two Sicilies, do hereby engage that the subjects or citizens of any other state shall not enjoy any favour, privilege, or immunity whatever in matters of commerce and navigation, which shall not also and at the same time be extended to the subjects of the other high contracting party; gratuitously, if the concession in favour of that other state shall have been gratuitous, and in return for a compensation as nearly as possible of proportionate value and effect, to be adjusted by mutual agreement, if the concession shall have been conditional.

7. All articles of the produce or manufacture of either country, and of their respective dominions, which can legally be imported into either country from the other, in ships of that other country, shall, when so imported, be subject to the same duties and enjoy the same privileges, whether imported in ships of the one country or in ships of the other, and in like manner all goods to which no legal duty is imposed or re-exported from either country to the other, in ships of that other country shall, when so exported or re-exported, be subject to the same duties, and be entitled to the same privileges, drawbacks, bounties, and allowances, whether exported in ships of the one country or in ships of the other.

8. No duties of tonnage, harbour, lighthouses, pilotage, quarantine, or other similar duties, of whatever nature or under whatever denomination, shall be imposed in either country upon the vessels of the other, in respect of voyages between the U. Kingdom of Great Britain and Ireland, or any of the British possessions in Europe, and the kingdom of the Two Sicilies, if laden, or in respect of any voyage if in ballast, which shall not be equally imposed in the like cases on national vessels.

9. In all cases in which, in either kingdom, the duty to be levied upon any goods imported from the other kingdom shall be not a fixed rate but a proportion of the value of the goods, such *ad valorem* duty shall be ascertained and secured in the following manner; that is to say, the importer shall, on making his entry for the payment of duty at the custom-house, sign a declaration stating the value of the goods at such amount as he shall deem proper; and in case the officer or officers of the customs shall be of opinion that such valuation is insufficient, he or they shall be at liberty to take the goods, on paying to the importer the value thereof according to the declaration of the importer, together with an addition of 10 per cent.; and the custom-house officer shall at the same time return to the importer any duty which the importer may have paid upon such goods.

10. It is hereby declared, that the stipulations of the present treaty are not to be understood as applying to the navigation and carrying trade between one port and another situated in the dominions of either contracting party; such navigation and trade being reserved exclusively to national vessels.

Vessels of either country shall, however, be permitted to load or unload part of their cargoes at one port in the dominions of either of the high contracting parties, and then to proceed to complete the said loading or unloading, to any other port or ports in the same dominions.

11. Neither of the two governments, nor any corporation or agent acting in behalf or under the authority of either government, shall in the purchase of any article which, being the growth, produce, or manufacture of the one country, shall be imported into the other, give, directly or indirectly, any priority or preference on account of or in reference to the national character of the vessel in which such article shall have been imported; it being the true intent and meaning of the high contracting parties, that no distinction or difference whatever shall be made in this respect.

12. Her Britannic Majesty declares that the commerce of Sicilian subjects within the U. Kingdom of Great Britain and Ireland is not restrained, interrupted, or in any manner affected by the operation of any monopoly, contract, or exclusive privilege of sale or purchase whatsoever; but that the subjects of his Sicilian Majesty within the U. Kingdom of Great Britain and Ireland, have unrestrained permission to buy from and sell to whomsoever they please, and in any form and manner which may be agreed upon between the purchaser and seller, and without being obliged to give any preference or favour in consequence of any such monopoly, contract, or exclusive privilege of sale or purchase; and her Britannic Majesty engages that no change shall in this respect be made in regard to the trade of the subjects of his Sicilian Majesty. His Sicilian Majesty engages on his part, that a like liberty in respect to purchases or sales shall be enjoyed by her Britannic Majesty's subjects trading to or residing in the Kingdom of the Two Sicilies: the royal Sicilian monopolies of tobacco, salt, playing cards, gunpowder, and nitre, being excepted.

It being understood that nothing agreed upon in the present treaty is opposed to the right of his Majesty the King of the Kingdom of the Two Sicilies to grant, whether to the authors or others, patents for inventions or improvements.

13. If any ships of war or merchant-vessels be wrecked on the coasts of either of the high contracting parties, such ships or vessels, or any parts thereof, and all furniture and appurtenances belonging thereto, and all goods and merchandise which shall be saved therefrom, or the produce thereof, if sold,

shall be faithfully restored, with the least possible delay, to the proprietors, upon being claimed by them or by their duly authorised factors; and if there are no such proprietors or factors on the spot, then the said goods and merchandise, or the proceeds thereof, as well as all the papers found on board such wrecked ships or vessels, shall be delivered to the British or Sicilian consul or vice-consul in whose district the wreck may have taken place; and such consul, vice-consul, proprietors, or factors, shall pay only the expenses incurred in the preservation of the property, together with the rate of salvage and expenses of quarantine which would have been payable in the like case of a wreck of a national vessel; and the goods and merchandise saved from the wreck shall not be subject to duties unless cleared for consumption; it being understood that in case of any legal claim upon such wreck, goods, or merchandise, the same shall be referred for decision to the competent tribunals of the country.

14. Her Britannic Majesty consents that as soon as the present treaty shall be carried into effect, she will give up for ever the privilege of the reduction of 10 per cent. stipulated in favour of the trade of her subjects, by the 7th Article of the Convention signed at London on the 26th of September, 1816. And his Sicilian Majesty engages on his part, that, so long as this treaty shall last, the subjects of her Britannic Majesty shall continue to enjoy a reduction of 10 per cent. upon the duties payable according to the customs' tariff, upon the total of the merchandise or productions of the U. Kingdom of Great Britain and Ireland, her colonies, possessions, and dependencies, imported by them into his Majesty's dominions; and further, the subjects of her Britannic Majesty shall not pay any higher duties than those which upon the like merchandise or productions shall be paid by the subjects or citizens of any other nation, conformably always to the terms of the 6th Article of the present treaty, and the principles laid down in that article.

It is, however, understood, that nothing contained in this article shall prevent or restrict the right of his Majesty the King of the Kingdom of the Two Sicilies to continue to his own subjects the enjoyment of a like reduction of 10 per cent. on the custom-house duties, or to grant it, if he shall think proper, to other nations, and thus to place them in this respect on the same footing with Great Britain; and to make at any time such changes as his Majesty shall deem fit in the tariffs of his royal dominions.

15. The Ionian Islands being under the protection of her Britannic Majesty, the subjects and vessels of those islands shall enjoy, in the Sicilian dominions, all the advantages which are granted by the present treaty to the subjects and vessels of Great Britain, as soon as the government of the Ionian Islands shall have agreed to grant the same reciprocal advantages in those islands to the subjects and vessels of his Sicilian Majesty; it being understood that to prevent abuses, every Ionian vessel claiming the benefits of this treaty shall be furnished with a patent signed by the Lord High Commissioner, or by his representative.

16. The commerce and navigation between the dominions of his Sicilian Majesty and Gibraltar and Malta, shall enjoy all the advantages granted to the subjects and vessels of the U. Kingdom of Great Britain and Ireland, and the Kingdom of the Two Sicilies, by the present treaty.

17. As soon as the ratifications of the present treaty shall have been exchanged, the stipulations contained in the Convention of Commerce and Navigation between Great Britain and the Kingdom of the Two Sicilies, signed at London on the 26th of September, 1816, as well as in the Additional Articles of the same date, shall be, without distinction and for ever, considered as null and void.

18. The present treaty shall be in force for the term of 10 years from the date of the exchange of the ratifications thereof, and further until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same; each of the said high contracting parties reserving to itself the right of giving such notice at the end of the said term of 10 years, or at any subsequent time.

19. The present treaty shall be ratified, and the ratifications shall be exchanged at Naples at the expiration of 3 months from the date of its signature, or sooner if possible.

In witness whereof the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at Naples, the 29th day of April, 1845.

#### TURKEY.

*Capitulations and Articles of Peace between Great Britain and the Ottoman Empire, as agreed upon, augmented, and altered, at different Periods, and, finally, confirmed by the Treaty of Peace concluded at the Dardanelles, in 1809.*

SULTAN MEHEMED.

MAY HE LIVE FOR EVER.

*"Let every thing be done in conformity to these capitulations, and contrary thereto let nothing be done."*

1. The English nation and merchants, and all other merchants sailing under the English flag, with their vessels and merchandise of all descriptions, may pass safely by sea, and go and come into our dominions, without any the least prejudice or molestation being given to their persons, property, or effects, by any person whatsoever, but they shall be left in the undisturbed enjoyment of their privileges, and be at liberty to attend to their affairs.

2. If any of the English coming into our dominions by land be molested or detained, such persons shall be instantly released, without any further obstruction being given to them.

3. English vessels entering the ports and harbours of our dominions shall and may at all times safely and securely abide and remain therein, and at their free will and pleasure depart therefrom, without any opposition or hindrance from any one.

4. If it shall happen that any of their ships suffer by stress of weather, and not be provided with necessary stores and requisites, they shall be assisted by all who happen to be present, whether the crews of our Imperial ships, or others, both by sea and land.

5. Being come into the ports and harbours of our dominions, they shall and may be at liberty to purchase at their pleasure, with their own money, provisions and all other necessary articles, and to provide themselves with water, without interruption or hindrance from any one.

6. If any of their ships be wrecked upon any of the coasts of our dominions, all boys, cadis, governors, commanders, and others our servants, who may be near or present, shall give them all help, protection, and assistance, and restore to them whatsoever goods and effects may be driven ashore; and in the event

of any plunder being committed, they shall make diligent search and inquiry to find out the property, which, when recovered, shall be wholly restored by them.

7. The merchants, interpreters, bankers, and others of the said nation, shall and may, both by sea and land, come into our dominions, and there trade with the most perfect security; and in coming and going, neither they nor their attendants shall receive any the least obstruction, molestation, or injury, either in their persons or property, from the beys, cadis, sea captains, soldiers, and others our slaves.

17. Our ships and galleys, and all other vessels, which may fall in with any English ships in the seas of our dominions, shall not give them any molestation, nor detain them by demanding any thing, but shall show good and mutual friendship the one to the other, without occasioning them any prejudice.

19. If the corsairs or gallies of the Levant be found to have taken any English vessels, or robbed or plundered them of their goods and effects, also if any one shall have forcibly taken any thing from the English, all possible diligence and exertion shall be used and employed for the discovery of the property, and inflicting condign punishment on those who may have committed such depredations; and their ships, goods, and effects shall be restored to them without delay or fatigue.

21. Duties shall not be demanded or taken of the English, or of the merchants sailing under the flag of that nation, on any plastras and sequins they may import into our sacred dominions, or on those they may transport to any other place.

26. English merchants, and all others sailing under their flag, may, freely and unrestrictedly, trade and purchase all sorts of merchandise (prohibited commodities alone excepted), and convey them, either by land or sea, or by way of the river Tannais, to the countries of Muscovy or Russia, and bring back thence other merchandise into our sacred dominions, for the purposes of traffic, and also transport others to Persia and other conquered countries.

38. Should the ships bound for Constantinople be forced by contrary winds to put into Caffa, or any other place of those parts, and not be disposed to buy or sell any thing, no one shall presume forcibly to take out or seize any part of their merchandise, or give to the ships or crews any molestation, or obstruct the vessels that are bound to these parts.

40. On their ships arriving at any port, and landing their goods, they may, after having paid their duties, safely and securely depart, without experiencing any molestation.

41. English ships bound to Constantinople, Alexandria, Tripoli of Syria, Scanderoon, or other ports of our sacred dominions, shall in future be bound to pay duties, according to custom, on such goods only as they shall, of their own free will, land with a view to sale; and for such merchandises as they shall not discharge, no duty shall be demanded, neither shall the least molestation or hindrance be given to them.

44. English and other merchants navigating under their flags, who trade to Aleppo, shall pay such duties on the silks, brought and laden by them on board their ships, as are paid by the French and Venetians, and not one asper more.

55. The Imperial fleet, galleys, and other vessels, departing from our sacred dominions, and falling in with English ships at sea, shall in no wise molest or detain them, nor take from them any thing whatsoever. English ships shall no longer be liable to any further search, or exaction at sea under colour of search or examination.

70. English ships coming to the ports of Constantinople, Alexandria, Smyrna, Cyprus, and other ports of our sacred dominions, shall pay 300 aspers for anchorage duty, without an asper more being demanded of them.

72. No molestation shall be given to any of the aforesaid nation buying camlets, mohairs, or program yarn, at Angora and Beghazar, and desirous of exporting the same from thence, after having paid the duty of 3 per cent., by any demand of customs for the exportation thereof, neither shall one asper more be demanded of them.

75. That it being represented to us that English merchants have been accustomed hitherto to pay no custom or scale duty, either on the silks bought by them at Brussa and Constantinople, or on those which come from Persia and Georgia, and are purchased by them at Smyrna from the Armenians; if such usage or custom really exists, and the same be not prejudicial to the empire, such duty shall not be paid in future.

(N. B.—These capitulations may be found entire in *Herislet's Treaties*; and in *Chitty's Commercial Law*, vol. II. pp. 290—311. Appen.)

*Treaty between Great Britain and the Sublime Porte, concluded at the Dardanelles, the 5th of January, 1809.*

1. From the moment of signing the present treaty, every act of hostility between England and Turkey shall cease.

5. In return for the indulgence and good treatment afforded by the Sublime Porte to English merchants, with respect to their goods and property, as well as in all matters tending to facilitate their commerce, England shall reciprocally extend every indulgence and friendly treatment to the flags, subjects, and merchants of the Sublime Porte, which may hereafter frequent the dominions of his Britannic Majesty for the purpose of commerce.

6. The last Custom-house tariff established at Constantinople, at the ancient rate of 3 per cent., and particularly the article relating to the interior commerce, shall continue to be observed, as they are at present regulated, and to which England promises to conform.

10. English patents of protection shall not be granted to dependants, or merchants who are subjects of the Sublime Porte, nor shall any passport be delivered to such persons, on the part of ambassadors or consuls, without permission previously obtained from the Sublime Porte.

Done near the Castles of the Dardanelles, the 8th of January, 1809, which corresponds with the year of the Hegira 1223, the 19th day of the moon Zilkade.

SEYD MEHMET EMIN VAAID EFFENDI.  
ROBERT ADAIR.

*Convention of Commerce and Navigation between Her Majesty and the Sultan of the Ottoman Empire, with two additional Articles thereto annexed.*

Art. 1. — All rights, privileges, and immunities which have been conferred on the subjects or ships of Great Britain by the existing capitulations and treaties are confirmed now and for ever, except in as far as they may be specifically altered by the present convention: and it is, moreover, expressly stipulated that all rights, privileges, or immunities which the Sublime Porte now grants, or may hereafter grant, to the ships and subjects of any other foreign power, or which it may suffer the ships and subjects of any other foreign power to enjoy, shall be equally granted to, and exercised and enjoyed by, the subjects and ships of Great Britain.

Art. 2. — The subjects of Her Britannic Majesty, or their agents, shall be permitted to purchase at all places in the Ottoman dominions (whether for the purposes of internal trade or exportation) all articles, without any exception whatsoever, the produce, growth, or manufacture of the said dominions; and the Sublime Porte formally engages to abolish all monopolies of agricultural produce, or of any other articles whatsoever, as well as all permits from the local governors, either for the purchase of any article or for its removal from one place to another when purchased; and any attempt to compel the subjects of his Britannic Majesty to receive such permits from the local governors shall be considered as an infraction of treaties, and the Sublime Porte shall immediately punish with severity any vizirs and other officers who shall have been guilty of such misconduct, and render full justice to British subjects for all injuries or losses which they may duly prove themselves to have suffered.

Art. 3. — If any article of Turkish produce, growth, or manufacture be purchased by the British mer-

chant or his agent, for the purpose of selling the same for internal consumption in Turkey, the British merchant or his agent shall pay, at the purchase and sale of such articles, and in any manner of trade therein, the same duties that are paid, in similar circumstances, by the most favoured class of Turkish subjects engaged in the internal trade of Turkey, whether Mussulmans or Rayahs.

Art. 4. — If any article of Turkish produce, growth, or manufacture be purchased for exportation, the same shall be conveyed by the British merchant or his agent, free of any kind of charge or duty whatsoever, to a convenient place of shipment, on its entry into which it shall be liable to one fixed duty of 9 per cent. *ad valorem*, in lieu of all other interior duties.

Subsequently, on exportation, the duty of 3 per cent., as established and existing at present, shall be paid. But all articles bought in the shipping ports for exportation, and which have already paid the interior duty at entering into the same, will only pay the 3 per cent. export duty.

Art. 5. — The regulations under which firmans are issued to British merchant vessels for passing the Dardanelles and the Bosphorus, shall be so framed as to occasion to such vessels the least possible delay.

Art. 6. — It is agreed by the Turkish government that the regulations established in the present convention shall be general throughout the Turkish empire, whether in Turkey in Europe, in Turkey in Asia, in Egypt, or other African possessions belonging to the Sublime Porte, and shall be applicable to all the subjects, whatever their description, of the Ottoman dominions; and the Turkish government also agrees not to object to other foreign powers settling their trade upon the basis of this present convention.

Art. 7. — It having been the custom of Great Britain and the Sublime Porte, with a view to prevent all difficulties and delay in estimating the value of articles imported into the Turkish dominions, or exported therefrom, by British subjects, to appoint at intervals of fourteen years, a commission of men well acquainted with the traffic of both countries, who have fixed by a tariff the sum of money in the coin of the Grand Signior which should be paid as duty on each article; and the term of fourteen years, during which the last adjustment of the said tariff was to remain in force, having expired, the high contracting parties have agreed to name conjointly fresh commissioners to fix and determine the amount in money which is to be paid by British subjects, as the duty of 3 per cent. upon the value of all commodities imported and exported by them; and the said commissioners shall establish an equitable arrangement for estimating the interior duties which, by the present treaty, are established on Turkish goods to be exported, and shall also determine on the places of shipment where it may be most convenient that such duties should be levied.

The new tariff thus established to be in force for 7 years after it has been fixed, at the end of which time it shall be in the power of either of the parties to demand a revision of that tariff; but if no such demand be made on either side within the 6 months after the end of the first 7 years, then the tariff shall remain in force for 7 years more, reckoned from the end of the preceding 7 years; and so it shall be at the end of each successive period of 7 years.

Art. 8. — The present convention shall be ratified, and the ratifications shall be exchanged at Constantinople within the space of 4 months.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed their seals thereunto.

Done at Balta-Liman, near Constantinople, the 16th day of August, 1838.

PONSONBY.  
(Signed in the Turkish original)  
MUSTAFA RESCHID, &c.

#### *Additional Articles.*

Certain difficulties having arisen between the ambassador of her Britannic Majesty and the plenipotentiaries of the Sublime Porte, in fixing the new conditions which should regulate the commerce in British goods imported into the Turkish dominions, or passing through the same in transit, it is agreed between his Excellency the British ambassador and the plenipotentiaries of the Sublime Porte, that the present convention should receive their signatures, without the articles which have reference to the above-mentioned subjects forming part of the body of the said convention.

But at the same time it is also agreed — the following articles having been consented to by the Turkish government — that they shall be submitted to the approbation of her Majesty's government, and, should they be approved and accepted by her Majesty's government, they shall then form an integral part of the treaty now concluded.

The articles in question are the following: —

Art. 1. — All articles being the growth, produce, or manufacture of the U. Kingdom of Great Britain and Ireland and its dependencies, and all merchandise, of whatsoever description, embarked on British vessels, and being the property of British subjects, or being brought overland, or by sea, from other countries by the same, shall be admitted, as heretofore, into all ports of the Ottoman dominions, without exception, on the payment of 3 per cent. duty, calculated upon the value of such articles.

And in lieu of all other and interior duties, whether levied on the purchaser or seller, to which these articles are at present subject, it is agreed that the importer, after receiving his goods, shall pay, if he sells them at the place of reception, or if he sends them thence to be sold elsewhere in the interior of the Turkish empire, one fixed duty of 2 per cent.; after which such goods may be sold and resold in the interior, or exported, without any further duty whatsoever being levied or demanded on them.

But all goods that have paid the 3 per cent. import duty at one port shall be sent to another free of any further duty, and it is only when sold there, or transmitted thence into the interior, that the second duty shall be paid.

It is always understood that Her Majesty's government do not pretend, either by this article or any other in the present treaty, to stipulate for more than the plain and fair construction of the terms employed; nor to preclude in any manner the Ottoman government from the exercise of its rights of internal administration, where the exercise of those rights does not evidently infringe upon the privileges accorded by ancient treaties, or the present treaty, to British merchandise or British subjects.

Art. 2. — All foreign goods brought into Turkey from other countries shall be freely purchased and traded in, in any manner, by the subjects of Her Britannic Majesty, or the agents of the same, at any place in the Ottoman dominions; and if such foreign goods have paid no other duty than the duty paid on importation, then the British subject or his agent shall be able to purchase such foreign goods on paying the extra duty of 2 per cent., which he will have to pay on the sale of his own imported goods, or on their transmission for sale into the interior; and after that such foreign goods shall be resold in the interior, or exported, without further duty; or, should such foreign goods have already paid the amount of the two duties (*i. e.* the import duty and the one fixed interior duty), then they shall be purchased by the British subject or his agent, and afterwards resold or exported, without being ever submitted to any further duty.

Art. 3. — No charge whatsoever shall be made upon British goods (such being the growth, produce, or manufacture of the U. Kingdom or its dependencies, or the growth, produce, or manufacture of any foreign country, and charged in British vessels, and belonging to British subjects) passing through the straits of the Dardanelles, of the Bosphorus, and of the Black Sea, whether such goods shall pass through these straits in the ships that brought them, or are transhipped in those straits, or, destined to be sold elsewhere, are landed with a view to their being transferred to other vessels (and thus to proceed on their voyage) within a reasonable time.

All merchandise imported into Turkey for the purpose of being transmitted to other countries, or

which, remaining in the hands of the importer, shall be transmitted by him for sale to other countries shall only pay the duty of 3 per cent. paid on importation, and no other duty whatsoever.

Done at Balta-Liman, near Constantinople, the 16th day of August, 1838.

PONSONBY.

(Signed in the Turkish original)

MUSTAFA REŞİD, &c.

Official Note delivered to Lord Ponsonby by his Excellency Nourée Effendi, on the 27th of August, 1838, relative to the 2d Article of the preceding Convention.

(Translation.)

It is stipulated by the 2d article of the treaty of commerce concluded between the Sublime Porte and the British government on the 25th Djémasziul-el, 1254 (August 16, 1838), that English merchants are at liberty to purchase all kinds of merchandise in the Ottoman empire.

But in order that the right of English merchants to sell within the Ottoman empire, or to export the merchandise which they may purchase, may not be liable to misconception, the embassy of Her Britannic Majesty has desired that an explanation should be given on this point, either in the treaty itself, or in a special note.

The meaning of the passage of which an elucidation is requested is clear, from the relation which the subsequent points in the 2d article bear to each other. But we nevertheless repeat, that English merchants may, in virtue of the treaty, purchase within the Ottoman empire all kinds of merchandise; may, if they think proper, send the same abroad after having paid the duty thereon stipulated by the treaty; or may, if they think fit, resell the same within the Ottoman empire on conforming to the arrangements established by the said treaty with reference to internal commerce.

Such are the arrangements of the treaty; and we give this explanation to the ambassador, renewing to his Excellency the assurances of our sincere and perfect friendship.

The 7th Djémasziul-akir, 1254 (August 27, 1838.)

*Convention between Great Britain, Austria, France, Prussia, Russia, and Turkey, respecting the Straits of the Dardanelles and of the Bosphorus. Signed at London, July 13, 1841.*

Article 1. His Highness the Sultan, on the one part, declares that he is firmly resolved to maintain for the future the principle invariably established as the ancient rule of his empire, and in virtue of which it has at all times been prohibited for the ships of war of foreign powers to enter the straits of the Dardanelles and of the Bosphorus; and that, so long as the Porte is at peace, his Highness will admit no foreign ship of war into the said straits.

And their Majesties the Queen of the United Kingdom of Great Britain and Ireland, the Emperor of Austria, King of Hungary and Bohemia, the King of the French, the King of Prussia, and the Emperor of all the Russias, on the other part, engage to respect this determination of the Sultan, and to conform themselves to the principle above declared.

2. It is understood that in recording the inviolability of the ancient rule of the Ottoman empire mentioned in the preceding article, the Sultan reserves to himself, as in past times, to deliver arms of passage for light vessels under flag of war, which shall be employed, as is usual, in the service of the missions of foreign powers.

3. His Highness the Sultan reserves to himself to communicate the present convention to all the powers with whom the Sublime Porte is in relations of friendship, inviting them to accede thereto.

The present convention shall be ratified, and the ratifications thereof shall be exchanged at London, at the expiration of 3 months, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto the seals of their arms.

Done at London, the 13th day of July, in the year of our Lord 1841.

UNITED STATES.

*Convention of Commerce between Great Britain and the U. States of America, signed at London, the 3d of July, 1815.*

Article 1. There shall be between all the territories of his Britannic Majesty in Europe, and the territories of the U. States, a reciprocal liberty of commerce. The inhabitants of the 3 countries respectively shall have liberty freely and securely to come with their ships and cargoes to all such places, ports, and rivers in the territories aforesaid, to which other foreigners are permitted to come, to enter into the same, and to remain and reside in any part of the said territories respectively; and also to hire and occupy houses and warehouses for the purpose of their commerce; and generally the merchants and traders of each nation respectively shall enjoy the most complete protection and security for their commerce; but subject always to the laws and statutes of the 3 countries respectively.

2. No higher or other duties shall be imposed on the importation into the territories of his Britannic Majesty in Europe, of any articles, the growth, produce, or manufacture of the U. States, and no higher or other duties shall be imposed on the importation into the U. States, of any articles, the growth, produce, or manufacture of his Britannic Majesty's territories in Europe, than are or shall be payable on the like articles, being the growth, produce, or manufacture of any other foreign country; nor shall any higher or other duties or charges be imposed in either of the two countries on the exportation of any articles to his Britannic Majesty's territories in Europe, or to the U. States, respectively, than such as are payable on the exportation of the like articles to any other foreign country; nor shall any prohibition be imposed upon the exportation or importation of any articles, the growth, produce, or manufacture of the U. States, or of his Britannic Majesty's territories in Europe, to or from the said territories of his Britannic Majesty in Europe, or to or from the said U. States, which shall not equally extend to all other nations.

No higher or other duties or charges shall be imposed in any of the ports of the U. States on British vessels, than those payable in the same ports by vessels of the U. States; nor in the ports of any of his Britannic Majesty's territories in Europe on the vessels of the U. States, than shall be payable in the same ports on British vessels.

The same duties shall be paid on the importation into the U. States of any articles, the growth, produce, or manufacture of his Britannic Majesty's territories in Europe, whether such importation shall be in the vessels of the U. States, or in British vessels; and the same duties shall be paid on the importation into the ports of any of his Britannic Majesty's territories in Europe of any articles, the growth, produce, or manufacture of the U. States, whether such importation shall be in British vessels, or in vessels of the U. States.

The same duties shall be paid, and the same bounties allowed, on the exportation of any articles, the growth, produce, or manufacture of his Britannic Majesty's territories in Europe, to the U. States, whether such exportation shall be in vessels of the U. States, or in British vessels; and the same duties shall be paid, and the same bounties allowed, on the exportation of any articles, the growth, pro-

duce, or manufacture of the U. States, to his Britannic Majesty's territories in Europe, whether such exportation shall be in British vessels, or in vessels of the U. States.

It is further agreed, that in all cases where drawbacks are or may be allowed upon the re-exportation of any goods, the growth, produce, or manufacture of either country respectively, the amount of the said drawbacks shall be the same, whether the said goods shall have been originally imported in a British or American vessel; but when such re-exportation shall take place from the U. States in a British vessel, or from the territories of his Britannic Majesty in Europe in an American vessel, to any other foreign nation, the 2 contracting parties reserve to themselves, respectively, the right of regulating or diminishing, in such case, the amount of the said drawback.

The intercourse between the U. States and his Britannic Majesty's possessions in the West Indies, and on the continent of North America, shall not be affected by any of the provisions of this article, but each party shall remain in the complete possession of its rights, with respect to such an intercourse.

3. His Britannic Majesty agrees that the vessels of the U. States of America shall be admitted and hospitably received at the principal settlements of the British dominions in the East Indies, viz. *Calcutta, Madras, Bombay, and Prince of Wales' Island*, and that the citizens of the said U. States may freely carry on trade between the said principal settlements and the said U. States, in all articles of which the importation and exportation respectively, to and from the said territories, shall not be entirely prohibited; provided only, that it shall not be lawful for them, in any time of war between the British government and any state or power whatever, to export from the said territories, without the special permission of the British government, any military stores, or naval stores, or rice. The citizens of the U. States shall pay for their vessels, when admitted, no higher or other duty or charge than shall be payable on the vessels of the most favoured European nations, and they shall pay no higher or other duties or charges on the importation or exportation of the cargoes of the said vessels, than shall be payable on the same articles when imported or exported in the vessels of the most favoured European nations.

But it is expressly agreed, that the vessels of the U. States shall not carry any articles from the said principal settlements to any port or place, except to some port or place in the U. States of America, where the same shall be unladen.

It is also understood, that the permission granted by this article is not to extend to allow the vessels of the U. States to carry on any part of the coasting trade of the said British territories; but the vessels of the U. States, having in the first instance proceeded to one of the said principal settlements of the British dominions in the East Indies, and then going with their original cargoes, or any part thereof, from one of the said principal settlements to another, shall not be considered as carrying on the coasting trade. The vessels of the U. States may also touch for refreshments, but not for commerce, in the course of their voyage to or from the British territories in India, or to or from the dominions of the Emperor of China, at the Cape of Good Hope, the island of St. Helena, or such other places as may be in the possession of Great Britain, in the African or Indian seas; it being well understood, that in all that regards this article, the citizens of the U. States shall be subject in all respects to the laws and regulations of the British government from time to time established.

4. It shall be free for each of the 2 contracting parties respectively to appoint consuls, for the protection of trade, to reside in the dominions and territories of the other party; but before any consul shall act as such, he shall in the usual form be approved and admitted by the government to which he is sent; and it is hereby declared, that in case of illegal and improper conduct towards the laws or government of the country to which he is sent, such consul may either be punished according to law, if the laws will reach the case, or be sent back, the offended government assigning to the other the reasons for the same.

It is hereby declared, that either of the contracting parties may except from the residence of consuls such particular places as such party shall judge fit to be so excepted.

5. This convention, when the same shall have been duly ratified by his Britannic Majesty and by the President of the U. States, by and with the advice and consent of their Senate, and the respective ratifications mutually exchanged, shall be binding and obligatory on his Majesty and on the said U. States for 4 years from the date of its signature; and the ratifications shall be exchanged in 6 months from this time, or sooner if possible.

This convention was subsequently prolonged by conventions for that purpose in 1818 and 1827.

*Convention between Great Britain and the United States of America, signed at London, the 20th October, 1818.*

Art. 1.—Whereas differences have arisen respecting the liberty claimed by the U. States for the inhabitants thereof, to take, dry, and cure fish, on certain coasts, bays, harbours, and creeks of his Britannic Majesty's dominions in America, it is agreed between the high contracting parties, that the inhabitants of the said United States shall have for ever, in common with the subjects of his Britannic Majesty, the liberty to take fish of every kind on that part of the coast of Newfoundland which extends from Cape Ray to the Rameau Islands, on the western and northern coasts of Newfoundland, from the said Cape Ray to the Quirpon Islands, on the shores of the Magdalen Islands, and also on the coasts, bays, harbours, and creeks, from Mount Joly, on the southern coast of Labrador, to and through the Straits of Bellefleur, and thence northwardly indefinitely along the coast, without prejudice, however, to any of the exclusive rights of the Hudson Bay Company; and that the American fishermen shall also have liberty, for ever, to dry and cure fish in any of the unsettled bays, harbours, and creeks of the southern part of the coast of Newfoundland, and of the coast of Labrador; but so soon as the same, or any portion thereof, shall be settled, it shall not be lawful for the said fishermen to dry or cure fish, without previous agreement for such purpose with the inhabitants, proprietors, or possessors of the ground. And the U. States hereby renounce for ever any liberty heretofore enjoyed or claimed by the inhabitants thereof to take, dry, or cure fish on or within three marine miles of any of the coasts, bays, creeks, or harbours of his Britannic Majesty's dominions in America, not included within the above-mentioned limits; provided, however, that the American fishermen shall be admitted to enter such bays or harbours for the purpose of shelter and of repairing damages therein, of purchasing wood, and of obtaining water, and for no other purpose whatever; but they shall be under such restrictions as may be necessary to prevent their taking, drying, or curing fish therein, or in any other manner abusing the privileges hereby reserved to them.

2. It is agreed that a line drawn from the most north-western point of the Lake of the Woods, along the 49th parallel of north latitude, or if the said point shall not be in the 49th parallel of north latitude, then that a line drawn from the said point due north or south, as the case may be, until the said line shall intersect the said parallel of north latitude, and from the point of such intersection due west along and with the said parallel, shall be the line of demarcation between the territories of the U. States and those of his Britannic Majesty, and that the said line shall form the northern boundary of the said territories of the U. States, and the southern boundary of the territories of his Britannic Majesty, from the Lake of Woods to the Stony Mountains.

3. It is agreed that any country that may be claimed by either party on the north-west coast of America, westward of the Stony Mountains, shall, together with its harbours, bays, and creeks, and the navigation of all rivers within the same, be free and open, for the term of 10 years from the date of the signature of the present convention, to the vessels, citizens, and subjects of the two powers: it being well

understood, that this agreement is not to be construed to the prejudice of any claim which either of the two high contracting parties may have to any part of the said country, nor shall it be taken to affect the claims of any other power or state to any part of the said country, the only object of the high contracting parties, in that respect, being to prevent disputes and differences among themselves.

4. All the provisions of the convention to "regulate the commerce between the territories of the U. States and of his Britannic Majesty, concluded at London," on the 3d of July, in the year of our Lord 1815, with the exception of the clause which limited its duration to 4 years, and excepting, also, so far as the same was affected by the declaration of his Majesty respecting the island of St. Helena, are hereby extended and continued in force for the term of 10 years from the date of the signature of the present convention, in the same manner as if all the provisions of the said convention were herein specially recited.

5. Whereas it was agreed by the first article of the treaty of Ghent, that "all territory, places, and possessions whatever, taken by either party from the other during the war, or which may be taken after the signing of this treaty, excepting only the islands hereinafter mentioned, shall be restored without delay, and without causing any destruction, or carrying away any of the artillery, or other public property originally captured in the said forts or places, which shall remain therein upon the exchange of the ratifications of this treaty, or any slaves, or other private property;" and whereas, under the aforesaid article, the United States claim for their citizens, and as their private property, the restitution of, or full compensation for, all slaves who at the date of the exchange of the ratifications of the said treaty were in any territory, place, or possessions whatsoever, directed by the said treaty to be restored to the U. States, but then still occupied by the British forces, whether such slaves were, at the date aforesaid, on shore, or on board any British vessel lying in waters within the territory or jurisdiction of the U. States; and whereas differences have arisen whether, by the true intent and meaning of the aforesaid article of the treaty of Ghent, the U. States are entitled to the restoration of, or full compensation for, all or any slaves as above described, the high contracting parties hereby agree to refer the said differences to some friendly sovereign or state to be named for that purpose: and the high contracting parties further engage to consider the decision of such friendly sovereign or state to be final and conclusive on all the matters referred.

6. This convention, when the same shall have been duly ratified by the President of the U. States, by and with the advice and consent of their senate, and by his Britannic Majesty, and the respective ratifications mutually exchanged, shall be binding and obligatory on the said U. States and on his Majesty; and the ratifications shall be exchanged in six months from this date, or sooner if possible.

In witness whereof, the respective plenipotentiaries have signed the same, and have therunto affixed the seal of their arms.

Done at London, the 20th October, 1818.

FREDERICK JOHN ROBINSON.  
HENRY GOULBURN.

#### URUGUAY.

*Treaty of Amity, Commerce, and Navigation, between her Majesty and the Oriental Republic of the Uruguay, signed at London, August 26, 1842.*

Article 1. There shall be perpetual peace and amity between the dominions and subjects of her Majesty the Queen of the United Kingdom of Great Britain and Ireland, her heirs and successors, and the Oriental Republic of the Uruguay and its citizens.

2. There shall be between all the territories of her Britannic Majesty in Europe, and the territories of the Oriental Republic of the Uruguay, a reciprocal freedom of commerce. The subjects and citizens of the two countries, respectively, shall have liberty freely and securely to come, with their ships and cargoes, to all places, ports, and rivers in the territories aforesaid, to which other foreigners are or may be permitted to come; to enter into the same, and to remain and reside in any part of the said territories respectively; also to hire and occupy houses and warehouses for the purposes of their commerce; and, generally, the merchants and traders of each nation shall enjoy, within the territories of the other, the most complete protection and security for their commerce; subject always to the laws and statutes of the land.

In like manner the respective ships of war and post-office packets of the two countries shall have liberty freely and securely to come to all harbours, rivers, and places, in either country, to which other foreign ships of war and packets are or may be permitted to come; and they shall be allowed to enter into the same, to anchor and to remain there and rest; subject always to the laws and statutes of the two countries respectively.

It is hereby declared, that the stipulations of the present article are not to be understood as applying to the navigation and carrying trade between one port and another, situated in the dominions of either contracting party; such navigation and trade being reserved exclusively to national vessels.

3. There shall be reciprocal liberty of commerce and navigation between and amongst the subjects and citizens of the two high contracting parties; and the subjects and citizens of the two countries respectively shall not pay in the ports, harbours, roads, cities, towns, or places whatsoever in either country, any other or higher duties, taxes, or imposts, under whatsoever names designated or included, than those which are there paid by the subjects or citizens of the most favoured nation; and the subjects and citizens of each of the high contracting parties shall enjoy the same rights, privileges, liberties, favours, immunities, and exemptions, in matters of commerce and navigation, that are granted or may hereafter be granted in either country to the subjects or citizens of the most favoured nation.

No duty of customs or other impost shall be charged upon any goods the produce of one country, upon importation by sea or by land from such country into the other, higher than the duty or impost charged upon goods of the same kind, the produce of or imported from any other country. And her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and the Oriental Republic of the Uruguay, do hereby bind and engage themselves not to grant any favour, privilege, or immunity, in matters of commerce and navigation, to the subjects or citizens of any other state, which shall not be also and at the same time extended to the subjects or citizens of the other high contracting party; gratuitously, if the concession in favour of that other state shall have been gratuitous; and on giving as nearly as possible the same compensation or equivalent, in case the concession shall have been conditional.

4. No higher or other duties or payments on account of tonnage, light or harbour dues, pilotage, salvage in case of damage or shipwreck, or any local charges, shall be imposed in any of the ports of the one country upon the vessels of the other, than are payable in those ports upon national vessels.

5. The same duties shall be paid on all articles the growth, produce, or manufacture of her Britannic Majesty's dominions, when imported into the territories of the Oriental Republic of the Uruguay, whether such article be imported in vessels of the said republic, or in British vessels; and the same duties shall be paid on all articles the growth, produce, or manufacture of the said republic, when imported into the dominions of her Britannic Majesty, whether such articles be imported in British vessels or in vessels of the said republic. The same duties shall be paid, and the same bounties and drawbacks allowed, on all articles the growth, produce, or manufacture of her Britannic Majesty's dominions, when exported to the said republic of the Uruguay, whether such articles be exported in vessels of the said Republic, or in British vessels; and the same duties shall be paid, and the same bounties and drawbacks allowed, on all articles the growth, produce, or manufacture of the said republic, when exported

to the dominions of her Britannic Majesty, whether such articles be exported in British vessels, or in vessels of the said republic.

6. In order to avoid any misunderstanding with respect to the regulations which may respectively determine what shall be considered a British vessel, or a vessel of the Oriental Republic of the Uruguay, when engaged in commerce between the two countries; it is hereby agreed, that all vessels built in the dominions of her Britannic Majesty, or having been made prize of war and condemned as such, or having been forfeited under any law made for the prevention of the slave trade, and condemned in any competent court for a breach of such law, and which shall be owned and navigated by subjects of her Majesty, and whereof the master and three-fourths at least of the mariners shall be subjects of her Britannic Majesty, and which shall be registered according to the laws of Great Britain, shall be considered as British vessels; and that all vessels built within the territory of the said Oriental Republic of the Uruguay, or having been made prize of war and condemned as such, or having been forfeited under any law made for the prevention of the slave trade, and condemned in any competent court for a breach of such law, or being of *bond fide* British construction, built in any port of her Britannic Majesty's dominions, and acquired by purchase; and which shall be owned and navigated by citizens of the said republic, and whereof the master and three-fourths at least of the mariners shall be citizens of the said republic, or matriculated subjects of her Britannic Majesty, and which shall be registered according to the laws of the said republic, shall be considered as vessels of the said Oriental Republic of the Uruguay, so far as shall relate to any commercial rights or privileges in the several ports of her Britannic Majesty's dominions.

And it is further agreed, that no ship considered as being the ship of either country shall be qualified to trade as above described under the provisions of this treaty, unless she be furnished with a register, passport, or sea-letter, under the signature of the proper person authorised to grant the same, according to the laws of the respective countries, and in a form to be reciprocally communicated by the two governments to each other. Such register, passport, or sea-letter shall certify the name, occupation, and residence of the owner or owners in the dominions of her Britannic Majesty, or in the territories of the Oriental Republic of the Uruguay, the use may be; shall declare that he or they is or are the sole owner of the ship, or owners in proportion to be specified; and shall state the name, burden, and description of the vessel, as to build and measurement; and if the vessel is of foreign build, of what country, and, as far as may be possible, when and from whom purchased; and all other particulars constituting the national character of the vessel, as the case may be.

7. The subjects of her Britannic Majesty shall have full liberty, in all the territories of the Oriental Republic of the Uruguay, to manage their own affairs themselves, or to commit them to the management of whomsoever they please, as broker, factor, agent, or interpreter; and they shall not be obliged to employ any other persons in those capacities, than those employed by the citizens of the Oriental Republic of the Uruguay; and they shall not be restrained in their choice of persons to act in such capacities, nor be obliged to pay them any other salary or remuneration, than such as is paid in like cases by the citizens of the said republic; and absolute freedom shall be allowed in all cases to the buyer and seller to bargain and fix the price of any goods, wares, or merchandise imported into and exported from the Oriental Republic of the Uruguay, as they shall see fit, provided they observe the laws and established customs of the country. The same privileges shall be enjoyed in the dominions of her Britannic Majesty by the citizens of the Oriental Republic of the Uruguay, under the same conditions.

The subjects and citizens of each of the contracting parties respectively shall, in the territories of the other, receive and enjoy full and perfect protection for their persons and property, and shall have free and open access to the courts of justice in the said countries respectively, for the prosecution and defence of their just rights; and they shall be at liberty to employ, in all cases, the advocates, attorneys, or agents of whatever description, whom they may think proper; and they shall enjoy, in this respect, the same rights and privileges therein as native citizens.

8. In whatever relates to the police of ports; the lading and unlading of ships; the safety of merchandise, goods, and effects; the succession to personal estates by will or otherwise; and the disposal of personal property of every sort and denomination by sale, donation, exchange, or in any other manner whatsoever; and to the administration of justice; the subjects and citizens of each of the two contracting parties shall enjoy, in the dominions and territories of the other, the same privileges, liberties, and rights, as native subjects or citizens; and they shall not be charged in any of these respects with any higher imposts or duties than those which are or may be paid by natives; conforming of course to the local laws and regulations of such dominions or territories.

And it is further agreed, that the subjects and citizens of the two contracting parties shall have and enjoy, in all the dominions or territories of each other, the most full and perfect liberty to devise or dispose of their property and effects of every kind and denomination, and wheresoever situate, by will or testament, to such person or persons, and in such proportions, as their own free will may dictate.

If any subject or citizen of either of the two contracting parties should die without will or testament in the dominions or territories of the other, the consul-general or consul, or, in his absence, the representative of such consul-general or consul, shall have the right to nominate curators to take charge of the property of the deceased, so far as the laws of the country will permit, for the benefit of the lawful heirs and creditors of the deceased, without being interfered with by the authorities of the country, but giving to those authorities due and proper notice.

9. The subjects of her Britannic Majesty residing in the territories of the Oriental Republic of the Uruguay, and the citizens of the said republic residing in the dominions of her Britannic Majesty, shall be exempted from all compulsory military service whatsoever, either by sea or land, and from all forced loans or military exactions or requisitions.

Neither shall they be compelled, under any pretext whatsoever, to pay any charges, requisitions, or taxes, greater than those which are or may be paid by native subjects or citizens of the territories in which they reside.

10. It shall be free for each of the two contracting parties to appoint consuls for the protection of trade, to reside in the dominions and territories of the other party; but no consul shall act as such until he shall in the usual form be approved and admitted by the government to which he is sent; and either of the contracting parties may except from the residence of consuls such particular places as they may judge fit to be excepted. The diplomatic agents and consuls of the Oriental Republic of the Uruguay, in the dominions of her Britannic Majesty, shall enjoy whatever privileges, exemptions, and immunities are or may there be granted to agents of the same rank belonging to the most favoured nation; and in like manner the diplomatic agents and consuls of her Britannic Majesty, in the territories of the Oriental Republic of the Uruguay, shall enjoy, according to the strictest reciprocity, whatever privileges, exemptions, and immunities are or may there be granted to the diplomatic agents and consuls of the most favoured nation.

11. For the better security of commerce between the subjects of her Britannic Majesty and the citizens of the Oriental Republic of the Uruguay, it is agreed, that if at any time any interruption of friendly intercourse or any rupture should unfortunately take place between the two countries, the subjects or citizens of either of the two contracting parties who may be within the territories of the other, shall, if residing upon the coasts, be allowed 4 months, and if residing in the interior, 9 months, to wind up their accounts and to dispose of their property; and a safe conduct shall be given to all such of the aforesaid persons as may choose to quit the country, to enable them to embark unmolested at the port which the government of the country shall select. It is, moreover, further agreed, that all subjects or citizens of either of the two contracting parties who, at the time of any such interruption of friendly relations between the two countries, shall be established in the exercise of any trade or special employment in the dominions

or territories of the other, shall have the privilege of remaining and of continuing such trade and employment therein, without any manner of interruption, in full enjoyment of their liberty and property, so long as they conduct themselves peaceably, and commit no offence against the laws; and their goods and effects, of whatever description, whether in their own custody or intrusted to individuals or to the state, shall not be liable to seizure or sequestration, or to any other charges or demands than those to which like effects or property belonging to native subjects or citizens may be liable. Debts between individuals, property in the public funds, and shares of companies, shall never be confiscated, sequestrated, or detained.

12. The subjects of her Britannic Majesty, and the citizens of the Oriental Republic of the Uruguay, respectively, residing in the territories of the other party, shall enjoy, in their houses, persons, and properties, the protection of the government, and continue in possession of the privileges which they now legally enjoy. They shall not be disturbed, molested, or annoyed in any manner on account of their religion, but they shall have perfect liberty of conscience, provided they respect the religion of the country in which they reside, as well as the constitution, laws, and customs of the land. They shall also have permission to celebrate divine service, according to the rites and ceremonies of their own church, either within their own private houses, or in their own particular churches or chapels, which they shall be at liberty to build and maintain in convenient places, approved of by the government. Liberty shall also be granted to the subjects or citizens of either of the two contracting parties resident in the territories of the other, to bury, in burial places of their own, such of their fellow-subjects or fellow-citizens who may die in such territories. Such burial places may be freely established and maintained; and the funerals and sepulchres of the dead shall not be disturbed in any way, or upon any account.

13. The present treaty shall be in force for the term of 10 years from the date thereof; and further, until the end of 12 months after either of the high contracting parties shall have given notice to the other of its intention to terminate the same: each of the high contracting parties reserving to itself the right of giving such notice to the other at the end of the said term of 10 years, or at any subsequent time.

And it is hereby agreed between them, that at the expiration of 12 months after such notice shall have been received by either party from the other, this treaty, and all the provisions thereof, shall altogether cease and determine.

14. The present treaty shall be ratified, and the ratifications shall be exchanged at London, as soon as possible within the period of 18 months from the date thereof.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto their respective seals.

Done at London, the 26th day of August, in the year of our Lord 1842.

ABERDEEN.

RIPON.

JOSE ELLAURI.

#### *Additional Article.*

Whereas by Art. 9. of the treaty of amity, commerce, and navigation, concluded and signed this day between her Britannic Majesty and the Oriental Republic of the Uruguay, it is stipulated that the subjects of her Britannic Majesty residing in the said republic shall not be compelled, under any pretext whatsoever, to pay any charges, requisitions, or taxes, greater than those which are or may be paid by native citizens; and whereas, by a law of the Oriental Republic of the Uruguay, a foreigner pays for the licence to open a shop, or other establishment included in the provisions of the said law, a sum greater than that which is paid by a native citizen; her Britannic Majesty engages, notwithstanding the provisions of the above-mentioned article, not to insist upon the abolition of this distinction, so long as it exists impartially with regard to the subjects or citizens of every other foreign nation.

And his Excellency the President of the Oriental Republic of the Uruguay engages, on his part, that if at any future time the amount payable by British subjects for such licence should be increased, a corresponding increase shall at the same time be made in the sum payable by native citizens of the republic; so that the proportion between the sum payable by British subjects and the sum payable by citizens of the Oriental Republic of the Uruguay, respectively, shall never be altered to the prejudice of British subjects.

The present additional article shall have the same force and validity as if it were inserted, word for word, in the treaty signed this day. It shall be ratified, and the ratifications shall be exchanged at the same time.

In witness whereof, the respective plenipotentiaries have signed the same, and have affixed thereto their respective seals.

Done at London, the 26th day of August, in the year of our Lord 1842.

ABERDEEN.

JOSE ELLAURI.

#### *Second Additional Article.*

Whereas a strict and immediate execution of that part of article 6. of the treaty of amity, commerce, and navigation, signed at London on the 26th of August, 1842, between her Majesty the Queen of the U. Kingdom of Great Britain and Ireland, and the Oriental Republic of the Uruguay, which stipulates that a ship must have been actually built within the territory of the Oriental Republic of the Uruguay, to be considered a ship of that republic, would, in the present state of Uruguay shipping, deprive the republic of the full advantage of the reciprocity intended to be established by the treaty; it is agreed that, for the space of 7 years from the date of the exchange of the ratifications of the said treaty, any ships, wheresoever built, being owned, navigated, and registered in conformity with the provisions of article 6. of the treaty, shall be considered as ships of the Oriental Republic of the Uruguay: her Majesty the Queen of the U. Kingdom of Great Britain and Ireland reserving to herself the right to claim, at the end of the said term of 7 years, the strict enforcement of all the stipulations contained in the said article of the treaty, relative to the conditions which are to determine the national character of vessels of the Oriental Republic of the Uruguay.

The present additional article shall have the same force and validity as if it had been inserted, word for word, in the aforesaid treaty of the 26th of August, 1842. It shall be ratified, and the ratifications shall be exchanged at the same time and place as those of the treaty.

In witness whereof, the undersigned, plenipotentiaries of her Britannic Majesty, and of the Oriental Republic of the Uruguay, have signed the same, and have affixed thereto the seals of their arms.

Done at Montevideo, the 8th day of March, in the year of our Lord 1843.

J. H. MANDVILLE.  
SANTIAGO VASQUEZ.

TREBISOND, anciently Trapezus, from its resemblance to a trapezium, a town of Asia Minor, on the south-east coast of the Black Sea, lat. 40° 1' N., lon. 39° 44' 59" E. Population variously estimated at from 15,000 to 30,000. The town is built on the declivity of a hill rising gently from the sea. It is a place of great antiquity; and, from the year 1203 to the final subversion of the Eastern empire by Mohammed II.

in the 15th century, was the seat of a dukedom, or, as it was sometimes called, an empire, comprising the country between the Phasis and the Halya. Its fortifications are still of considerable strength, at least for a Turkish city. The space included within the walls is of great extent; but it is principally filled with gardens and groves. The houses are mean in their outward appearance, and comfortless within. — (*Tournefort, Voyage du Levant*, tome ii. pp. 231—239; *Kincaid's Journey through Asia Minor*, &c. p. 338.)

**Harbour.**—Trebitsond has two ports, one on the W. and one on the E. side of a small peninsula, or point of land, projecting a short way into the sea. That on the east is the best sheltered, and is the place of anchorage for the largest ships. It is, however, exposed to all but the southerly gales; but it does not appear that, with ordinary precaution, any danger need be apprehended. The ground, from  $\frac{1}{2}$  to  $\frac{3}{4}$  a mile E. from the point, is clean, and holds extremely well. Ships moor with open hause to the N., and a good hawser and stream anchor on shore, as a stern-fast. At night, the wind always comes off the land. Captain Middleton says that the only bad weather is from the N. W.; but that, though the swell be considerable, it does not cause any heavy strain upon the cables. — (*Nautical Magazine*, vol. ii. p. 181.) — At Platana, near Trebitsond, and quite as exposed, Turkish vessels have from time immemorial rode in safety the whole winter; a satisfactory proof that the dangers supposed to be incident to the roads along the coast are wholly visionary. — (*Ibid.* p. 214.)

**Trade.**—In antiquity, and in more modern times, previously to the conquest of Constantinople by the Turks, and the exclusion of all foreign vessels from the Black Sea, Trebitsond was the seat of an extensive trade. Any one, indeed, who casts his eye over a map of Asia, must be satisfied that this city is the natural emporium of all the countries to the S. E. of the Black Sea, from Kars on the east, round by Diarbeker to Amasia on the west. Erzeroum, the principal city of Armenia, is only about 135 miles S. E. from Trebitsond. Its merchants are distinguished by their superior attainments, and by their enterprise and activity. For a lengthened period, they have derived most part of their supplies of European commodities by way of Smyrna or Constantinople: nothing, however, but the impossibility of obtaining them at so convenient a port as Trebitsond, could have made them resort to such distant markets as those now mentioned; and it may well excite surprise, considering the period during which the Black Sea has been open, that efforts were not sooner made to establish an intercourse with Armenia, Georgia, and the north-western parts of Persia, through this channel. We are glad, however, to have to state, that within these few years this has been done; and, notwithstanding the difficulties that necessarily attach to every attempt to open new channels of commerce with semi-civilised nations, the experiment has proved more than ordinarily successful.

The policy of Russia has recently, also, given to Trebitsond an importance it did not formerly possess. Previously to the 1st of January, 1832, the trade between Europe and Persia, by way of the Black Sea, principally centered in the Russian port of Redout Kalé, at the mouth of the Phasis. This was a consequence of the exemption granted in 1822 to the Russian provinces to the south of the Caucasus from the duties charged in the other parts of the empire. But the exemption having ceased at the period referred to, and the Trans-Caucasian provinces having been subjected to the same duties as the other provinces, the transit trade to Persia by way of Redout Kalé, Teflis, and the Caspian Sea, has almost entirely ceased, and it is now carried on through Trebitsond, Erzeroum, and Tabreez. In consequence, the increase of trade at Trebitsond has been very remarkable. We subjoin a

Statement of the Number and Tonnage of Vessels, with the Value of their Cargoes, and distinguishing the Countries to which the same belonged, which entered and cleared at the Port of Trebitsond in the Year 1835. — (*Consular Returns*.)

Countries.	Entered.			Cleared.		
	Vessels.	Tonnage.	Value of Cargoes.	Vessels.	Tonnage.	Value of Cargoes.
British	18	1,215	155,260	17	1,551	20,167
Turkish	113	16,444	619,336	109	15,312	608,264
Russian	16	2,651	137,439	14	2,275	31,084
Austrian	5	5,399	64,612	11	3,399	2,515
Greek	5	891	9,141	6	912	1,725
Sardinian	—	—	4,164	5	881	19,777
Sassian	1	112	16,580	1	112	—
Total	170	26,444	1,080,552	156	24,572	690,920

Most of the vessels from Constantinople had on board British produce; and it is believed that from 7-10ths to 9-10ths of the goods imported to be forwarded to Persia are of British origin, consisting principally of cotton goods, woollen, hardware, tin, sugar, &c. Previously to 1831 no British iron had ever been seen at Trebitsond; but it was then introduced, and is now imported to the exclusion of all other sorts. M. de Hagemelster admits that it has entirely superseded the iron of Russia in this and other markets on the southern side of the Black Sea. — (*Report on the Commerce of the Black Sea*, p. 207.)

In Persia, as in almost all Eastern countries, foreign products are admitted, on paying a low duty. Lately, however, the schah has evinced a disposition to restrict the importation of English goods, or to load them with heavier duties. This conduct, so unusual in an Eastern prince, may, it is probable, have been suggested by the foreign agents at his court.

**Direct Trade with Trebitsond.**—The transit trade of Trebitsond is by far the most important; but, as the goods destined for Persia by this channel are cleared out for Turkey, they appear in the list of exports to it, and, consequently, make our trade with Turkey appear much greater than it really amounts to.

The trade with Trebitsond itself is, however, far from inconsiderable, and might be indefinitely extended. The iron of Great Britain is now, as stated above, imported to the exclusion of that of Russia, which was formerly the only sort made use of. Considerable quantities of cotton yarn are also supplied through Trebitsond to the looms in the eastern part of Asia Minor that used to be wholly supplied with native yarn, and a taste for British cottons is beginning to spread among the population.

We carry away from Trebitsond Persian silk, wool, tobacco, wax, opium, boxwood, nuts, &c. But, owing to the restrictions on exportation, the trade has hitherto laboured under many difficulties; and numbers of ships have sailed in ballast for Odessa, Galatz, and other ports, where they load.

The principal articles of import are manufactured cottons, mostly from Great Britain, sugar, coffee, rum, salt, tin, wine, &c. Cottons are sold at long credits; sugar, coffee, &c. are sold at shorter credits, and are more regularly paid. The exports consist of silk, sheep's wool, tobacco, shawls and carpets, galls, and drugs of various sorts, boxwood, nuts, &c. There are very rich copper mines in the mountains to the south of Trebitsond; but they are but little wrought; and the Turks are so blind to their own interests, as to prohibit the exportation of copper, as well as of corn and wax. It is difficult, therefore, to obtain return cargoes. More than half the articles imported are destined for Persia. In 1832, no fewer than 9,189 packages passed through Trebitsond for Tabreez; and it is believed that of these fully 8,000 consisted of British manufactures.

**Money, Weights, and Measures,** same as at CONSTANTINOPLE; which see.

**TRIESTE**, a large city and sea-port of the Austrian dominions, the capital of a district of Illyria, situated near the N. E. extremity of the Gulph of Venice, lat. 45° 38' 37" N., lon. 13° 46' 27" E. Population, in 1836, of the city only, 51,346, and including the district comprised within the limits of the free port, 75,551. It is divided into the old and new towns. The former is built upon elevated ground; the latter, which is lower down, is laid out with greater regularity, and is partly intersected by a canal, into which vessels not drawing more than 9 or 10 feet water enter to load and unload.

**Harbour.**—The harbour of Trieste, though rather limited in size, is easy of access and convenient. It is protected from southerly gales by the *Molo Terzani*, so called from the Empress Maria Theresa, at the extremity of which the new light-house, mentioned below, has been constructed. The port, with the mole, forms a crescent  $\frac{1}{2}$  mile in length, being a continued quay, faced with hewn stones, with stairs and jetties for the convenience of embarkation. On the north side of the port is a dock or harbour, appropriated exclusively for vessels performing quarantine. It is walled round; and is furnished with hotels, warehouses, and every sort of accommodation required for the use of passengers and goods. Ships under 300 tons burden lie close to the quays; those of greater size mooring a little further out.

The principal defects of the port are, its limited size, and its being exposed to the N. W. winds, which sometimes blow with much violence, and throw in a heavy sea. The gales, however, are seldom of long continuance; and the holding ground being good, when the anchors are backed and proper precautions taken, no accident occurs. The tide at Trieste is scarcely perceptible; but the depth of water is influenced by the wind, being increased by a long continued sirocco or S. E. wind, and diminished by the prevalence of the E. N. E. wind, known by the name of *Bora*. The access to the port is not obstructed by any bar or shallow; and there is good anchorage in the roads, in from 6 to 7 and 10 fathoms water. A good sailing vessel may beat in by night or by day, except it blow hard from the N. E. or E. N. E., when she had better anchor in the Bay of Rese, or Pirano, where she will ride in perfect safety.

**Pilots.**—Ships bound for Trieste are under no obligation to take pilots; but those entering the port for the first time would do well to take one on making the coast of Istria. Boats are always hovering off *Borignie*; they are not manned by regular pilots, but by fishermen, who, though unfit to be trusted with the management of the ship, know the bearings of the places and the depth of water. The fee usually paid them for pilotage is 30 dollars; in addition to which, they are supported at the ship's expense during the performance of quarantine.

**Light-house.**—The light-house at the extremity of the Theresian mole is 106 feet (Eng.) high. The light is intermittent; and may be seen, supposing the eye of the observer to be elevated 13 feet above the level of the sea, about 12 nautical miles, or from Pirano on the side of Istria, and the shoals of Grado on the Italian coast. A light-house has also been erected on the point of Salvore, bearing from Trieste W. by S., distant about 18 miles. The lantern is elevated about 106 feet above the level of the sea. From this point Pirano Bay opens, where vessels may anchor in safety in all sorts of weather.

**Money.**—Mercantile accounts are usually kept at Trieste in what is commonly called *commerciale* money, from an agreement entered into with respect to it by some of the German princes, in 1763. The current coins that are legal tender are dollars,  $\frac{1}{2}$  dollars or florins, and swansigers, or pieces of 20 kreutzers. Ten dollars are coined out of the Cologne marc (8,608 gr. Eng.) of pure silver, so that the value of the dollar is 4s. 8d. sterling.

The florin, or  $\frac{1}{2}$  dollar = 2s. 1½d. sterling; swansigers, or pieces of 20 kreutzers (60 to the marc), = 8½d. sterling. Hence it follows that 1s. sterling = 25½ kreutzers (60 to a florin); and the pound sterling = 9 s. 2½ kr., or, as it is commonly taken, 9 s. 25 kr. All contracts are either expressly declared, or are understood, to be in silver money; gold coins, not being legal tender, pass only as merchandises.

**Weights and Measures.**—Those chiefly in use at Trieste are those of Vienna and Venice. The commercial pound contains 4 quarters, 16 ounces, or 32 loths: it is = 8,639 English grains. Thus, 100 lbs. at Trieste = 132·6 lbs. avoirdupois; or 90½ lbs. of Trieste = 112 lbs. avoirdupois.

The principal dry measure is the stajo or staro = 2·34 Winch. bushels. The Vienna metren, which is sometimes used, = 1·733 Winch. bushel. The polonick = 0·861 Winch. bushel.

The principal liquid measure is the orna or eimer = 40 boccals = 15 wine or 12½ Imperial gallons very nearly. The barile = 17½ English wine gallons.

The orna of oil contains ½ cask, and weighs about 107 commercial pounds. It is = 17 wine or 14·16 Imperial gallons.

The oil woollen measure 26·6 English inches. The oil for silk = 25·2 English inches.

**Trade.**—Trieste has no command of internal navigation; but being the most convenient, or rather the only sea-port, not merely of the Illyrian provinces, but of the duchy of Austria, and the greater part of Hungary, she possesses an extensive commerce. This has been increased by the facilities afforded to all sorts of mercantile transactions by the privilege of *porto franco* conferred on the town, and a considerable extent of contiguous country. Under this franchise, all goods, with but very few exceptions, may be imported into and exported from the city free of all duties whatever. Foreign products, when taken for consumption into the interior, are subject to the duties mentioned under the head *Tariff*, in a subsequent part of this article.

**Exports.**—These are very various, consisting partly of the raw and partly of the manufactured products of Austria, France, Illyria, Dalmatia, Hungary, and Italy; with foreign articles imported and re-shipped. Among the principal articles of raw produce may be specified, corn, chiefly wheat, and maize, with rice, wine, oil, shumac, tobacco, wax, &c.; silk, silk rags and waste, hemp, wool, flax, linen rags, hides, furs, skins, &c.; the produce of the mines makes an important item, consisting of quicksilver, cinabar, iron, lead, copper, brass, litharge, alum, vitriol, &c.; the forests of Carniola furnish timber, for ship building and other purposes, of excellent quality and in great abundance, with staves, cork wood, box, hoops, &c.; marble also ranks under this head. Of manufactured articles, the most important are, thrown silk, silk stuffs, printed cottons from Austria and Switzerland, coarse and fine linens, and all sorts of leather: under this head are also ranked soap, Venetian treacle, liqueurs, &c., with jewellery, tools and utensils of all sorts, glass ware and mirrors, Venetian beads, refined sugar, and a host of other articles. Of foreign articles imported and re-shipped, the most important are sugar, coffee, and dye stuffs. Trieste is also a considerable depot for all sorts of produce from the Black Sea, Turkey, and Egypt.

It is not possible to obtain any accurate account of the quantity and value of the exports; but Mr. Money, the late British consul at Trieste, who carefully inquired into the subject, supposed that they might amount, in 1833, exclusive of those shipped for Venice, Fiume, and other Austrian ports, to about 1,800,000*l.* a year, which he divided as follows:—

<i>Raw Produce, viz.</i> —Grain, rice, oil, honey, wax, shumac, tobacco, &c.	350,000
Silk, hemp, wool, rags, hides and skins	260,000
Metals, mineral and other products; as, quicksilver, iron, lead, copper, brass, zinc, litharge, argol, antimony, arsenic, alum, vitriol, potash, turpentine, marbles, &c.	230,000
Timber, plank, boards, &c.	180,000
<i>Manufactures, viz.</i> —Of silk, cotton, wool, linen, leather, &c.	235,000
Soap, candles, Venetian treacle, and medicines	80,000
Tools, machinery, arms, &c.	25,000

Manufactures — continued.

Household furniture, musical instruments, glass and glass wares, porcelain, &c. - 20,000  
 Foreign Articles re-shipped for exportation, exclusive of those for Lombardy and the  
 Papal States - - - - - 300,000  
 Total - - - - - £1,800,000

Mr. Money further supposed that these articles were distributed amongst the countries trading with Trieste, as follows:—

To Turkey and the Levant	-	-	-	-	-	380,000
Egypt	-	-	-	-	-	300,000
Greece, the Ionian Islands, and Malta	-	-	-	-	-	130,000
the Kingdom of the Two Sicilies	-	-	-	-	-	350,000
Ports in France, Sardinia, and Tuscany	-	-	-	-	-	100,000
Spain, Portugal, and Barbary	-	-	-	-	-	120,000
Great Britain	-	-	-	-	-	220,000
Ports in the North of Germany	-	-	-	-	-	150,000
the United States of America	-	-	-	-	-	50,000
South America and the West Indies	-	-	-	-	-	20,000
Total exports	-	-	-	-	-	£1,800,000

There has, however, been some, though but little, increase in the interval; and we have been assured by high mercantile authority, that the entire value of the exports from Trieste to foreign countries may at present (1858) be estimated at £2,000,000 per year. We subjoin

An Account of the principal Articles of Raw Produce exported from Trieste, with their Prices free on board on the 14th January, 1848, in Austrian and English Money, Weights, and Measures.

**Imports.**—There is a great difference between the imports into, and the exports from Trieste; the value of the former being certainly not less than 4,000,000 sterling. The excess of imports is explained partly by the fact that large quantities of foreign goods imported into Trieste, are subsequently re-exported by coasting vessels to Venice, Fiume, and other ports, partly by the residence of English and other foreigners at Vienna, and partly by there being an excess of exports as compared with imports from some parts of the empire. The great articles of import are sugar, cotton goods and raw cotton, oil, coffee, wheat, silks, indigo and other dye stuffs, valonia, &c.

An Account of the principal Articles of Foreign and Colonial Produce imported into, and exported from Trieste during each of the 5 years, ending with 1847, with the Stocks on hand on the 1st of January, 1848.

Trieste being a free port, goods destined for its consumption, and that of the adjoining territory, by no duties whatever, and are exported and imported without notice by the customs. Goods brought from the interior for export at Trieste, are charged an export duty on passing the Custom-house line. Cash imported at Trieste, to be conveyed through the Austrian dominions to those of any other power, is charged a small transit duty.

Gunpowder, salt, and tobacco, being articles monopolised by government, are not allowed to be imported into Trieste except for sale to the government or its contractors. Vessels arriving with gunpowder on board, deliver it at the arsenal, and on their clearing out it is returned to them free of expense. The utmost vigilance is exerted to prevent the introduction of tobacco; but with very little effect. The only article, the exportation of which from the Austrian dominions is at present prohibited, are gold and silver in bars, and silk cocoons.

#### Account of the Arrivals of Shipping, and of the principal Articles of Import, at Trieste, in 1847.

**Great Britain.**—In 40 British, 14 Austrian, 4 Russian, 1 Greek, 1 Roman States, 1 Norwegian, 1 Swedish, and 4 Prussian vessels:—Coffee, 50 tons St. Domingo, 50 tons La Guayra; sugar, 303 casks crushed, 5,873 boxes Havannah, 1,941 cases, 548 barrels, 599 bags Brazil, 1,676 bags East India; cocoa, 24 tons; cannia lignea, 122 tons; pepper, 126 tons; pimento, 81 tons; ginger, 108 tons; cinnamon, 101 bales; cochineal, 27 serons; cloves, 10 packages; rum, 119 puncheons; abelice, 275 packages; indigo, 219 cases, 19 serons; tea, 102 chests; logwood, 21 tons; Pernambuco wood, 11,440 pieces; span wood, 33,697 pieces, 503 tons; ebony, 1,138 pieces; iron, 348 tons, 19,985 bundles, 59,150 rails; tin, 540 ingots, 150 blocks, 429 barrels; brass, 7,928 boxes, plates; copper, 30,598 ingots, 22 cases, 154 packages; lead, 1,334 ingots; hardware, 165 packages; earthenware, 155 crates; manufactures, 5,374 packages; cotton, 4,156 bales; cotton twist, 1,173 bales; cases, 3,365 sets; herrings, 1,260 barrels; pilchard, 480 casks.

**United States.**—In 31 American, 1 British, 1 Norwegian, 2 Swedish, 1 Lubek vessel (7 vessels from New York, 11 New Orleans, 6 Mobile & Baltimore, 2 Boston, 3 Savannah, 1 Philadelphia, 1 Charleston, 1 Richmond, 1 Apalachicola):—Coffee, 199 tons St. Domingo, 64 tons St. Jago, 28 tons La Guayra; sugar, 776 boxes Havannah, 78 casks Porto Rico; pimento, 91 tons; cannia lignea, 3 tons; logwood, 749 tons; cotton, 29,210 bales; tobacco, 1,976 bales.

**Brazil.**—In 36 British, 45 Austrian, 4 Sardinian, 19 Danish, 11 Swedish, 2 Bremen, 2 Hamburg, 1 French, 3 Prussian vessels (37 vessels from Rio de Janeiro, 13 Bahia, 5 Macao, 3 Paraiba, 2 Maroni, 1 Cochin-China):—Coffee, 7,370 tons Rio, 40 tons Bahia; sugar, 30,476 cases, 263 barrels, 14,766 bags white, 2,080 cases, 510 barrels, 1,456 bags macerated.

**Cuba.**—In 4 British, 1 Austrian, 14 American, 1 Sardinian, 1 Hamburg, 6 Spanish vessels (10 vessels from Havannah, 10 Matanzas, 8 St. Jago, 1 Trinita):—Coffee, 571 tons Havannah, 1,020 tons St. Jago; sugar, 1,828 boxes white, 25,265 boxes yellow; rum, 87 puncheons; logwood, 21 tons.

**St. Domingo.**—In 2 British vessels:—Coffee, 443 tons; logwood, 6 tons.

**Porto Rico.**—In 1 Swedish, 1 Bremen vessel:—Coffee, 303 tons.

**Sumatra.**—In 1 American vessel:—Pepper, 303 tons.

**Pepper.**—In 6 French, 35 Austrian, 1 Russian, 7 Roman

States, 1 Tuscan vessel (61 vessels from Marseilles, 3 Genoa, 2 Havre de Grace, 1 Cote):—Coffee, 33 tons St. Domingo, 20 tons Havannah, 534 tons St. Jago, 22 tons Porto Rico, 8 tons La Guayra, 9 tons Java; sugar, 245 casks crushed, 6 casks crushed, 1,319 cases, 150 barrels Porto Rico, 139 bales white, 6,495 boxes yellow Havannah; cloves, 1,530 packages; rum, 32 puncheons; logwood, 154 tons; cotton, 2,294 tons.

**Spain.**—In 3 Spanish, 1 British, 2 Austrian, 1 Roman States, 1 Sardinian, 1 Neapolitan vessel (6 vessels from Barcelona, 2 Almeria, 1 Cadix):—Coffee, 30 tons Havannah, 79 tons St. Jago, 35 tons Porto Rico; sugar, 394 bales cases, 649 boxes yellow Havannah; lead, 2,475 ingots, 90 tons, 129 bags shell.

**Portugal.**—In 2 Austrian, 1 Russian, 3 Sardinian, 1 Swedish, 1 Portuguese vessel (6 vessels from Lisbon, 2 Oporto, 1 Coffee, 115 tons Rio; sugar, 535 cases, 1,456 barrels, 16 bags white Brazil; cinnamon, 10 packages; nutmeg, 6 cases; cloves, 10 packages; indigo, 219 cases, 19 serons; tea, 102 chests; logwood, 21 tons; Pernambuco wood, 11,440 pieces; span wood, 33,697 pieces, 503 tons; ebony, 1,138 pieces; iron, 348 tons, 19,985 bundles, 59,150 rails; tin, 540 ingots, 150 blocks, 429 barrels; brass, 7,928 boxes, plates; copper, 30,598 ingots, 22 cases, 154 packages; lead, 1,334 ingots; hardware, 165 packages; earthenware, 155 crates; manufactures, 5,374 packages; cotton, 4,156 bales; cotton twist, 1,173 bales; cases, 3,365 sets; herrings, 1,260 barrels; pilchard, 480 casks.

**Holland.**—In 10 Dutch, 1 British, 3 Austrian, 1 Roman States, 2 Danish, 5 Swedish, 1 Prussian, 1 Russian, 1 Bremen, 1 Sardinian, 1 Neapolitan vessel (11 vessels from Amsterdam, 3 Rotterdam, 1 Coffee, 10 tons Porto Rico, 125 tons Java, 7 tons sugar, 6,044 cases, 1,178 barrels, 235 boxes crushed, 26 casks refined, 36 cases, 243 barrels white Brazil, 7,190 bags Java, 1,020 tons St. Jago, 35 tons Porto Rico; sugar, 394 bales cases, 649 boxes yellow Havannah; lead, 2,475 ingots, 90 tons, 129 bags shell.

**Norway.**—In 1 Norwegian, 1 Danish, 1 Bremen vessel:—Stockfish, 573 tons.

**Sweden.**—In 1 Swedish, 1 Danish vessel:—Tea, 102 chests.

During the year, 1,392 square rigged vessels have come via 500 Acre, 244 Great, 115 Small, 67 New, 67 New, 100, 48 American, 48 Russian, 31 Sardinian, 10 Roman, 24 Swedish, 21 Turkish, 13 Roman States, 11 French, 10 Spanish, 10 Norwegian, 10 Dutch, 10 Prussian, 1 Tunis, 5 Bremen, 4 Hamburg, 3 Sardinian, 3 British, 2 Danish, 2 Egyptian, 1 Oldenburg, 1 Lubek, 1 Portuguese, and 1 to genuine. (From the Chronicle of Lancy, Frankfurt, & Co.)

**Shipping.**—Since the loss of Flanders, the mercantile navy of Austria has been confined wholly to the ports on the Adriatic. But it is, notwithstanding, very considerable; and, on gross as at this moment a very large share of the trade of the Mediterranean and Black Sea. The oak timber of Carniola and the Dalmatian coast is reckoned about the very best in the world; so that the Austrian ships, being built of it, are very strong, at the same time that they are particularly handsome. They are also well manned and provided. The seamen are expert, temperate, and orderly; and Mr. Money says, that the laws for the regulation of the merchant service are excellent.

By far the greater number of vessels of large burden belong to Trieste. The rest belong to Venice, Fiume, Ragusa, and the Bocche di Cattaro. On the other hand, the smaller vessels employed in the coasting trade, which is very considerable, are more equally divided: Venice having, probably, as many as Trieste, while a good number belong to the ports of Istria, Hungary, and Dalmatia.

The foreign trade of this port comprises all voyages beyond the limits of the Adriatic; and may be divided as follows:—

1. The Levant trade, including the Ionian Islands, Greece, Constantinople, Smyrna, Odessa, &c., the ports in Syria, Cyprus, Candia, and Egypt, more especially Alexandria.
2. The *commerce* of Mediterranean trade, in the west, com-

prising the coast of Barbary, Spain, France, and Italy; being principally carried on with Marseilles, Genoa, and Leghorn.

3. The commerce on the ocean, which the Austrian merchants have attempted with considerable success. Several ships sail for Brazil, the U. States, England, Hamburg, &c.

The number of Austrian vessels engaged in foreign trade is seen by the subjoined statement to amount to about 587, having an aggregate burden of 146,146. But exclusive of these, above 300 vessels of about 40 tons each are engaged in the coasting trade. The fishery is but inconsiderable.

We are indebted to the *Lloyd Austriaco* for the following returns respecting the navigation of Trieste during 1859:—

Arrivals.			Clearances.		
	Vessels.	Tons.		Vessels.	Tons.
Sailing vessels engaged in foreign trade	1,858	239,253	Sailing vessels engaged in the foreign trade	1,807	236,353
Steam vessels (ditto)	94	7,748	Steam vessels (ditto)	94	7,748
Sailing boats engaged in the coasting trade	2,836	105,178	Sailing boats engaged in the coasting trade	3,169	107,586
Steam boats (ditto)	913	46,890	Steam boats (ditto)	908	46,890
Smaller craft (ditto)	7,714	179,835	Smaller craft (ditto)	6,196	145,968
Total	12,657	567,841	Total	11,699	549,559

**Customs Regulations.**—The Custom-house at Trieste has nothing whatever to do with the entry, reporting, &c. of vessels. When a ship arrives, she is reported to the Health Office; which publishes a list of arrivals and departures, with a statement of their cargoes, as they appear in the manifests. Ships are cleared by the same office; the masters being assisted by the consuls of the country to which they belong. As soon as a vessel has performed quarantine, she loads or unloads without any interference or inspection by the customs officers, or by any one else. Goods unsuceptible of contagion may be landed during quarantine.

Being a free port, the bonding and warehousing system is, of course, unknown at Trieste.

**Port Charges.**—These are paid at the office of the harbour master on clearing out. They are the same, whatever may be the ship's stay; and are, perhaps, the most moderate of any in Europe.

*Port Charges paid by Austrian and Foreign Ships.*

<i>Austrian, and foreign privileged ships:</i>			<i>Foreign ships not privileged:</i>		
	Fl. kr.			Fl. kr.	
Anchorage, per ton admeasurement	-	0 4	Anchorage, light-house, and cargo as above, per ton admeasurement, and per ton weight of goods	-	0 10
Light-house	-	0 3	New tonnage duty, per ton admeasurement	-	0 16
Cargo duty, per ton weight of goods	-	0 3	Abboraggio, payable by ships departing in ballast, or with less than half a cargo	-	0 9
<i>N. B. — If grain, per 90 stajls.</i>					

Comparative Statement of the Port Charges paid at Trieste, respectively, by a native and privileged foreign ship, and a foreign Ship not privileged, each of 300 Tons Burden, with mixed Cargoes.

<i>Native and privileged:</i>			<i>Foreign, not privileged:</i>		
	Fl. kr.			Fl. kr.	
Anchorage and light, as above, 300 tons, at 7 kreutzers per ton admeasurement	-	35 0	Anchorage, light and cargo duty, as above	-	50 0
Cargo duty, 300 tons, at 3 kreutzers	-	15 0	Tonnage duty, 300 tons, at 16 kreutzers	-	80 0
Total	-	50 0		-	130 0

or about 4*l.* 1*s.* sterling.

or about 12*l.* 10*s.* sterling.  
If the ship depart in ballast, or with less than a cargo, there is a further charge of 9 kreutzers per ton, or 45 florins; making in all, 175 florins.

**Quarantine** is strictly enforced at Trieste, and the establishments for facilitating its performance are complete and efficient. The Board of Health at this port is the central or principal one for the Austrian States; and maintains an active correspondence with all the principal ports, both in the Mediterranean and elsewhere. There are 3 lazarettos,—that called St. Teresa, or Lazaretto Nuovo, is appropriated to vessels from the Levant and Egypt, which are, for the most part, subjected to the long or full quarantine of 40 days. It is spacious, and properly guarded; having a sufficient number of military and medical officers and assistants; with extensive quays and magazines for housing and airing goods, dwelling houses and apartments for resident officers and passengers, &c. It is, in fact, one of the most perfect establishments of the kind in existence. The other, or old (*Vecchio*) lazaretto, contiguous to the great mole, is appropriated to ships and passengers performing a quarantine of not more than 28 days; and, though inferior to the former, is sufficiently capacious and convenient. The sanitary offices, including that of harbour master, are near the centre of the port: where also are moored vessels under observation for a term not exceeding 8 days. Here also are facilities for communicating *visu voce* with persons under quarantine; and spacious warehouses, with adequate guards and other officers. But, notwithstanding these conveniences, if a vessel arrive having an infectious malady on board, she is not allowed to enter either lazaretto at Trieste, but is sent to an island near Venice, fitted out for the purpose, where assistance may be afforded with less risk of propagating infection.

The ordinary Board of Health consists of a president; two assistants, one of whom is a doctor of medicine; and three provisors, two of whom are merchants.

*Quarantine Charges payable at the port of Trieste, by all Ships.*

			His provisions do.	0 20	0 8

**Quarantine Dues payable on Goods.**—Non-susceptible goods pay *ad valorem* at the rate of 6 kreutzers per 100 florins or 1 mille. Susceptible goods pay an extra charge, according to tariff, or to circumstance. Besides the above *ad valorem* duty, goods not susceptible pay 4 kreutzers (1*q.*) per every 1,000 lbs. weight of Vienna. Grain is subject to an extra charge of about  $\frac{1}{4}$  per cent.

*Brokers, Commission Merchants, Brokerage, &c.* — There are a few exceptions to the freedom generally enjoyed of settling and exercising any trade at Trieste. Brokers, for example, are limited in number, and appointed by the Chamber of Commerce. They are obliged to give security, are under various regulations, and may not themselves trade as principals. They are of 2 classes: 1st, brokers for the sale and purchase of merchandise, who are again subdivided into particular classes, according to the articles they are conversant with, as grain, oil, cotton, drugs, hides and leather, colonial produce, manufactures, &c.; 2d, bill brokers, or exchange agents; and, 3d, ship and insurance brokers. Such authorised brokers are alone allowed to extend contracts, certificates, surveys, or other documents; and they are considered as public functionaries, whose depositions are received as legal evidence.

Any one may be a commission merchant or factor, but he may not issue printed circulars or lists of prices; nor will his books, however regularly kept, be considered as evidence in a court of justice, unless he is *matriculated*, for which the possession of a certain amount of capital is required. This, however, is little more than mere form, and a great deal of business is done by persons acting both as merchants and brokers, without being duly authorised.

The usual rate of a merchant's or factor's commission on the purchase of goods is 2 per cent.; on sales,  $\frac{1}{2}$  per cent.; *del credere* is sometimes added.

A merchant's commission for collecting freight, and doing other shipping business, is 2 per cent. on the inward cargo; and by custom of the place, the house to which a ship is consigned or recommended by the charterers, is entitled to a commission of 2 per cent. on the outward cargo, whether it has or has not been instrumental in procuring the goods that are laden outward.

A broker's commission for freightage a ship, or procuring a charter, is 2 per cent. This does not include the charge for writing charter, or for any other services performed in the clearance. In case of general cargoes, when the broker has to collect goods from different merchants, he charges 3 per cent. commission. A bill broker's commission (courtage) is sometimes 1 per mille, more commonly  $\frac{1}{2}$  per mille. Brokerage for the sale or purchase of merchandise varies from  $\frac{1}{2}$  per cent. to 1 per cent., according to circumstances, and the nature of the article.

*Insurance.* — The insurance of ships is carried on to a considerable extent at Trieste. The security is unexceptionable, the terms more moderate than in England, and losses are said to be adjusted promptly and liberally. The oppressive duties on policies of insurance in England have been the cause that most insurances on ships for the Adriatic, that were formerly effected in London, Liverpool, &c., are now effected at Trieste. The insurance of houses is universal; and that of lives is also, of late years, practised to a considerable extent. House insurance is carried on by joint companies, of limited responsibility.

*Bankruptcy* is not of very frequent occurrence at Trieste. The laws with respect to it do not differ much from those in force in most other countries. Frauds are punishable by imprisonment; but here, as elsewhere, they are very difficult to detect. Honest bankrupts are discharged, on making a complete disclosure of their affairs, and a surrender of their assets. Property settled on a wife is not affected by the debts of the husband; a regulation which, it is evident, must lead to fraud.

*Communications by Land.* — The intercourse between Trieste and Austria, Hungary, &c., is necessarily all carried on by land. The roads leading to Vienna, and to the Hungarian towns, particularly the first, are kept in good repair, and the tolls are moderate; but owing to the rugged nature of the country, the ascent is in some places very considerable. The diligence from Trieste to Vienna, 340 English miles, performs the journey in 73 hours. The draught horses employed on the roads are excellent; but, in some of the mountainous districts, bullocks are used.

Repeated surveys have been made of the country between Vienna and Trieste, in the view of forming a canal. But the difficulties in the way of such a project seem to be all but insuperable. The ground is not only rugged, but the subsoil of the country stretching northwards to a considerable distance from Trieste is so very porous, that, unless precautions were taken to obviate it, the water in the canal would speedily escape. A railroad has been proposed, and it might, no doubt, be accomplished. But the expense would be so very great, that it is extremely problematical whether it would ever yield any thing like a return.

*Careening, Stores, &c.* — Timber at Trieste is excellent, workmen good, and their wages moderate; so that it is a very favourable place for careening and repairing. Water is very good, but rather scarce; so that, if a large supply be required, due notice must be given. Ships are served in regular rotation. Beef is very good, but rather high priced. Butter and cheese are dear; and fuel is excessively so. On the whole, therefore, Trieste cannot be considered as a favourable place for the provisioning of a ship.

*Banking.* — There are no public banks at Trieste. The bank of Vienna has an office here, but it is merely for the exchange of its notes for cash, or, more frequently, of large notes for small ones. These notes, being guaranteed by government, are legal tender, and in general circulation, but no other company is allowed to issue notes to be used as a circulating medium. There is not, however, any deficiency of currency. Banking business is transacted by private companies, or by individuals, who are subject to certain regulations, and are obliged to lay before competent authority an attested statement of the capital embarked in their concerns. Their business principally consists in procuring bills of exchange from other places for the use of the merchants of Trieste, or in discounting, (in which latter operation they have many private competitors,) at the rate of from 4 to 6 per cent. per annum, according to the nature of the paper offered, and in proportion to the scarcity or abundance of cash.

The principal bankers of Trieste are of undoubted solidity, and do not indulge in dangerous speculations; and notwithstanding the apparent want of great banking establishments, the business of buying and selling, and of making payments and remittances, whether in bills or specie, is transacted at this port with great facility; and there seldom arises any distress, pressure, or stagnation, from want of money or credit.

It is not usual for respectable bankers to give interest on deposits. The partners in joint stock companies, banks, &c. are, in general, responsible only to the extent of their declared capital; and the individuals composing them are only liable each to the extent of their share. The same individual is frequently a general merchant, a partner in a banking house, and a member of an insurance company. All these businesses may at present be said to be prosperous.

*Credit.* — Goods imported into Trieste are sometimes sold for ready money, a discount being usually understood, and allowed in such case, of 2 or 2½ per cent. But they are commonly sold at 3 months' credit, that is, by bills of that date; occasionally, but rarely, they are sold at 6 months.

Bills thus obtained, though offering no other guarantee than the signature of the drawer or acceptor, may be discounted or insured at a moderate rate by companies who dedicate themselves to this branch of business, and who, from their extensive dealings, are good judges of the risk. The practice has become almost universal; and it not only facilitates sales, but has a tendency to prevent bankruptcies, as it is difficult for a house long to conceal its insolvency; and its credit is, by this mode of trial, soon ascertained.

*Tares.* — Real tare is allowed on most articles of export; and on all articles of import, except cotton and sugar. The tare on Brasil sugar in chests depends on their length and size, but in general it amounts to from 15 to 18 per cent.; on Brasil sugar in bags the tare is 3 per cent.; on Havannah sugar a tare is allowed of 52 lbs. English per box, being from 13 to 14 per cent.; on Jamaica sugar the tare is 14 per cent. Tare on American cotton, 4 per cent.

An Account of the Number of Vessels, with the Amount of their Tonnage, that were built or purchased in the Austrian Ports on the Adriatic, and also those that were wrecked, broken up, or sold out of the Austrian Mercantile Navy, in the Years 1839, 1840, 1841, and 1842, and showing the total Number existing on the 31st of December, 1842.

*Tariff (Austrian).* — Subjoined is the existing tariff of the import, export, and transit duties charged in the Austrian empire on some of the most important articles of trade and consumption. It came into operation on the 27th of February, 1838.

The duties imposed by this tariff, though, in some instances, considerably lower than those formerly charged, are still, speaking generally, very heavy. The duty on cotton and woollen goods, for example, is 60 per cent. *ad valorem*; while that on coffee is 38s. the English cwt., that on raw sugar for consumption 32s. the cwt., and so forth. There is, in fact, a singular contradiction in the commercial policy of Austria; in some respects it is as liberal as could be wished for, while in others it is selfish and illiberal in the extreme. In all that respects ports and shipping, the legislation of Austria may be advantageously contrasted with that of almost any other nation. All articles are freely admitted into Trieste and Venice, and may be consumed in them, or warehoused and re-exported, without being liable to any duty, the port charges being at the same time very reasonable. But the moment that it is attempted to introduce any article from a free port into the interior, it is loaded with oppressive duties, and subjected to vexatious regulations. These have been imposed in the view of protecting and encouraging domestic industry; but it is, perhaps, unnecessary to say that their effect in Austria, as in all other countries, has been precisely the reverse. Instead of trusting to their own exertions, and bringing the inexhaustible resources of science and ingenuity to their aid, the native producers, deprived of the stimulus of competition, depend for success on the efforts of the customs officers to exclude foreign products, and to secure them a monopoly. There is, consequently, but little improvement. Every thing has about it an air of languor and routine. Most part, also, of the foreign products now to be met with in the interior have found their way there through clandestine channels. The mischievous influence of such a system is, indeed, too obvious to be disputed by any one not interested in its support. The modifications made of late years in the tariff, and the commercial treaty negotiated with this country, may, we hope, be regarded as the forerunners of still greater changes. A reduction of the duty on most foreign articles to a half or a third part of its present amount would do more than any thing else to promote the industry of the empire, to stimulate commerce, and to increase the customs revenue. Now that the navigation of the Danube is opened, a reduction of this sort is more than ever necessary. The introduction of a taste for the production of foreigners is of all others the most likely means by which the long dormant energies and immense productive capacities of Hungary, Transylvania, and the other eastern provinces of the empire, may be stimulated and developed. Unluckily, however, the existing duties must either go far, by excluding foreign products, wholly to prevent the formation of such a taste in the countries referred to, or, if they should be imported, it will only be in limited quantities, and through the agency of the smuggler. The latter derives employment and wealth from this vicious system; and were it intended for his advantage, it might be said to be well contrived, and the means judiciously adapted to bring about the desired end. But it is directly opposed to invention and industry; paralyses the manufactures it was intended to protect; and either annihilates all commerce, or makes it redound to the advantage only of those who trample on the laws. No system can be more completely at variance with the paternal intentions of the Austrian government; and

One Vienna pound = 1.225 lb. avoirdupois: hence the centner of 100 Vienna pounds = 122.5 or 122½ lbs. avoirdupois.

The Austrian florin of the standard of 30 to the Cologne mark, is almost exactly 2 shillings sterling. In the Lombardo Venetian kingdom, the centner of 100 kilogrammes is still the weight used in levying the duty, the difference between 100 kilogrammes = 78.8 lbs. of Austria being allowed.

**TRINITY HOUSE.** This society was incorporated by Henry VIII., in 1515, for the promotion of commerce and navigation, by licensing and regulating pilots, and ordering and erecting beacons, light-houses, buoys, &c. A similar society, for the like purposes, was afterwards established at Hull; and also another at Newcastle-upon-Tyne in 1537; which 3 establishments, says Hakluyt, were in imitation of that founded by the Emperor Charles V. at Seville in Spain; who, observing the numerous shipwrecks in the voyages to and from the West Indies, occasioned by the ignorance of seamen, established, at the *Casa de Contratacion*, lectures on navigation, and a pilot-major for the examination of other pilots and mariners; having also directed books to be published on that subject for the use of navigators.

Henry VIII., by his charter, confirmed to the Deptford Trinity House Society all the ancient rights, privileges &c. of the shipmen and mariners of England, and their several possessions at Deptford, from which it is plain that the Society had existed long previously. The corporation was confirmed, in 1685, in the enjoyment of its privileges and possessions, by letters patent of the 1st of James II. by the name of the Master,

Wardens, and Assistants of the Guild or Fraternity of the most glorious and undivided Trinity and of St. Clement's, in the parish of Deptford Strond, in the County of Kent. At first, the corporation appears to have consisted of seamen only; but since the charter of James II., noblemen and gentlemen have been enrolled among its elder brethren. It is governed by 31 elder brothers, of whom 1 is master, 4 wardens, and 8 assistants: but the inferior members of the fraternity, named younger brethren, are not limited in point of number; every master or mate, expert in navigation, being admissible as such. Besides the power of erecting light-houses, and other sea-marks, on the several coasts of the kingdom, for the security of navigation — (see LIGHT-HOUSES), — the master, wardens, assistants, and elder brethren are invested by charter with the following powers; viz. the examination of the mathematical scholars of Christ's Hospital; the appointment of pilots to conduct ships into and out of the Thames; the settling the several rates of pilotage; and the granting licences to poor seamen, not free of the city or past going to sea, to row on the river Thames for their support. They formerly, also, enjoyed several other powers, which have since fallen into disuse or been vested in other hands. To this company belongs the Ballast Office, for clearing and deepening the Thames, by taking up a sufficient quantity of ballast for the supply of all ships that sail out of the river, for which they pay certain rates. — (See BALLAST.) The corporation is authorised to receive voluntary subscriptions, benefactions, &c.; and to purchase, in mortmain, lands, tenements, &c. to the amount of 500*l.* per annum. The ancient Hall of the Trinity House at Deptford, where the meetings of the brethren were formerly held, was pulled down long ago. They now meet in an elegant building erected for the purpose in London, near the Tower.

*Trinity House Revenues, &c.* — The gross revenue under the management of the Trinity House amounts to about 250,000*l.* a year; but the net revenue is rather under that sum. It arises from the dues payable to the corporation on account of light-house, buoyage and beaconage, and ballastage; and from the interest of money in the funds, and the rent of freehold property. In 1842, the receipts were as under: —

	£	s.	d.	£	s.	d.	£	s.	d.
<i>Light-houses.</i> — Total sums received on account of light-houses				342,032	5	3½			
Deduct commission on collection	9,564	9	4½						
Charges on account of maintenance, &c.*	174,166	14	2	185,721	3	6½			
Nett light-house revenue							56,311	2	3
<i>Buoyage and Beaconage</i> — gross amount of				14,438	8	8			
Deduct commission on collection	283	1	11	10,447	1	1			
Charges	10,063	19	8				4,041	7	7
Nett buoyage, beaconage, and revenue†									
<i>Ballastage</i> — gross amount of				30,906	11	7			
Deduct charges	31,915	16	11	1,009	5	4			
Deficiency of ballastage revenue‡							30,891	7	3½
<i>Rent of Land and houses, dividends on account of funded property, &amp;c., all charges deducted</i>							73,173	17	1½
							1,069	5	4
<b>Total nett revenue</b>							<b>73,164</b>	<b>11</b>	<b>3½</b>

By far the greater portion of this large sum is laid out on pensions to poor disabled seamen, and on the maintenance of their widows, orphans, &c. We have seen the number of persons so relieved stated at 3,000; and we believe that the fund is both judiciously and economically administered. Still, however, as we have remarked in another article — (*ante*, p. 779.) — it does appear to us, considering the vast importance to a maritime nation like this of keeping the charges on shipping as low as possible, that it would be good policy to provide otherwise for the poor persons now dependent on the Trinity House, and to reduce the charges on account of lights, &c. to the lowest sum that would suffice to maintain the establishment in a proper state of efficiency. No one, certainly, would wish to see the poor seamen or their widows or orphans deprived of any part of the pittance they now receive; but a larger amount might be given them from other sources, and be at the same time less felt by the public. Every one knows that nothing contributes so much to facilitate a commercial intercourse by land as good roads and low tolls; and good lights, buoys, beacons, &c., and light charges, have precisely the same influence at sea.

**TRIPANG**, or **SEA SLUG** (*Biche de Mer*), a species of fish of the genus *Holothuria*, found chiefly on coral reefs in the Eastern seas, and highly esteemed in China, into which it is imported in large quantities. It is an unseemly looking substance, of a dirty brown colour, hard, rigid, scarcely possessing any power of locomotion, or appearance of animation. Sometimes the slug is as much as 2 feet in length, and from 7 to 8 inches in circumference. A span in length, and 2 or 3 inches in girth, is, however, the ordinary size. The quality and value of the fish, however, do not by any means depend upon its size, but upon properties in it neither obvious to nor discernible by those who have not been long and extensively engaged in the trade. In shallow water the animal is taken out by the hand, but in deeper water it is sometimes speared. When taken it is gutted, dried in the sun, and smoked over a wood fire; this being the only preparation it receives.

\* This sum includes 3,481*l.* expended on account of new works; 50,712*l.* for interest paid on money borrowed to complete the purchase of certain lights; and 10,946*l.* repairs, coals, stores, wages to engineers of the yachts required for conducting the light and buoyage service, and salary to superintendent and storekeeper at the wharf at Blackwall and rates, taxes, repairs, &c. on the establishment at that place.

† It will be seen that the charges on account of ballastage exceed the revenue; the amount of such excess, 1,069*l.* 5*s.* 4*d.*, is deducted at the foot of this account.

The fishery is carried on from the western shores of New Guinea, and the southern shores of Australia, to Ceylon inclusive. Indeed, within the last few years it has been successfully prosecuted on the shores of the Mauritius. The whole produce goes to China. In the market of Macassar, the great staple of this fishery, not less than thirty varieties are distinguished, varying in price from 5 Spanish dollars a picul (133½ lbs.) to 14 times that price, each variety being distinguished by well-known names: The quantity of tripang sent annually to China from Macassar is about 7,000 piculs, or 8,333 cwt.; the price usually varying from 8 dollars a picul to 110 and 115, according to quality. — (*Crawford's Indian Archipelago*, vol. III. p. 461.) There is also a considerable export of tripang from Manila to Canton. Besides tripang, *fish-maws* and *sharks' fins* are exported to China from every maritime country of India.

**TROY WEIGHT**, one of the most ancient of the different kinds used in Britain. The pound English Troy contains 12 ounces, or 5,760 grains. It is used in the weighing of gold, silver, and jewels; the compounding of medicines; in experiments in natural philosophy; in comparing different weights with each other; and is now (by 5 Geo. 4. c. 74.) made the standard of weight.

**TROY WEIGHT, Scotch**, was established by James VI. in the year 1618, who enacted that only one weight should be used in Scotland, viz. the French Troy stone of 16 pounds, and 16 ounces to the pound. The pound contains 7,609 grains, and is equal to 17 oz. 6 dr. avoirdupois. The cwt. or 112 lbs. avoirdupois, contains only 103 lbs. 2½ oz. of this weight, though generally reckoned equal to 104 lbs. This weight is very nearly identical with that formerly used at Paris and Amsterdam; and is generally known by the name of Dutch weight. Though prohibited by the articles of Union, it has been used in most parts of Scotland in weighing iron, hemp, flax, and other Dutch and Baltic goods, meal, butcher's meat, lead, &c. — (See **WEIGHTS AND MEASURES**.)

**TRUCK SYSTEM**, a name given to a practice that has prevailed, particularly in the mining and manufacturing districts, of paying the wages of workmen in goods instead of money. The plan has been, for the masters to establish warehouses or shops; and the workmen in their employment have either got their wages accounted for to them by supplies of goods from such *depôts*, without receiving any money; or they have got the money, with a tacit or express understanding that they were to resort to the warehouses or shops of their master for such articles as they were furnished with.

*Advantages and Disadvantages of the Truck System.* — A great deal of contradictory evidence has been given, and very opposite opinions have been held, as to the practical operation and real effect of this system on the workmen. Nor is this to be wondered at, seeing that every thing depends on the mode in which it is administered, and that it may be either highly advantageous or highly injurious to the labourer. If a manufacturer of character establish a shop supplied with the principal articles required for the use of the workmen in his employment, and give them free liberty to resort to it or not as they please, it can, at all events, do them no harm, and will, most likely, render them material service. The manufacturer, having the command of capital, may, in general, lay in his goods to greater advantage than they can be laid in by the greater number of retail tradesmen in moderate-sized towns; and not being dependent on the profits of his shop for support, he is, even though he had no advantage in their purchase, able to sell his goods at a cheaper rate than they can be afforded by the majority of shopkeepers. Some times, also, a factory is established in a district where shops either do not exist at all, or are very deficient; and in such cases the master consults the interest and convenience of those dependent on him when he provides a supply of the principal articles required for their subsistence. It is easy, therefore, to see that the keeping of shops by masters for the use of their workmen may be very beneficial to the latter. But to insure its being so, it is indispensable that the masters should be above taking an advantage when it is within their reach, and that their conduct towards the workmen should not be in any degree influenced by the circumstance of the latter dealing or not dealing with their shops.

Such disinterestedness is, however, a great deal more than could be rationally expected from the generality of men; and hence, though many instances may be specified in which the truck system was advantageous to the workmen, those of a contrary description were unfortunately, far more numerous. It is obvious, indeed, that a practice of this sort affords very great facilities for fraudulent dealings. Under the old law, a manufacturer who had a shop, had means, supposing he were inclined to use them, not possessed by any ordinary shopkeeper as respects his customers, for forcing upon his workmen inferior goods at an exorbitant price. They are at first supplied on liberal terms, and are readily accommodated with goods in anticipation of wages, till they get considerably into debt. The pernicious influence of this deceitful system then begins fully to disclose itself. The workmen cease to be free agents; they are compelled to take such goods and at such prices as the master pleases; for, were they to attempt to emancipate themselves from this state of thralldom by leaving their employment, they would be exposed to the risk of prosecution and imprisonment for the debts they had incurred. It is not easy to imagine the extent to which these facilities for defrauding the labouring class were taken advantage of in various districts of the country. In many instances, indeed, the profits made by the shops exceeded those made by the business to which they were contingent; and thousands of workmen, whose wages were nominally 30s. a week, did not really receive, owing to the bad quality and high price of the goods supplied to them, more than 20s., and often not so much.

*Abolition of the Truck System.* — A system of dealing with the labouring classes, so very susceptible of abuse, and which, in point of fact, was very extensively abused, was loudly and justly complained of. A bill was in consequence introduced for its suppression by Mr. Littleton (now Lord Hatherton), which, after a great deal of opposition and discussion, was passed into a law, 1 & 2 Will. 4. c. 32. — (*See abstract subjoined.*)

Those who opposed this act did so on two grounds; — 1st, that it was improper to interfere at all in a matter of this sort; and, 2d, that the interference would not be effective. The first of these objections does not appear entitled to any weight. In suppressing the truck system, the legislature did nothing that could in anywise regulate or fetter the fair employment of capital: it interfered merely to put down abuse; to carry, in fact, the contract of wages into full effect, by preventing the workman from being defrauded of a portion of the wages he had stipulated for. The presumption no doubt is, in questions between workmen and their employers, that government had better abstain from all interference, and leave it to the parties to adjust their disputes on the principle of mutual interest and compromised advantage. Still, however, this is merely a presumption; and must not be viewed as an absolute rule. Instances have repeatedly occurred where the interference of the legislature to prevent or suppress abuse, on occasions of the sort now alluded to, has been imperiously required, and been highly advantageous. Those who claim its interposition are, indeed, bound to show clearly that it is called for to obviate some gross abuse, or that it will materially redound to the public advantage; and this, we think, was done in the completest manner, by the opponents of the truck system. Regard for the interests of the more respectable part of the masters, as well as for those of the workmen, required its abolition; for, while it continued, those who despised taking an advantage of their dependants were less favourably situated than those who did. It is ludicrous, therefore, in a case of this sort, to set up a cuckoo cry about the "freedom of industry." The good incident to the truck system was in practice found to be vastly overbalanced by the abuses that grew out of it; and as these could not, under the existing law of debtor and creditor, be separately destroyed, the legislature did right in attempting to suppress it altogether.

It was said, indeed, that this would be found to be impracticable; and the manufacturers would enter underhand into partnerships with the keepers of shops, and that the system would really be continued, in another and, perhaps, more objectionable form. This anticipation has, we believe, been in some degree realised; but the system has notwithstanding been in many places abandoned, and is nowhere practised to any thing like the extent to which it was carried previously to the passing of Lord Hatherton's act. It will not, however, be completely rooted out, till all small debts, however they originate, be put beyond the pale of the law. We have already vindicated the expediency of this measure on other grounds — (*see CARR*); and the influence it would have in effectually destroying whatever is most pernicious in the truck system, is a weighty additional recommendation in its favour. Were all right of action upon debts for less than 50*l.* or 100*l.* taken away, no master would think of acquiring a control over the free agency of his workmen, by getting them in debt to him; and no workman would, under such circumstances, submit to be directed in his choice of shops or goods. The case of the Scotch colliers affords a curious illustration of what is now stated. Down to 1775, these persons were really *adscripti glebe*, or prædial slaves; that is, they and their descendants were bound to perpetual service at the works to which they belonged, — a right to their labour being acquired by any new proprietor to whom the works were sold! The 15 Geo. 3. c. 28. was passed for the emancipation of the colliers from this state of bondage. It, however, failed of practically accomplishing its object; for the masters speedily contrived, by making them advances in anticipation of their wages, to retain them as completely as ever under their control! To obviate this abuse, the 39 Geo. 3. c. 56. was passed; which most properly took from the masters all title to pursue the colliers for loans, unless advanced for the support of the collier and his family during sickness. This act had the desired effect; and the colliers have since been as free as any other class of labourers. — (*See edition of the Wealth of Nations by the author of this work, p. 172.*) In fact, were small debts put beyond the pale of the law, it would not be necessary to interfere directly with the truck system; for it would not then be possible to pervert it to any very injurious purpose.

The following are the principal clauses in the act 1 & 2 Will. 4. c. 37., entitled, "An Act to prohibit the Payment in certain Trades, of Wages in Goods, or otherwise than in the Current Coin of the Realm:—" —

1. In all contracts hereafter to be made for the hiring of any artificer in any of the trades herein-after enumerated, or for the performance by any artificer of any labour in any of the said trades, the wages of such artificer shall be made payable only in the current coin of this realm, and not otherwise; any contract to the contrary being illegal, null, and void.
2. If such contract contain any stipulations as to the manner in which the wages shall be expended, it is void.
3. Wages must be paid to the workman in coin only. Payment in goods illegal and void.

4. Artificers may recover wages, if not paid in the current coin.

5. In an action brought for wages, no set-off shall be allowed for goods supplied by the employer, or by any shop in which he is interested.

6. No employer shall have any action or suit in equity against his artificer, for goods supplied to him on account of wages, or supplied by any shop in which he has an interest.

7. If the artificer, or his wife or children, become chargeable

Digitized by Google

very strong. The principal soap-works are at Susea. Little, however, is prepared on a speculative anticipation of a demand for exportation; but any quantity may be had by contracting for it a few months before the period when it is wanted. A sort of woollen scull-caps are largely exported. They are in extensive demand all over the Levant, and are nowhere made in such perfection as here. Ivory and gold dust, hides, wax, morocco leather, sponge, barilla, coral, dates, ostrich feathers, &c. are among the articles of export.

The imports from Europe consist of woollens, coarse German and Irish linens, cotton stuffs, hardware, sugar, coffee, spices, tin plates, lead, alum, dye stuffs, wine, silk, Spanish wool, &c. There is very little direct trade between Tunis and England; but a good deal is indirectly carried on, through the intervention of Malta and Gibraltar. Marseilles has probably the largest share of the trade with the regency. In 1830, there entered the different ports of Tunis 194 ships, of the burden of 30,747 tons, exclusive of those engaged in the trade with the other African states and Turkey.

Exclusive of the trade by sea, a considerable trade is carried on between Tunis and the interior of Africa, by means of caravans. These import slaves, gold dust, ivory, feathers, drugs, &c. They carry back cotton stuffs, linens, hardware, spices, cochineal, &c.

Naval and military stores imported into Tunis pay no duty. Other articles pay a duty of 3 per cent. ad valorem on a rated tariff. Obstructions arising out of monopolies, &c. are occasionally thrown in the way of exportation; and in general it is necessary, before proceeding to ship, to obtain a *fatwa*, or licence to that effect, from the bey. That, however, may be, for the most part, procured without much difficulty.

*Money.*—Accounts are kept in piastres of 16 octobas or 52 sapers. The piastre is worth about 1s. 1d. sterling. The sapers is an imaginary money. The value of foreign coins depends on the state of the exchange.

*Weights.*—Gold, silver, and pearls are weighed by the ounce of 12 mouds; 16 of these ounces make the Tunis pound = 7,775.5 Eng. gra. The principal commercial weight is the centaro, containing 100 lbs., or roudin, being equivalent to 111.05 lbs. avoird., or 50.36 kilsgr.

*Measures.*—The principal corn measure is the *catia*, divided into 16 whibes; and the whibe into 12 asbas. One *catia* = 144 Imperial bushels.

The wine measure is the millerale of Marseilles = 141 Imp. gallons, or 64.38 Mers. It is divided into 63 mouds.

The principal oil measure is the metal or meter = 5.125 wine pints, or 19.29 liters; but it is of different diameters in different parts of the country; and is larger at Susea, whence most of the oil is exported, than at Tunis.

The pic, or principal long measure, is of 3 units; viz. the pic wadies measure = 3.5 Eng. feet; the pic *de* measure = 3.45 do.; and the pic *lisse* measure = 19.6 do.

For further particulars, see that chapter of *Shaw's Travels in Barbary*, &c. (one of the most learned and accurate writers of the kind in the English language), that treatise of the kingdom of Tunis; *Macarty's Account of Tunis*, &c.; *Johns's Commerce of the Mediterranean*, pp. 55–56.; *Kelly's Com- bust.*, &c.

**RUINS OF CARTHAGE.**—The famous city of Carthage, one of the greatest emporiums of the ancient world, long the mistress of the sea, and the most formidable enemy of Rome, was situated near the cape which still bears her name, about 10 miles N.E. from Tunis. Such, however, have been the alterations on the coast, that the port of the city, within whose ample expanse whole navies used to ride, is now wholly filled up: antiquaries differ as to its situation; and the sea has in some places receded from 2 to 3 miles from the ruins of the buildings by which it was formerly skirted. The common sewers are still in a very perfect state, as are several cisterns, public reservoirs, and other remains of that sort, with the fragment of a noble aqueduct that supplied the city with water. But besides these and a very few Punic inscriptions that have been dug up, there is nothing left to attest the ancient grandeur and magnificence of the city, or to identify it with the illustrious people by whom it was founded and occupied till its destruction by Scipio Nasica. There are no temples, no triumphal arches, no granite columns or obelisks covered with Phœnician characters, and no ancient inscriptions. These have all fallen a sacrifice to hostile attacks, or to the destroying hand of time.

Nunc paucim, vix reliquias, vix nomina servans,  
Obruitur, propriis non agnoscenda ruinis.

Such mutilated fragments of buildings as still remain are evidently the work of a later age; of those who occupied the city between the period when a colony was sent to it by Augustus, and its final subversion by the Saracens in the 7th century.

**TURBITH, or TURPETH**, the cortical part of the root of a species of *Convolvulus*, brought from different parts of the East Indies. It is a longish root about the thickness of the finger, resinous, heavy, of a brownish hue without and whitish within. It is imported cloven in the middle, lengthwise, and the heart or woody matter taken out. The best is ponderous, not wrinkled, easy to break, and discovers to the eye a large quantity of resinous matter. At first it makes an impression of sweetness on the taste; but, when chewed for some time, betrays a nauseous acrimony. It is used in medicine, but only to a small extent. — (*Lewis's Mat. Med.*)

**TURBITH (MINERAL)**, the name given by chemists to the subsulphate of mercury.

**TURBOT** (*Pleuronectes maximus*), a well-known and highly esteemed species of fish. Very considerable quantities of turbot are now taken on various parts of our coasts, from the Orkneys to the Land's End, yet a preference is given in the London markets to those caught by the Dutch. The latter are said to have sometimes drawn as much as 80,000l. in a single year, for turbot sold in London.

Fresh turbot, however taken, or in whatever ship imported, may be imported free of duty. — (See **FISH**.)

**TURMERIC**, the root of the *Curcuma longa*. It is externally greyish, and internally of a deep lively yellow or saffron colour; very hard; and not unlike, either in figure or size, to ginger. That should be preferred, which is large, new, resinous, difficult to break, and heavy. It is imported from Bengal, Java, China, &c.: but some of a superior quality is said to have been brought from Tobago. Small quantities of it have also been grown in England. It has a somewhat aromatic, and not very agreeable smell; and a bitterish, slightly acid, but rather warm taste. It used to be in co-

siderable estimation as a medicine; but, in Europe, it is now only used as a dye. It yields a beautiful bright yellow colour; which, however, is extremely fugitive, and no means have hitherto been discovered of fixing it. It is sometimes employed to heighten the yellows made with weld, and to give an orange tint to scarlet; but the shade imparted by the turmeric soon disappears. The Indians use it to colour and season their food. — (*Lewis's Mat. Med.*; *Bancroft on Colours*, vol. i. p. 276.)

The entries of turmeric for consumption amount to about 4,000 cwts.; but as the duty on the article when brought from a foreign possession was reduced in 1843 from 10s. to 5s. per cwt., and when brought from a British possession from 5s. 4d. to 1d. per do., it is probable that the consumption will be materially increased. Its price, duty paid, in London, varies, according to quality, from 10s. to 32s. per cwt.

**TURPENTINE** (Ger. *Turpentin*; Fr. *Térébenthine*; It. *Trementina*; Rus. *Skidpidar*; Pol. *Turpentina*). There are several species of turpentine, but all of them possess the same general and chemical properties.

1. *Common Turpentine*, is a resinous juice which exudes from the Scotch fir or wild pine (*Pinus sylvestris*). The trees which are most exposed to the sun, and have the thickest barks, yield it in the greatest abundance. They begin to produce it when about 40 years old. The bark of the tree is wounded and the turpentine flows out in drops, which fall into a hole, or sort of cup, previously dug at the foot of the tree, holding about 1½ pint. It is purified by being exposed to liquefy in the sun's rays, in barrels perforated in the bottom, through which it filters. In the U. States, the collection of turpentine is confided chiefly to negroes, each of whom has the charge of from 3,000 to 4,000 trees. The process lasts all the year, although the incisions are not made in the trees till the middle of March, and the flow of the turpentine generally ceases about the end of October. The boxes are emptied 5 or 6 times during the year; and it is estimated that 250 boxes will produce a barrel weighing 390 lbs. Turpentine has a strong, somewhat fragrant odour, and a bitter, disagreeable taste; its consistence is greater than that of honey; its colour dirty yellow; and it is more opaque than the other sorts. We import it almost entirely from the U. States.

2. *Venice Turpentine*, is the produce of the larch (*Pinus Larix*). It is obtained by boring a hole into the heart of the tree about 2 feet from the ground, and fitting into it a small tube through which the turpentine flows into vessels prepared for its reception. It is purified by straining through cloths, or hair sieves. It is more fluid, having the consistence of new honey, a yellowish colour, and is less unpleasant to the smell and taste, than the common turpentine. Genuine Venetian turpentine is principally obtained from the forests of Baye, in Provence; but much of that to be found in the shops comes from America, and is, perhaps, obtained from a different species of fir.

3. *Canadian Balsam, or Turpentine*, is obtained from incisions in the bark of the *Pinus Balsamea*, a native of the coldest regions of North America. It is imported in casks, each containing about 1 cwt. It has a strong, not disagreeable odour, and a bitterish taste; is transparent, whitish, and has the consistence of copaiva balsam. — (See **BALSAM**.)

4. *Chian, or Cyprus Turpentine*, is obtained from the *Pistacia Terebinthus*, a native of the north of Africa and the south of Europe, and cultivated in Chios and Cyprus. It flows out of incisions made in the bark of the tree in the month of July; and is subsequently strained and purified. It has a fragrant odour, a moderately warm taste, devoid of acrimony or bitterness, and a white or very pale yellow colour; it is about as consistent as thick honey, is clear, transparent, and tenacious. From its comparative high price, Chian turpentine is seldom procured genuine, being for the most part adulterated either with Venetian or common turpentine. The different species of turpentine may be dissolved in rectified spirit, or pure alcohol; and, by distillation, they all give similar oils, which, from their being distilled (and not from any resemblance to alcohol, or spirits properly so called), are vulgarly termed spirit of turpentine. If the distillation be performed with water, the produce is an essential oil, the common spirit of turpentine; and if the distillation be carried on in a *retort*, without water, the product is more volatile and pungent, — a concentrated oil, as it were, — and is called the ethereal spirit of turpentine. The residuum that is left, in both cases, is a brownish resinous mass, brittle, capable of being melted, highly inflammable, insoluble in water, but mixing freely with oils: it is the common rosin of commerce. — (*Lib. of Entert. Knowledge, Vegetable Substances*; *Thomson's Dispensatory*.)

The entries of turpentine for home consumption in 1841 and 1842 amounted, at an average, to 365,566 cwt. a year. It is entirely imported from the U. States.

**TURPENTINE, OIL OF** (Ger. *Turpentinöl*; Fr. *Eau de résac, Huile de térébenthine*; It. *Acqua di resac*; Sp. *Aguarras*), the essential oil drawn from turpentine by distillation. There are two sorts of this oil: the best, red; and the second, white. It is very extensively used by house painters, and in the manufacture of varnish, &c. The distillers have been charged with using it in the preparation of gin. Oil of turpentine is very often adulterated.

**TURQUOISE** (Ger. *Türkis*; Fr. *Turquoise*; It. *Turchina*; Sp. *Turquesa*), a precious stone in considerable estimation. Its colour, which is its principal recommendation, is a beautiful celestial blue, which migrates into pale blue, and is sometimes tinged with green. Specific gravity, 3.127. It is destitute of lustre, opaque, and does not admit of a very high polish. It is much worn in necklaces, and every part of ornamental jewellery, from the size of a pin's head to that of an almond: it contrasts beautifully with brilliants, or pearls, set in fine gold, and appears to most advantage when cut spheroidal. — (*Mawe on Diamonds*, 2d ed. p. 129.)

Real turquoise are exclusively furnished by Persia. The mines whence they are obtained are situated near Nishapore. They are the property of the Crown, and are farmed to the highest bidder. They bring a rent of from 2,000*l.* to 2,700*l.* a year. — (*Fraser's Travels on the Shores of the Caspian*, pp. 343—347.)

**TUTENAG**, the name given in commercial language to the zinc or spelter of China. — (See **ZINC**.) This commodity used to be smuggled from China (the exportation of unwrought metals from that empire being prohibited) to Hindostan, the Malay Archipelago, and neighbouring countries, to the amount, it is supposed, of about 50,000 cwt. a year. In 1820, the British free traders introduced German spelter or zinc for the first time into the Indian market. In 1826, the importation of tutenag from China into Calcutta ceased: and it has now been totally superseded throughout India by spelter. Of this latter commodity there were exported from Great Britain, in 1840, to the East India Company's territories and Ceylon, 50,585 cwt., besides the quantities furnished by Hamburg, Rotterdam, Antwerp, and other continental ports.

**TYRE**, the principal city of Phœnicia, and the most celebrated emporium of the ancient world. This famous city was situated on the S. E. coast of the Mediterranean, where the inconsiderable town of Tsour now stands, in lat. 35° 17' N., lon. 35° 14' 35" E. The trade that is at present carried on at Tsour is too trifling to deserve notice; but as this work is intended to give some account, however imperfect, of the revolutions in the channels of commercial enterprise, we may, perhaps, be excused for submitting a few statements with respect to the commerce carried on by so renowned a people as the Tyrians.

Tyre was founded by a colony from Sidon, the most ancient of the Phœnician cities. The date of this event is not certainly known, but Larcher supposes it to have been 1,690 years before the Christian era. — (*Chronologie d'Hérodote*, cap. ii. p. 131.) It is singular, that while Homer mentions Sidon, he takes no notice of Tyre, whose glory speedily eclipsed that of the mother city; but this is no conclusive proof that the latter was not then a considerable emporium. The prophets Isaiah, Jeremiah, and Ezekiel, who flourished from 700 to 600 years before Christ, represent Tyre as a city of unrivalled wealth, whose "merchants were princes, and her traffickers the honourable of the earth." Originally, the city was built on the main land: but having been besieged for a lengthened period by the Babylonian monarch Nebuchadnezzar, the inhabitants conveyed themselves and their goods to an island at a little distance, where a new city was founded, which enjoyed an increased degree of celebrity and commercial prosperity. The old city was, on that account, entitled Palætyre, and the other simply Tyre. The new city continued to flourish, extending its colonies and its commerce on all sides, till it was attacked by Alexander the Great. The resistance made by the Tyrians to that conqueror showed that they had not been enervated by luxury, and that their martial virtues were nowise inferior to their commercial skill and enterprise. The overthrow of the Persian empire was effected with less difficulty than the capture of this single city. The victor had not magnanimity to treat the vanquished as their heroic conduct deserved. In despite, however, of the cruelties inflicted on the city, she rose again to considerable eminence. But the foundation of Alexandria, by diverting the commerce that had formerly centered at Tyre into a new channel, gave her an irreparable blow; and she gradually declined till, consistently with the denunciation of the prophet, her palaces have been levelled with the dust, and she has become "a place for the spreading of nets in the midst of the sea."

*Commerce, Colonies, &c. of Tyre.* — Phœnicia was one of the smallest countries of antiquity. It occupied that part of the Syrian coast which stretches from Aradus (the modern Roud) on the north, to a little below Tyre on the south, a distance of about 50 leagues. Its breadth was much less considerable, being for the most part bounded by Mount Libanus to the east, and Mount Carmel on the south. The surface of this narrow tract was generally rugged and mountainous; and the soil in the valleys, though moderately fertile, did not afford sufficient supplies of food to feed the population. Libanus and its dependent ridges were, however, covered with timber suitable for ship building; and besides Tyre and Sidon, Phœnicia possessed the ports of Tripoli, Byblos, Berytus, &c. In this situation, occupying a country unable to supply them with sufficient quantities of corn, hemmed in by mountains, and by powerful and warlike neighbours, on the one hand, and having, on the other, the wide expanse of the Mediterranean, studded with islands, and surrounded by fertile countries, to invite the

enterprise of her citizens, they were naturally led to engage in maritime and commercial adventures; and became the boldest and most experienced mariners, and the greatest discoverers, of ancient times.

From the remotest antiquity, a considerable trade seems to have been carried on between the Eastern and Western worlds. The spices, drugs, precious stones, and other valuable products of Arabia and India, have always been highly esteemed in Europe, and have been exchanged for the gold and silver, the tin, wines, &c. of the latter. At the first dawn of authentic history, we find Phœnicia the principal centre of this commerce. Her inhabitants are designated in the early sacred writings by the name of Canaanites, — a term which, in the language of the East, means merchants. The products of Arabia, India, Persia, &c. were originally conveyed to her by companies of travelling merchants, or caravans; which seem to have been constituted in the same way, and to have performed exactly the same part in the commerce of the East, in the days of Jacob, that they do at present. — (*Gen.* xxxvii. 25, &c.) At a later period, however, in the reigns of David and Solomon, the Phœnicians, having formed an alliance with the Hebrews, acquired the ports of Elath and Ezion-geber, at the north-east extremity of the Red Sea. Here they fitted out fleets, which traded with the ports on that sea, and probably with those of southern Arabia, the west coast of India, and Ethiopia. The ships are said to have visited Ophir; and a great deal of erudition has been expended in attempting to determine the exact situation of that emporium or country. We agree, however, with Heeren, in thinking that it was not the name of any particular place; but that it was a sort of general designation given to the coasts of Arabia, India, and Africa, bordering on the Indian Ocean; somewhat in the same loose way as we now use the terms East and West India. — (See the chapter on the *Navigation and Commerce of the Phœnicians*, in the translation of Heeren's work.)

The distance of the Red Sea from Tyre being very considerable, the conveyance of goods from the one to the other by land must have been tedious and expensive. To lessen this inconvenience, the Tyrians, shortly after they got possession of Elath and Ezion-geber, seized upon Rhinoculura, the port in the Mediterranean nearest to the Red Sea. The products of Arabia, India, &c., being carried hither by the most compendious route, were then put on board ships, and conveyed by a brief and easy voyage to Tyre. If we except the transit by Egypt, this was the shortest and most direct, and for that reason, no doubt, the cheapest, channel by which the commerce between Southern Asia and Europe could then be conducted. But it is not believed that the Phœnicians possessed any permanent footing on the Red Sea after the death of Solomon. The want of it does not, however, seem to have sensibly affected their trade; and Tyre continued, till the foundation of Alexandria, to be the grand emporium for Eastern products, with which it was abundantly supplied by caravans from Arabia, the bottom of the Persian Gulph, and from Babylon, by way of Palmyra.

The commerce of the Phœnicians with the countries bordering on the Mediterranean was still more extensive and valuable. At an early period, they established settlements in Cyprus and Rhodes. The former was a very valuable acquisition, from its proximity, the number of its ports, its fertility, and the variety of its vegetable and mineral productions. Having passed successively into Greece, Italy, and Sardinia, they proceeded to explore the southern shores of France and Spain, and the northern shores of Africa. They afterwards adventured upon the Atlantic; and were the first people whose flag was displayed beyond the pillars of Hercules.\*

Of the colonies of Tyre, Gades, now Cadiz, was one of the most ancient and important. It is supposed by M. de St. Croix to have originally been distinguished by the name of Tartessus or Tarshish, mentioned in the sacred writings. — (*De l'Etat et du Sort des Anciennes Colonies*, p. 14.) Heeren, on the other hand, contends, as in the case of Ophir, that by Tarshish is to be understood the whole southern part of Spain, which was early occupied and settled by Phœnician colonists. — (See also *Huet, Commerce des Anciens*, cap. 8.) At all events, however, it is certain that Cadiz early became the centre of a commerce that extended all along the coasts of Europe as far as Britain, and perhaps the Baltic. There can be no doubt that by the Cassiterides, or Tin Islands, visited by the Phœnicians, are to be understood the Scilly Islands and Cornwall. — (See *Tin*.) The navigation of the Phœnicians, probably, also, extended a considerable way along the western coast of Africa; of this, however, no details have reached us.

But, of all the colonies founded by Tyre, Carthage has been by far the most celebrated. It was at first only a simple factory; but was materially increased by the arrival of a large body of colonists, forced by dissensions at home to leave their native land, about 883 years before Christ. — (*St. Croix*, p. 20.) Imbued with the enterprising mercantile spirit of their ancestors, the Carthaginians rose, in no very long period, to the highest eminence as a naval and commercial state. The settlements founded by the Phœnicians in Africa, Spain, Sicily, &c. gradually fell into their hands; and after

\* Mons Calpe and Mons Abyla, the Gibraltar and Ceuta of modern times.

the destruction of Tyre by Alexander, Carthage engrossed a large share of the commerce of which it had previously been the centre. The subsequent history of Carthage, and the misfortunes by which she was overwhelmed, are well known. We shall only, therefore, observe, that commerce, instead of being, as some shallow theorists have imagined, the cause of her decline, was the real source of her power and greatness; the means by which she was enabled to wage a lengthened, doubtful, and desperate contest with Rome herself for the empire of the world.

The commerce and navigation of Tyre probably attained their maximum from 650 to 550 years before Christ. At that period the Tyrians were the factors and merchants of the civilised world; and they enjoyed an undisputed pre-eminence in maritime affairs. The prophet Ezekiel (chap. xxvii.) has described in magnificent terms the glory of Tyre; and has enumerated several of the most valuable productions found in her markets, and the countries whence they were brought. The fir trees of Senir (Hermon), the cedars of Lebanon, the oaks of Bashan (the country to the east of Galilee), the ivory of the Indies, the fine linen of Egypt, and the purple and hyacinth of the isles of Elishah (Peloponnesus), are specified among the articles used for her ships. The inhabitants of Sidon, Arrad (Aradus), Gebel (Byblos), served her as mariners and carpenters. Gold, silver, lead, tin, iron, and vessels of brass; slaves, horses, mules, sheep, and goats; pearls, precious stones, and coral; wheat, balm, honey, oil, spices, and gums; wine, wool, and silk; are mentioned as being brought into the port of Tyre by sea, or to its markets by land, from Syria, Arabia, Damascus, Greece, Tarshish, and other places, the exact site of which it is difficult to determine.\*

Such, according to the inspired writer, was Tyre, the "Queen of the waters" before she was besieged by Nebuchadnezzar. But, as has been already remarked, the result of that siege did not affect her trade, which was as successfully and advantageously carried on from the new city as from the old. Inasmuch, however, as Carthage soon after began to rival her as a maritime and mercantile state, this may, perhaps, be considered as the era of her greatest celebrity.

It would not be easy to over-rate the beneficial influence of that extensive commerce from which the Phœnicians derived such immense wealth. It inspired the people with whom they traded with new wants and desires, at the same time that it gave them the means of gratifying them. It everywhere gave fresh life to industry, and a new and powerful stimulus to invention. The rude uncivilised inhabitants of Greece, Spain, and Northern Africa acquired some knowledge of the arts and sciences practised by the Phœnicians; and the advantages of which they were found to be productive secured their gradual though slow advancement.

Nor were the Phœnicians celebrated only for their wealth, and the extent of their commerce and navigation. Their fame, and their right to be classed amongst those who have conferred the greatest benefits on mankind, rest on a still more unassailable foundation. Antiquity is unanimous in ascribing to them the invention and practice of all those arts, sciences, and contrivances that facilitate the prosecution of commercial undertakings. They are held to be the inventors of arithmetic, weights and measures, of money, of the art of keeping accounts, and, in short, of every thing that belongs to the business of a counting-house. They were also famous for the invention of ship building and navigation; for the discovery of glass—(See GLASS); for their manufactures of fine linen and tapestry; for their skill in architecture, and in the art of working metals and ivory; and still more for the incomparable splendour and beauty of their purple dye.—(See the learned and invaluable work of the President de Guénet, *Sur L'Origine des Loix*, &c. Eng. trans. vol. i. p. 296., and vol. ii. pp. 95—100.; see also the chapter of Heeren on the *Manufactures and Land Commerce of the Phœnicians*.)

But the invention and dissemination of these highly useful arts form but a part of what the people of Europe owe to the Phœnicians. It is not possible to say in what degree the religion of the Greeks was borrowed from theirs; but that it was to a pretty large extent seems abundantly certain. Hercules, under the name of Melcarthus, was the tutelary deity of Tyre; and his expeditions along the shores of the Mediterranean, and to the straits connecting it with the ocean, seem to be merely a poetical representation of the progress of the Phœnician navigators, who introduced arts and civilisation, and established the worship of Hercules, wherever they went. The temple erected in honour of the god at Gades was long regarded with peculiar veneration.

The Greeks were, however, indebted to the Phœnicians, not merely for the rudiments of civilisation, but for the great instrument of its future progress—the gift of letters. No fact in ancient history is better established than that a knowledge of alpha-

\* There is, in Dr. Vincent's *Commerce and Navigation of the Ancients in the Indian Ocean* (vol. ii. pp. 634—652.), an elaborate and (like the other parts of that work) prolix commentary on this chapter of Ezekiel, in which most of the names of the things and places mentioned are satisfactorily explained.—(See also Heeren on the *Phœnicians*, cap. iv.)

betic writing was first carried to Greece by Phœnician adventurers: and it may be safely affirmed, that this was the greatest boon any people ever received at the hands of another.

Before quitting this subject, we may briefly advert to the statement of Herodotus with respect to the circumnavigation of Africa by Phœnician sailors. The venerable father of history mentions, that a fleet fitted out by Necho king of Egypt, but manned and commanded by Phœnicians, took its departure from a port on the Red Sea, at an epoch which is believed to correspond with the year 604 before the Christian era, and that, keeping always to the right, they doubled the southern promontory of Africa; and returned, after a voyage of 3 years, to Egypt, by the Pillars of Hercules. — (*Herod. lib. iv. § 42.*) Herodotus further mentions, that they related that, in sailing round Africa, they had the sun on their right hand, or to the north, — a circumstance which he frankly acknowledges seemed incredible to him, but which, as every one is now aware, must have been the case if the voyage was actually performed.

Many learned and able writers, and particularly Gosselin (*Recherches sur la Géographie Systématique et Positive des Anciens*, tome i. pp. 204—217.), have treated this account as fabulous. But the objections of Gosselin have been successfully answered in an elaborate note by Lereher (*Hérodote*, tome iii. pp. 458—464. ed. 1802.; and Major Rennell has sufficiently demonstrated the practicability of the voyage (*Geography of Herodotus*, p. 682, &c.). Without entering upon this discussion, we may observe, that not one of those who question the authenticity of the account given by Herodotus, presumes to doubt that the Phœnicians braved the boisterous seas on the coasts of Spain, Gaul, and Britain; and that they had, partially at least, explored the Indian Ocean. But the ships and seamen that did this much, might, undoubtedly, under favourable circumstances, double the Cape of Good Hope. The relation of Herodotus has, besides, such an appearance of good faith; and the circumstance, which he doubts, of the navigators having the sun on the right, affords so strong a confirmation of its truth; that there really seems no reasonable ground for doubting that the Phœnicians preceded, by 2,000 years, Vasco da Gama in his perilous enterprise.

*Present State of Syria.* — The principal modern ports on the coast of Syria are Alexandretta, Latakia, Tripoli, Beyrout, Seyde, and Acre. The commerce which they carry on is but inconsiderable. This, however, is not owing to the badness of the ports, the unsuitableness of the country, or to any natural cause, but wholly to long continued oppression and misgovernment. There is a passage in the dedication to Sandys' *Travels*, that describes the state of Syria, Asia Minor, Egypt, &c. about two centuries ago, with a force and eloquence which it is not very likely will soon be surpassed: —

“Those countries, once so glorious and famous for their happy estate, are now, through vice and ingratitude, become the most deplored spectacles of extreme misery; the wild beasts of mankind having broken in upon them and rooted out all civilitie, and the pride of a sterner and barbarous tyrant possessing the thrones of ancient and just dominion; who, aiming only at the height of greatness and sensualitie, hath in tract of time reduced so great and goodly a part of the world, to that lamentable distresse and servitude under which (to the astonishment of the understanding beholders) it now faints and groaneth. Those rich lands at this present remain waste and overgrown with bushes, receptacles of wild beasts, of thieves and murderers; large territories dispeopled or thinly inhabited; goodly cities made desolate; sumptuous buildings become ruines; glorious temples either subverted, or prostituted to impietie; true religion discountenanced and oppressed; all nobilitie extinguished; no light of learning permitted, nor vertue cherished: violence and rapine insulting over all, and leaving no securitie save to an abject mind and unlookt on povertie.”

Those who compare this beautiful passage with the authentic statements of Volney — incomparably the best of the modern travellers who have visited the countries referred to — will find that it continues to be as accurate as it is eloquent.

## U. V.

**VALONIA**, a species of acorn, forming a very considerable article of export from the Morea and the Levant. The more substance there is in the husk, or cup of the acorn, the better. It is of a bright drab colour, which it preserves so long as it is kept dry: any dampness injures it; as it then turns black, and loses both its strength and value. It is principally used by tanners, and is always in demand. Though a very bulky article, it is uniformly bought and sold by weight. A ship can only take a small proportion of her registered tonnage of valonia, so that its freight per ton is always high.

Of 163,983 cwts. of valonia imported in 1840, 143,095 cwts. were brought from Turkey, 15,195 cwts. from Italy, and the residue from Greece and the Ionian islands. The entries for home consumption amounted, during the 3 years ending with 1842, to about 8,200 tons, or 164,000 cwt. a year. The duty was reduced in 1842 from 20s. to 5s. a ton. The price of valonia in the London market in 1843 varied from 18s. to 22s. a ton.

VALPARAISO, the principal sea-port of Chili, in lat.  $33^{\circ} 1' 48''$  S., lon.  $71^{\circ} 31' 8''$  W. Population perhaps 10,000 or 12,000. The water in the bay is deep, and it affords a secure anchorage, except during northerly gales, to the violence of which it is exposed; but as the holding ground is good, and the pull of the anchor against a steep hill, accidents seldom occur to ships properly found in anchors and cables. There is no mole or jetty; but the water close to the shore is so deep, that it is customary for the smaller class of vessels to carry out an anchor to the northward, and to moor the ship with the stern ashore by another cable made fast to the shore. Large ships lie a little further off, and load and unload by means of lighters. The best shelter is in that part called the Fisherman's Bay, lying between the castle and fort St. Antonio, where, close to a clear shingle beach, there is 9 fathoms water. In the very worst weather, a landing may be effected in this part of the bay. — (See *Miers's Chili and La Plata*, i. 440., where there is a plan of Valparaiso.) The harbours of Valdivia and Concepcion are much superior to that of Valparaiso; the former being, indeed, not only the best in Chili, but second to few in any part of the world. But Valparaiso, being near the capital, Santiago, and being the central *dépôt*, for the resources of the province, is most frequented. The town is inconveniently situated, at the extremity of a mountainous ridge; most of the houses being built either upon its acclivity or in its breaches. Large quantities of corn and other articles of provision are shipped here for Callao and Panama, but principally for the former. Exclusive of wheat, the principal articles of export are tallow and hides, copper, the precious metals, indigo, wool, sarsaparilla, &c. It appears from the accounts laid before the reader in another article — (see *anté*, p. 1003.) — that the productiveness of the Chili mines has materially increased during the last few years, and that the average produce of those of gold and silver may now be taken at about 2,500,000 dol. or 500,000*l.* a year. There is a great want of capital in the country; and the anarchy and insecurity that have prevailed since the commencement of the revolutionary war have been very unfavourable to all sorts of industry. There can, however, be no doubt that Chili has already gained considerably, and that she will every day gain more, by her emancipation from the yoke of Old Spain. Our exports to this distant country amount to above 1,000,000*l.* a year; and the probability is that they will become still more extensive.

A country with a scanty population which imports so largely cannot be in the wretched condition that Mr. Miers and other disappointed travellers would have us to believe. The candour and good sense of M. de la Perouse are above all question; and every one who compares his remarks on the condition of Chili with what has now been stated, must see that its commerce, at least, has gained prodigiously by the revolution.

“The influence of the government is in constant opposition to that of the climate. The system of prohibition exists at Chili in its fullest extent. This kingdom, of which the productions would, if increased to their maximum, supply all Europe; whose wool would be sufficient for the manufactures of France and England; and whose herds, converted into salt provisions, would produce a vast revenue; — this kingdom, alas! has no commerce. Four or five small vessels bring, every year, from Lima, tobacco, sugar, and some articles of European manufacture, which the miserable inhabitants can obtain only at second or third hand, after they have been charged with heavy customs duties at Cadiz, at Lima, and lastly, at their arrival in Chili; in exchange they give their tallow, hides, some deals, and their wheat, which, however, is at so low a price, that the cultivator has no inducement to extend his tillage. Thus Chili, with all its gold, and articles of exchange, can scarcely procure sugars, tobacco, stuffs, linens, cambrics, and hardware, necessary to the ordinary wants of life.” — (*Perouse's Voyage*, vol. i. p. 50. Eng. ed.)

Instead, however, of 4 or 5 small ships from Lima, in 1842, no fewer than 214 British ships, of the burden of 61,535 tons, entered Valparaiso only, exclusive of those at the other ports, and exclusive also of a great number of American, French, and other ships. All sorts of European goods are carried direct to Chili, and are admitted at reasonable duties. The advantages resulting from this extensive intercourse with foreigners, and from the settlement of English adventurers in the country, have been already immense, and will every day become more visible. It was impossible, considering the ignorance of the mass of the people, that the old system of tyranny and superstition could be pulled to pieces without a good deal of violence and mischief; but the foundations of a better order of things have been laid; nor can there be a doubt that Chili is destined to become an opulent and a flourishing country.

*Monies, Weights, and Measures* of Chili are the same as those of Spain; for which, see *CABER*. The quintal of 4 arrobas, or 100 lbs. = 101.44 lbs. avoirdupois. The fanega, or principal corn measure, contains 3,439 English cubic inches, and is therefore = 1.599 Winch. bushels. Hence 5 fanegas = 1 Winch. quarter very nearly. The vara, or measure of length, = 33.384 Eng. inches.

Gross Return of British and Foreign Trade at the Port of Valparaiso in Chili during the Year ending 31st December, 1842.

VAN DIEMEN'S LAND, or TASMANIA, a large island belonging to Great Britain, forming part of Australia, lying between  $41^{\circ} 20'$  and  $43^{\circ} 30'$  S. lat., and  $144^{\circ} 40'$  and  $148^{\circ} 20'$  W. lon. It is supposed to contain about 27,000 square miles. — (See the *Mercator's Chart* prefixed to this work.)

This land was discovered by the Dutch navigator Tasman, in 1642, and was named in honour of Anthony Van Diemen, at that time governor-general of the Dutch possessions in the East Indies; but it is now frequently called Tasmania, from its discoverer. Previously to 1798, it was supposed to form part of New Holland, but it was then ascertained to be an island. It was taken possession of by the British in 1803; and in 1804 Hobart Town, the capital, was founded.

The surface is generally hilly and mountainous; but, though none of the land be of the first quality, there are several moderately fertile plains, and a good deal of the hilly ground is susceptible of being cultivated. On the whole, however, it is not supposed that more than about a third part of the entire surface of the island can be considered arable: but about a third more may be advantageously used as sheep pasture. As compared with New Holland, it is well watered. The climate, though variable, is, generally speaking, good, and suitable for European constitutions; and it is not exposed to the tremendous droughts that occasion so much mischief in New South Wales. Wheat is raised in considerable quantities. Wool, however, is at present the staple produce of the colony.

Van Diemen's Land, like New South Wales, was originally intended to serve as a penal colony, and convicts are still sent to it; latterly, however, it has received a very considerable number of free settlers. In 1841, the total population of the island, exclusive of aborigines, was as follows: —

	Free.		Convicts.
Males - - - - -	19,362	Males - - - - -	14,116
Females - - - - -	14,463	Females - - - - -	2,275
Military - - - - -	991		16,391
Females - - - - -	243		
<u>35,059</u>		<u>Grand total - - - - -</u>	<u>31,450</u>

The prosperity of the colony was formerly a good deal retarded by the enormities committed by a banditti of runaway convicts, known by the name of bush-rangers; and more recently by the hostilities of the natives. Vigorous measures were, however, adopted for the suppression of such outrages, by confining the natives within a limited district; and these, we are glad to say, appear to have been effectual for their object.

Hobart Town is situated in the southern part of the island, on the west side of the river Derwent, near its junction with Storm Bay, in lat.  $42^{\circ} 54'$  S., lon.  $147^{\circ} 28'$  E. The water is deep, and the anchorage good. A jetty has been constructed, accessible to the largest ships. The situation appears to have been very well chosen; and the town has been judiciously laid out. In 1838, the district of Hobart Town contained 14,382 inhabitants, of whom 3,553 were convicts. The houses are supposed to be worth, at an average, 50*l.* a year. There are several printing establishments in the town, and various newspapers, some of them very well conducted. There is also a Book Society, a Mechanics' Institute, and several respectable schools and academies. The Van Diemen's Land Banking Company, the Derwent Bank, and the Commercial Bank, have each offices in Hobart Town. They are joint stock companies.

Launceston, the second town in the island, is situated in the northern part, at the head

of the navigable river Tanaar, which falls into Port Dalrymple. Its population may amount to about 10,000. It has a considerable trade with Sydney and Hobart Town, and with England.

*Trade of Van Diemen's Land.* — Hardware, haberdashery, apparel, cotton and linen goods, woollens, malt liquor, spirits, wine, &c. form the principal articles of import.

Here, as in New South Wales, wool forms by far the most important article of export; next to it is whale oil, and then follows wheat and flour, live stock, timber, whalebone, mimosa bark, and various less important articles. The usual excess of the imports over the exports is accounted for here, as at Sydney, by the remittances to defray the cost of the convict establishment.

The increase in the production of wool has been quite as rapid here as in N. S. Wales. The stock of sheep, which in 1836 amounted to 553,698 head, had, in 1838, increased to 1,214,000 head; and while the imports of wool from Van Diemen's Land into the U. Kingdom in 1830 did not exceed 958,975 lbs., they amounted in 1842 to 3,491,685 lbs. Lately, however, this colony has been involved in the same distress and difficulty that have occasioned such severe suffering in New South Wales. Owing to a variety of circumstances, of which the most important, perhaps, was the increase of the issues of bank paper and the facility of obtaining discounts, the prices of most descriptions of insular property increased rapidly down to 1836, and a mania for speculative purchases became all but universal. Land which in 1834 would not have realised more than from 8s. to 10s. an acre, was, in 1836, eagerly bought up at prices ranging from 40s. to 80s.; and sheep and cattle, which in the former year might have been purchased respectively for 5s. and 40s., could not in the latter for less than 2s. and 12s. But lately, all this baseless fabric has fallen to pieces; and the prices of most articles have reverted to the level of 1834, or even lower, occasioning, by their fall, the ruin of a vast number of persons. The sale of crown lands has almost entirely ceased; and the prices of lands belonging to private parties are little better than nominal. But, though severe, in the meantime, a crisis of this sort affects no real source of wealth, and cannot, therefore, be of long duration. But the lesson it affords should not be thrown away; and the colonists would do well to remember that a rapid rise of prices and great facilities of obtaining discounts, how desirable soever in the meantime, are the sure precursors of glutted and falling markets, bankruptcy, and ruin. The upset price of land in this colony is fixed at the same extravagant rate as in New South Wales; and has had, and no doubt will continue to have, the same pernicious consequences.

#### CUSTOM-HOUSE REGULATIONS, RATES OF PILOTAGE, HARBOUR DUES, &c.

To the chief clerk, on the registry of vessels	0 10 0
On inordining change of master	0 10 0

**Warehouse Rent and Charges.** — A government order published the 7th of February, 1826, fixes the following rents on spirits and tobacco, in the king's bonded stores, viz. —  
1st. All spirituous liquors, 1s. 3d. per per of 224 gallons, for every week, or any period less than a week, during which the same shall be deposited.

2dly. Tobacco, 6d. per ton for every week, or any period less than a week, during which the same shall be deposited.

3dly. The amount of all such warehouse rent, in respect of any cask or package required to be delivered, must be paid before the same can be so delivered.

4thly. No allowance whatsoever will at any time be made, in respect of, nor will the government be answerable for, any loss by fire, leakage, robbery, or casualty of any kind.

**Government Order, 25th of February, 1829.** — Representations having been made to the lieutenant governor, of the inconvenience and delay attending the stowing and unstowing of goods in the bonded warehouses, a gang of men has been appointed to be employed under a storekeeper for this purpose exclusively, and the following scale of charges will be required to be paid: —

**For Spirits.** — Per pipe,  $\frac{1}{2}$  pipe, or pouncebox, each stowing 3d., unstowing 1d. 6d.  
Per  $\frac{1}{2}$  pipe, hogshead, or barrel, stowing 6d., unstowing 2s.  
Per case containing 3 or more dozen bottles, stowing 3d., unstowing 6d.  
Per case containing a less quantity than 3 dozen, stowing 2d., unstowing 3d.

**For Tobacco.** — In large serons, each, stowing 6d., unstowing 3d.  
In cases, each, stowing 3d., unstowing 6d.  
In kegs, each, stowing 2d., unstowing 3d.  
In baskets, rolls, or small serons, stowing 1d., unstowing 1d.

In consequence of this arrangement, it is to be understood that no labourers are to be admitted into or employed at the bonded warehouses, except the storekeeper's gang.  
Goods intended to be warehoused under bond must be landed before 12 o'clock.

Hours of attendance at the Custom-house quay, from 8 o'clock till 4 from the 1st of September to the 30th of April, and from 9 till 4 from the 1st of May till the 31st of August.

The appointed days for opening the bonded warehouse for the delivery of goods are Mondays and Thursdays in every

week, at 1 o'clock, on which days the duties must be paid prior to 9 o'clock. Tobacco is landed on the same days, from 10 to 12 o'clock.

**Rates of Pilotage at the Derwent.**

Drum of water.	Into.	Out.
10 feet and under	£ s. d.	£ s. d.

**At Port Dalrymple.**

Proceeding above Whirlpool Reach.	£ s. d.
7 feet and under	0 2 6
Above 7 feet per foot	0 6 4

If the pilot does not board the vessel outside the middle ground at the Heads at George Town, or, the weather not permitting his going outside, if he be not ready to show the channel by keeping his boat in the fair way until the ship can be boarded, he shall forfeit half the pilotage inwards.

For every number of inches below 6, no charge is to be made; for  $\frac{1}{2}$  a foot and upwards, 1 foot is to be charged.

Colonial vessels are exempted from the payment of pilotage, unless the master shall make the signal for a pilot and accept his service.

**Harbour Dues at the Derwent.**

For mooring and unmooring a vessel within the harbour, per register ton	£ s. d.
For each removal of the ship within the harbour, per register ton	0 0 1
Colonial vessels under 80 tons per register to be exempted from the payment of the foregoing dues, unless the services of the harbour master be specifically required.	0 0 1

**At Port Dalrymple.**

For each removal of a ship or vessel from anchorage or mooring, to other anchorage or mooring:	£ s. d.
under 200 tons	0 15 0
200 tons and under 300	1 0 0
300 tons and under 400	1 10 0
400 tons and under 500	2 0 0
500 tons and upwards	2 10 0

Each vessel entering the harbour will be charged with 5 removals.

Vessels belonging to the port are not to pay harbour dues. No vessels to be deemed colonial that are not registered in Van Diemen's Land.

These details have been principally derived from the *Statistics of the Colony*, published at Hobart Town in 1843; and partly from Lieut. Breton's book, and different *Parliamentary Papers*.

**VANILLA**, the fruit of the *Epidendrum Vanilla*, a species of vine extensively cultivated in Mexico. It has a trailing stem, not unlike the common ivy, but not so woody, which attaches itself to any tree that grows near it. The Indians propagate it by planting cuttings at the foot of trees selected for that purpose. It rises to the height of 18 or 20 feet; the flowers are of a greenish yellow colour, mixed with white; the fruit is about 8 or 10 inches long, of a yellow colour when gathered, but dark brown or black when imported into Europe; it is wrinkled on the outside, and full of a vast number of seeds like grains of sand, having, when properly prepared, a peculiar and delicious fragrance. It is principally used for mixing with and perfuming chocolate; and is, on that account, largely imported into Spain; but as chocolate, owing to oppressive duties, is little used in England, vanilla is not much known in this country.

Vanilla is principally gathered in the intendency of Vera Cruz, in Mexico, at Misantla, Colipa, Vacuatla, and other places. It is collected by the Indians, who sell it to the whites (*gente de razon*), who prepare it for market. They spread it to dry in the sun for some hours, then wrap it in woollen cloths to sweat. Like pepper, it changes its colour in this operation — becoming almost black. It is finally dried by exposing it to the sun for a day. There are four varieties of vanilla, all differing in price and excellence; viz. the *vanilla fina*, the *zacate*, the *rezacate*, and the *vasura*. The best comes from the forests surrounding the village of Zentila, in the intendency of Oaxaca. According to Humboldt, the mean exportation of vanilla from Vera Cruz may amount to from 900 to 1,000 millares, worth at Vera Cruz from 30,000 to 40,000 dollars. — Vanilla is also imported from Brazil, but it is very inferior. The finest Mexican vanilla is extremely high priced. All sorts are subjected in this country to a duty of 5s. per lb. — (See *Humboldt, Nouvelle Espagne*, 2d edit. tome iii. pp. 37. 46.; *Poinsett's Notes on Mexico*, p. 194. &c.)

**VELLUM**, a species of fine parchment. (See **PARCHMENT**.)

**VENICE**, a famous city of Austrian Italy, formerly the capital of the republic of that name, on a cluster of small islands towards the northern extremity of the Adriatic, in lat 45° 25' 53" N., lon. 12° 20' 31" E. Population about 100,000. The commerce of Venice, once the most extensive of any European city, is now comparatively trifling; and the population is gradually diminishing both in numbers and wealth

Her imports consist of wheat and other sorts of grain, from the adjoining provinces of Lombardy and the Black Sea; olive oil, principally from the Ionian Islands; cotton stuffs and hardware from England; sugar, coffee, and other colonial products from England, the United States, Brasil, &c.; dried fish, dye stuffs, &c. The exports principally consist of grain, raw and wrought silk, paper, woollen manufactures, fruits, cheese, &c., the products of the adjoining provinces of Italy, and of her own industry; but her manufactures, so famous in the middle ages, are now much decayed.

**Port.** — The islands on which Venice is built lie within a line of long, low, narrow islands, running N. and S., and enclosing what is termed the lagoon, or shallows, that surround the city, and separate it from the main land. The principal entrance from the sea to the lagoon is at Malamocco, about 1½ league S. from the city; but there are other, though less frequented, entrances, both to the S. and the N. of this one. There is a bar outside Malamocco, on which there are not more than 10 feet at high water at spring tides; but there is a channel between the western point of the bar and the village of San Pietro, which has 16 feet water at springs, and 14 at neaps. Merchant vessels usually moor off the ducal palace; but sometimes they come into the grand canal which intersects the city, and sometimes they moor in the wider channel of the Giudecca. Vessels coming from the south for the most part make Pirano or Rovigno on the coast of Istria, where they take on board pilots, who carry them to the bar opposite to Malamocco. But the employment of Istrian pilots is quite optional with the master, and is not, as is sometimes represented, a compulsory regulation. When one is taken, the usual fee from Pirano or Rovigno to the bar is 50 Austrian dollars, or about 4*l*. On arriving at the bar, ships are conducted across it and into port by pilots, whose duty it is to meet them outside, or on the bar, and of whose services they must avail themselves. — (For the charges on account of pilotage, see *post*.)

**Money.** — Formerly there were various methods of accounting here; but now accounts are kept, as at Genoa, in lire italiane, divided into centesimi, or 100th parts. The lira is supposed to be of the same weight, fineness, and, consequently, value as the franc. But the coins *actually in circulation*, denominated lire, are respectively equal in sterling value to about 5*d*. and 4½*d*. The latter are coined by the Austrian government.

**Weights and Measures.** — The commercial weights are here, as at Genoa, of two sorts; the *peso sottile* and the *peso grosso*. The French kilogramme, called the *libra italiana*, is also sometimes introduced.

100 lbs. peso grosso =	105·186 lbs. avoirdupois.	100 lbs. peso sottile =	66·428 lbs. avoirdupois.
—	127·830 lbs. Troy.	—	80·728 lbs. Troy.
—	47·698 kilogrammes.	—	30·133 kilogrammes.
—	98·485 lbs. of Hamburg.	—	62·196 lbs. of Hamburg.
—	96·569 lbs. of Amsterdam.	—	60·986 lbs. of Amsterdam.

The moggio, or measure for corn, is divided into 4 staja, 16 quarte, or 64 quartaroli. The staja = 2·27 Winchester bushels.

The measure for wine, anfora = 4 bigonzi, or 8 mastelli, or 48 sechil, or 193 bozze, or 768 quartucci. It contains 127 English wine gallons.

The botta = 5 bigonzi. Oil is sold by weight or measure. The botta contains 2 migliaje, or 90 miri of 25 lbs. peso grosso. The miro = 4·028 English wine gallons.

The braccio, or long measure, for woollen = 26·6 English inches; the braccio for silks = 24·3 *do*. The foot of Venice = 13·68 English inches. — (*Nelkenbrecher*, and *Kelly*.)

**Historical Notice.** — Venice was the earliest, and for a lengthened period the most considerable, commercial city of modern Europe. Her origin dates from the invasion of Italy by Attila in 452. A number of the inhabitants of Aquileia, and the neighbouring territory, flying from the ravages of the barbarians, found a poor but secure asylum in the cluster of small islands opposite the mouth of the Brenta, near the head of the Adriatic Gulph. In this situation they were forced to cultivate commerce and its subsidiary arts, as the only means by which they could maintain themselves. At a very early period they began to trade with Constantinople and the Levant; and notwithstanding the competition of the Genoese and Pisans, they continued to engross the principal trade in Eastern products, till the discovery of a route to India by the Cape of Good Hope turned this traffic into a totally new channel. The crusades contributed to increase the wealth and to extend the commerce and the possessions of Venice. Towards the middle of the 15th century, when the Turkish sultan, Mahomet II., entered Constantinople sword in hand, and placed himself on the throne of Constantine and Justinian, the power of the Venetians had attained its maximum. At that period, besides several extensive, populous, and well cultivated provinces in Lombardy, the republic was mistress of Crete and Cyprus, of the greater part of the Morea, and most of the isles in the Egean Sea. She had secured a chain of forts and factories that extended along the coasts of Greece from the Morea to Dalmatia; while she monopolised almost the whole foreign trade of Egypt. The preservation of this monopoly, of the absolute dominion she had early usurped over the Adriatic, and of the dependence of her colonies and distant establishments, were amongst the principal objects of the Venetian government; and the measures it adopted in that view were skillfully devised, and prosecuted with inflexible constancy. With the single exception of Rome, Venice, in the 15th century, was by far the richest and most magnificent of European cities; and her singular situation in the midst of the sea, on which she seems to float, contributed to impress those who visited her with still higher notions of her wealth and grandeur. Sannazarius is not the only one who has preferred Venice to the ancient capital of the world; but none have so beautifully expressed their preference.

Viderat Adriacis Venetam Neptunus in undis,  
Stare urbem. et toto ponere jura mari.  
Nunc mihi Tarpeias quantumvis, Jupiter, arces  
Oblyce, et illa tua nicenia Martia, ait:  
Si Tibicim pelago praeferas, urbem aspice ntramque,  
Ilam homines dicas, hanc posuisse Deos.

Though justly regarded as one of the principal bulwarks of Christendom against the Turks, Venice had to contend, in the early part of the 16th century, against a combination of the European powers. The famous league of Cambray, of which Pope Julius II. was the real author, was formed for the avowed purpose of effecting the entire subjugation of the Venetians, and the partition of their territories. The emperor and the kings of France and Spain joined this powerful confederacy. But, owing less to the valour of the Venetians, than to dissensions amongst their enemies, the league was speedily dissolved without materially weakening the power of the republic. From that period the policy of Venice was comparatively pacific and cautious. But notwithstanding her efforts to keep on good terms with the Turks, the latter invaded Cyprus in 1570; and conquered it, after a gallant resistance, continued for 11 years. The Venetians had the principal share in the decisive victory gained over the Turks at Lepanto in 1571: but owing to the discordant views of the confederates, it was not properly followed up, and could not prevent the fall of Cyprus.

The war with the Turks in Candia commenced in 1645, and continued till 1670. The Venetians exerted all their energies in defence of this valuable island; and its acquisition cost the Turks above 200,000 men. The loss of Candia, and the rapid decline of the commerce of the republic, now almost wholly turned into other channels, reduced Venice, at the close of the 17th century, to a state of great exhaustion. She may be said, indeed, to have owed the last 100 years of her existence more to the forbearance and jealousies of others than to any strength of her own. Nothing, however, could avert that fate she had seen overwhelm so many once powerful states. In 1797, the "maiden city" submitted to the yoke of the conqueror; and the last surviving witness of antiquity — the link that united the ancient to the modern world — stripped of independence, of commerce, and of wealth, is now slowly sinking into the waves whence she arose.

The foundation of Venice is described by Gibbon, c. 35.; and in his 60th chapter he has eloquently depicted her prosperity in the year 1200. Mr. Hallam, in his work on the *Middle Ages* (vol. i. pp. 470—487.), has given a brief account of the changes of the Venetian government. Her history occupies a considerable space in the voluminous work of M. Sismondi on the *Italian Republics*; but his details as to her trade and commercial policy are singularly meagre and uninteresting. All previous histories of Venice have, however, been thrown into the shade by the valuable work of M. Daru (*Histoire de la République de Venise*, 2d ed. 8 vols. 8vo. Paris, 1821.) Having had access to genuine sources of information, inaccessible to all his predecessors, M. Daru's work is as superior to theirs in accuracy, as it is in most other qualities required in a history.

*Trade, Navigation, and Manufactures of the Venetians in the 15th Century.*—The Venetian ships of the largest class were denominated galleasses, and were fitted out for the double purpose of war and commerce. Some of them carried 50 pieces of cannon, and crews of 600 men. These vessels were sometimes, also, called argosers or argosies. They had early an intercourse with England; and argosies used to be common in our ports. In 1325, Edward II. entered into a commercial treaty with Venice, in which full liberty is given to the Venetians, for 10 years, to sell their merchandise in England, and to return home in safety, without being made answerable, as was the practice in those days, for the crimes or debts of other strangers. — (*Anderson's Chron. Deduction*, Anno 1325.) Sir William Monson mentions, that the last argosie that sailed from Venice for England was lost, with a rich cargo and many passengers, on the coast of the Isle of Wight, in 1587.

In the beginning of the 15th century, the annual value of the goods exported from Venice by sea, exclusive of those exported to the states adjoining her provinces in Lombardy, was estimated, by contemporary writers, at 10,000,000 ducats; the profits of the out and home voyage, including freight, being estimated at 4,000,000 ducats. At the period in question, the Venetian shipping consisted of 3,000 vessels of from 100 to 200 tons burden, carrying 17,000 sailors; 300 ships with 8,000 sailors; and 45 galleys of various size, kept afloat by the republic for the protection of her trade, &c., having 11,000 men on board. In the dock-yard, 16,000 labourers were usually employed.\* The trade to Syria and Egypt seems to have been conducted principally by ready money; for 500,000 ducats are said to have been annually exported to these countries; 100,000 were sent to England. — (*Daru*, tome ii. p. 189, &c.) The vessels of Venice visited every port of the Mediterranean, and every coast of Europe; and her maritime commerce was, probably, not much inferior to that of all the rest of Christendom. So late as 1518, 5 Venetian galleasses arrived at Antwerp, laden with spices, drugs, silks, &c. for the fair at that city.

The Venetians did not, however, confine themselves to the supply of Europe with the

\* This is the statement of the native authorities; but there can be no doubt that it is greatly exaggerated; — 1,600 would be a more reasonable number.

commodities of the East, and to the extension and improvement of navigation. They attempted new arts, and prosecuted them with vigour and success, at a period when they were entirely unknown in other European countries. The glass manufacture of Venice was the first, and for a long time the most celebrated, of any in Europe; and her manufactures of silk, cloth of gold, leather, refined sugar, &c. were deservedly esteemed. The jealousy of the government, and their intolerance of any thing like free discussion, was unfavourable to the production of great literary works. Every scholar is, however, aware of the fame which Venice early acquired by the perfection to which she carried the art of printing. The classics that issued from the Aldine presses are still universally and justly admired for their beauty and correctness. The Bank of Venice was established in the 12th century. It continued throughout a bank of deposit merely, and was skilfully conducted.

But the policy of government, though favourable to the introduction and establishment of manufactures, was fatal to their progressive advancement. The importation of foreign manufactured commodities into the territories of the republic for domestic consumption was forbidden under the severest penalties. The processes to be followed in the manufacture of most articles were regulated by law. — “*Dès l'année 1172, un tribunal avoit été créé pour la police des arts et métiers, la qualité et la quantité des matières furent soigneusement déterminées.*” — (Daru, iii. 153.) Having, in this way, little to fear from foreign competition, and being tied down to a system of routine, there was nothing left to stimulate invention and discovery; and during the last century the manufactures of Venice were chiefly remarkable as evincing the extraordinary perfection to which they had early arrived, and the absence of all recent improvements. An unexceptionable judge, M. Berthollet, employed by the French government to report on the state of the arts of Venice, observed, “*Que l'industrie des Vénitiens, comme celle des Chinois, avoit été précocée, mais étoit restée stationnaire.*” — (Daru, tome iii. p. 161.)

M. Daru has given the following extract from an article in the statutes of the State Inquisition, which strikingly displays the real character of the Venetian government, and their jealousy of foreigners: — “If any workman or artisan carry his art to a foreign country, to the prejudice of the republic, he shall be ordered to return; if he do not obey, his nearest relations shall be imprisoned, that his regard for them may induce him to come back. If he return, the past shall be forgiven, and employment shall be provided for him in Venice. If, in despite of the imprisonment of his relations, he persevere in his absence, an emissary shall be employed to despatch him; and after his death his relations shall be set at liberty!” — (Tom. iii. p. 150.)

The 19th book of M. Daru's history contains a comprehensive and well-digested account of the commerce, manufactures, and navigation of Venice. But it was not possible, in a work on the general history of the republic, to enter so fully into the details as to these subjects as their importance would have justified. The *Storia Civile e Politica del Commercio de' Veneziani*, di Carlo Antonio Marin, in 8 vols. 8vo., published at Venice at different periods, from 1798 to 1808, is unworthy of the title. It contains, indeed, a great many curious statements; but it is exceedingly prolix; and while the most unimportant and trivial subjects are frequently discussed at extreme length, many of great interest are either entirely omitted, or are treated in a very brief and unsatisfactory manner. The commercial history of Venice remains to be written; and were it well executed, it would be a most valuable acquisition.

*Present Trade and Manufactures of Venice.* — From the period when Venice came into the possession of Austria, down to 1830, it seems to have been the policy of the government to encourage Trieste in preference to Venice; and the circumstance of the former being a free port, gave her a very decided advantage over the latter. Latterly, however, a more equitable policy has prevailed. In 1830, Venice was made a free port, and has since fully participated in every privilege conferred on Trieste. But, notwithstanding this circumstance, the latter still continues to preserve the ascendancy; and the revival of trade that has taken place at Venice has not been so great as might have been anticipated. The truth is, that except in so far as she is the *entrepôt* of the adjoining provinces of Lombardy, Venice has no considerable natural advantage as a trading city; and her extraordinary prosperity during the middle ages is more to be ascribed to the comparative security enjoyed by the inhabitants, and to their success in engrossing the principal share of the commerce of the Levant, than to any other circumstance. Still, however, her trade is far from inconsiderable. But, unfortunately, there are no means by which to ascertain its precise amount. The great articles of import are sugar, coffee, and other colonial products; indigo and other dye stuffs, olive oil, salted fish, various descriptions of cotton, woollen, and other manufactured goods; wheat and other grain, from the Black Sea; tin plates and hardware, raw cotton, &c.; amounting, in all, to the value probably of 1,500,000*l.* or 1,600,000*l.* The exports principally consist of silk and silk goods, wheat and other grain, paper, jewellery, glass, and glass wares. Venetian treacle, books, with a great variety of other articles, including portions of most of those that are imported. It should, however, be observed, that by far the greater part both of the import and export trade of the city is carried on through Trieste by coasting vessels, that are every day passing between the two cities. The smuggling of prohibited and overtaxed articles into Austrian Lombardy is practised to a great extent. It is believed that fully two thirds of the coffee made use of in Lombardy is clandestinely introduced; and sugar, British cottons, and hardware, with a variety of other articles, are supplied through illegitimate channels. The facilities for smuggling, owing to the nature of the frontier, and the ease with which the officers are corrupted, are such, that the articles passing through the hands of the fair trader afford no test of the real extent of the business done. It is to be hoped that the Austrian government may take an enlightened view of this important matter. It cannot but be anxious for the suppression of smuggling; and it may be assured that this is not practicable otherwise than

by a reduction of duties. The regulations as to the payment of the duties on goods destined for the interior, the clearing of ships, &c., are the same at Venice as at Trieste; which see.

The manufactures of Venice are very various, and more extensive than is generally supposed. The glassworks, which produce magnificent mirrors, with every variety of artificial pearls and gems, coloured beads, &c., situated on the island of Murano, employ, in all, about 4,000 hands, including the women and children employed in arranging the beads. — (*Bowring*.) Jewellery, including gold chains, is also extensively produced; as are gold and silver stuffs, velvets, silks, laces, and other expensive goods; and tressle, soap, earthenware, wax-lights, &c., to a greater or less extent. Printing is more extensively carried on in this than in any other city of Italy, and books form a considerable article of export. Ship-building is also carried on to some extent, both here and at Chioggia. In 1836, the first steam-engine seen in Venice was set up for a sugar refinery.

From the circumstances of Venice being situated nearly opposite the mouths of the Brenta, which bring down large quantities of mud, the probability is that the lagoon, by which she is surrounded, will ultimately be filled up. Under the republic this was a subject of great apprehension, and every device was resorted to that seemed likely to avert a result so pregnant with danger to the independence of the city. But now that there is no particular motive for hindering the mud from accumulating in the lagoon, it is probable that, in the course of time, the shallow will be converted into terra firma, and Venice lose her insular position.

*Railway to Venice.* — But whether the lagoon should, or should not, be filled up, Venice will very speedily be connected with the mainland by artificial means. A railway is now in the course of being constructed, which is to extend from the city to Padua, and thence to Verona, &c. That part of this important work which passes through the lagoon is to be supported on arches, the construction of which is already far advanced. It may be expected that the formation of this new and easy channel of communication with some of the most fertile districts of Lombardy, will be of considerable service to Venice; and will tend, in some degree, to revive her decaying energies.

There belong to the city, exclusive of fishing-boats, about 30,000 tons of shipping, of which a large proportion is employed in the coasting trade. Many of the inhabitants depend for their subsistence on fishing in the lagoon, and the contiguous portion of the Adriatic. — (Exclusive of the authorities already referred to, see *Bowring's Report on the Statistics of Italy*; *Geog. Dict.*; *Commercial Circulars*, &c.)

A steam-packet has been established between Venice and Trieste.

*Shipping Charges in the Port of Venice on Ships of different Nations, of the Burden of 360 Tons.*

Description of Charge.	If Austrian, or of a Nation having a Treaty of Reciprocity with Austria.		If of a Nation not having a Treaty of Reciprocity with Austria.	
	<i>Austrian Lires</i>	<i>£ s. d.</i>	<i>Austrian Lires</i>	<i>£ s. d.</i>
From the time to the place of finally mooring	61 57	2 1 0½	61 57	2 1 0½
Out of the port of departure	01 07	2 1 0½	61 57	2 1 0½
<i>Tonnage Duty.</i> One Austrian livre (5d. sterling) per ton — (Originally levied on all ships not Austrian.)	Free.	- -	300 0	10 0 0
<i>Clearing Charges.</i> If to a port out of the Gulf of Venice (but if to a port in the Gulf, i.e. 36d. less in all cases)	2 30	0 1 6½	16 78	0 11 ¾
<i>Quarantine Charges.</i> If performing 7 days, being the usual time for vessels from England —	36 27	1 6 2	85 36	1 15 7
<i>Total of ordinary charges</i>	164 71	5 9 9½	483 30	16 6 10½
If in long quarantine, all ships pay extra —	23 74	0 17 2	95 74	0 17 2
If departing in ballast, or with less than ¼ a cargo, all ships, not Austrian, or not under treaty to be charged as such, pay extra tonnage duty, 45 cents (about 3½d. sterling) per ton, being, on a 360 ton ship —	Free.	- -	135 0	4 10 0
<i>Total of extreme charges</i>	190 45	6 6 11½	658 94	21 16 0½

*Banking Establishments.* — The old bank of Venice was founded so far back as 1171, being the most ancient establishment of the kind in Europe. It was a bank of deposit; and such was the estimation in which it was held, that its paper continued to bear an agio as compared with coin down to 1797, when the bank fell with the government by which it had been guaranteed. At present there are no corporate banking establishments in the city; and no bank notes are in circulation. There are, however, several private banking houses, which buy, sell, and discount bills; and make advances on land and other securities. They are under no legal regulations of any sort, except formally declaring the amount of their capital to the authorities when they commence business. The legal and usual rate of interest and discount is 6 per cent. It is not the practice to allow interest on deposits. Bills on London are usually drawn at 3 months, and on Trieste at 1 month.

*Brokers, Commission, &c.* — The number of brokers is limited, and they are licensed by government; but the business of commission merchant and factor is open to every one. Before, however, commencing any trade or profession at Venice, a petition must be presented for leave to the authorities; but this is more a matter of form than any thing else; its prayer being rarely, if ever, refused.

The usual rate of commission and brokerage on the purchase or sale of colonial produce is 2 per cent., and on manufactured goods 3 per cent., inclusive of broker's commission, 1 per cent. A ship broker's commission on the freight of a whole cargo is 2 per cent., and on a general cargo 4 per cent. By the custom of the place, merchants charge 2 per cent. on the inward and 2 per cent. on the outward freight of all ships consigned to them; and this, though they had done no more than recommend the matter to a broker! A bill broker's commission is ¼ per mille. Merchants and bankers charge a commission on internal bills of ¼ per cent., and on foreign do. of 1 per cent.

*Insurances* are effected by companies and individuals. The government charges no duty on the policies.

*Communications with Lombardy* are effected by flat-bottomed vessels, which, passing through the lagoon, enter the canals and rivers, and make their way through most part of the country watered by the Po and its tributaries. The freight of goods from Milan to Venice, distant about 170 miles, is about 1½ per ton. The principal products they bring down are grain, silk, hemp, and flax, cheese, rhubarb, &c. The country to the north of Venice affords large quantities of deals, which are shipped for Malta, Sicily, and the Levant.

*Quarantine* is enforced here the same as at Trieste. Ships coming from without the Straits of Gibraltar, provided there be no infectious disease on board, are admitted to *pratique* on performing a short quarantine of 7 days in a part of the lagoon, about a mile from the city. Long quarantine is performed a little farther off. The lazaretto, and establishments for passengers, &c. performing quarantine, are among the best in Europe. Ships having foul bills, or coming from suspicious places, are sent thither from Trieste. — (For the quarantine charges, see *ant.*)

*Provisions, Ships' Stores, &c.* — These articles may all be had at Venice of excellent quality, but not

cheap, with, perhaps, the exception of br. ad. Water is conveyed to the city by lighters, and is, consequently, pretty dear; fuel is very scarce, and very high priced.

Taxes. — On goods leaving the free port of Venice for the interior of the Austrian states, the Custom-house shows no taxes; but cases, casks, and other coverings go into the scale with their contents, and the duty is levied on the gross weight. Wine, spirits, &c. consumed in this city, being liable to an excise duty to cover the municipal expenses, have an allowance, if in iron-bound casks, of 18 per cent. on the weight; and if not in iron-bound casks, of 12 per cent. The taxes allowed between merchants are as follow:—

Cotton wool, Pernambuco and Bahia . . . 2 per cent.  
East India, &c. . . 4

Sugar, Brazil	-	-	-	15 to 18 per cent.
Jamaica, manzanilla	-	-	-	14
Essexton, brown and yellow, and East India of all colours	-	-	-	8
refined, crushed	-	-	-	12
Brimstone	-	-	-	10
Italian hemp	-	-	-	10
Madder root	-	-	-	2
Hungary potash	-	-	-	10

On other articles, real taxes are usually taken.

VERA CRUZ, the principal sea-port on the western coast of Mexico; lat 19° 11' 52" N., lon. 96° 8' 45" W. Population (supposed) 16,000. Opposite the town, at the distance of about 400 fathoms, is a small island on which is built the strong castle of St. Juan d'Ulloa, which commands the town. The harbour lies between the town and the castle, and is exceedingly insecure; the anchorage being so very bad, that no vessel is considered safe unless made fast to rings fixed for the purpose in the castle wall: nor is this always a sufficient protection from the fury of the northerly winds (*los nortes*), which sometimes blow with tremendous violence. Humboldt mentions, in proof of what is now stated, that a ship of the line, moored by 9 cables to the castle, tore, during a tempest, the brass rings from the wall, and was dashed to pieces on the opposite shore. — (*Nouvelle Espagne*, ed. 2de, iv. 59.) Its extreme unhealthiness is, however, a more serious drawback upon Vera Cruz, than the badness of its port. It is said to be the original seat of the yellow fever. The city is well built, and the streets clean; but it is surrounded by sand hills and ponds of stagnant water, which, within the tropics, are quite enough to generate disease. The inhabitants, and those accustomed to the climate, are not subject to this formidable disorder; but all strangers, even those from the Havannah and the West India Islands, are liable to the infection. No precautions can prevent its attack; and many have died at Xalapa, on the road to Mexico, who merely passed through this pestilential spot. During the period that the foreign trade of Mexico was carried on exclusively by the *flota*, which sailed periodically from Cadiz, Vera Cruz was celebrated for its fair, held at the arrival of the ships. It was then crowded with dealers from Mexico and most parts of Spanish America; but the abolition of the system of regular fleets in 1778 proved fatal to this fair, as well as to the still more celebrated fair of Portobello.

A light-house has been erected on the N.W. angle of the castle of St. Juan. The light, which is a revolving one of great power and brilliancy, is elevated 79 feet above the level of the sea.

Commerce. — An individual, looking at a map of the world, would be apt to conclude that Mexico is one of the most favourably situated countries for commerce; and, in some respects, this is true. But her trade labours, notwithstanding, under some serious disadvantages. Though washed by the Atlantic and Pacific Oceans, neither of her coasts is accessible for several months of the year. On the E. coast, or that bordering the Gulph of Mexico, there is not a single good harbour; and during the season when the coasts are accessible, they are extremely unhealthy. Owing also to the rapid ascent from the shores to the interior, the construction of roads, and the transport of commodities to and from the inner provinces, is alike difficult and expensive. No doubt, however, an efficient government and an industrious people would speedily, in a great measure, overcome these obstacles to an extensive intercourse with the foreigner. But Mexico has neither the one nor the other; and, at present, her trade is confined within the narrowest limits. Down to 1778, when the Spanish government relaxed the old prohibitive system, the foreign goods legally imported into Mexico comprised only a few Chinese and European manufactures; the former brought annually in one galleon of about 1,400 tons, and the latter sent once in three years exclusively in ships chartered by government from Seville or Cadiz! On the opening of the trade in 1779, private capitalists engaged in it; and after that period, at an average of 12 years before and after, the returns for exports alone rose from 11,000,000 to 19,000,000 of dollars, the difference being chiefly in the quantity of specie. How much greater would the increase have been, if the trade had not been fettered with vexatious duties, first on articles of Spanish produce in the markets of Seville and Cadiz; 2. on shipping for Mexico; 3. at Vera Cruz; and, 4. with an *alcavala*, or transfer duty, at every step, from the merchant to the consumer? On the breaking out of the civil war, the ports of Tampico, Mazatlan, and San Blas were opened by the new government; and soon afterwards foreign vessels were admitted into all the ports on the same terms as Spaniards. The Spanish capitalists retired to Cuba or Spain; and their places were supplied by British and American merchants, who established themselves in the interior, and supplied the inhabs. in return for dollars with manufactured goods, the superior quality and cheapness of which has, no doubt, had some influence in depressing native manufactures. The jealousy of the natives, however, and the absurd threats of the

government against foreign artificers and traders, has tended to prevent their settling in the country, and engaging in any considerable undertaking, other than the mines; and the depressed state of the latter, which have always furnished the principal article of export, has tended still further to depress and paralyse commerce. The roads, too, instead of being improved, have been suffered to fall into a state of almost irreparable decay. In this respect, the following extract from one of the letters of M. Chevalier is decisive. "The splendid road which, during the domination of the Spaniards, was constructed across deserts and precipices, by the merchants of Vera Cruz, to the summit of the upper country, is a melancholy instance of the carelessness with which the public interests of the country are directed. During the war of independence, this road was cut up in various points; and, down to this day, the enfranchised Mexicans have not replaced a single stone, nor filled up a single trench, nor even cut down one of the trees, which, in the absence of any considerable traffic, and under the influence of a tropical sun, are rapidly growing up to a magnificent size in the very middle of the road. In the upper country nothing would be more easy than to open noble means of communication. The soil is naturally level: and basaltic rocks, particularly adapted for the construction of roads, are found in great abundance. But even where there are roads, the Mexicans make little use of them. They carry to a yet more extravagant length the inconceivable predilection of the Spanish race in favour of transporting their goods on the backs of animals. You expect to meet with carts and waggons: no such thing; every thing is conveyed on the backs of mules or Indians. Troops of little consumptive donkeys bring into the city, in parcels not much bigger than a man's two fists, the charcoal required for the culinary operations of the inhabitants. The price of every bulky article is thus increased to an enormous degree. The interior districts are as inaccessible as if they were cut off by an enemy's army, and famine frequently ensues."

In consequence of this wretched state of the roads, of the insecurity consequent to the prevalence of revolutions, and the torpor and indolence of the inhabitants (occasioned partly and principally by physical, but partly, also, by moral causes), industry of all kinds is at an extremely low ebb; and the commerce of the republic is far from being commensurate either with her population, or the number and value of her exportable products.

The following table furnishes an official account of the vessels entering the ports of Vera Cruz, Tampico, San Blas, and Mazatlan during the year 1838, with the invoice value of their cargoes, &c.

Countries.	Inward.			Outward.		
	Ships.	Tons.	Value.	Ships.	Tons.	Value.
<b>I. Vera Cruz:—</b>

The above statement, though not complete, shows the comparative trade of different countries with Mexico, and proves that about half her imports come from Great Britain, which also takes off about 5-6ths of her exports, bullion, the chief article, amounting to about 17,000,000 doll.

For a considerable period after the town of Vera Cruz had thrown off the Spanish yoke, the castle of St. Juan d'Ulloa continued in possession of the Spaniards. During this interval, the commerce of Vera Cruz was almost entirely transferred to the port of Alvarado, 12 leagues to the south-east. Alvarado is built upon the left bank of a river of the same name. The bar at the mouth of the river, about 1½ mile below the town, renders it inaccessible for vessels drawing above 10 or 12 feet water. Large ships are obliged to anchor in the roads, where they are exposed to all the violence of the north winds, loading and unloading by means of lighters. Alvarado is supposed, but probably without much foundation, to be a little healthier than Vera Cruz. The trade has now, mostly reverted to its old channel.

But within these few years, Tampico has risen to considerable importance as a commercial sea-port. It is situated about 60 leagues N. N. W. of Vera Cruz, in lat.  $20^{\circ} 15' 30''$  N., lon.  $97^{\circ} 52' W.$ , being about 104 leagues from Mexico. Hitherto it is said to have been free from fever. The shifting of the bar at the mouth of the river, and the shallowness of the water on it, which is sometimes under 8, and rarely above 15 feet, are serious obstacles to the growth of the port. Vessels coming in sight are boarded by pilots, who conduct them, provided they do not draw too much water, over the bar. Those that cannot enter the port load and unload by means of lighters: mooring so that they may get readily to sea in the event of a gale coming on from the north.

*Exports and Imports.*—The precious metals have always formed the principal article of export from Mexico. During the 10 years ending with 1801, the average annual produce of the Mexican mines amounted, according to M. Humboldt, to 23,000,000 dollars — (*Nouvelle Espagne*, iv. 137.); and in 1805 the produce was 27,165,888 dollars. — (*Id.* iv. 83.) But during the revolutionary war, the old Spanish capitalists, to whom most of the mines belonged, being proscribed, emigrated with all the property they could scrape together: and this withdrawal of capital from the mines, added to the injury several of them sustained by the destruction of their works during the contest, the interruption of all regular pursuits which it occasioned, and the insecurity and anarchy that afterwards prevailed, caused an extraordinary falling off in the produce of the mines. Within these few years, however, a considerable improvement has taken place. The efforts, and the lavish expenditure, of a few of the companies formed in this country for working the mines, have been so far successful, that some of them have been got again into good order, and a large increase of produce may be fairly anticipated, provided they are permitted to prosecute their operations without molestation. But, as we have elsewhere stated (see *ant.* p. 831.), some of the parties who sold or leased the mines began to put forward claims never heard of before, the moment they perceived that there was a reasonable prospect of the companies succeeding; and in some instances they have not scrupled to enforce their claims by violence! It is to be hoped that the Mexican government will exert itself to repress these outrages. If it have power to put down, and yet wink at or tolerate such disgraceful proceedings, it will make itself responsible for the consequences; and will merit chastisement as well as contempt.

The total quantity of gold and silver coined in the different Mexican mints in 1840 and 1841 was, in 1840, 13,134,610 dollars; in 1841, 13,587,805 dollars: to which may be added about 4,000,000 dollars a year for the gold and silver raised and exported without being brought to the mints to be recoined. Hence the exports of the precious metals from Mexico may at present be estimated at from 17,000,000 to 18,000,000 dollars a-year.

Besides the precious metals, cochineal, flour, indigo, provisions, leather, sarsaparilla, vanilla, jalap, soap, logwood, and pimento are the principal articles exported from Vera Cruz.

The imports consist principally of cotton, woollen, linen, and silk goods, paper, brandy, quicksilver, iron, steel, wine, wax, &c.

According to Humboldt, the imports at Vera Cruz, before the revolutionary struggles, might be estimated, at an average, at about 15,000,000 dollars, and the exports at about 22,000,000 do.

It must, however, be observed that this statement refers only to the registered articles, or to those that paid the duties on importation and exportation. But exclusive of these, the value of the articles clandestinely imported by the ports on the Gulph, previously to the revolution, was estimated at 4,500,000 dollars a year; and 2,500,000 dollars were supposed to be annually smuggled out of the country in plate and bars, and ingots of gold and silver. A regular contraband trade used to be carried on between Vera Cruz and Jamaica: and notwithstanding all the efforts of government for their exclusion, and the excessive severity of its laws against smuggling, the shops of Mexico were always pretty well supplied with the products of England and Germany. — (*Humboldt, Nouvelle Espagne*, iv. 125.; *Poinsett's Notes on Mexico*, p. 133.)

Humboldt states, that the total population of Mexico, exclusive of Guatemala, may be estimated at about 7,000,000. Of this number about  $\frac{1}{3}$  are Indians, the rest being Europeans, or descendants of Europeans, and mixed races. But notwithstanding this large amount of population, the trade we carry on with Mexico is very inferior to that which we carry on with Brazil. The following is an account of the real or declared value of all sorts of British produce and manufactures exported to the States of Central and Southern America in 1842: —

	\$		\$
Mexico	374,969	States of the Rio de la Plata	328,701
Guatemala	-	Chili	920,499
Colombia	221,711	Peru	684,219
Brazil	1,756,805		

The imports of British goods at second hand into Mexico and Colombia from the West Indies is still, however, far from inconsiderable; and a pretty large proportion of the British goods sent to Chili are conveyed thence to Acapulco and other Mexican ports on the Pacific. We subjoin—

The Mexican government issued a new tariff in 1843. It prohibits the importation of a great many articles; and the duties it imposes on those that may be imported are, for the most part, heavy. This, however, is of comparatively little consequence, in so far at least as the foreigner is concerned; for the smuggler takes off nearly as large a supply of the prohibited and over-taxed products as would be taken off by the legitimate traders, were they admitted under reasonable duties.

**VERDIGRIS** (Ger. *Grünspan*; Fr. *Vert-de-gris*, *Verdet*; It. *Verderame*; Sp. *Cardenillo*, *Verdete*, *Verde-gris*; Rus. *Jar*), a kind of rust of copper, of a beautiful bluish green colour, formed from the corrosion of copper by fermented vegetables. Its specific gravity is 1.78. Its taste is disagreeably metallic; and, like all the compounds into which copper enters, it is poisonous. It was known to the ancients, and various ways of preparing it are described by Pliny. It is very extensively used by painters, and in dyeing; it is also used to some extent in medicine. The best verdigris is made at Montpellier; the wines of Languedoc being particularly well suited for corroding copper, and forming this substance. It is generally exported in cakes of about 25 lbs. weight each. It is also manufactured in this country, by means of the refuse of cider, &c.; the high duty of 2s. per lb. on the foreign article giving the home producers a pretty complete monopoly of the market. The goodness of verdigris is judged of from the deepness and brightness of its colour, its dryness, and its forming, when rubbed on the hand with a little water or saliva, smooth paste, free from grittiness. — (*Thomson's Chemistry*; *Rees's Cyclopædia*.)

**VERJUICE** (Ger. *Agrest*; Fr. *Verjus*; It. *Agresto*; Sp. *Agras*), a kind of harsh, austere vinegar, made of the expressed juice of the wild apple, or crab. The French give this name to unripe grapes, and to the sour liquor obtained from them.

**VERMICELLI** (Ger. *Nudeln*; Du. *Meelaeppen*, *Proppen*; Fr. *Vermicelli*; It. *Fermicelli*, *Tagliolini*; Sp. *Aletrias*), a species of wheaten paste formed into long, slender, hollow tubes, or threads, used amongst us in soups, broths, &c. — (See **MACCARONI**.)

**VERMILLION**. See **CINNABAR**.

**VINEGAR** (Ger. *Essig*; Du. *Azyn*; Fr. *Vinaigre*; It. *Aceto*; Sp. and Port. *Vinagre*; Rus. *Ukzuz*; Lat. *Acetum*). — (See **ACID (ACETIC)**, for a description of vinegar.) A duty being imposed on vinegar of 2d. the gallon, its manufacture is placed under the control of the excise. A licence, costing 5*l.*, and renewable annually, has to be taken out by every maker of vinegar, or acetic acid. In 1842, the duty on vinegar produced 93,842*l.*, showing that 2,861,040 gallons had been brought to the charge. The manufacture is almost confined to England; the quantities produced in Scotland and Ireland being quite inconsiderable. The duty was reduced, in 1826, from 4d. to 2d. per gallon.

All places for manufacturing or keeping vinegar must be entered, under a penalty of 50*l.* No vinegar maker is to receive any vinegar, or acetic acid, or sugar wash, or any preparation for vinegar, without giving 12 hours' notice to the excise, under penalty of 100*l.* Any person sending out or receiving vinegar shall, unless the duty on it be paid, and it be accompanied by a permit, forfeit 200*l.* All vinegar makers are to make entries at the next Excise-office of the quantity made within each month, and are bound to clear off the duties within a month of such entry, on pain of double duties.

**VITRIOL**. See **COPPERAS**.

**VITRIOL, OIL OF**. See **ACID (SULPHURIC)**.

**ULTRAMARINE** (Ger. *Ultramarina*; Fr. *Bleu d'outremer*; It. *Oltremarino*; Sp. *Ultramar*; Rus. *Ultramarin*), a very fine blue powder made from the blue parts of *lapis lazuli*. It has the valuable property of neither fading, nor becoming tarnished, on exposure to the air, or a moderate heat; and on this account is highly prized by painters. Owing to its great price, it is very apt to be adulterated. It was introduced about the end of the fifteenth century.

**USANCE**, a period of *one, two, or three months*, or of so many days, after the date of a bill of exchange, according to the custom of different places, before the bill becomes due. Double or treble usance is double or treble the usual time; and  $\frac{1}{2}$  usance is  $\frac{1}{2}$  the time. When a month is divided, the  $\frac{1}{2}$  usance, notwithstanding the differences in the lengths of the months, is uniformly 15 days. Usances are calculated exclusively of the date of the bill. Bills of exchange drawn at usance are allowed the usual days of grace, and on the last of the 3 days the bill should be presented for payment. — (See **EXCHANGE**.)

**USURY**. See **INTEREST AND ANNUITIES**.

## W.

**WALNUTS**, the fruit of the *Juglans*, or walnut-tree, of which there are several varieties. The walnut is a large handsome tree, with strong spreading branches. The fruit is a pretty large, smooth, ovate nut, containing an oily kernel, divided into four lobes. The nut has been always held in high estimation; it was called by the Romans *Jovis glans*, the acorn or mast of Jove, and hence the name of the tree. The walnut tree is indigenous to Persia and the countries bordering on the Caspian Sea. It has long been introduced into Great Britain; but the fruit seldom ripens in the more northerly parts of the island. Previously to the very general introduction of mahogany, the wood of the walnut tree was extensively used among us in making of furniture; and it continues to be largely employed for that purpose in many parts of the Continent. It is much used by turners; and is superior to every other sort of wood for the mounting of guns; a circumstance which caused great devastation among our walnut plantations during the latter years of the war. Great numbers of walnut trees are annually consumed in the Haute Vienne and other departments of France, in the manufacture of the wooden shoes or clogs used by the peasantry. The nuts are either gathered when ripe, being served up at desserts without any preparation; or they are plucked green, and pickled. — (*Poiret, Histoire Philosophique des Plantes*, tome vii. p. 213.; *Rees's Cyclopædia*, &c.)

Account of Walnuts imported, exported, and retained for Home Use, during 1841 and 1842, with the Net Duty thereon, and the Rate of Duty.

WANGHEES, sometimes called JAPAN CANES, a species of cane imported from China. They should be chosen pliable, tough, round, and taper; the knots at regular distances from each other; and the heavier the better. Such as are dark-coloured, badly glazed, and light, should be rejected. — (*Milburn's Orient. Com.*)

WAREHOUSING SYSTEM. By this system is meant the provisions made for lodging imported articles in public warehouses, at a reasonable rent, without payment of the duties on importation till they be withdrawn for home consumption. If re-exported, no duty is ever paid.

1. *Expediency and Origin of the Warehousing System.* — It is laid down by Dr. Smith, in one of his justly celebrated maxims on the subject of taxation, that "Every tax ought to be levied at the time and in the manner that is most likely to be convenient for the contributor to pay it." — (*Wealth of Nations*, p. 371.) No one can doubt the soundness of this maxim; and yet it was very strangely neglected, down to 1803, in the management of the customs. Previously to this period, the duties on most goods imported had either to be paid at the moment of their importation, or a *bond*, with sufficient security for their future payment, had to be given to the revenue officers. The hardship and inconvenience of such a system is obvious. It was often very difficult to find sureties; and the merchant, in order to raise funds to pay the duties, was frequently reduced to the ruinous necessity of selling his goods immediately on their arrival, when, perhaps, the market was already glutted. Neither was this the only inconvenience that grew out of this system; for the duties having to be paid all at once, and not by degrees as the goods were sold for consumption, their price was raised by the amount of the prompt on the capital advanced in payment of the duties; competition, too, was diminished in consequence of the greater command of funds required to carry on trade under such disadvantages; and a few rich individuals were enabled to monopolise the importation of those commodities on which heavy duties were payable. The system had, besides, an obvious tendency to discourage the carrying trade. It prevented this country from becoming the *entrepôt* for foreign products, by hindering the importation of such as were not immediately wanted for home consumption; and thus tended to lessen the resort of foreigners to our markets, inasmuch as it rendered it difficult, or rather impossible, for them to complete an assorted cargo. And in addition to all these circumstances, the difficulty of granting a really equivalent drawback to the exporters of such commodities as had paid duty, opened a door for the commission of every species of fraud.

But these disadvantages and drawbacks, obvious as they may now appear, did not attract the public attention till a comparatively late period. Sir Robert Walpole seems to have been one of the first who had a clear perception of their injurious influence; and it was the principal object of the famous *Excise Scheme*, proposed by him in 1733, to oblige the importers of tobacco and wine to deposit them in public warehouses; relieving them, however, from the necessity of paying the duties chargeable on them till they were withdrawn for home consumption.

No doubt can now remain in the mind of any one, that the adoption of this scheme would have been of the greatest advantage to the commerce and industry of the country. But so powerful was the delusion generated in the public mind with respect to it, that its proposal well nigh caused a rebellion. Most of the merchants of the day had availed themselves of the facilities which the existing system afforded of defrauding the revenue; and they dexterously endeavoured to thwart the success of a scheme which would have given a serious check to such practices, by making the public believe that it would be fatal to the commercial prosperity of the country. The efforts of the merchants were powerfully seconded by the spirit of party, which then ran very high. The political opponents of the ministry, anxious for an opportunity to prejudice them in the public estimation, contended that the scheme was only the first step towards the introduction of such a universal system of excise as would inevitably prove alike subversive of the comfort and liberty of the people. In consequence of these artful misrepresentations, the most violent clamours were everywhere excited against the scheme. On one occasion Sir Robert Walpole narrowly escaped falling a sacrifice to the ungovernable fury of the mob, which beset all the avenues to the House of Commons; and, after many violent and lengthened debates, the scheme was ultimately abandoned.

The disadvantages of the old plan, and the benefits to be derived from the establishment of a voluntary warehousing system, were most ably pointed out by Dean Tucker, in his "Essay on the Comparative Advantages and Disadvantages of Great Britain and France with respect to Trade," published in 1750. But so powerful was the impression made by the violent opposition to Sir Robert Walpole's scheme, and such is the force of prejudice, that it was not till 1803 that this obvious and signal improvement — the greatest, perhaps, that has been made in our commercial and financial system — could be safely adopted.

*Regulations as to Warehousing.* — The statute of 43 Geo. 3. c. 132. laid the founda-

tion of this system; but it was much improved and extended by subsequent statutes, the regulations of which have been embodied in the following act, 8 & 9 Vict. c. 91., which took effect on the 4th of August, 1845.

This act empowers the commissioners of the customs, under the authority and direction of the Lords of the Treasury, to nominate the ports at which goods may be warehoused without payment of duty, and the warehouses in which particular descriptions of goods may be deposited. It also fixes the time during which goods are allowed to remain in the warehouse; and prescribes the regulations as to their removal from port to port, their sale and stowage in the warehouse, the remission of the duties in case of loss by accident, the allowances for waste, &c. But being of much importance, we subjoin a full abstract of the statute.

ABSTRACT OF THE ACT 8 & 9 VICT. c. 91. FOR THE WAREHOUSING OF GOODS.

*Act to commence from the 4th August, 1845.—§ 1.*

*Treasury to appoint warehousing Ports.*—It shall be lawful for the lords of the treasury of the U. K., by their warrant from time to time, to appoint the ports in the U. K. which shall be warehousing ports for the purposes of this Act; and it shall be lawful for the commissioners of customs, subject to the authority and directions of the lords of the treasury, by their order from time to time to appoint in what warehouses or places of special security, or of ordinary security, as the case may require, in such ports, and in what different parts or divisions of such warehouses or places, and in what manner, any goods, and what sorts of goods, may and may only be warehoused and kept and secured without payment of any duty upon the first entry thereof, or for exportation only, in cases where the same may be prohibited to be imported for home use; and also in such order to direct in what cases (if any) security by bond, in manner hereinafter provided, shall be required in respect of any warehouse so appointed by them.—§ 2.

*Warehouses of special Security to be so stated on their Appointment.*—Whenever any warehouse shall have been approved of by the said commissioners of customs as being a warehouse of special security, it shall be stated in their order of appointment that such warehouse is appointed as a warehouse for special security: provided always, that all warehouses connected with the wharfs for the landing of the goods to be lodged therein, and inclosed together with such wharfs within walls such as are or shall be required by any Act for the constructing of such warehouses and wharfs, and being appointed to be legal quays, shall, without any order of the said commissioners, be warehouses for the purposes of this Act for all goods landed at such wharfs or quays, at any port appointed by the lords of the treasury to be a warehousing port as aforesaid, and all such warehouses shall be warehouses of special security.—§ 3.

*Appointments made and Bonds given previous to Act to continue in force.*—All appointments of warehouses for the warehousing of goods made under the authority of any other Act in force at the time of the commencement of this Act, shall continue in force as if the same had been made under the authority of this Act; and all bonds given in respect of any goods warehoused or entered to be warehoused under any Act in force at the time of the commencement of this Act, shall continue in force for the purposes of this Act.—§ 4.

*Commissioners to provide Warehouses for Tobacco, and Treasury to fix Rent.*—The commissioners of customs shall, out of the monies arising from the duties of customs, provide from time to time warehouses for the warehousing of tobacco at the ports into which tobacco may be legally imported: provided always, that for every hogshead, chest, case or other package of tobacco so warehoused the importer or proprietor thereof shall pay as and for warehouse-rent such sum or sums, not exceeding any sum payable under any Act in force at the time of the commencement of this Act, and at such periods and in such manner as the lords of the treasury shall from time to time by their warrant appoint and direct, and all such sums shall be paid, received, and appropriated as duties of customs.—§ 5.

*Power to revoke or alter Appointment.*—It shall be lawful for the said lords of the treasury by their warrant, and for the said commissioners of customs by their order, from time to time to revoke any former warrant or any former order, or to make any alteration in or addition to any former warrant or any former order made as aforesaid by them respectively.—§ 6.

*Publication of Appointments in Gazette.*—Every order made by the said commissioners of customs in respect of warehouses of special security, as well those of original appointment as those of revocation, alteration, or addition, shall be published in the London Gazette for such as shall be appointed in Great Britain, and in the Dublin Gazette for such as shall be appointed in Ireland.—§ 7.

*Warehouse Keeper may give general Bond, if willing.*—Before any goods shall be entered to be warehoused in any warehouse, in respect of which security by bond shall be required as aforesaid, the proprietor or occupier of such warehouse, if he be willing, shall give general security by bond, with two sufficient sureties, for the payment of the full duties of importation on all such goods as shall at any time be warehoused therein, or for the due exportation thereof; and if such proprietor or occupier be not willing to give such general security, the different importers of the separate quantities of goods shall upon each importation, before such goods shall be entered to be warehoused, give such security by bond with one sufficient surety, in respect of the particular goods imported, the penalty of such bond being double the amount of the duty to which such goods are subject.—§ 8.

*Sale of Goods in Warehouse by Proprietor to be valid.*—If any goods lodged in any warehouse shall be the property of the occupier of such warehouse, and shall be bond fide sold by him, and upon such sale there shall have been a written agreement signed by the parties, or a written contract of sale made, executed, and delivered by a broker, or other person legally authorized for or in behalf of the parties respectively, and the amount of the price stipulated in the said agreement or contract shall have been actually paid or secured to be paid by the purchaser, every such sale shall be valid, although such goods shall remain in such warehouse; provided that a transfer of such goods, according to such sale, shall have been entered in a book to be kept for that purpose by the officer of the customs having the charge of such warehouse, who is hereby required to keep such book and to enter such transfer, with the dates thereof, upon application of the owners of the goods, and to produce such book upon demand made.—§ 9.

*Stowage in Warehouse to afford easy Access.*—All goods warehoused shall be stowed in such manner as that easy access may be had to every package and parcel of the same, and if the occupier of the warehouse shall omit so to stow the same, he shall for every such omission forfeit the sum of 5*l.*; and if any goods shall be taken out of any warehouse without due entry of the same with the proper officers of the customs, the occupier of the warehouse shall be liable to the payment of the duties due thereon.—§ 10.

*Occupiers of Warehouses to produce, on Demand, Goods to Officers of Customs, or to forfeit 5*l.**—The occupier or occupiers of any warehouse in which goods are deposited under the provisions of this Act shall, upon any request being made by any officer duly authorized by the commissioners of customs, immediately produce to such officer any goods deposited therein, or received into his or their custody, for the delivery of which the said occupier or occupiers has or have not received an order duly signed by the proper warehouse officer, and upon every failure so to do such occupier or occupiers shall forfeit the

sum of £1. over and above the duties to which every package or parcel of goods not so produced may be liable.—§ 11.

*Goods fraudulently concealed or removed, forfeited.*—If any goods warehoused shall be fraudulently concealed in or removed from the warehouse, the same shall be forfeited; and if any importer or proprietor of any goods warehoused, or any person in his employ, shall by any contrivance fraudulently open the warehouse, or gain access to the goods, except in the presence of the proper officer acting in the execution of his duty, such importer or proprietor shall forfeit and pay for every such offence, the sum of 500*l.*—§ 12.

*Persons assisting in the removing of Goods entered for the Warehouse, subjected to Penalties.*—If any goods entered to be warehoused under any law made for the warehousing of goods shall be removed and not deposited in a warehouse or place of security, in pursuance of such entry, every person who shall remove or assist or be otherwise concerned in the removing of any such goods, or who shall knowingly harbour, keep, or conceal, or shall knowingly permit or suffer to be harboured, kept, or concealed, any such goods so removed, and every person to whose hands and possession any goods so removed shall knowingly come, shall forfeit either treble the value thereof, or the penalty of 100*l.*, at the election of the commissioners of customs, and such goods shall be forfeited.—§ 13.

*Examination on Entry and Landing.*—Within one month after any tobacco shall have been warehoused, and upon the entry and landing of any other goods to be warehoused, the proper officer of customs shall take a particular account of the same, and shall mark the contents on each package, and shall mark the word "prohibited" on such packages as contain goods prohibited to be imported for home use; and all goods shall be warehoused and kept in the packages in which they shall have been imported, and no alteration shall be made in the packages or the packing of any goods in the warehouse, except in the cases herein-after provided.—§ 14.

*Goods to be carried to Warehouse under Authority of Officer of Customs.*—All goods entered to be warehoused or to be re-warehoused shall be carried into the warehouse under the care or with the authority or permission of the proper officer of customs, and in such manner and by such persons, and by such roads or ways, and within such spaces of time, as the proper officer of customs shall authorise, permit, or direct, and all such goods not so carried shall be forfeited.—§ 15.

*Goods to be cleared in three Years; Ship's Stores in one Year.*—All goods which have been so warehoused shall be duly cleared either for exportation or for home use within three years, and all surplus stores of ships within one year from the day of the first entry thereof, unless further time be given by the lords of the treasury; and if any such goods be not so cleared, it shall be lawful for the commissioners of customs to cause the same to be sold, and the produce shall be applied to the payment of the warehouse rent and other charges, and the overplus (if any) shall be paid to the proprietor; and such goods, when sold, shall be held subject to all the conditions to which they were subject previous to such sale, except that a further time of three months from the date of the sale shall be allowed to the purchaser for the clearing of such goods from the warehouse; and if the goods so sold be not duly cleared from the warehouse within such three months, the same shall be forfeited.—§ 16.

*In case of Accident in landing or shipping Goods, Duty may be remitted.*—If any goods entered to be warehoused, or entered to be delivered from the warehouse, shall be lost or destroyed by any unavoidable accident, either on ship-board or in the landing or shipping of the same, or in the receiving into or delivering from the warehouse, it shall be lawful for the commissioners of customs to remit or return the duties payable or paid on the quantity of such goods so lost or destroyed.—§ 17.

*Duties on Goods lost or destroyed in Warehouse by Accident remitted.*—It shall be lawful for the commissioners of customs to remit the duties payable or paid on the whole or any portion of any goods which shall be lost or destroyed by any unavoidable accident in the warehouse in which the same shall have been deposited under the provisions of this or any other Act passed for the warehousing of goods; and the duties payable upon the following articles deposited in warehouses of special security, viz.:—wines, currants, raisins, figs, hams, and cheese, when taken out of the warehouse for home use, shall be charged upon the quantities ascertained by the measure or weight of the same actually delivered.—§ 18.

*Entry for Exportation or Home Use.*—No goods which have been so warehoused shall be taken or delivered from the warehouse, except upon due entry, and under care of the proper officers for exportation, or upon due entry and payment of the full duties payable thereon for home use, if they be such goods as may be used in the U. K., save and except goods delivered into the charge of the searchers to be shipped as stores, and which shall and may be so shipped without entry or payment of any duty for any ship of the burden of sixty tons at least, bound upon a voyage to foreign parts, the probable duration of which, out and home, will not be less than forty days: provided always, that such stores shall be duly borne upon the ship's victualling bill, and shall be shipped in such quantities and subject to such directions and regulations as the commissioners of customs shall direct and appoint.—§ 19.

*Rum for Stores and surplus Stores.*—Rum of the British plantations may be delivered into the charge of the searcher to be shipped as stores for any ship without entry or payment of any duty, and any surplus stores of any ship may be delivered into the charge of the searcher to be re-shipped as stores for the same ship, or for the same master in another ship, without entry or payment of any duty, such rum and such surplus stores being borne upon the victualling bills of such ships respectively, and if the ship, for the future use of which any surplus stores have been warehoused, shall have been broken up or sold, such stores may be so delivered for the use of any other ship belonging to the same owners, or may be entered for payment of duty, and delivered for the private use of such owners, or any of them, or of the master or purser of such ship.—§ 20.

*Duties to be paid on original Quantities.*—Upon the entry of any such goods to be cleared from the warehouse, if the same be for home use, the person entering such goods inwards shall deliver a bill of the entry and duplicates thereof, in like manner as directed by law in the case of goods entered to be landed, as far as the same is applicable, and at the same time shall pay down to the proper officer of the customs the full duties of customs payable thereon, and not being less in amount than according to the account of the quantity first taken of the respective packages or parcels of the goods in such entry at the examination thereof, at the time of the first entry and landing of the same, without any abatement on account of any deficiency, except by this Act is otherwise provided; and if the entry be for exportation or for removal to any other warehouse, and any of the packages or parcels of the goods be deficient of the respective quantities of the same according to the account first taken as aforesaid, a like entry inwards shall also be passed in respect of the quantities so deficient, and the full duties shall be paid on the amount thereof before such packages or parcels of goods shall be delivered or taken for exportation or removal, except as by this Act is otherwise provided; and if any goods so deficient in quantity shall be such as are charged to pay duty according to the value thereof, such value shall be estimated at the prices for which the like sorts of goods of the best quality shall have been last or lately sold.—§ 21.

*Duties on Tobacco, Sugar, and Spirits.*—Duties payable upon tobacco, sugar, and spirits respectively, when taken out of warehouse for home use, shall be charged upon the quantities ascertained by the weight, measure, or strength of the same actually delivered, save and except that if the sugar shall not be in a warehouse of special security no greater abatement on account of deficiency of the quantity, first ascertained as aforesaid, shall be made than shall be after the rate of 3 per cent., of such quantity for the first three months, and 1 per cent., for every subsequent month during which such sugar shall have been warehoused; and also save and except that if the spirits (being any other spirits than rum of the British plantations) shall not be in a warehouse of special security, no greater abatement on account of deficiency of the quantity or strength first ascertained as aforesaid shall be made than shall be after the several rates of allowances following; (that is to say),

For every hundred gallons hydrometer proof:—  
 For any time not exceeding six months, one gallon:  
 For any time exceeding six months, and not exceeding  
 eighteen months, three gallons:  
 For any time exceeding eighteen months, and not exceed-  
 ing two years, five gallons:

For any time exceeding two years, and not exceeding two  
 years and a half, six gallons:  
 For any time exceeding two years and a half, and not ex-  
 ceeding three years, seven gallons:  
 And for every additional year, two gallons:

Provided always, that no abatement shall be made in respect of any deficiency in quantity of any spirits occasioned by leakage and not by natural evaporation, in whatever warehouse the same may be kept, except as by this Act is otherwise specially provided.—§ 22.

*Allowances for natural Deficiency on Corn or Grain in Warehouse.*—In respect of any wheat or barley, or any rye or any oats, lodged in warehouses without payment of duty on the first importation thereof, the following allowances for natural waste shall be made upon the exportation thereof, or upon the entry thereof for home consumption; viz.—

In respect of all wheat, barley, and rye, except as below, which has been in warehouse one month and less than three months, there shall be allowed 14 per cent.:

In respect of all wheat, barley, and rye, except as below, which has been in warehouse three months and less than six months, there shall be allowed 5 per cent.:

In respect of all wheat, barley, and rye, except as below, which has been in warehouse six months and less than twelve months, there shall be allowed 2½ per cent.:

And in respect of all wheat, barley, and rye, except as below, which has been in warehouse twelve months and upwards, there shall be allowed 3 per cent.:

In respect of oats, except as below, which have been in warehouse one month and less than three months, there shall be allowed 21 per cent.:

In respect of oats, except as below, which have been in warehouse three months and less than six months, there shall be allowed 5½ per cent.:

In respect of oats, except as below, which have been in warehouse six months and less than twelve months, there shall be allowed 4½ per cent.:

And in respect of oats, except as below, which have been in warehouse twelve months and upwards, there shall be allowed 5 per cent.:

The exception referred to above is, that only half the above allowances hereby directed to be made on wheat and barley and oats respectively shall be made upon Spanish wheat and barley and oats respectively, and upon wheat and barley kiln-dried abroad respectively, and that no such allowance shall be made in respect of rye being kiln-dried: provided also, that no such allowance shall be made unless there shall be an actual deficiency in the quantity of such wheat, rye, barley, and oats originally warehoused.—§ 23.

*Importer may enter Goods for Home Use or for Exportation.*—If after any goods shall have been duly entered and landed to be warehoused, and before the same shall have been actually deposited in the warehouse, the importer shall further enter the same, or any part thereof, for home use or for exportation, as from the warehouse, the goods so entered shall be considered as virtually and constructively warehoused, although not actually deposited in the warehouse, and shall and may be delivered and taken for home use, or for exportation, as the case may be.—§ 24.

*Goods may be removed to other Ports to be re-warehoused.*—Any goods which have been warehoused at some port in the U. K. may be removed by sea or inland carriage to any other port in the same in which the like goods may be warehoused upon importation, to be re-warehoused at such other port, and again as often as may be required to any other such port, to be there re-warehoused, subject to the regulations hereinafter mentioned, viz.: 12 hours' notice in writing of the intention to remove such goods shall be given to the warehouse officer, specifying the particular goods intended to be removed, and the marks, numbers, and description of the packages in which the same are contained, in what ship imported, when and by whom entered inwards to be warehoused, and if subsequently re-warehoused when and by whom re-warehoused, and to what ports the same are to be removed; and thereupon the warehouse officer shall take a particular account of such goods, and shall mark the contents on every package in preparation for the delivering of the same for the purposes of such removal, and previous to the delivery thereof may cause the proper seals of office to be affixed thereto: And also, that tobacco, the produce of the British possessions in America, or of the U. S. of America, and purchased for the use of the navy, may be removed by the purser of any ship of war in actual service to the ports of Rochester, Portsmouth, or Plymouth, to be there re-warehoused, in the name of such purser, in such warehouse as shall be approved for that purpose by the commissioners of customs.—§ 25.

*Entry of Goods for Removal.*—Before such goods shall be delivered to be removed due entry of the same shall be made, and a proper bill of such entry, with duplicates thereof, be delivered to the collector or comptroller, containing the before-mentioned particulars, and an exact account of the quantities of the different sorts of goods; and such bill of entry, signed by the collector and comptroller, shall be the warrant for the removal of such goods; and an account of such goods, containing all such particulars, shall be transmitted by the proper officers of the port of removal to the proper officers of the port of destination; and upon the arrival of such goods at the port of destination due entry of the same to be re-warehoused shall in like manner be made with the collector and comptroller at such port, containing all the particulars and accounts before mentioned, together with the name of the port from which such goods have been removed, and the description and situation of the warehouse in which they are to be warehoused; and the bill of such entry, signed by such collector and comptroller, shall be the warrant to the landing officer and the warehouse officer to admit such goods, to be there re-warehoused, under such examination as is made of the like goods when first warehoused upon importation from parts beyond the seas; and the particulars to be contained in such notice and in such entries shall be written and arranged in such form and manner as the collector and comptroller shall require; and the officers at the port of arrival shall transmit to the officers at the port of removal an account of the goods so arrived, according as they shall upon examination prove to be, and the warehouse officers at the port of removal shall notify such arrival in their books.—§ 26.

*Bond to re-warehouse may be given at either Port.*—The person removing such goods shall at the time of entering the same give bond, with one sufficient surety, for the due arrival and re-warehousing of such goods, within a reasonable time, with reference to distance between the respective ports, to be fixed by the commissioners of customs, which bond may be taken by the collector and comptroller either of the port of removal or of the port of destination, as shall best suit the residence or convenience of the persons interested in the removal of such goods; and if such bond shall have been given at the port of destination, a certificate thereof, under the hands of the collector and comptroller of such port, shall, at the time of entering such goods, be produced to the collector or comptroller of the port of removal.—§ 27.

*Bond how to be discharged.*—Such bond shall not be discharged unless such goods shall have been duly re-warehoused at the port of destination within the time allowed for such removal, or shall have been otherwise accounted for to the satisfaction of the said commissioners, nor until the full duties due upon any deficiency of such goods shall have been paid, nor until fresh security shall have been given in respect of such goods in manner hereinafter provided, unless such goods shall have been lodged in some warehouse in respect of which general security shall have been given by the proprietor or occupier thereof, or in some warehouse in respect of which no security is required.—§ 28.

*Goods re-warehoused held on Terms of first warehousing.*—Such goods which so re-warehoused may be entered and shipped for exportation, or entered and delivered for home use, as the like goods may be when first warehoused upon importation, and the time when such goods shall be allowed to remain re-warehoused at such port shall be reckoned from the day when the same were first entered to be warehoused.—§ 29.

*On arrival, after re-warehousing, Parties may enter to export, &c.*—If upon the arrival of such goods at the port of destination the parties shall be desirous forthwith to export the same, or to pay duty thereon for home use, without actually lodging the same in the warehouse for which they have been

entered and examined to be re-warehoused, it shall be lawful for the officers of the customs at such port, after all the formalities of entering and examining such goods for re-warehousing have been duly performed, except the actual labour of carrying and lodging the same in the warehouse, to consider the same as virtually or constructively re-warehoused, and to permit the same to be entered and shipped for exportation, or to be entered and delivered for home use, upon payment of the duties due thereon, in like manner as if such goods had been actually so carried and lodged in such warehouse; and the account taken for the re-warehousing of such goods may serve as the account for delivering the same as if from the warehouse either for shipment or for payment of duties, as the case may be; and all goods so exported, or for which the duties have been so paid, shall be deemed to have been duly cleared from the warehouse. — § 30.

**Removal in the same Port.** — Any goods which have been warehoused in some warehouse in the port of London may, with the permission of the commissioners of customs first obtained, be removed to any other warehouse in the said port in which the like goods may be warehoused on importation; and any goods which have been warehoused in some warehouse in any other port may, with the permission of the collector and comptroller of such port first obtained, be removed to any other warehouse in the same port in which the like goods may be warehoused on importation, under such general regulations as the commissioners of customs shall direct. — § 31.

**Goods and Packages subject to original Conditions.** — All goods which shall have been removed from one warehouse for or to another, whether in the same port or in a different port, and all proprietors of such goods, shall be held subject in all respects to all the conditions to which they would have been held subject if such goods had remained in the warehouse where they had been originally warehoused. — § 32.

**Goods sold, new Owners may give Bond, and release the original Bond.** — If any goods shall have been warehoused in any warehouse in respect of which general security by bond as hereinbefore provided shall not have been given by the proprietor or occupier of such warehouse, and particular security, as in such case is required, shall have been given by the importer of such goods in respect of the same, and such goods shall have been sold or disposed of, so that the original bond shall be no longer interested in or have control over such goods, it shall be lawful for the proper officers to admit fresh security to be given, by the bond of the new proprietor of such goods or persons having the control over the same, with his sufficient surety, and to cancel the bond given by the original bond of such goods, or to exonerate him and his surety to the extent of the fresh security so given. — § 33.

**Bond of Remover to be in force in new Warehouse until fresh Bond be given.** — If the person removing any goods from one port to another, and who shall have given bond in respect of such removal and re-warehousing, shall be and shall continue to be interested in such goods after the same shall have been duly re-warehoused, and such goods shall have been so re-warehoused in some warehouse in respect of which security is required, and the proprietor or occupier of the same shall not have given general security, the bond in respect of such removal and re-warehousing shall be conditioned and continue in force for the re-warehousing such goods until fresh bond be given by some new proprietor or other person in manner hereinbefore provided. — § 34.

**Lawful to sell, separate, and re-pack in same or equal Packages.** — It shall be lawful to sell, separate, and re-pack any goods, and to make such lawful alterations therein, or arrangements thereof as may be necessary either for the preservation of such goods, or in order to the shipment, or the disposal of the same; provided that such goods be re-packed in the same packages in which the same goods, or some part of the whole quantity of the same parcel of goods, were imported, or in packing of an entire quantity equal thereto; and the proprietors or occupiers of customs shall permit (not being less in any case, if the goods be to be exported or to be removed to another warehouse, than may be required by law for the importation of such goods); and also in the warehouse to draw off any wine or any rum of the British plantations into reputed quart bottles or reputed pint bottles, for the purpose only of being exported from the warehouse; and also in the warehouse to draw off any such rum into casks, containing not less than 40 gallons each, for the purpose only of being disposed of as stores for ships; and also in the warehouse to draw off any other spirits into reputed quart bottles, under such regulations as the commissioners of customs shall direct; and also in the warehouse for the purpose only of being exported from the warehouse; and also in the warehouse to draw off and mix with any wine any brandy, secured in the same warehouse, not exceeding the proportion of 10 gallons of brandy to every gallon of wine; and also in the warehouse to fill up any casks of wine or spirits from any other casks of the same, respectively secured in the same warehouse; and also in any warehouse of special security to rack off any wine from the lees, and in such warehouse to mix any wines of the same sort, arising from the cask all import brands; and also in the warehouse to take such moderate samples of goods as may be allowed by the commissioners of customs, without entry and without payment of duty, except as the same may eventually become payable as on a deficiency of the original quantity. — § 35.

**No Alteration to be made in Goods or Packages.** — No alteration shall be made in any such goods or packages, nor shall any such wine, rum, brandy, or spirits be bottled, drawn off, mixed, or filled up, nor shall any such samples be taken, except after such notice given by the respective importers or proprietors, and at such times and in such manner, and under such regulations and restrictions as the commissioners of customs shall from time to time require and direct. — § 36.

**Re-packing in proper Packages, &c.** — Whereas it may happen that after the re-packing into proper packages of any parcel of goods which have been unpacked or drawn off from the original package in any of the cases hereinbefore provided for, there may remain some surplus quantities of the respective parcels of such goods which may not be sufficient to make or fill up any new package, or that it may so happen that some part of such goods when separated from other parts may be such refuse, or in so damaged a state as to be worthless, or that the total quantity of such parcel of goods may be reduced by the separation and removal, or by the dispersion of dust or otherwise: And whereas the duties payable on such goods may have been levied at a rate having regard to a just allowance for the state in which such goods are imported, and it is not proper that any manufacturer or proprietor should be performed in such warehouse to the detriment of the revenue; be it therefore enacted, that after such goods have been so re-packed in proper packages, it shall be lawful for the commissioners of customs at the request of the importer or proprietor of such goods, to cause or permit any such refuse, damage, or surplus goods not contained in any of such packages, to be destroyed; and if the goods be such as may be delivered for home use, the duties payable on any such surplus of any part of such surplus as may remain, and the same shall be delivered for home use accordingly; and if they be such as may not be so delivered, such surplus as may so remain shall be dis-

posed of for the purpose of exportation in such manner as the commissioners of customs shall direct; and the revenue duty on the quantity contained in each of such proper packages shall be ascertained and marked upon the same; and the deficiency shall be ascertained by a comparison of the total quantity in such proper packages with the total quantity of such goods warehoused, and the proportion which such deficiency may bear to the quantity in each package shall also be marked on the same, and added to such quantity, and the total shall be deemed to be the imported contents of such packages, and be held subject to the full duties of importation, except as otherwise in this Act provided by this Act; provided always, that it shall be lawful for the said commissioners to accept the abandonment for the duties of any quantity of tobacco or coffee, or of pepper or cocoa, or of wine, and also of any whole packages of other goods, and to cause or permit the same to be destroyed, and to deduct such quantity of tobacco or coffee, or of pepper or cocoa, or the contents of such whole packages, from the total quantity of the same importation in computing the amount of the deficiency of such total quantity. — § 37.

**No Foreign Casks, &c., to be used for re-packing unless Duties paid thereon.** — No foreign casks, bottles, casks, tins, or other materials, whatever, except any in which some goods shall have been imported and warehoused, shall be used in the re-packing of any goods in the warehouse, unless the full duties shall have been first paid thereon. — § 38.

**Goods may be delivered out of Warehouse by leave of Commissioners of Customs.** — It shall be lawful for the commissioners of customs to permit any goods to be taken out of warehouse for any such purpose as may appear to them to be expedient, under such regulations and restrictions as they may think fit to direct, without payment of duty of customs under security, nevertheless, by bond to the satisfaction of the said commissioners, that such regulations and restrictions shall be duly complied with, and that such goods shall be returned to the warehouse within such time as they shall appoint. — § 39.

**Goods in Bulk delivered.** — No parcels of goods so warehoused which were imported in bulk shall be delivered, except in the whole quantity of such parcel, or in a quantity not less than 1 ton weight, unless by special leave of the proper officers of customs. — § 40.

**Packages to be marked before Delivery.** — No goods so warehoused shall be delivered, unless the name of the package containing the same, shall have been marked in such distinguishing manner as the commissioners of customs shall deem necessary and practicable, and shall from time to time direct. — § 41.

**Commissioners of Customs may approve of Premiums for refining Sugar.** — Upon the application to the commissioners of customs of any person actually carrying on the business of a sugar refiner at any of the ports of London, or Liverpool, Bristol, Hull, Greenock, or Glasgow, or any other port to be approved of by any three lords of the treasury, it shall be lawful for the commissioners of customs by their order to approve of such premium for the refining of sugar, to be paid to the refiner for exportation only, on it being made appear to the satisfaction of the said commissioners that the said premiums are in fit every respect for receiving such sugars, and wherein the same may be safely deposited. — § 42.

**On Approval thereof, Officers empowered to deliver Sugars Duty free for refining for Re-exportation.** — On the approval of any premium as bonded sugar houses as aforesaid, it shall be lawful for the officers of customs at the ports respectively where such premiums are situated to deliver, without payment of duty, to the party or parties so applying as aforesaid, on entry with the proper officer of customs, any quantity of foreign sugar, or of sugar the produce of any British possession, for the purpose of being there refined under the lock of the crown for exportation only; and all sugars so delivered shall be lodged and secured in such premises, under such conditions, regulations, and restric-

time as the said commissioners shall from time to time direct; provided always, that it shall be lawful for the said commissioners, by their order, to revoke or alter any former order of approval of any such premises. — § 45.

**Refuse to give Bond.** — Upon the entry of the sugar to be refined in any premises approved of under the authority of this Act, the refiner on whose premises the same is to be refined shall give bond to the satisfaction of the officers of the customs in the penalty of double the amount of the duty payable upon a like quantity of sugar of the British plantations, with a condition that the whole of such sugar shall be actually subjected to the process of refinement upon the said premises, and that within four months from the date of such bond the whole of the refined sugar and treacle produced by such process shall be either duly exported from the said premises or delivered into an approved bonded warehouse under the locks of the crown, for the purpose of being eventually exported to foreign parts. — § 46.

**Decrease and Increase may be ascertained and allowed.** — Under Regulations of the Treasury. — Whereas some sorts of goods are liable in time to decrease, and some to increase, and some to fluctuation of quantity, by the effect of the atmosphere and other natural causes, and it may be necessary in some cases that the duties should not be charged upon the deficiency arising from such causes; be it therefore enacted, that it shall be lawful for the lords of the treasury to make regulations for ascertaining the amount of such decrease or increase of the quantity of any particular sort of goods, and to direct in what proportion any abatement of duty payable under this Act for deficiencies shall be made on account of any such decrease; provided always, that if such goods be lodged in warehouses of special security, or declared in the order of appointment to be of special security, no duty shall be charged for any amount whatever of deficiency of any of such goods on the exportation thereof, except in cases where suspicion shall arise that part of such goods has been clandestinely conveyed away, nor shall any such goods (unless they be wine or spirits) be measured, counted, weighed, or gauged, for exportation, except in such cases of suspicion. — § 45.

**Allowances for natural Waste of Wine, &c.** — For any wine, spirits, coffee, cocoa nuts, or pepper, lodged in warehouses not being or being declared to be of special security, the following allowances for natural waste, in proportion to the time during which any such goods shall have remained in the warehouse, shall be made upon their exportation thereof, according as such allowances are hereinafter respectively set forth; viz.

Wine, upon every cask;

For any time exceeding one year, one gallon:

For any time exceeding one year and not exceeding two years, two gallons:

For any time exceeding two years, three gallons:

Spirits, upon every one hundred gallons hydrometer proof;

For any time not exceeding six months, one gallon:

For any time exceeding six months and not exceeding twelve months, two gallons:

For any time exceeding twelve months and not exceeding eighteen months, three gallons:

For any time exceeding eighteen months and not exceeding two years, four gallons:

For any time exceeding two years, five gallons:

Coffee, cocoa nuts, pepper, for every one hundred pounds, and so in proportion for any less quantity, two pounds. — § 46.

**Cases of Embarrassment and Waste through Misconduct of Officers.** — In case it shall happen that any of the merchandise, waste, spoil, or destruction shall be made of or in any goods or merchandise which shall be warehoused in warehouses under the authority of this Act, by or through any wilful misconduct of any officers or officers assistant or excise, such officer or officers shall be deemed guilty of a misdemeanor, and shall upon conviction suffer such punishment as may be inflicted by law in cases of misdemeanor; and if such officer shall be so prevented by conviction by the masters, consignees, or proprietors of the goods or merchandise so embarrassed, wasted, spoiled, or destroyed, then and in such case no duty of customs or excise shall be payable for or in respect of such goods or merchandise so embarrassed, wasted, spoiled, or destroyed, and no forfeiture or seizure shall take place of any goods and mer-

chandise so warehoused in respect of any deficiency caused by such embarrassment, waste, spoil, or destruction, and no damage occasioned by such embarrassment, waste, spoil, or destruction of such goods or merchandise, not being occasioned by fire, shall be repaid and made good to such master, consignee, or proprietor, by the commissioners of customs or excise, under such orders, regulations, and directions as it be for that purpose made and given by the lords of the treasury or three of them. — § 47.

**Bound on Entry Outwards.** — Whereas it is expedient to make regulations for the exporting of such goods to ports beyond seas as have been imported into the U. K. for sale, per bona, or otherwise, and warehouse and warehouse receipts, and importation thereof, or notwithstanding the same may be permitted to be used in the U. K.; be it therefore enacted, that upon the entry outwards of any goods to be exported from the U. K. to any foreign port, the person in whose name the same shall be used shall give security by bond in double the amount of duty payable by law upon the importation of such goods, with an efficient surety, that such goods shall be duly sold, re-exported, and shall be landed at the place for which the same are entered outwards, or otherwise accounted for to the satisfaction of the commissioners of customs. — § 48.

**Goods removed from Warehouse made Care of the Officer.** — Goods taken from the warehouse for removal or for exportation shall be removed, or shall be carried to be shipped, sold, or sent to or with the authority or permission of the proper officers of customs, and in each case the person in whose name such goods are taken, and by such roads or ways, as those officers of customs shall authorize, permit, or direct, and if such goods are not removed or carried as aforesaid, — § 49.

**Shelf not to be the Duty Free.** — No such goods shall be not be lawful for any person to export any such goods as warehoused, nor to enter for exportation to ports beyond seas any goods so warehoused, in any ship which shall sail of the bottom of sixty tons or upwards. — § 50.

**Goods landed in Docks to be Taken for Freight to the Landing.** — All goods or merchandise which shall be landed in docks, and lodged in the custody of the proprietors of the said docks under the provisions of this Act, and which shall be as forfeited to H. M., shall, when so landed, continue to be subject or liable to be so landed, and the same claim for freight as aforesaid, or their servants or agents, or any other person, or persons, or of any other person or persons concerned in or freight of the same, from or out of which such goods or merchandise respectively were landed, and liable to be so landed, as aforesaid, on board such ship or vessel, or to be so landed, and the directors and proprietors of any such dock or in which any such goods or merchandise may be landed as aforesaid, or their servants or agents, or any other person, shall and may, and they are hereby authorized, required, and required, upon due notice in that behalf given to him by such master or masters, owner or owners, or other person or persons, to detain upon such goods and merchandise, as being seized as forfeited to H. M. in the warehouse brought to the said docks as aforesaid, until the respective freight which the same shall be subject and liable as aforesaid to be daily paid or satisfied, together with the rate and charge at which the same shall have been subject and liable, and not a deposit shall have been made by the owner or owners or consignee or consignees of such goods or merchandise, and a notice to the claim for demands made by the master, owner, or owners of the respective ships or vessels, or other persons as aforesaid, for or on account of freight upon such goods or merchandise, which deposit the said directors or proprietors of such dock or docks, or their agents or servants, or any other person, directed to receive and hold in trust, until the claim or claims for freight upon such goods shall have been satisfied, as proof of which, and demand made by the master or masters, owner or owners, or their agents or servants, or any other person, as aforesaid, shall have been made, and the rate and charge due upon the said goods being first paid, the said deposit shall be returned to him or them by the said directors or proprietors of such dock or docks, and the claim or claims on the said deposit shall have been made as aforesaid. — § 51.

**Warehousing Ports, &c.** — Certain ports only are warehousing ports; nor may all sorts of goods be warehoused in every warehousing port. We subjoin a list of the warehousing ports in Great Britain and Ireland. Goods of all sorts may, speaking generally, be warehoused in the principal ports; but the regulations as to those that may be warehoused in the lesser ports are perpetually varying.

WAREHOUSE, RENT.					
Packages of baggage, small packages of produce, etc. per ton					

#### WAREHOUSE RENT.

Rates for warehouse rent on goods deposited in the king's warehouses at the several outlets, viz. —

On large cases and vats containing toys or other merchandise, and packages of wine and other liquids, per week, 6d. each.

Packages of baggage, small packages of produce, to be kept, per week, 6d. each. All other packages to be before described (except tobacco), per week, 6d. each. For every hundred of tobacco deposited in the king's warehouses at London, to be kept for every hundred of tobacco, 12d. For every hundred of tobacco warehoused in the king's warehouses at the several outlets, 12d. per week.

**WATCHES** (Ger. *Uhren, Taschenuhren*; Fr. *Montres*; It. *Oriuoli da tasca, o da succoccia*; Sp. *Relojes de faltriguera*; Rus. *Karmanuie tschasii*), portable machines, generally of a small size and round flat shape, that measure and indicate the successive portions of time; having, for the most part, their motions regulated by a spiral spring. When constructed on the most approved principles, and executed in the best manner, a watch is not only an exceedingly useful, but a most admirable piece of mechanism. It has exercised the genius and invention of the most skilful mechanics, as well as of some of the ablest mathematicians, for nearly 3 centuries. And, considering the smallness of its size, its capacity of being carried about uninjured in every variety of position, the number and complexity of its movements, and the extraordinary accuracy with which it represents the successive portions of time as determined by the rotation of the earth on its axis, we need not wonder at Dr. Paley having referred to it as a striking specimen of human ingenuity.

Spring watches are constructed nearly on the same principle as pendulum clocks. Instead of the pendulum in the latter, a spring is used in the former, the isochronism of the vibrations of which corrects the unequal motions of the balance.

*Historical Notice.* — The invention of spring watches dates from about the middle of the 16th century, and has been warmly contested for Huygens and Hooke. The English writers generally incline in favour of the latter. Dr. Hutton says — (*Mathematical Dictionary*, art. *Watch*), that the words “Rob. Hooke inventit, 1656,” were inscribed on the dial plate of a watch presented to Charles II. in 1675. But Montucla affirms (*Histoire des Mathématiques*, tom. ii. p. 413. ed. 1800), that Huygens made this “*belle découverte*” in 1656, and presented a spring watch to the States of Holland in 1657. Comparing these statements, it certainly appears that the claim of Huygens to the priority of the discovery is the better established of the two. We do not, however, believe that either of those distinguished persons owed, in this respect, any thing to the other. The probability seems to be, that the happy idea of employing a spring to regulate the motion of watches occurred to them both nearly at the same time.

*Improvement of Watches.* — Owing to the facility with which the longitude may be determined by the aid of accurately going watches, it is of great importance to have them made as perfect as possible. In this view, liberal premiums have been given to the makers of the best marine watches, or chronometers, by the governments of England, France, Spain, &c. In the reign of Queen Anne, parliament offered a reward of 50,000*l.* to any one who should make a watch, or other instrument, capable of determining the longitude at sea, within certain limits. This magnificent premium was awarded, in 1764, to the celebrated John Harrison, for a marine watch, which, being tried in a voyage to Barbadoes, determined its longitude with even more than the required accuracy. Other premiums, though of inferior amount, were subsequently given to Messrs. Mudge, Arnold, Earnshaw, &c. Since 1822, 2 prizes, one of 300*l.* and one of 200*l.*, have been annually given to the makers of the 2 chronometers adjudged to be the best, after having been submitted to a twelvemonth's trial at the Royal Observatory at Greenwich. And to such perfection has the manufacture attained, that some of the chronometers employed by navigators, though carried into the most opposite climates, have not varied to the extent of 2 seconds in their mean rate of going throughout the year.

*Watch Manufacture.* — The watch-making business, though latterly a good deal depressed, is largely carried on in London; the artists of which have attained to a high degree of excellence in this department. There may be about 14,000 gold and 86,000 silver watches annually assayed at Goldsmiths' Hall, London — (*Jacob on the Precious Metals*, vol. ii. p. 413.) — the aggregate value of which is, probably, not much under 600,000*l.* The manufacture is also carried on to a considerable extent at Liverpool, Coventry, Edinburgh, &c. Watch movements used to be extensively manufactured at Prescot in Lancashire; but latterly, we believe, the manufacture has been withdrawing to Liverpool.

On the Continent, watches are principally manufactured in Paris, Geneva, and in Neuchâtel. Some of the French and Swiss watches, particularly the latter, are excellent; but, generally speaking, they are slight, and inferior to those made in London. Paris and Geneva watches are largely exported to foreign countries; and are everywhere in high estimation, particularly among the ladies.

Watches impressed with any mark or stamp, appearing to be or to represent any legal British assay mark or stamp, or purporting by any mark or appearance to be of the manufacture of the U. Kingdom, or not having the name and place of abode of some foreign maker abroad visible on the frame and also on the face, or not being in a complete state, with all the parts properly fixed in the case, may not be imported into the U. Kingdom, even for the purpose of being warehoused. — (*3 & 4 Will. 4. c. 52. § 58.*)

*Watches in China.* — Pretty considerable numbers of European watches are imported into China; and it may be worth mentioning, as a curious instance of the diversity of tastes, that the Chinese, as well as most other Eastern nations, who can afford it, uniformly wear watches in pairs! This sort of extravagance is not, however, confined to watches, but extends to a variety of other articles. Shawls, for example, are invariably worn in India in pairs of exactly the same pattern; and it is hardly possible, indeed, to find a native dealer who will sell a single shawl.

**WATER.** It may be thought unnecessary, perhaps, to say any thing in a work of this sort with respect to a fluid so well known and so abundant. But, besides being an indispensable necessary of life, water is, in most large cities, an *important commercial article*. It is in the latter point of view, principally, that we mean to consider it. — Inasmuch, however, as the mode of supplying different places with water, and its price, necessarily vary in every possible way, we shall limit our remarks on these subjects to the metropolis only. The few remarks we intend to offer of a general nature will apply indifferently to any populous place, the supply of which with water occasions a considerable expense.

1. *Quality of Water.* — Dr. Ure has made the following statements with respect to the quality of water: — “Water,” says he, “is a very transparent fluid, possessing a moderate degree of activity with regard to organised substances, which renders it friendly to animal and vegetable life, for both which it is, indeed, indispensably necessary. Hence it acts but slightly on the organs of sense, and is therefore said to have neither taste nor smell. It appears to possess considerable elasticity, and yields in a perceptible degree to the pressure of air in the condensing machine.

“Native water is seldom, if ever, found perfectly pure. The waters that flow within or upon the surface of the earth contain various earthy, saline, metallic, vegetable, or animal particles, according to the substances over or through which they pass. Rain and snow waters are much purer than these, although they also contain whatever floats in the air, or has been exhaled along with the watery vapours.

"The purity of water may be known by the following marks or properties of pure water:—

- "1. Pure water is lighter than water that is not pure.
  - "2. Pure water is more fluid than water that is not pure.
  - "3. It has no colour, smell, or taste.
  - "4. It wets more easily than the waters containing metallic and earthy salts, called hard waters, and feels softer when touched.
  - "5. Soap, or a solution of soap in alcohol, mixes easily and perfectly with it.
  - "6. It is not rendered turbid by adding to it a solution of gold in aqua regia; or a solution of silver, or of lead, or of mercury, in nitric acid; or a solution of acetate of lead in water.
- "Water was, till modern times, considered as an elementary or simple substance; but it is now ascertained to be a compound of oxygen and hydrogen."

2. *Supply of Water.*—London was very ill supplied with water previously to the early part of the 17th century, when the New River water was introduced into the city. This exceedingly useful work was planned and carried into effect by the famous Sir Hugh Middleton, who expended his whole fortune on the project; having, like many other public benefactors, entailed poverty on himself and his posterity by embarking in an undertaking productive of vast wealth to others, and of great public utility. The New River has its principal source near Chadwell, between Hertford and Ware, about 20 miles from London; but the artificial channel in which the water is conveyed is about 40 miles in length. Sir Hugh Middleton encountered innumerable difficulties during the progress of the undertaking, which it is probable would have been abandoned, at least for a time, but for the aid afforded by James I. The New River Company was incorporated in 1619, 6 years after the water had been brought to the reservoir at Islington. The undertaking yielded very little profit for a considerable number of years; but it has since become extremely profitable; so much so, that an original 500*l.* share has been sold for 16,000*l.*!

The Chelsea Water-Works Company was formed in 1723, and (with the aid of 3 smaller companies, none of which are now in existence) it, and the New River, supplied all that part of the metropolis north of the Thames with water, down to the year 1810. In that year, however, 3 new companies, the East London, West Middlesex, and Grand Junction, were established, under the authority of different acts of parliament. At this moment the metropolis is supplied with water by the following companies:—

New River,  
Chelsea,  
East London,  
West Middlesex,

Grand Junction,  
Lambeth,  
Vauxhall, or South London, and  
Southwark Water Works.

The following statements with respect to these companies are taken from Mr. Wade's treatise on the police of the metropolis. The Report of the commissioners appointed by government in 1827, to inquire into the state of the supply of water in the metropolis, is the principal authority on which they are founded.

"*The New River Company* get their supply from the spring at Chadwell, between Hertford and Ware. It comes in an open channel, of about 40 miles in length, to reservoirs at Clerkenwell. There are 3 reservoirs, having between them a surface of about 5 acres, and an average depth of 10 feet. These reservoirs are 844 feet above low water mark in the Thames and, by means of steam engines and a stand-pipe, an additional height of 60 feet can be given to the water, so that all the mains belonging to this Company are kept full of a considerable pressure of water. The highest service given by the New River is the cistern on the top of Covent Garden Theatre. The aqueduct by which the water is brought has only a fall of 3 inches per mile; thus it wastes, by evaporation, during the drought of summer, and is impeded by frost in the winter. At these times the Company pump an additional supply from the Thames, at Broken Wharf, between Blackfriars and Southwark Bridges. To this, however, they seldom have recourse; and their engine, erected since the works at London Bridge were broken down, has worked only 176 hours in the year. The New River Company supply 66,000 houses with water, at an annual average of about 1,100 hogsheads each, or, in all, about 75,000,000 hogsheads annually.

"*The East London Water Works* are situated at Old Ford, on the river Lea, about 3 miles from the Thames, and a little below the point to which the tide flows up the Lea. By the act of parliament, this Company must take its water when the tide runs up and the mills below have ceased working. The water is pumped into reservoirs and allowed to settle; and a supply of 6,000,000 gallons is daily distributed to about 42,000 houses. This Company supply no water at a greater elevation than 80 feet, and the usual height at which the delivery is made to the tenants is 6 feet above the pavement; they have 200 miles of iron pipes, which, in some places, cost them 7 guineas a yard. This and the New River are the only companies which do not draw their supply of water entirely from the Thames.

"*The West Middlesex* derive their supply of water from the Thames, at the upper end of Hammer-smith, about 94 miles above London Bridge, and where the bed of the Thames is gravel. The water is forced by engines to a reservoir at Kensington, 308 feet long, 123 wide, and 20 deep, paved and lined with bricks, and elevated about 190 feet above low water in the Thames. They have another reservoir on Little Primrose Hill, about 70 feet higher, and containing 88,000 hogsheads of water, under the pressure of which the drains are kept charged, in case of fires. They serve about 15,000 tenants, and the average daily supply is about 2,350,000 gallons.

"*The Chelsea Water Works* derive their supply from the Thames, about  $\frac{1}{4}$  of a mile east of Chelsea Hospital; and they have 2 reservoirs—one in the Green Park and another in Hyde Park—the former having an elevation of 44 feet, and the latter of 70. These reservoirs, till within these few months, had never been cleaned, nor had there been any preparation made for that purpose in their construction. About  $\frac{1}{3}$  of the water served out by this Company is allowed to settle in these reservoirs, and the remaining  $\frac{2}{3}$  are sent directly from the Thames. Latterly, the Company have been making preparations for filtering the water; and also for allowing it to settle in reservoirs, at Chelsea, before it is delivered into the mains. The Chelsea Company serve about 12,400 houses, and the average daily supply is 1,760,000 gallons.

"*The Grand Junction Company* derive the whole of their supply from the Thames, immediately adjoining Chelsea Hospital; thence it is pumped, without any filtration or settling, into 3 reservoirs at Paddington. These reservoirs are about 71, 86, and 92 feet above high water mark in the Thames; their

united contents are 19,355,840 gallons; and by means of a stand-pipe, the water is forced to the height of 147 feet, or about 61 feet above the average height in the reservoir. The number of houses supplied by the Grand Junction Company is 7,700, and the average daily supply is about 2,900,000 gallons.

"The *Lambeth Company* take their supply from the Thames, between Westminster and Waterloo Bridges. It is drawn from the bed of the river by a suction pipe, and delivered to the tenants without being allowed to subside; there being only a cistern of 400 barrels at the works, as a temporary supply, until the engines can be started. The greatest height to which the Company force water is about 40 feet; the number of houses that they supply is 16,000, and the average service is 1,344,000 gallons daily.

"The *South London, or Vauxhall Company*, take their supply from the river Thames by a tunnel, which is laid 6 feet below low water mark, and as far into the river as the third arch of Vauxhall Bridge. At that particular place, the bed of the Thames is described as being always clean, and without any of those depositions of mud and more offensive substances that are found in many other places. Besides the greater purity of the bed of the Thames here than where any other Company on the south side take their supply, the Company allow the water to settle in their reservoirs. The Vauxhall Company supply about 10,000 houses with about 1,000,000 gallons of water daily.

"The *Southwark Water Works* (the property of an individual) are supplied from the middle of the Thames, below Southwark and London Bridges; and the water thus taken is sent out to the tenants without standing to settle, or any filtration further than it receives from passing through wire grates and small holes in metallic plates. The number of houses supplied by these works is about 7,000, and the average daily supply about 720,000 gallons."

The results may be collected into a Table, as follows:—

Companies.	Services.	Average per Day, Gallons.	Gallons Annually.	Average per House, Gallons.
1. New River - - -	67,000	13,000,000	4,056,000,000	182
2. East London - - -	42,000	6,000,000	1,872,000,000	113
3. West Middlesex - - -	15,000	2,250,000	708,000,000	150
4. Chelsea - - -	12,400	1,760,000	549,120,000	142
5. Grand Junction - - -	7,700	2,900,000	875,600,000	363
6. Lambeth - - -	16,000	1,344,000	388,128,000	77
7. South London - - -	10,000	1,000,000	312,000,000	109
8. Southwark - - -	7,000	720,000	244,560,000	102
Total - - -	183,100	28,774,000	8,977,388,000	157

Average per house north of the river - 190 gallons.  
Average per house south of the river - 93 ditto.

It would appear from this Table, as if the supply of water were either excessive on the Middlesex side of the river, or very deficient on the Surrey side. But this discrepancy is more apparent than real. The inhabitants in the northern district, speaking generally, decidedly richer than those in the southern district; they have, particularly in the west end of the town, larger families, and a much greater number of horses. There is also a much larger expenditure of water upon the roads in Middlesex than in Surrey. Still, however, we believe that there is a more liberal supply in the former than in the latter.

*Monopoly of the Water Companies.*—The sanction of parliament was given to the 3 new companies formed in 1810, not so much in the view of increasing the actual supply of water, as of checking monopoly, and reducing the rates by their competition. But these expectations have not been realised. For a while, indeed, the competition of the several companies was exceedingly injurious to their interests, and occasioned the total destruction of some of the inferior ones; but no sooner had this happened, than the others discovered that their interests were in reality the same, and that the true way to promote them was to concert measures together. In furtherance of this object, the 5 companies for the supply of that part of the metropolis north of the river proceeded to divide the town into as many districts, binding themselves, under heavy penalties, *not to encroach on each other's estates*; and having in this way gone far to secure themselves against any new competitors, their next measure was to add *five and twenty per cent.* to the rates established in 1810; and these have, in several instances, been still further augmented! The benefits that were expected to result from their multiplication have, therefore, proved quite imaginary; and though the supply of water has been increased, it is neither so cheap nor so good as it might have been under a different system.

The results given in the above table apply to 1827; but in 1834 the following statement was laid before the House of Commons. It exhibits the number of houses supplied with water by the different companies, the quantity furnished to each house, and the different rates of charge.

Water Companies.	Houses supplied.	Total Yearly Supply.	Daily Average to each.	Charge for 1,000 Hds.
New River Company - - -	70,145	114,650,000	241	17 2
Chelsea do. - - -	13,894	15,733,000	168	29 0
Grand Junction do. - - -	8,780	21,704,567	363	48 6
W. Middlesex do. - - -	16,000	20,000,000	185	45 6
E. London do. - - -	46,421	37,810,594	121	28 0
S. London do. - - -	12,046	8,100,000	100	15 0
Lambeth do. - - -	16,664	11,998,600	184	17 0
Southwark do. - - -	7,100	7,000,000	100	21 0
Total water supply - - -	191,068	237,014,761		

The striking discrepancies that appear in this table tend to confirm the principle we endeavoured to enforce in the article COMPANIES, that certain restrictions should, in almost all cases, be imposed on companies for the supply of water to a large city. These are not undertakings that can be safely trusted to the free principles that may generally be relied upon. If there be only one set of springs adjacent to a town, or if there be certain springs more conveniently situated for supplying it with water than any other, a company acquiring a right to such springs, and incorporated for the purpose of conveying the water to town, thereby gain an *exclusive advantage*; and if no limits be set to its dividends, its partners may make an enormous profit at the expense of the public, without its being possible materially to reduce them by means of competition. What has happened in the case of the New River Company sufficiently evinces the truth of what has now been stated. Had its dividends been limited to any thing like a reasonable profit, the water that is at present supplied by its means might have been furnished for a small part of what it actually costs. But in cases of this sort, priority of occupation, even without any other peculiar advantage, goes far to exclude all regular and wholesome competition. A company that has got pipes laid down in the streets may, if threatened by the competition of another company, lower its rates so as to make the latter withdraw from the field; and as soon as this is done, it may revert to its old, or even to higher charges. It is not, in fact, possible, in cumbrous concerns of this sort, to have any thing like competition, in the ordinary sense of the term; and experience shows that whenever it is attempted, it only continues for a limited period, and is sure to be in the end effectually suppressed. We are, therefore, clearly of opinion, that no company should ever be formed for the conveyance of water into a large city, without a maximum being set both to the rates and the dividends;

giving the company an option, in the event of the maximum rate yielding more than the maximum dividend, either to reduce the rate, or to apply the surplus to the purchase of the company's stock; so that ultimately the charge on account of the dividends may be got rid of.

We are glad to have to add, that we are supported in what is now stated by the *Report of the Select Committee of the House of Commons on the supply of water for the metropolis, printed in 1821*. It is there said — "The public is at present without any protection even against a further indefinite extension of demand. In cases of dispute there is no tribunal but the Boards of the companies themselves, to which individuals can appeal; there are no regulations but such as the companies may have voluntarily imposed upon themselves, and may therefore at any time revoke, for the continuance of the supply in its present state, or for defining the cases in which it may be withdrawn from the householder. All these points, and some others of the same nature, indispensably require legislative regulation, where the subject matter is an article of the first necessity, and the supply has, from peculiar circumstances, got into such a course that it is not under the operation of those principles which govern supply and demand in other cases."

"The principle of the acts under which these companies were instituted, was to encourage competition; and certainly in this, as in other cases, it is only from competition, or the expectation of competition, that a perfect security can be had for a good supply. But your committee are satisfied, that, from the peculiar nature of these undertakings, the principle of competition requires to be guarded by particular checks and limits in its application to them, in order to render it effectual, without the risk of destruction to the competing parties and thereby, ultimately, of a serious injury to the public." And the committee proceeds to remark — "The submission of their accounts annually to parliament, for a few years, would necessarily throw light on this part of the question."

We think that it would be highly expedient to adopt the suggestions of the committee, by calling upon the companies to lay annually detailed statements of their affairs before parliament. They should be obliged in these statements to give an account of the rates charged by them, and to make a special report as to every case in which they have withdrawn water from a householder. It is to no purpose to repeat, in opposition to this proposal, the common-places about competition securing for the citizens a sufficient supply of water at the lowest prices, in the same way that the competition of bakers and butchers secures them supplies of beef and bread. The statements already made show that there is no analogy whatever in the circumstances under which these articles are supplied. If a man be dissatisfied with any particular butcher or baker, he may go to another; but *it is not possible for him to change his water-servant, unless he also change the place of his residence*. No water company will encroach upon the district assigned to another; and supposing an individual unlucky enough to quarrel with those who have the absolute monopoly of the supply of the district in which he resides, he must either migrate to another, or be without water, unless he can get a supply upon his own premises! Such being the actual state of things, it is quite ludicrous to talk about competition affording any real security against extortion and abuse. Even the publication of the proceedings of the companies would be a very inadequate check on their conduct; but such as it is, it is perhaps the only one that can now be resorted to; and as it would have considerable influence, it ought not, certainly, to be neglected.

3. *Quality of the London Water*. — All the companies, with the exception of the New River and East London Companies, derive their supplies of water from the Thames; and in consequence of their taking it up within the limits to which the tide flows, it is necessarily, in the first instance, loaded with many impurities. But the reports that were formerly so very prevalent, with respect to the deleterious quality of the water taken from the river, have been shown to be very greatly exaggerated. The statement of Dr. Bostock, given in the *Report of the commissioners*, shows that by far the greater part of the impurities in the Thames water are mechanically suspended in, and not chemically combined with, it; and that they may be separated from it by filtration, or by merely allowing it to stand at rest. Most of the companies have recently made considerable efforts to improve their water; and though they have not done in this respect as much as they might and should have done, a considerable improvement has, on the whole, been effected: and notwithstanding all that has been said to the contrary, we have been assured, by those best qualified to form an opinion on such a subject, that, though not nearly so pure as a little pains would render it, there is not the slightest foundation for the notion that its impurities have been such as to affect, in any degree, the health of the inhabitants.

4. *Water for Ships*. — Various improvements have been made in the art of preserving water on board ships. Of these, the principal are the charring the inside of the casks in which the water is kept, and the substitution of iron tanks for casks. The latter, being made of the required shape, may be conveniently stowed into any part of the ship. In men-of-war, the iron tanks serve as ballast; the water being brought up by a forcing pump. Water is found to preserve better in them than in any other sort of vessel. Drip-stones may be employed with much advantage in the purification of water. When water is taken on board from a river into which the tide flows, it should, of course, be raised at low ebb.

WAX (*Ger. Wachs; Fr. Cire; It. and Sp. Cera; Rus. Wosk*), a vegetable product. Several plants contain wax in such abundance, as to make it worth while to extract it from them. But all that is known in commerce consists of bees' wax. The honey is first pressed from the comb, and the wax is then melted into cakes. It has a slight odour of honey, is insipid, and of a bright yellow hue. It is brittle, yet soft, and somewhat unctuous to the touch. It is often adulterated with earth, pea meal, resin, &c. The presence of the former may be suspected when the cake is very brittle, or when its colour inclines more to gray than to yellow; and the presence of resin may be suspected when the fracture appears smooth and shining, instead of being granulated. Wax, when bleached or purified, is white, perfectly insipid, inodorous, and somewhat translucent; it is harder, less unctuous to the touch, heavier, and less fusible than yellow wax. It is sometimes adulterated with the white oxide of lead to increase its weight, with white tallow, and with potato starch. The first is detected by melting the wax in water, when the oxide falls to the bottom; the presence of tallow is indicated by the wax being of a dull opaque white, and wanting the transparency which distinguishes pure wax; and starch may be detected by applying sulphuric acid to the suspected wax, as the acid carbonises the starch, without acting on the wax. — (*Thomson's Chemistry, and Dr. A. T. Thomson's Dispensatory.*)

Notwithstanding the large supply of wax produced at home, a considerable quantity is imported from abroad; and there can be no doubt that the imports would have been much greater, but for the magnitude of the duty, which formerly amounted to 10s. a cwt. on wax brought from a British possession, and to 30s. a cwt. on that brought from a foreign country. In 1843, however, these duties were reduced to 1s. and 2s. a cwt., which, there can be little doubt, will lead to a material increase of consumption. Of 5,463

cwts. of wax imported in 1840, 5,778 cwts. were brought from the western coast of Africa; 1,814 cwts. from Tripoli, Tunis, &c.; 1,435 from the East India Company's territories, &c.

**WEIGHTS AND MEASURES.** Weights are used to ascertain the gravity of bodies,—a quality depending partly on their magnitude, and partly on their density. Measures are used to determine the magnitude of bodies, or the space which they occupy.

(For an account of the weights and measures used in foreign countries, and their equivalents in English weights and measures, see the notices of the great sea-port towns dispersed throughout this work. Thus, for the Russian weights and measures, see *PERESVANO*; for those of China, see *CARROW*; &c.)

Neither the magnitude nor the weight of any one body can be determined, unless by comparing it with some other body selected as a standard. It is impossible, indeed, to form any idea in respect of magnitude or weight, except in relation to some definite space or weight with which we are acquainted. We say that one article weighs 1 pound, another 2 pounds, a third 3, and so on; meaning not only that these weights are to each other as 1, 2, 3, &c., but also that the weight or specific gravity of the first is equal to the known and determinate weight denominated a pound, that the second is equal to 2 pounds, and so on.

*Standards of Weight and Measure.*—Standards of lineal measure must have been fixed upon at the earliest period, and appear to have consisted principally of parts of the human body,—as the cubit, or length of the arm from the elbow to the tip of the middle finger: the foot; the *ulna*, arm, or yard; the span; the digit, or finger; the fathom, or space from the extremity of one hand to that of the other, when they are both extended in opposite directions; the pace, &c. Large spaces were estimated by measures formed out of multiples of the smaller ones; and sometimes in day's journeys, or by the space which it was supposed an ordinary man might travel in a day, using a reasonable degree of diligence.

But lineal measures can only be used to determine the magnitude of solid bodies; the magnitude of bodies in a liquid or fluid state has to be determined by what are called measures of capacity. It is probable that, in the infancy of society, shells, or other hollow instruments afforded by nature, were used as standards. But the inaccuracy of the conclusions drawn from referring to them must soon have become obvious; and it early occurred, that to obtain an accurate measure of liquids nothing more was necessary than to constitute an artificial one, the dimensions, and consequently the capacity, of which should be determined by the lineal measures previously adopted.

The determination of the gravity or weight of different bodies supposes the invention of the balance. Nothing is known of the steps which led to its introduction; but it was used in the remotest antiquity. It seems probable that, at first, cubes of some common lineal measure, as a foot, or the fraction of a foot, formed of copper, iron, or some other metal, were used as standards of weight. When the standard was selected, if it was desired to ascertain the specific gravity or weight of any given article, all that was necessary was to put it into one of the scales of the balance, and as many cubes or parts of cubes on the other as might be necessary to counterpoise it.

Weights have, however, been frequently derived from grains of corn. Hence, in this, and in some other European countries, the lowest denomination of weight is a *grain*; and 32 of these grains are directed, by the ancient statute called *Compositio Mensurarum* to compose a pennyweight, whereof 20 make an ounce, 12 ounces a pound, and so upwards.

In every country in which commercial transactions are extensively carried on, the importance of having weights and measures determined by some fixed standard becomes obvious to every one. But as the size of different parts of the human body differ in different individuals, it is necessary to select some durable article,—a metallic rod, for example,—of the length of an ordinary cubit, foot, &c., and to make it a standard with which all the other cubits, feet, &c. used in mensuration shall correspond. These standards have always been preserved with the greatest care: at Rome, they were kept in the temple of Jupiter; and among the Jews, their custody was intrusted to the family of Aaron.—(*Paucion, Métrologie*, p. 223.)

The principal standards used in the ancient world, were, the cubit of the Jews, from which their other measures of length, capacity, and weight were derived; and the foot of the Greeks and Romans.

In England, our ancient historians tell us that a new, or rather a revived, standard of lineal measure was introduced by Henry I., who ordered that the *ulna*, or ancient ell, which corresponds to the modern yard, should be made of the exact length of his own arm, and that the other measures of length should be raised upon it. This standard has been maintained, without any sensible variation. In 1742, the Royal Society had a yard made, from a very careful comparison of the standard ells or yards of the reigns of Henry VII. and Elizabeth kept at the Exchequer. In 1758, an exact copy was

made of the Royal Society's yard; and this copy having been examined by a committee of the House of Commons, and reported by them to be equal to the standard yard, it was marked as such; and this identical yard is declared, by the act 5 Geo. 4. c. 74, to be the standard of lineal measure in Great Britain. The clause in the act is as follows:—

"From and after the 1st of May, 1825 (subsequently extended to the 1st of January, 1826), the straight line or distance between the centres of the 2 points in the gold studs in the straight brass rod, now in the custody of the clerk of the House of Commons, whereon the words and figures 'STANDARD YARD, 1760,' are engraved, shall be the original and genuine standard of that measure of length or lineal extension called a yard; and the same straight line or distance between the centres of the said 2 points in the said gold studs in the said brass rod, the brass being at the temperature of 62° by Fahrenheit's thermometer, shall be and is hereby denominated the 'IMPERIAL STANDARD YARD,' and shall be and is hereby declared to be the unit or only standard measure of extension, wherefrom or whereby all other measures of extension whatsoever, whether the same be lineal, superficial, or solid, shall be derived, computed, and ascertained; and that all measures of length shall be taken in parts or multiples or certain proportions of the said standard yard; and that 1-3d part of the said standard yard shall be a foot, and the 12th part of such foot shall be an inch; and that the pole or perch in length shall contain 5½ such yards, the furlong 220 such yards, and the mile 1,760 such yards."—§ 1.

The superficial measures are formed on the basis of the square of this standard; it being enacted, that

"The rood of land shall contain 1,210 square yards, according to the said standard yard; and that the acre of land shall contain 4,840 such square yards, being 160 square perches, poles, or rods."—§ 2.

*Uniformity of Weights and Measures.*—The confusion and inconvenience attending the use of weights and measures of the same denomination, but of different magnitudes, was early remarked; and there is hardly a country in which efforts have not been made to reduce them to the same uniform system. Numerous acts of parliament have been passed, having this object in view, and enjoining the use of the same weights and measures, under very severe penalties. But, owing to the inveteracy of ancient customs, and the difficulty of enforcing new regulations, these statutes have always had a very limited influence, and the greatest diversity has continued to prevail, except in lineal measures. But the statute of 5 Geo. 4. c. 74. seems to have, at length, effected what former statutes failed of accomplishing. It is, perhaps, indebted for its success in this respect to the moderate nature of the changes which it introduced. We have already seen that it made no alteration in the lineal measures previously in use. Neither did it affect the previously existing system of weights: both the Troy and the Avoirdupois weights having been preserved.

"The Troy weight," says Mr. Davies Gilbert, late President of the Royal Society, "appeared to us (the commissioners of weights and measures) to be the ancient weight of this kingdom, having, as we have reason to suppose, existed in the same state from the time of St. Edward the Confessor; and there are reasons, moreover, to believe that the word Troy has no reference to any town in France, but rather to the monkish name given to London, of Troy Novant, founded on the legend of Brute. Troy weight, therefore, according to this etymology, is, in fact, London weight. We were induced, moreover, to preserve the Troy weight, because all the coinage has been uniformly regulated by it; and all medical prescriptions or formulae now are, and always have been, estimated by Troy weight, under a peculiar subdivision which the College of Physicians have expressed themselves most anxious to preserve."

It was resolved, therefore, to continue the use of Troy weight; and also, on account of the accuracy of the Troy standard, to raise the Avoirdupois weight from this basis.

"We found," said Mr. Davies Gilbert, "the Avoirdupois weight, by which all heavy goods have been for a long time weighed (probably derived from Avoirs (Averia), the ancient name for goods or chattels, and Poids, weight), to be universally used throughout the kingdom. This weight, however, seems not to have been preserved with such scrupulous accuracy as Troy weight, by which more precious articles have been weighed; but we had reason to believe that the pound cannot differ by more than 1, 2, or 3 grains, from 7,000 grains Troy; some being in excess, and others, though in a less degree, in defect, but in no case amounting to above 1, 2, or 3 grains. It therefore occurred to us, that we should be offering no violence to this system of weights, if we declared that 7,000 grains Troy should be hereafter considered as the pound Avoirdupois."

In accordance with these views, it was enacted,—"That from and after the 1st day of May, 1825, the standard brass weight of 1 pound Troy weight, made in the year 1758, now in the custody of the clerk of the House of Commons, shall be, and the same is hereby declared to be, the original and genuine standard measure of weight, and that such brass weight shall be, and is hereby denominated, the Imperial Standard Troy pound, and shall be, and the same is hereby declared to be, the unit or only standard measure of weight, from which all other weights shall be derived, computed, and ascertained; and that 1-12th part of the said Troy pound shall be an ounce; and that 1-20th part of such ounce shall be a pennyweight; and that 1-24th part of such pennyweight shall be a grain; so that 5,760 such grains shall be a Troy pound; and that 7,000 such grains shall be, and they are hereby declared to be, a pound Avoirdupois, and that 1-16th part of the said pound Avoirdupois shall be an ounce Avoirdupois, and that 1-16th part of such ounce shall be a dram."

The measures of capacity were found to be, at the period of passing the late statute, in the greatest confusion; and a considerable change has consequently been made in them. The wine gallon formerly amounted to 231 cubic inches, the corn gallon to 268·8, and the ale gallon to 282. But these are superseded by the Imperial gallon, which contains 277·274 cubic inches, or 277½ very nearly. It is deduced as follows:—

"The standard measure of capacity, as well for liquids as for dry goods not measured by heaped measure, shall be the GALLON, containing 10 lbs. avoirdupois weight of distilled water weighed in air, at the temperature of 62° of Fahrenheit's thermometer, the barometer being at 30 inches; and a measure shall be forthwith made of brass, of such contents as aforesaid, under the directions of the Lord High Treasurer or the commissioners of His Majesty's treasury; and such brass measure shall be, and is hereby declared to be, the Imperial standard gallon, and shall be, and is hereby declared to be, the unit and only standard measure of capacity, from which all other measures of capacity to be used, as well for

wine, beer, ale, spirits, and all sorts of liquids, as for dry goods not measured by heaped measure, shall be derived, computed, and ascertained; and all measures shall be taken in parts or multiples or certain proportions of the said Imperial standard gallon; and the quart shall be  $\frac{1}{4}$ th part of such standard gallon, and the pint shall be  $\frac{1}{2}$ th of such standard gallon, and 3 such gallons shall be a peck, and 8 such gallons shall be a bushel, and 8 such bushels a quarter of corn or other dry goods, not measured by heaped measure."—§ 6.

We subjoin a Table showing the contents of the different gallons, both in measure and weight.

	Cubic Inches.	Avoirdupois Weight.			Troy Weight.		
		Lbs.	oz.	dr.	Lbs.	oz.	dwt. grs.
Imperial gallon	277-274	10	0	0	12	1	16 16
Corn gallon	268-8	9	10	14	11	7	19 18
Wine gallon	231	8	6	64	10	1	9 22
Ale gallon	262	10	2	11	12	4	6 8

**Heaped Measures.**—The greatest blemish, by far, in the act 5 Geo. 4. c. 74. was the continuance and legitimization of the practice of selling by heaped measure. This practice has since, however, been abolished, along with the use of all local and customary measures, by the act 5 & 6 Will. 4. c. 63., which contains several important provisions.

This act sets out with repealing the 4 & 5 of Will. 4. c. 49., and the provisions in the acts 5 Geo. 4. c. 74. and 6 Geo. 4. c. 12., which require that all weights and measures shall be exact models or copies in shape or form of the standards deposited in the exchequer; and those allowing the use of weights and measures, not in conformity with the Imperial standard, established by said acts; or that allow goods or merchandise to be bought or sold by weights or measures established by local custom, or founded on special agreement. It then goes on to enact as follows:—

**Weights and Measures stamped at the Exchequer declared legal.**—Weights and measures verified and stamped at the exchequer as copies of standard weights and measures, shall be taken to be legal weights and measures, to be used for comparison as copies of the Imperial standard weights and measures, although not similar in shape to those required under the provisions of the said acts; and the comptroller-general, or other duly authorised officer of the exchequer, may compare and verify, and stamp as correct, standard measures of a yard, standard weights and standard measures of capacity, any weights and measures which correspond in length, weight, and capacity with the standards, or parts or multiples thereof, deposited in the exchequer, under the 5 Geo. 4. c. 74., although such weights and measures may not be models or copies in shape or form of the standards so deposited.—§ 4.

**Copies of the Standard Weights and Measures worn to be re-verified.**—All copies of the Imperial standard weights and measures which have become defective, or have been mended, in consequence of wear or accident, shall forthwith be sent to the exchequer, for the purpose of being again compared and verified, and shall be stamped as re-verified copies of such standard weights and measures, provided the comptroller-general, or other officer appointed for such verification, deem them fit for the purposes of standards; and every new comparison and verification shall be indorsed upon the original indenture of verification; and such weights and measures shall be stamped upon payment of fees of verification only; and the comptroller-general, or other officer, shall keep an account of all copies of the Imperial standard weights and measures verified at the exchequer.—§ 5.

**Local and Customary Measures abolished.**—From and after the passing of this act, the Winchester bushel, the Scotch ell, and all local or customary measures, shall be abolished; and every person who shall sell by any measure other than one of the Imperial measures, or some multiple or aliquot part thereof, shall be liable to a penalty not exceeding 40s. for every such sale; but nothing therein shall prevent the sale of any articles in any vessel, where such vessel is not represented as containing any amount of Imperial measure, or of any fixed, local, or customary measure heretofore in use.—§ 6.

**Heaped Measure abolished.**—From and after the passing of this act, so much of the said acts as relates to heaped measure is hereby repealed, and the use of heaped measure shall be abolished, and all bargains, sales, and contracts made after the passing of this act, by heaped measure, shall be null and void; and every person who shall sell any articles by heaped measure shall be liable to a penalty not exceeding 40s. for every such sale.—§ 7.

**Articles sold by Heaped Measure, how to be sold.**—Whereas some articles heretofore sold by heaped measure are incapable of being stricken, and may not be conveniently sold by weight; it is enacted, that all such articles may henceforth be sold by a bushel measure, corresponding in shape with the bushel prescribed by the 5 Geo. 4. c. 74. for the sale of heaped measure, or by any multiple or aliquot part thereof, filled in all parts as nearly to the level of the brim as the size and shape of the articles will admit; but nothing herein shall prevent the sale by weight of any article heretofore sold by heaped measure.—§ 8.

**Coals to be sold by Weight.**—From and after the 1st of January, 1836, all coals, slack, culm, and cannon of every description shall be sold by weight, and not by measure, under a penalty of 40s. for every sale.—§ 9.

**All Articles to be sold by Avoirdupois, except, &c.**—From and after the passing of this act, all articles sold by weight shall be sold by avoirdupois weight, except gold, silver, platinum, diamonds, or other precious stones, which may be sold by troy weight; and drugs, which, when sold by retail, may be sold by apothecaries' weight.—§ 10.

**The Stone, Hundred Weight, &c.**—From and after the passing of this act, the weight denominated a stone shall, in all cases, consist of 14 standard pounds avoirdupois, the hundred weight of 8 such stones, and the ton of 20 such hundred weights; but nothing herein shall prevent any bargain, sale, or contract being made by any multiple or aliquot part of the pound weight.—§ 11.

**Contents of Weights and Measures to be stamped on them.**—All weights made after the passing of this act of the weight of one pound avoirdupois, or more, shall have the number of pounds contained in them stamped or cast on the top or side thereof in legible figures and letters; and all measures of capacity made after the passing of this act, shall have their contents stamped or marked on the outside thereof in legible figures and letters.—§ 12.

**Weights of Lead or Pewter not to be stamped.**—The stamping of weights of lead or pewter, or of any mixture thereof, is prohibited after the 1st of January, 1836; but nothing herein shall prevent the use of lead or pewter, or any mixture thereof, in the manufacture of weights wholly and substantially cast with brass, copper, or iron, and legibly stamped or marked "cased," or prevent the insertion of such a plug of lead or pewter into weights as shall be *bona fide* necessary for adjusting them and affixing the stamp thereon.—§ 13.

**Conversion of Rents, Tolls, &c.**—Clause 14. and 15. regulate the proceedings that are to take place in England, Ireland, and Scotland, for the conversion of rents, tolls, &c. payable in weights or measures now abolished into Imperial standard weights and measures.

**Fair Prices.**—In Scotland, from and after the passing of this act, the fair prices of all grain in every county shall be struck by the Imperial quarter, and all other returns of the prices of grain shall be set forth by the same, without any reference to any other measure whatsoever; and any sheriff clerk, clerk of a market, or other person offending against this provision, shall forfeit not exceeding 5l.—§ 16.

*Copies of Standards, Inspectors, &c.* — Clauses 17, 18, 19, and 20. prescribe the mode in which copies of the standard weights and measures shall be provided in counties, cities, boroughs, &c., the appointment of inspectors of weights and measures, &c. Clause 22. orders, that the expense of providing copies of standard weights, with the remuneration to inspectors, be defrayed out of the county rate. Clause 23. prohibits any maker or seller of weights or measures from being appointed inspector, and orders all inspectors to enter into a bond of 200*l.* for the due performance of the duties of their office, and the safe custody of the stamps and standard weights and measures committed to their care. Clause 24. orders inspectors to attend at market towns when ordered by justices. The following clauses are of general importance.

*Magistrates to procure Stamps for Inspectors for stamping all Weights, &c.* — In England, the justices in general or quarter sessions assembled, and in Scotland the justices and magistrates at a meeting called by the sheriff, and in Ireland the grand juries, shall provide the inspectors with good and sufficient stamps for stamping or sealing weights and measures; and all weights and measures whatsoever, except as herein excepted, used for buying and selling, or for the collecting of any tolls or duties, or for the making of any charges on the conveyance of any goods or merchandise, shall be examined and compared with one or more copies of the Imperial standard weights and measures provided under authority of this act for such inspectors, who shall stamp, so as best to prevent fraud, such weights and measures, if they be found to correspond with the said copies; and the fees for such examination, comparison, and stamping shall be those in the schedule at the end of this act; and every person using any weight or measure other than those authorised by this act, or some aliquot part thereof, or which has not been stamped as aforesaid, except as herein excepted, or which shall be found light or otherwise unjust, shall forfeit not exceeding 5*l.*; and any contract, bargain, or sale made by such weights or measures shall be wholly null and void; and every light or unjust weight and measure shall, on being discovered by any inspector, be seized, and, on conviction, forfeited; but nothing herein shall require any single weight above 56 *lbs.* to be inspected and stamped, nor any wooden or wicker measure used in the sale of fire, or other articles of the like nature, or any glass or earthenware jug or drinking cup, though represented as containing the amount of any Imperial measure, or of any multiple thereof; but any person buying by any vessel represented as containing the amount of an Imperial measure, or of any multiple thereof, is authorised to require the contents of such vessel to be ascertained by comparison with a stamped measure, such measure to be provided by the person using such wooden or wicker measure, glass, jug, or drinking cup; and in case the person using such last-mentioned measure or vessel refuse to make such comparison, or if, upon comparison being made, it be found to be deficient in quantity, the person using the same shall be subject to the forfeitures and penalties imposed on those using light or unjust weights or measures. — § 21.

*Weights and Measures once stamped need not be re-stamped.* — No weight or measure duly stamped by any inspector appointed under the 4 & 5 Will. 4. c. 49., or this act, or by any person or persons authorised to examine and stamp weights or measures, shall be liable to be re-stamped, although the same be used in any other place than that at which it was originally stamped, but shall be considered as a legal weight or measure throughout the U. K., unless found to be defective or unjust. — § 27.

*Power to Justices, &c. to enter Shops and inspect Weights and Measures.* — Justices, sheriffs, magistrates, and inspectors are authorised to examine weights and measures, and to order such as are light or otherwise unjust to be seized and forfeited; those using such weights and measures are subjected to a penalty of not more than 5*l.*; and a like penalty is imposed on those refusing to produce such weights and measures, or obstructing the magistrates. — § 28.

*Penalties on Inspectors counterfeiting Stamps, &c.* — Inspectors or other persons authorised to inspect weights or measures, who shall stamp any weight or measure without verifying the same, or who shall otherwise misconduct themselves in their office, shall for every such offence forfeit not more than 5*l.*; persons forging or counterfeiting any stamp or mark used for stamping or marking weights or measures, forfeit for every offence not more than 50*l.* and not less than 10*l.*; and persons knowingly using weights or measures marked with such counterfeit stamps, forfeit for every offence not more than 10*l.* nor less than 2*l.*. — §§ 29, 30.

*Penalty on Price Lists, &c.* — From and after the 1st of January, 1836, any person printing, or clerk of any market or other person making any return, price list, price current, or any journal or other paper containing price list or price current, in which the weights and measures quoted or referred to denote or imply a greater or less weight or measure than is denoted or implied by the same denomination of Imperial weights and measures under the provisions of this act, shall forfeit and pay not exceeding 10*l.* for every copy of every such return, price list, price current, journal, or other paper which they publish. — § 31.

The remaining clauses relate to the recovery of penalties; and save the rights of the Founders' Company, and of the Universities of Oxford and Cambridge.

Schedule of fees to be taken by all inspectors of weights and measures appointed under the authority of this act:—

For examining, comparing, and stamping all brass weights, within their respective jurisdictions, —

Each half hundred weight	0 9
Each quarter of a hundred weight	0 6
Each stone	0 4
Each weight under a stone to a pound inclusively	0 1
Each weight under a pound	0 0 6
Each set of weights of a pound and under	0 8

For examining, comparing, and stamping all iron weights, or weights of other descriptions, not made of brass, within their respective jurisdictions, —

Each half hundred weight	0 0
Each quarter of a hundred weight	0 0
Each stone	0 0
Each weight under a stone	0 0 6
Each set of weights of a pound and under	0 0 8

For examining, comparing, and stamping all wooden measures, within their respective jurisdictions, —

Each bushel	0 2
Each half bushel	0 2
Each peck, and all under	0 1
Each yard	0 0 6

For examining, comparing, and stamping all measures of capacity of liquids, made of copper or other metal, within their respective jurisdictions, —

Each five gallon	1 0
Each four gallon	0 9
Each three gallon	0 6
Each two gallon	0 4
Each gallon	0 2
Each half gallon	0 1
Each quarter and under	0 0 6

*Invariable or Natural Standards.* — As the standards adopted in most countries have been in a great degree arbitrary, it has long been the opinion of scientific men, that, to construct a more perfect system of weights and measures, some natural and unchangeable basis should be adopted. It has, indeed, been contended by Pauton and Bailly, that the measures of the ancients were deduced from a basis of this sort; and that the *stadium* always formed an aliquot part of the earth's circumference, that part differing amongst different nations and authors. But no learning or ingenuity can induce any one to believe what is so obviously incredible. The ancients had no means of determining the earth's circumference with any thing like the accuracy required to render it the great unit of a system of measures; and, what is equally decisive, no ancient author ever makes the slightest allusion to any such standard.

In more modern times, however, the idea of seeking for a unit of weight and measure in some unchanging natural object has been practically carried into effect. The standards that have been usually proposed for this object, have been some aliquot part of the quadrant of the meridian, or the length of a pendulum vibrating seconds in some given latitude. The latter has been in so far adopted into the existing system of weights and measures established by the act of 1823, that the length of the standard yard, as compared with that of a pendulum vibrating seconds in the latitude of London, is specified in the act as follows:—

“Whereas it has been ascertained by the commissioners appointed by his Majesty to inquire into the subject of weights and measures, that the said yard hereby declared to be the Imperial standard yard, when compared with a pendulum vibrating seconds of mean time in the latitude of London, in a vacuum at the level of the sea, is in the proportion of 36 inches to 39 inches and 1,393 ten-thousandths parts of an inch; be it therefore enacted and declared, that if at any time hereafter the said Imperial standard yard shall be lost, or shall be in any manner destroyed, defaced, or otherwise injured, it shall and may be restored by making, under the direction of the Lord High Treasurer, or the commissioners of his Majesty's treasury of the United Kingdom of Great Britain and Ireland, or any 3 of them for the time being, a new standard yard, bearing the same proportion to such pendulum as aforesaid, as the said Imperial standard yard bears to such pendulum.”

# TABLES OF ENGLISH WEIGHTS AND MEASURES, ACCORDING TO THE NEW OR IMPERIAL MEASURE.

## IMPERIAL TROY WEIGHT.

The standard pound containing 5,760 grs.

	French Grammes.
1 Grain	= 0.0648
1 Pennyweight	= 1.5552
20 Pennyweights	= 31.1072
12 Ounces	= 373.2330

Troy weight is used in the weighing of gold, silver, jewels, &c. It is also used in ascertaining the strength of spirituous liquors; in philosophical experiments; and in comparing different weights with each other.

## APOTHECARIES' WEIGHT.

	Fr. Gram.
1 Grain	= 0.0648
1 Scruple	= 1.296
3 Scruples	= 3.888
8 Drams	= 31.102
12 Ounces	= 373.233

This weight is essentially the same as Troy weight, but differently divided. It is chiefly used for medical prescriptions; but drugs are mostly bought and sold by avoirdupois weight.

**DIAMOND WEIGHT.**—Diamonds and other precious stones are weighed by carats, the carat being divided into 4 grains, and the grain into 16 parts. The diamond carat weight  $3\frac{1}{16}$  grains Troy: thus,

Diamond Weight.	Troy Weight.	Decigrammes.
16 Parts	1 Grain	= 0.10
4 Grains	1 Carat	= 205.5

## IMPERIAL AVOIRDUPOIS WEIGHT.

	Fr. Gram.
1 Dram	= 1.771
16 Drams	= 28.346
16 Ounces	= 453.544
28 Pounds	= 12.699 kil.
4 Quarters	= 1 Hundred wt. = 50.796
20 Hundred wt.	= 1 Ton = 1015.920

The dram is subdivided into 3 scruples, and each scruple into 10 grains; the pound, or 7,680 grains avoirdupois, equals 7,000 grains Troy, and hence 1 grain Troy equals 1.097 grains avoirdupois.

Hence also 144 lbs. avoirdupois = 175 lbs. Troy, and 192 os. ditto = 175 os. ditto.

The stone is generally 14 lbs. avoirdupois weight, but for butcher's meat or fish it is 8 lbs. Hence, the hundred weight (cwt.) equals 8 stone of 14 lbs. or 14 stone of 8 lbs.

A stone of glass is 5 lbs. A seam of glass 24 stone, or 190 lbs.

Hay and straw are sold by the load of 36 trusses. The truss of hay weighs 56 lbs. and of straw 36 lbs. The truss of new hay is 60 lbs. until the 1st of September.

The custom of allowing more than 16 ounces to the pound of butter used to be very general in several parts of the country.

## CHEESE AND BUTTER.

8 Pounds	= 1 Clove.
32 Cloves	= 1 Wey in Essex.
42 do.	= 1 do. in Suffolk.
86 Pounds	= 1 Firkin of Butter.

## IMPERIAL LONG MEASURE.

	Fr. Metres.
12 Inches	= 1 Foot = 0.3048
3 Feet	= 1 Yard = 0.9144
8 1/2 Yards	= 1 Pole or Rod = 5.0291
40 Poles	= 1 Furlong = 201.1632
8 Furlongs	= 1 Mile = 1609.3069
3 Miles	= 1 League = 4827.9179
60 Geographical or 69 1/2 Eng. Miles	= 1 Degree = 11120.7442

Besides the above, there are the palm, which equals 3 inches; the hand, 4 inches; the span, 9 inches; and the fathom, 6 feet.

## IMPERIAL SUPERFICIAL MEASURE.

	Fr. Sq. Metres.
144 Inches	= 1 Square foot = 0.0929
9 Square feet	= 1 Square yard = 0.8316
30 1/2 Square yards	= 1 Square pole = 25.2961
40 Square poles	= 1 Rood = 1011.6652
4 Roods	= 1 Acre = 4046.6648

The inch is generally divided, on scales, into 10ths, or decimal parts; but in squaring the dimensions of artificers' work, the duodecimal system is adopted; the inch being divided into 12 parts or lines, each part into 12 seconds, and each second into 12 thirds.

Land is usually measured by a chain of 4 poles, or 22 yards, which is divided into 100 links. Ten chains in length and 1 in breadth make an acre, which equals 160 square perches, or 4,840 square yards.

## CUBIC OR SOLID MEASURE.

	Fr. Cubic Metres.
1,728 Cubic inches	= 1 Cubic foot = 0.0283
27 Cubic feet	= 1 Cubic yard = 0.7654
40 Feet of rough timber, or 50 Feet hewn do.	= 1 Load or Ton = { 1.1326 1.4157
12 Cubic feet	= 1 Ton of shipping = 1.1802

By cubic measure, marble, stone, timber, masonry, and all artificers' works of length, breadth, and thickness, are measured, and also the contents of all measures of capacity, both liquid and dry.

## IMPERIAL LIQUID AND DRY MEASURE.

Deduced from the Standard Gallon, containing 10 lbs. weight of distilled water, temperature 62°, barometer 30 inches.

Weight of Water	Cubic Feet.	Cubic Inches.	Gills.	Pints.	Quarts.	Pottles.	Gallons.	Pecks.	Bushels.	Coombs.	Quarters.
5 oz.		8.665	1								
lbs. 12		34.659	4	1							
2 1/2		69.318	8	2	1						
5		138.637	16	4	2	1					
10		277.274	32	8	4	2	1				
20		554.548	64	16	8	4	2	1			
80	1.2837	2218.191	256	64	32	16	8	4	1		
320	5.1547	8872.765	1,024	256	128	64	32	16	4	1	
640	10.2694	17745.526	2,048	512	256	128	64	32	8	2	1

The dimensions of the Imperial standard bushel are as follows:—The outer diameter  $2\frac{1}{4}$  inches, and the inner diameter  $1\frac{1}{2}$ . The depth is  $8\frac{1}{2}$ , and the height of the cone, for heaped measure, is 6 inches. The contents of the Imperial heaped bushel were 2815.4887 cubic inches. The subdivisions and multiples are in the same proportion.

## WOOL WEIGHT.

Like all other bulky articles, wool is weighed by avoirdupois weight, but the divisions differ; thus,

7 Pounds = 1 Clove. 64 Tods = 1 Wey.  
3 Cloves = 1 Stone. 3 Weys = 1 Sack.  
3 Stone = 1 Tod. 12 Sacks = 1 Last.

A pack of wool contains 340 lbs.

## OLD MEASURES SUPERSEDED BY THE IMPERIAL SYSTEM.

## OLD WINE MEASURE.

		Cub. In.	Pr. Litres.
1 Pint	-	28.875	= 0.4731
2 Pints	1 Quart	-	57.75
4 Quarts	1 Gallon	-	231
42 Gallons	1 Tierce	5-614 feet	= 158.9673
2 Tierces	1 Puncheon	11-328	= 317.9345
63 Gallons	1 Hoghead	8-421	= 238.4509
2 Hogshds.	1 Pipe or Butt	16-842	= 476.9018
2 Pipes	1 Tun	-	33-684

The pint is subdivided into halves and quarters; the latter is called a gill. A rundlet is 18 gallons, and an anker 9.

*Conversion of Old Wine Measure into Imperial Measure.*—The old wine gallon contains 231 cubic inches, and the Imperial gallon 277.274 ditto. Hence, to convert wine gallons into Imperial gallons, multiply by  $\frac{231}{277.274}$ , or by .83311; and to convert Imperial gallons into wine gallons, multiply by the reciprocal fraction  $\frac{277.274}{231}$ , or by 1.20032. But for most practical purposes, wine measure multiplied by 5 and divided by 6 will give Imperial measure with sufficient accuracy, and conversely.

*N.B.*—The multipliers and divisors employed to reduce old wine, ale, &c. measures to Imperial measure, serve also to reduce prices by the former to the latter.

We subjoin, from the very complete and valuable work of Mr. Buchanan, of Edinburgh, on Weights and Measures, a

Table of English Wine Gallons, from 1 to 100, with their Equivalents in Imperial Gallons.

Wine Gallons.	Equivalents in Imperial Gals.	Wine Gallons.	Equivalents in Imperial Gals.	Wine Gallons.	Equivalents in Imperial Gals.	Wine Gallons.	Equivalents in Imperial Gals.
1	0.83311	26	21.66088	51	42.48866	76	63.31643
2	1.66622	27	22.49399	52	43.32177	77	64.14954
3	2.49933	28	23.32711	53	44.15488	78	64.98265
4	3.33244	29	24.16022	54	44.98800	79	65.81576
5	4.16555	30	24.99333	55	45.82111	80	66.64887
6	4.99866	31	25.82644	56	46.65422	81	67.48198
7	5.83177	32	26.65955	57	47.48732	82	68.31509
8	6.66488	33	27.49266	58	48.32043	83	69.14820
9	7.49799	34	28.32577	59	49.15354	84	69.98131
10	8.33111	35	29.15888	60	49.98665	85	70.81442
11	9.16422	36	30.00199	61	50.81976	86	71.64753
12	9.99733	37	30.83510	62	51.65287	87	72.48064
13	10.83044	38	31.66821	63	52.48598	88	73.31375
14	11.66355	39	32.50132	64	53.31909	89	74.14686
15	12.49666	40	33.33443	65	54.15220	90	74.97997
16	13.32977	41	34.16754	66	54.98531	91	75.81308
17	14.16288	42	34.99965	67	55.81842	92	76.64619
18	14.99599	43	35.83276	68	56.65153	93	77.47930
19	15.82910	44	36.66587	69	57.48464	94	78.31241
20	16.66221	45	37.49898	70	58.31775	95	79.14552
21	17.49532	46	38.33209	71	59.15086	96	79.97863
22	18.32843	47	39.16520	72	59.98397	97	80.81174
23	19.16154	48	39.99831	73	60.81708	98	81.64485
24	19.99465	49	40.83142	74	61.65019	99	82.47796
25	20.82776	50	41.66453	75	62.48330	100	83.31107

Hence, supposing the former denominations to be preserved, a tierce of wine = 35 Imperial gallons very nearly; a puncheon = 70 ditto very nearly; a hoghead = 52 ditto very nearly; a pipe or butt = 105 ditto very nearly; and a tun = 210 ditto very nearly.

## OLD ALE AND BEER MEASURE.

		Cub. In.	Pr. Litres.
1 Pint	-	35.23	= 0.579
2 Pints	1 Quart	-	70.5
4 Quarts	1 Gallon	-	282
8 Gallons	1 Firkin ale	1-205 feet	= 26.909
9 Gallons	1 ditto beer	1-468	= 41.567
2 Firkins	1 Kilderkin	2-937	= 83.134
2 Kilderkins	1 Barrel	5-875	= 166.940
1 Barrel	1 Hoghead	8-812	= 260.562
2 Barrels	1 Puncheon	10-750	= 322.675
3 Hogheads	1 Butt	-	17-624
3 Butts	1 Tun	-	35-248

## Conversion of Old Ale and Beer Measure into Imperial Measure.

—The old ale gallon contains 282 cubic inches, and the Imperial standard gallon 277.274 ditto. Hence, to convert ale gallons into Imperial gallons, multiply by  $\frac{282}{277.274}$ , or by 1.017045; and to convert Imperial gallons into ale gallons, multiply by the reciprocal fraction  $\frac{277.274}{282}$ , or by .983411. Unless extreme accuracy be required, the first 3 decimals need only be used. And for most practical purposes, ale measure multiplied by 59 and divided by 60 will give Imperial measure with sufficient accuracy, and conversely.

Table of English Ale Gallons, from 1 to 100, with their Equivalents in Imperial Gallons.

Ale Gallons.	Equivalents in Imperial Gals.	Ale Gallons.	Equivalents in Imperial Gals.	Ale Gallons.	Equivalents in Imperial Gals.	Ale Gallons.	Equivalents in Imperial Gals.

25	25.42600	50	50.85212	75	75.97833	100	101.63775

## OLD DRY OR WINCHESTER MEASURE.

		Cub. In.	Pr. Litres.
4 Gills	1 Pint	-	33.6
2 Pints	1 Quart	-	67.2
2 Quarts	1 Pottle	-	134.4
3 Pottles	1 Gallon	-	369.6
3 Gallons	1 Peck	-	337.6
4 Pecks	1 Bushel	2150.43	= 35.2309
4 Bushel	1 Coom	4-977 feet	= 140.521
2 Cooms	1 Quarter	9-964	= 28.563
5 Quarters	1 Wey or Load	49-770	= 140.572
2 Weys	1 Last	99-540	= 283.748

The Winchester bushel is  $1\frac{1}{4}$  inches wide, and 8 inches deep. Corn and seeds are measured by striking the bushel from the brim, with a round piece of light wood, about 3 inches in diameter, and of equal thickness from one end to the other. All other dry goods are heaped.

## Conversion of Winchester Bushels into Imperial Bushels.

—The Winchester bushel contains 2150.43 cubic inches, and the Imperial standard bushel 2218.192 ditto. Hence, to convert Winchester bushels into Imperial bushels, multiply by  $\frac{2150.43}{2218.192}$ , or by .969447; and to convert Imperial bushels into Winchester bushels, multiply by the reciprocal fraction  $\frac{2218.192}{2150.43}$ , or 1.031517. For practical purposes, multiply Winchester measure by 21 and divide by 22 for Imperial measure, and the contrary.

In some markets, corn is sold by weight, which is the fairest mode of dealing, though not the most convenient in practice. Even where measures are used, it is customary to weigh certain quantities or proportions, and to regulate the prices accordingly. The average bushel of wheat is generally reckoned at 60 lbs. — of barley 47 lbs. of oats 38 lbs. — peas 64, beans 63, clover 68, rye and canary 63, and rape 48 lbs. In some places, a load of corn, for a man, is reckoned 5 bushels, and a cart load 40 bushels.

Table of Winchester Quarters, from 1 to 100, with their Equivalents in Imperial Quarters.

Winchester Quarters.	Equivalents in Imperial Qrs.	Winchester Quarters.	Equivalents in Imperial Qrs.	Winchester Quarters.	Equivalents in Imperial Qrs.	Quarters.	Equivalents in Imperial Qrs.

#### COAL MEASURE.

Coals were formerly sold by the chaldron, which bears a certain proportion to Winchester measure.

- 4 Pecks = 1 Bushel.  
3 Bushels = 1 Sack.  
3 Sacks = 1 Vat.

#### MEASURES OF WOOD.

- 1,000 Billets of wood = 1 Cord.  
10 cwt. of ditto = 1 Cord.  
1 Cord of wood = 1 Chaldron of coals.  
100 lbs. of wood = 1 Quintal of wood.

**French System of Weights and Measures.**—The new metrical system established in France subsequently to the Revolution, is founded on the measurement of the quadrant of the meridian, or of the distance from the pole to the equator. This distance having been determined with the greatest care, its ten-millionth part was assumed as the *mètre*, or unit of length, all the other lineal measures being multiples or submultiples of it, in decimal proportion. The *mètre* corresponds pretty nearly to the ancient French *aune*, or yard, being equal to 3.07844 French feet, or 3.281 English feet, or 39.3708 English inches.

The unit of weight is the *gramme*, which is a cubic centimetre, or the 100th part of a *mètre* of distilled water of the temperature of melting ice; it weighs 15.434 English Troy grains.

In order to express the decimal proportion, the following vocabulary of names has been adopted, in which the terms for multiplying are Greek, and those for dividing Latin.

- For multipliers, the word  
Deca prefixed means - 10 times.  
Hecto - - - 100 -  
Kilo - - - 1,000 -  
Myria - - - 10,000 -

- On the contrary, for divisors,  
the word *Deci* expresses the 10th part.  
*Centi* - - - 100th -  
*Milli* - - - 1,000th -

Thus, *Decamètre* means 10 *mètres*.

*Decimètre* - - - the 10th part of a *mètre*.

*Kilogramme* - - - 1,000 grammes, &c.

The *are* is the element of square measure, being a square decamètre, equal to 3.965 English perches.

The *stère* is the element of cubic measure, and contains 35.317 cubic feet English.

The *litre* is the element of all measures of capacity. It is a cubic decimètre, and equals 2.1135 English pints. 100 litres make the hectolitre, which equals 26.419 wine gallons, or 2.838 Winchester bushels.

**SYSTEME CUEL, OR BINARY SYSTEM.**—This new system has the metrical standards for its basis, but their divisions are binary, that is, by 2, 4, 8, &c.;

- 4 Vats = 1 Chaldron.  
21 Chaldrons = 1 Score.

The coal bushel holds 1 Winchester quart more than the Winchester bushel; its contents being 2217.62 cubic inches. It is 19½ inches wide from outside to outside, and 8 inches deep. In measuring coals it was heaped up in the form of a cone, to the height of at least 6 inches above the brim (according to a regulation passed at Guildhall in 1806), the outside of the bushel being the extremity of the cone, so that the bushel should contain at least 3814.9 cubic inches, nearly equal to the Imperial heaped bushel. Hence the chaldron should measure 58.64 cubic feet.

But the sale of coals by measure has, in consequence of the frauds to which it led—(see *ante*, p. 284.)—been abolished; and they are now sold by weight.

**Of Wood Fuel, English Measure.**—Wood fuel is assized into shids, billets, faggots, fall wood, and cord wood. A shid is to be 4 feet long, and, according as they are marked and notched, their proportion must be in the girth; viz. if they have but 1 notch, they must be 16 inches in the girth; if 2 notches, 23 inches; if 3 notches, 28 inches; if 4 notches, 33 inches; and if 5 notches, 38 inches about. Billets are to be 3 feet long, of which there should be 3 sorts; viz. a single cask, and a cask of 2; the 1st is 7 inches, the 3d 10 inches, and the 3d 14 inches about: they are sold by the 100 of 5 score. Faggots are to be 3 feet long, and at the band 24 inches about, besides the knot of such faggots; 50 go to the load. Bavins and spray wood are sold by the 100, which are accounted a load. Cord wood is the bigger sort of fire wood, and it is measured by a cord, or line, whereof there are 2 measures; that of 14 feet in length, 3 feet in breadth, and 3 feet in height. The other is 8 feet in length, 4 feet in height, and 4 feet in breadth.

and instead of the new vocabulary, the names of the ancient weights and measures are used, annexing the term *usuel* to each. Thus the killogramme is called the *livre usuelle*, and the double *metre*, the *toise usuelle*.

The following Tables show the proportions between the new or metrical French system and the English system:—

Comparison of FRENCH and ENGLISH WEIGHTS and MEASURES, containing the New or Metrical Weights and Measures of France, with their Proportion to those of England, both according to the Decimal System and the *Système usuel*.

#### DECIMAL SYSTEM.

##### Long Measures.

French.		English.
Millimètre	=	0.03937 inches.
Centimètre	=	0.39371 —
Decimètre	=	3.93710 —
Mètre	=	39.37100 —
Decamètre	=	32.80916 feet.
Hectomètre	=	328.09167 —
Kilomètre	=	1093.63890 yards.
Myriamètre	=	10936.38900 —

or 6 miles 1 furlong 28 poles.

##### Solid Measures.

Décistère	=	3.317 cubic feet.
Stère (a cubic mètre)	=	35.3174 —
Décastère	=	353.1741 —

## Measures of Capacity.

Millitre	-	=	0.06103 cubic inches.
Centilitre	-	=	0.61028 —
Déclitre	-	=	6.10280 —
Litre (a cubic decimetre)	}	=	{ 61.02803 — or 2.1135 wine pints.
Décalitre	-	=	610.28028 cubic inches. or 2.642 wine gallons.
Hectolitre	-	=	3.5317 cubic feet, or 26.419 wine gallons, 22 Imperial gallons, or 2.639 Winchester bushels.
Kilolitre	-	=	35.3171 cubic feet, or 1 tun and 12 wine gallons.
Myrialitre	-	=	353.17146 cubic feet.

## Superficial Measures.

Centiare	-	=	1.1960 sq. yards.
Are (a square decamètre)	-	=	119.6046 —
Décare	-	=	1196.0460 —
Hectare	-	=	11960.4604 — or 2 acres 1 rood 35 perches.

## Weights.

Milligramme	-	=	0.0154 grains.
Centigramme	-	=	0.1543 —
Décligramme	-	=	1.5434 —
Gramme	-	=	15.4340 —
Décligramme	-	=	154.3403 — or 5.64 drams avoirdupois
Hectogramme	-	=	3.527 oz. Troy, or 3.527 oz. avoirdupois.
Kilogramme	-	=	2 lbs. 8 oz. 3 dwt. 3 grs. Troy, or 2 lbs. 3 oz. 4.682 drams avoirdupois
Myriagramme	-	=	26.796 lbs. Troy, or 22.046 lbs. avoirdupois.
Quintal	-	=	1 cwt. 3 qrs. 25 lbs. nearly.
Millier, or Bar	-	=	9 tons 16 cwt. 3 qrs. 12 lbs.

*Ancient Weights and Measures.* — This subject is involved in considerable difficulty; and to enter fully into it would be quite inconsistent with our objects and limits. But the following details, abstracted from the best authorities, may be useful to such of our readers as have occasion to look into the ancient authors.

## TABLE OF VARIOUS ANCIENT WEIGHTS (according to different Authorities).

**WELD, OR DYER'S WEED** (Ger. *Wam*; Du. *Wouw, Wouwe*; Fr. *Gaude*; It. *Guadarella*; Lat. *Luteola*), is an imperfect biennial, with small fusiform roots, and a leafy stem from 1 to 3 feet in height. It is a native of Britain, Italy, and various parts of Europe; and is cultivated for the sake of its stalk, flowers, and leaves, which are employed in the dyeing of yellow, whence its botanical name *Reseda luteola*. Weld requires the growth of nearly 2 summers before it comes to maturity; and the crop is liable to fail from so many causes, and is besides so exhausting, that its cultivation is by no means profitable, and is only carried on, in this country at least, to a small extent, principally in Essex. Weld is preferred to all other substances in giving the lively green lemon yellow. It is, however, expensive; and it is found, when employed in topical dyeing, to degrade and interfere with madder colours more than other yellows, and to stain the parts wanted to be kept white. Hence quercitron bark is now employed in calico printing, to the almost total exclusion of weld. It is still, however, employed in dyeing silk a golden yellow, and in paper staining. — (*London's Ency. of Agriculture*; *Bancroft on Colours*, vol. ii. pp. 95—100.; *Rees's Cyclopædia*.)

**WHALEBONE**, a substance of the nature of horn, adhering in thin parallel laminae to the upper jaw of the whale. These vary in size from 3 to 12 feet in length; the breadth of the largest at the thick end, where they are attached to the jaw, is about a foot. They are extremely elastic. All above 6 feet in length is called *size bone*.

Whalebone bore anciently a very high price, when the rigid stays and the expanded hoops of our grandmothers produced an extensive demand for this commodity. The Dutch have occasionally obtained 700*l.* per ton, and were accustomed to draw 100,000*l.* annually from England for this article. Even in 1763, it brought 500*l.*; but soon after fell, and has never risen again to the same value. During the present century the price has varied between 60*l.* and 300*l.*; seldom falling to the lowest rate, and rarely exceeding 150*l.* Mr. Scoresby reckoned the price, in the 5 years ending with 1818, at 90*l.*: in 1834 it amounted to from 130*l.* to 145*l.*; and at present (1844) it varies from 280*l.* for Southern to 350*l.* for Northern. This is for what is called *size bone*, or such pieces as measure 6 feet or upwards in length; those below this standard are usually sold at half price. It may appear singular that whalebone should rise, while oil has been so decidedly lowered; but the one change, it is obvious, causes the other. Oil, being the main product of the fishery, regulates its extent; which being diminished by the low price, the quantity of whalebone is lessened, while the demand for it continuing as great as before, the value consequently rises. It is, however, probable that the present high price of bone may, in some degree, tend to revive the fishery.

It may be worth while to remark, as evincing the ignorance that at one time prevailed with respect to the whale, that, by an old feudal law, the *tail* of all whales belonged to the queen, as a perquisite, to furnish her Majesty's wardrobe with whalebone! — (*Blackstone*, vol. i. p. 233.)

**WHALE (COMMON)**, the *Balaena mysticetus* of Linnaeus, a marine animal of the cetaceous species, and the largest of all those with which men are acquainted. The whale has sometimes, it is affirmed, been found 160 feet in length; but this is most probably an exaggeration. In the Northern seas, it is at present seldom found above 60 feet long: being now, however, generally killed before it arrives at its full growth, this is no proof that the animal may not formerly have attained to a much larger size. The bodies of whales are covered, immediately under the skin, with a layer of fat or *blubber*, which, in a large fish, is from 12 to 18 inches thick. In young whales, this fatty matter resembles hog's lard; but in old ones it is of a reddish colour. This is the valuable part of the whale; and the desire to possess it has prompted man to attempt the capture of this mighty animal. The blubber yields, by expression, nearly its own weight of a

thick viscid oil (train oil). The common whale is now rarely found, except within the Arctic circle; but at a former period it was not unfrequently met with on our coasts. There is a good account of the common whale, and of the manner in which the fishery is carried on, in Mr. John Laing's "Voyage to Spitzbergen;" one of the shortest, cheapest, and best of the innumerable books published on this hacknied subject.

The *Physeter macrocephalus*, or black-headed spermaceti whale, is chiefly found in the Southern Ocean. It usually measures about 60 feet in length, and 30 in circumference at the thickest part. The valuable part of the fish is the spongy, oily mass dug from the cavity of the head; this is crude spermaceti; and of it an ordinary sized whale will yield about 12 large barrels.

**WHALE FISHERY (NORTHERN).** We do not propose entering, in this article, into any details as to the mode in which the fishery is carried on; but mean to confine ourselves to a brief sketch of its history, and value in a commercial point of view.

It is probably true, as has been sometimes contended, that the Norwegians occasionally captured the whale before any other European nation engaged in so perilous an enterprise. But the early efforts of the Norwegians were not conducted on any systematic plan, and should be regarded only in the same point of view as the fishing expeditions of the Esquimaux. The Biscayans were certainly the first people who prosecuted the whale fishery as a regular commercial pursuit. They carried it on with vigour and success in the 12th, 13th, and 14th centuries. In 1388, Edward III. relinquished to Peter de Puyanne a duty of 6*l.* sterling a whale, laid on those brought into the port of Biarritz, to indemnify him for the extraordinary expenses he had incurred in fitting out a fleet for the service of his Majesty. This fact proves beyond dispute that the fishery carried on from Biarritz at the period referred to must have been very considerable indeed; and it was also prosecuted to a greater or less extent from Cibourne, Vieux Boucan, and subsequently from Rochelle and other places.\*

The whales captured by the Biscayans were not so large as those that are taken in the Polar seas, and are supposed to have been attracted southward in pursuit of herrings. They were not very productive of oil, but their flesh was used as an article of food, and the whalebone was applied to a variety of useful purposes, and brought a very high price.

This branch of industry ceased long since, and from the same cause that has occasioned the cessation of the whale fishery in many other places—the want of fish. Whether it were that the whales, from a sense of the dangers to which they exposed themselves in coming southwards, no longer left the Icy Sea, or that the breed had been nearly destroyed, certain it is, that they gradually became less numerous in the Bay of Biscay, and at length ceased almost entirely to frequent that sea; and the fishers being obliged to pursue their prey upon the banks of Newfoundland and the coasts of Iceland, the French fishery rapidly fell off.

The voyages of the Dutch and English to the Northern Ocean, in order, if possible, to discover a passage through it to India, though they failed of their main object, laid open the haunts of the whale. The companions of Barentz, who discovered Spitzbergen in 1596, and of Hudson, who soon after explored the same seas, represented to their countrymen the amazing number of whales with which they were crowded. Vessels were in consequence fitted out for the Northern whale fishery by the English and Dutch, the harpooners and a part of the crew being Biscayans. They did not, however, confine their efforts to a fair competition with each other as fishers. The Muscovy Company obtained a royal charter, prohibiting the ships of all other nations from fishing in the seas round Spitzbergen, on pretext of its having been first discovered by Sir Hugh Willoughby. There can, however, be no doubt that Barentz, and not Sir Hugh, was its original discoverer; though, supposing that the fact had been otherwise, the attempt to exclude other nations from the surrounding seas, on such a ground, was not one that could be tolerated. The Dutch, who were at the time prompt to embark in every commercial pursuit that gave any hopes of success, eagerly entered on this new career, and sent out ships fitted equally for the purposes of fishing, and of defence against the attacks of others. The Muscovy Company having attempted to vindicate its pretensions by force, several encounters took place between their ships and those of the Dutch. The conviction at length became general, that there was room enough for all parties in the Northern seas; and in order to avoid the chance of coming into collision with each other, they parcelled Spitzbergen and the adjacent ocean into districts, which were respectively assigned to the English, Dutch, Hamburgers, French, Danes, &c.

The Dutch, being thus left to prosecute the fishery without having their attention diverted by hostile attacks, speedily acquired a decided superiority over all their competitors.

When the Europeans first began to prosecute the fishery on the coast of Spitzbergen, whales were everywhere found in vast numbers. Ignorant of the strength and strata-

\* See *Mémoire sur l'Antiquité de la Pêche de la Baleine, par Noët, 12mo. Paris, 1796.*

gems of the formidable foe by whom they were now assailed, instead of betraying any symptoms of fear, they surrounded the ships and crowded all the bays. Their capture was in consequence a comparatively easy task, and many were killed which it was afterwards necessary to abandon, from the ships being already full.

While fish were thus easily obtained, it was the practice to boil the blubber on shore in the North, and to fetch home only the oil and whalebone. And, perhaps, nothing can give a more vivid idea of the extent and importance of the Dutch fishery in the middle of the 17th century, than the fact, that they constructed a considerable village, the houses of which were all previously prepared in Holland, on the Isle of Amsterdam, on the northern shore of Spitzbergen, to which they gave the appropriate name of *Smeerenberg* (from *smeeren*, to melt, and *berg*, a mountain). This was the grand rendezvous of the Dutch whale ships, and was amply provided with boilers, tanks, and every sort of apparatus required for preparing the oil and the bone. But this was not all. The whale fleets were attended with a number of provision ships, the cargoes of which were landed at *Smeerenberg*; which abounded during the busy season with well-furnished shops, good inns, &c.; so that many of the conveniences and enjoyments of Amsterdam were found within about 11 degrees of the Pole! It is particularly mentioned, that the sailors and others were every morning supplied with what a Dutchman regards as a very great luxury — *hot rolls* for breakfast. *Batavia* and *Smeerenberg* were founded nearly at the same period, and it was for a considerable time doubted whether the latter was not the more important establishment. — (*De Reste Histoire des Pêches*, &c. tome i. p. 42.)

During the flourishing period of the Dutch fishery, the quantity of oil made in the North was so great that it could not be carried home by the whale ships; and every year vessels were sent out in ballast to assist in importing the produce of the fishery.

But the same cause that had destroyed the fishery of the Biscayans, ruined that which was carried on in the immediate neighbourhood of Spitzbergen. Whales became gradually less common, and more and more timid and difficult to catch. They retreated first to the open seas, and then to the great banks of ice on the eastern coast of Greenland. When the site of the fishery had been thus removed to a very great distance from Spitzbergen, it was found most economical to send the blubber direct to Holland. *Smeerenberg* was in consequence totally deserted, and its position is now with difficulty discoverable.

But though very extensive, the Dutch whale fishery was not, during the first 30 years of its existence, very profitable. This arose from the circumstance of the right to carry it on having been conceded, in 1614, to an exclusive company. The expense inseparable from such great associations, the wastefulness and unfaithfulness of their servants, who were much more intent upon advancing their own interests than those of the company, increased the outlays so much, that the returns, great as they were, proved little more than adequate to defray them, and the fishery was confined within far narrower limits than it would otherwise have reached. But after various prolongations of the charter of the first company, and the formation of some new ones, the trade was finally thrown open in 1642. The effects of this measure were most salutary, and afford one of the most striking examples to be met with of the advantages of free competition. Within a few years the fishery was vastly extended; and though it became progressively more and more difficult from the growing scarcity of fish, it proved, notwithstanding these disadvantages, more profitable to the private adventurers than it had ever been to the company; and continued for above a century to be prosecuted with equal energy and success. The famous John de Witt has alluded as follows to this change in the mode of conducting the trade: —

“In this respect,” says he, “it is worthy of observation, that the authorised Greenland Company made heretofore little profit by their fishery, because of the great charge of setting out their ships; and that the train oil, blubber, and whale fins were not well made, handled, or cured; and being brought hither and put into warehouses, were not sold soon enough, nor to the Company’s best advantage. Whereas now that every one equips their vessels at the cheapest rate, follow their fishing diligently, and manage all carefully, the blubber, train oil, and whale fins are employed for so many uses in several countries, that they can sell them with that convenience, that though there are now 15 ships for 1 that formerly sailed out of Holland on that account, and consequently each of them could not take so many whales as heretofore, and notwithstanding the new prohibition of France and other countries to import these commodities, and though there is greater plenty of them imported by our fishers — yet those commodities are so much raised in the value above what they were whilst there was a company, that the common inhabitants do exercise that fishery with profit, to the much greater benefit of our country than when it was (under the management of a company) carried on but by a few.” — (*True Interest of Holland*, p. 63. 8vo. ed. London, 1746.)

The private ships sent by the Dutch to the whale fishery were fitted out on a principle that secured the utmost economy and vigilance on the part of every one connected with them. The hull of the vessel was furnished by an individual, who commonly took upon himself the office of captain; a sail-maker supplied the sails, a cooper the casks, &c. The parties engaged as adventurers in the undertaking. The cargo being brought to Holland and disposed of, each person shared in the produce according to his

proportion of the outfit. The crew was hired on the same principle; so that every one had a motive to exert himself, to see that all unnecessary expenses were avoided, and that those that were necessary were confined within the narrowest limits. This practice has been imitated to some extent in this and some other countries, but in none has it been carried so far as in Holland. It appears to us, that it might be advantageously introduced into other adventures.

When in its most flourishing state, towards the year 1680, the Dutch whale fishery employed about 260 ships, and 14,000 sailors.

The English whale fishery, like that of Holland, was originally carried on by an exclusive association. The Muscovy Company was, indeed, speedily driven from the field; but it was immediately succeeded by others, that did not prove more fortunate. In 1725, the South Sea Company embarked largely in the trade, and prosecuted it for 8 years; at the end of which, having lost a large sum, they gave it up. But the legislature, having resolved to support the trade, granted, in 1732, a bounty of 20s. a ton to every ship of more than 200 tons burden engaged in it; but this premium being insufficient, it was raised, in 1749, to 40s. a ton, when a number of ships were fitted out, as much certainly in the intention of catching the bounty as of catching fish. Deceived by the prosperous appearance of the fishery, parliament imagined that it was firmly established, and in 1777 the bounty was reduced to 30s. The effects of this reduction showed the factitious nature of the trade, the vessels engaged in it having fallen off in the course of the next 5 years from 105 to 39! To arrest this alarming decline, the bounty was raised to its old level in 1781, and of course the trade was soon restored to its previous state of apparent prosperity. The hostilities occasioned by the American war reduced the Dutch fishery to less than half its previous amount, and gave a proportional extension to that of England. The bounty, which had in consequence become very heavy, was reduced, in 1787, to 30s. a ton; in 1792 it was further reduced to 25s.; and in 1795 it was reduced to 20s., at which sum it continued till 1824, when it ceased.

It appears from accounts given in Macpherson's *Annals of Commerce* (vol. iii. p. 511., vol. iv. p. 130.), that the total bounties paid for the encouragement of the whale fishery, in the interval between 1750 and 1788, amounted to no less than 1,577,935*l*. It will be seen from the official account which follows, that there are no means of furnishing any accurate account of the sums paid as bounties from the year 1789 to 1815 inclusive; but it is, notwithstanding, abundantly certain that the total bounties paid during the period from 1789 to 1824 considerably exceeded 1,000,000*l*. Here, then, we have a sum of upwards of TWO MILLIONS AND A HALF laid out since 1750 in promoting the whale fishery. Now we believe that if we estimate the entire average value of the gross produce of the Northern whale fishery (and it is to it only that the preceding statements apply) during the last 3 or 4 years, at 100,000*l*. a year, we shall be considerably beyond the mark. But had the 2,500,000*l*. expended in bolstering up this branch of industry been laid out as capital in any ordinary employment, it would have produced 125,000*l*. a year of *net* profit; being 25,000*l*. a year more than the total value of the produce of the fishery, without allowing any thing for the capital wasted, and ships lost in carrying it on. Whatever, therefore, may be the value of the whale fishery as a nursery for seamen, it is absurd to regard it as contributing any thing to the public wealth. The remark of Dr. Franklin, that he who draws a fish out of the sea draws out a piece of silver, is ever in the mouths of those who are clamouring for bounties and protection against competition. But we apprehend that even Franklin himself, sagacious as he was, would have found it rather difficult to show how the wealth of those is to be increased, who, in fishing up one piece of silver, are obliged to throw another of greater value into the sea. We subjoin

It is not even certain whether the expenditure of 2,500,000*l*. upon bounties would really have had the effect of making the whale fishery be carried on upon a considerable scale, but for the occupation of Holland by the French, and the consequent hostilities in which she was involved with this country. These did more to promote and consolidate

the British fishery than any thing else. The war entirely annihilated that of the Dutch: and our government having wisely offered to the fishers of Holland all the immunities enjoyed by the citizens of Great Britain in the event of their settling amongst us, many availed themselves of the invitation, bringing with them their capital, industry, and skill. In consequence of this signal encouragement, the whale fishery of England was prosecuted with greater success than at any previous period; and at the termination of the late war, in 1815, there were nearly 150 valuable ships and about 6,000 seamen engaged in the Northern fishery, and about 30 ships and 800 men in that to the South.

After peace was restored, the English capitalists and others became apprehensive lest the Dutch should engage anew with their ancient vigour and success in the whale fishery. But these apprehensions were without any real foundation. The Hollanders, during the 30 years they had been excluded from the sea, had lost all that practical acquaintance with the details of the fishery, for which they had long been so famous, and which is so essential to its success. The government attempted to rouse their dormant energies by the offer of considerable premiums and other advantages to those who embarked in the trade. Three companies were in consequence formed for carrying it on; 1 at Rotterdam, 1 at Harlingen, and 1 in South Holland. But their efforts have been very limited, and altogether unfortunate. In 1826, the company of South Holland was dissolved, while that of Harlingen despatched 4 ships, and that of Rotterdam 2. In 1827, Rotterdam sent only 1 ship, and Harlingen 2. In 1828, 1 solitary ship sailed from Holland—a feeble and last effort of the company of Harlingen; and since then a ship or two has been occasionally fitted out by private adventurers, but generally without success.

Such has been the fate of the Dutch whale fishery. The attempts to revive it failed, not because the ships sent out were ill calculated for the service, but because they were manned by unskilful seamen. In the early ages of the fishery, this difficulty would have been got over, because, owing to the fewness of competitors, and the scanty supply of oil and whalebone, even a small cargo brought a high price; but at present, when the fishery is prosecuted on a very large scale and at a very low rate of profit by the English, the Americans, the Hamburgers, &c., no new competitor coming into the field could expect to maintain himself unless he had nearly equal advantages. The Dutch have, therefore, done wisely in withdrawing from the trade. Any attempt to establish it by the aid of bounties and other artificial encouragements would be one of which the ultimate success must be very doubtful, and which could lead to no really useful result. During the 20 years preceding the late French war, the fishery of Holland was gradually declining, and had, in a great measure, ceased to be profitable. It would be folly to endeavour to raise anew, and at a great expense, a branch of industry that had become unproductive at a former period, when there is no ground for supposing that it would be more productive at this moment.

We have already noticed several changes of the localities in which the whale fishery has been carried on at different periods; and within these few years others of the same kind have taken place. The Dutch fishers first began to frequent Davis's Straits in 1719; and as the whales had not hitherto been pursued into this vast recess, they were found in greater numbers than in the seas round Spitzbergen. From about this period it was usually resorted to by about 3-10ths of the Dutch ships. It was not till a comparatively late period that Davis's Straits began to be frequented by English whalers; and down to 1820, when Captain Scoresby published his elaborate and valuable work on the whale fishery, that carried on in the Greenland seas was by far the most considerable. But it will be seen from the subjoined account, that from 1826 down to 1837 the Greenland seas were nearly abandoned. This was principally a consequence of the greater abundance of whales in Davis's Straits, but it was, also, in part owing to the various discoveries made by the expeditions fitted out by government for exploring the seas and inlets to the westward of Davis's Straits and Baffin's Bay having made the fishers acquainted with several new and advantageous situations for the prosecution of their business. Since 1837, however, the few ships that have been sent out have gone mostly to the Greenland seas.

The sea in Davis's Straits is less incommoded with field ice than the Greenland and Spitzbergen seas, but it abounds with icebergs; and the fishery, when carried on in Baffin's Bay and Lancaster Sound, is more dangerous, perhaps, than any that has hitherto been attempted.

The subjoined table shows how rapidly the Northern fishery has declined of late years, and it also shows the extremely hazardous and fluctuating nature of the trade. It may now, however, be considered as all but abandoned, in so far at least as the capture of whales is concerned, the produce of the fishery, during the 3 years ending with 1842, scanty as it was, having consisted principally of seals. Nor is this to be regretted. For many years past it has partaken more of the nature of a gambling pursuit than of a branch of sober industry; and has, on the whole, been productive of a heavy loss.

The extensive use of gas, and the increased imports of vegetable oils, occasioned by the reduction of the oppressive duties with which they were formerly affected, have prevented the diminution in the supply of whale oil from having any bad effect.

Account of the Greenland and Davis' Straits Whale Fisheries carried on from Great Britain from 1814 to 1843 both inclusive, specifying the Number of Ships sent to each; the Ports whence they were sent and the Number sent on each, with the Number of Ships lost; the Produce of the Fishery in Oil and Bone, with other Particulars. — (Obtained from a private source, on which, however, every reliance may be placed.)

\* This includes the 5 best in the ice the previous year.

\* This includes the 5 best in the ice the previous year.

It is seen from this table, that there has been a singular change in the ports from which the Northern fishery has been carried on. In London were undertaken all the discoveries which led to its establishment; and the great companies formed in that city enjoyed for a lengthened period nearly a complete monopoly of the business. So late as 1790 and 1790, the metropolis sent out 4 times the number of vessels that sailed from any other port; but it was observed that her fishery was, on the whole, less fortunate than that of the new rivals which had sprung up; and her merchants were so much discouraged, that in Mr. Scoresby's time they equipped only 17 or 18 vessels. They have since wholly abandoned the trade, and do not send out a single ship!

Hull early became a rival to London, having sent out vessels at the very commencement of the fishery. Though checked at first by the monopoly of the great companies, as soon as the trade became free she prosecuted it with distinguished success. Towards the end of last century, she attained, and preserved down to 1837, the character of the first whale-fishing port in Great Britain. In 1819 she sent out 65 ships, and her imports of oil amounted in 1820 to 8,086 tuns. But such and so rapid has been the decline of the fishery in the interval, that in 1842 Hull only sent out 2 ships!

At present, the fishery, such as it is, is principally carried on from Peterhead.

**WHALE FISHERY (SOUTHERN).** — This consists of three distinct branches; viz., 1st, the catch of the spermæti whale, which furnishes the valuable substance called spermæti (see the term); 2d, that of the common black whale of the Southern seas; and, 3d, that of the sea elephant, or southern walrus.

The spermæti whale (*Physeter macrocephalus*) is found in all tropical climates, and especially on the coasts of New Zealand and the adjoining seas. The ordinary duration of the voyage of a ship from England, employed in this department of the fishery, is about 3 years.

The common black whale of the Southern seas (*Physeter microps*) is met with in various places, but principally on the coast of Brazil; in the bays on the west coast of Africa; and in some of the bays in New South Wales, Van Diemen's Land, &c.

See elephants (intermediate between the walrus of the Northern seas and the seal) are principally met with in the seas round the Islands of Desolation, South Georgia, and South Shetland, the coast of California, &c. Vast numbers of these animals are annually captured; vessels frequently load entirely with them; and they are believed to furnish more oil than the common South Sea whale. The oil of the black whale and that of the sea elephant are both known in the market by the name of southern oil, and they are so very similar, that those most versed in the trade can with difficulty distinguish the one from the other. Hence ships commonly engage indifferently in either fishing as opportunity offers. The usual duration of the voyage of a ship from England in either of the last two departments, or in the two combined, varies from 12 to 18 months.

The South Sea fishery was not prosecuted by the English till about the beginning of the American war; and as the Americans had already entered on it with vigour and success, 4 American harpooners were sent out in each vessel. In 1791, 75 whale ships were sent to the South Sea; but the number has not been so great since; and

latterly it has been unprosperous and declining, in consequence principally of the competition of the colonists in Australia, who are incomparably better situated for the prosecution of this branch of industry. The *Macrocephalus*, or spermaceti whale, is particularly abundant in the neighbourhood of the Spice Islands; and Mr. Crawford, in his valuable work on the *Eastern Archipelago* (iii. 447.), has entered into some details to show that the fishery carried on there is of greater importance than the spice trade. Unluckily, however, the statements on which Mr. Crawford founded his comparisons were entirely erroneous, neither the ships nor the men employed amounting to more than 1-5th or 1-6th part of what he has represented.

We subjoin a

Statement of the Southern Whale Fishery carried on from Great Britain since 1800; exhibiting the Total Number of Ships annually absent from Great Britain on Whaling Expeditions; the Total Number of Ships that annually returned to Great Britain; and the annual Imports of Sperm and Common Oil, with the Prices of each.

\* The ships for this and the succeeding years, as for the previous ones, do not include colonial ships, but those from Britain only.

† From this year commenced the Imperial Measure.

**American Whale Fishery.** — For a lengthened period, the Americans have prosecuted the whale fishery with greater vigour and success than, perhaps, any other people. They commenced it in 1690, and for about 50 years found an ample supply of fish on their own shores. But the whale having abandoned them, the American navigators entered with extraordinary ardour into the fisheries carried on in the Northern and Southern Oceans. From 1778 to 1775, Massachusetts employed annually 183 vessels, carrying 13,820 tons, in the former; and 121 vessels, carrying 14,026 tons, in the latter. Mr. Burke, in his famous speech on American affairs in 1774, adverted to this wonderful display of daring enterprise as follows: —

"As to the wealth," said he, "which the colonies have drawn from the sea by their fisheries, you had all that matter fully opened at your bar. You surely thought these acquisitions of value, for they seemed to excite your envy; and yet the spirit by which that enterprising employment has been exercised ought rather, in my opinion, to have raised esteem and admiration. And pray, Sir, what in the world is equal to it? Pass by the other parts, and look at the manner in which the New England people carry on the whale fishery. While we follow them among the trembling mountains of ice, and behold them penetrating into the deepest frozen recesses of Hudson's Bay and Davis's Straits; while we are looking for them beneath the Arctic circle, we hear that they have pierced into the opposite region of polar cold; that they are at the Antipodes, and engaged under the frozen serpent of the South. Falkland Island, which seemed too remote and too romantic an object for the grasp of national ambition, is but a stage and resting-place for their victorious industry. Nor is the equinoctial heat more discouraging to them than the accumulated winter of both poles. We learn, that while some of them draw the line or strike the harpoon on the coast of Africa, others run the longitude and pursue their gigantic game along the coast of Brazil. No sea, but what is vexed with their fisheries; no climate that is not witness of their toils. Neither the perseverance of Holland, nor the activity of France, nor the dexterous and firm sagacity of English enterprise, ever carried this most perilous mode of hardy industry to the extent to which it has been pursued by this recent people; a people who are still in the gristle, and not hardened into manhood."

The unfortunate war that broke out soon after this speech was delivered, checked for a while the progress of the fishery; but it was resumed with renewed vigour as soon as peace was restored. The American fishery has been principally carried on from Nantucket and New Bedford in Massachusetts; and for a considerable time past the ships have mostly resorted to the Southern seas. "Although," says Mr. Pitkin, "Great Britain has, at various times, given large bounties to her ships employed in this fishery, yet the whalers of Nantucket and New Bedford, unprotected and unsupported by any thing but their own industry and enterprise, have generally been able to meet their competitors in a foreign market."—(*Commerce of the U. States*, 2d ed. p. 46.)

We subjoin

*French Whale Fishery.*—France, which preceded the other nations of Europe in the whale fishery, can hardly be said, for many years past, to have had much share in it. In 1784, Louis XVI. endeavoured to revive the fishery. With this view he fitted out 6 ships at Dunkirk on his own account, which were furnished with harpooners and a number of experienced seamen brought at a great expense from Nantucket. The adventure was more successful than could have been reasonably expected, considering the auspices under which it was carried on. Several private individuals followed the example of his Majesty, and in 1790 France had about 40 ships employed in the fishery. The revolutionary war destroyed every vestige of this rising trade. But since the peace, government has made great efforts for its renewal; and, at present, high bounties are granted to all vessels fitted out for the whale fisheries, but especially to those engaged in the sperm fishery. These, however, have not been so successful in forcing ships into this trade as might have been anticipated; for it appears from the official accounts, that in 1841, only 27 ships entered the different ports of France from the whale fisheries; while only 4 ships cleared out for the same in the course of that year!—(*Administration des Douanes* for 1841, p. 588.)

WHARF, a sort of quay, constructed of wood or stone, on the margin of a roadstead or harbour, alongside of which ships or lighters are brought for the sake of being conveniently loaded or unloaded.

There are 2 denominations of wharfs, viz. *legal quays* and *sufferance wharfs*. The former are certain wharfs in all sea-ports, at which all goods are required by the 1 Eliz. c. 11. to be landed and shipped, and they were set out for that purpose by commission from the Court of Exchequer, in the reign of Charles II. and subsequent sovereigns. Many others have been legalised by act of parliament. In some ports, as Chepstow, Gloucester, &c., certain wharfs are deemed legal quays by immemorial practice, though not set out by commission, or legalised by act of parliament.

Sufferance wharfs are places where certain goods may be landed and shipped, such as hemp, flax, coal, and other bulky goods, by special sufferance granted by the Crown for that purpose.

WHARFAGE, the fee paid for landing goods on a wharf, or for shipping them off.

The stat. 22 Chas. 2. c. 11., after providing for the establishment of wharfs and quays, makes it lawful for any person to lade or unlade goods, on paying wharfage and cranage at the rates appointed by the king in council.

WHEAT (Ger. *Weizen*; Du. *Tarw*; Da. *Hoede*; Sw. *Hoete*; Fr. *Froment*, *Bled*, *Blé*; It. *Grano*, *Formento*; Sp. and Port. *Trigo*; Rus. *Pszhenzia*; Pol. *Pszénica*), a species of bread corn (*Triticum* Lin.), by far the most important of any cultivated in Europe. We are totally ignorant of the country whence this valuable grain was first derived; but it was very early cultivated in Sicily. It is raised in almost every part of the temperate zones, and in some places as high as 2,000 feet above the level of the sea.

The kinds of wheat sown are numerous, but they may be classed under 4 heads: viz. cone or bearded wheat, which, however, is now little cultivated; white wheat, of which there are innumerable varieties, the *white Dantzic* being considered one of the best; red wheat, which is seldom sown where the climate is good and early, and the land in proper condition; and spring wheat. A greater number of people are nourished by rice than by wheat; but owing to the greater quantity of gluten which the latter contains, it makes by far the best bread. Rye comes nearer to wheat in its bread-making qualities than any other sort of grain; still, however, it is very inferior to it. The finest samples of wheat are small in the berry, thin skinned, fresh, plump, and bright, slipping readily through the fingers.

Being very extensively cultivated on soils of very various qualities, and frequently with very imperfect preparation, the produce of wheat crops in Great Britain varies from about 12 to 56 bushels per acre.

The counties most distinguished for the quantity and quality of their wheat are, Kent, Essex, Suffolk, Rutland, Hertfordshire, Berkshire, Hampshire, and Herefordshire, in England; and Berwickshire, and the Lothians, in Scotland. In the northern counties it is, speaking generally, of an inferior quality; being cold to the feel, dark coloured, thick skinned, and yielding comparatively little flour. In the best wheat counties, and in good years, the weight of a Winchester bushel of wheat is from 60 to 62 lbs. In the Isle of Sheppey, in Kent (where, perhaps, the best samples of wheat sent to the London market are produced), this grain, in some favourable seasons, weighs 64 lbs. a bushel. Where the climate is colder, wetter, or more backward, or in bad seasons, the weight of the bushel of wheat is not more than 56 or 57 lbs. It is calculated that the average weight of the bushel of good English wheat is 58½ lbs.; and that the average yield of flour is 13 lbs. of flour to 14 lbs. of grain. — (See Mr. Stevenson's very valuable article on *England*, in *Brewster's Encyclopædia*, vol. viii. p. 720.; *London's Ency. of Agriculture*, &c.)

For a view of the regulations with respect to the importation and exportation of wheat, &c., see CORN LAWS AND CORN TRADE. The price of wheat in 1842 was 57s. 3d. per quarter.

WHISKY, a spirit obtained by distillation from corn, sugar, or molasses, though generally from the former. Whisky is the *national spirit*, if we may so term it, of Scotland and Ireland; but that distilled in the former is generally reckoned superior to that of the latter. — (See SPIRITS.)

WINE (Ger. *Wein*; Fr. *Vin*; It. and Sp. *Vino*; Port. *Vinho*; Rus. *Wino*, *Wino-gradoe winos*; Lat. *Vinum*; Gr. *Oinos*; Arab. *Khamr*), the fermented juice of the grape, or berries of the vine (*Vitis vinifera*).

The vine is indigenous to Persia and the Levant; but it is now found in most temperate regions. The limits within which its cultivated in the northern hemisphere of the Old World vary from about 15° to 48° and 52°; but in North America it is not cultivated farther north than 38° or 40°. It is rarely grown at a greater altitude than 3,000 feet. From Asia the vine was introduced into Greece, and thence into Italy. The Phœceans, who founded Marseilles, carried the vine to the south of France; but it is doubtful whether it was introduced into Burgundy till the age of the Antonines.\* The species of *Vitis* indigenous to North America is very different from the *Vitis vinifera*. In favourable seasons, the vine ripens in the open air in England; and in the eleventh and twelfth centuries, considerable quantities of inferior wine were made from native grapes. Vineyards are now, however, unknown in this country; but the grapes raised in hot-houses, and used in desserts, are excellent.

The vine grows in every sort of soil; but that which is light and gravelly seems best suited for the production of fine wines. It succeeds extremely well in volcanic countries. The best wines of Italy are produced in the neighbourhood of Vesuvius: the famous Tokay wine is also made in a volcanic district, as are several of the best French wines; many parts of the south of France bearing evident marks of extinct volcanoes. Hermitage

\* The ancient writers give the most contradictory accounts with respect to the introduction of the vine into Gaul. — (See the learned and excellent work of Le Grand d'Aussy, *Vie Privée des Français*, tome ii. pp. 329–333.) The statement given above seems the most probable.

is grown among the *débris* of granite rocks. The most favourable situation for a vineyard is upon a rising ground or hill facing the south-east, and the situation should not be too confined ;

—————apertos  
Bacchus amat colles.

The art of expressing and fermenting the juice of the grape appears to have been practised from the remotest antiquity. The sacred writings tell us that Noah planted a vineyard soon after the deluge — (*Gen. ix. 20.*) ; and a modern Latin poet ingeniously represents the vine as a gift from Heaven, to console mankind for the miseries entailed upon them by that grand catastrophe !

Omnia vastatis ergo quum cerneret arvis  
Desolata Deus, nobis felicia vini  
Dona dedit ; tristes hominum quo munere fovit  
Reliquias, mundi solatus vite ruinam !

*Vanierii Præd. Rusticum, lib. xi.*

*Species of Wine.* — There are many varieties of vines ; and this circumstance, combined with differences of soil, climate, mode of preparation, &c., occasions an extreme variety in the species of wine. But between places immediately contiguous to each other, and where even a careful observer would hardly remark any difference, the qualities of the wines, though produced by the same species of grape, and treated in the same way, are often very different. A great deal evidently depends upon the aspect of the vineyard ; and it is probable that a good deal depends on peculiarities of soil. But whatever may be the cause, it is certain that there are wines raised in a few limited districts, such as Tokay, Johannisberger, Constantia, the best Burgundy, Champagne, claret, &c., that no art or care has hitherto succeeded in producing of equal goodness in other places.

*ANCIENT WINES.* — The wines of Lesbos and Chios among the Greeks, and the Falernian and Cecuban among the Romans, have acquired an immortality of renown. Great uncertainty, however, prevails as to the nature of these wines. Dr. Henderson thinks that the most celebrated of them all, the Falernian, approached, in its most essential characters, near to Madeira. In preparing their wines, the ancients often inspissated them till they became of the consistence of honey, or even thicker. These were diluted with water previously to their being drunk ; and, indeed, the habit of mixing wine with water seems to have prevailed much more in antiquity than in modern times.

*MODERN WINES.* — The principal wines made use of in this country are port, sherry, claret, Champagne, Madeira, hock, Marsala, Cape, &c.

*Port*, the after-dinner wine most commonly used in England, is produced in the province of Upper Douro, in Portugal ; and is shipped at Oporto, whence its name. When it arrives in this country, it is of a dark purple or inky colour ; has a full, rough body, with an astringent bitter-sweet taste, and a strong flavour and odour of brandy. After it has remained some years longer in the wood, the sweetness, roughness, and astringency of the flavour abate ; but it is only after it has been kept 10 or 15 years in bottle, that the odour of the brandy is completely subdued, and the genuine aroma of the wine developed. When kept to too great an age, it becomes tawny, and loses its peculiar flavour. During the process of melioration, a considerable portion of the extractive and colouring matter is precipitated on the sides of the vessels in the form of crust. In some wines this change occurs much earlier than in others.

A large quantity of brandy is always mixed with the wine shipped from Oporto for England. Genuine unmixed port wine is very rarely met with in this country. We have been so long accustomed to the compounded article, that, were it possible to procure it unmixed, it is doubtful whether it would be at all suited to our taste. According to Mr. Brande's analysis, on which, however, owing to the differences in the quality of the wine, no great stress can be laid, port, as used in England, contains about 23 per cent. of alcohol. In 1841, 2,387,017 gallons of port were retained for consumption in the U. Kingdom.

*Oporto Wine Company.* — The quality of the wine shipped from Oporto has been materially injured by the monopoly so long enjoyed by the Oporto Wine Company. This company was founded in 1756, during the administration of the Marquis Pombal. A certain extent of territory is marked out by its charter as the only district on the Douro in which wine is to be raised for exportation : the entire and absolute disposal of the wines raised in this district is placed in the hands of the Company ; who are further authorised to fix the prices to be paid for them to the cultivators, to prepare them for exportation, and to fix the price at which they shall be sold to foreigners ! It is obvious that a company with such powers cannot be any thing else than an intolerable nuisance. What could be more arbitrary and unjust than to interdict the export of all wines raised out of the limits of the Company's territory ? But even in its own district, its proceedings have been most oppressive and injurious. The Company annually fix, by a fiat of their own, 2 rates of prices — one for the *vinho de feitoria*, or wine for exportation, and the other for *vinho de ramo*, or wine for home consumption — at which the cultivators are to be paid, *whatever may be the quality of their wines !* They have, therefore, no motive to exert superior skill and ingenuity ; but content themselves with endeavouring to raise, at the least possible expense, the greatest supply of *vinho de feitoria*, for which the Company allow the highest price. All emulation is thus effectually extinguished, and the proprietors who possess vineyards of a superior quality invariably adulterate their

wines with inferior growths, so as to reduce them to the average standard. "In this way," says Dr. Henderson, "the finer products of the Douro vintages have remained in a great measure unknown to us; and port wine has come to be considered as a single liquor, if I may use the expression, of nearly uniform flavour and strength; varying, it is true, to a certain extent in quality, but still always approaching to a definite standard, and admitting of few degrees of excellence. The manipulations, the admixtures—in one word, the adulterations—to which the best wines of the Cimo do Douro are subjected, have much the same effect as if all the growths of Burgundy were to be mingled in one immense vat, and sent into the world as the only true Burgundian wine. The delicious produce of Romanée Chambertin and the Clos Vougeot, would disappear, and in their places we should find nothing better than a second-rate Beane or Macon wine."—(*History of Ancient and Modern Wines*, p. 210.)

Not only, however, have the Oporto Wine Company deteriorated the quality, but they have also raised the price of their wines to an enormous height. Secured against the competition of their countrymen, and enjoying down to 1831, a nearly absolute monopoly of the British markets by means of the high duties on French wines, they have filled their pockets at our expense. At the very moment when the Company have been shipping wine for England at 40*l.* a pipe, they have frequently shipped the same wine to other countries at 20*l.*!—(*Fleetwood Williams on the Wine Trade*.) And the authentic Tables published by Balbi show that the price of wine has been trebled or quadrupled under the management of this corporation.—(*Essai Statistique sur le Royaume de Portugal*, tome i. p. 187.)

But though the abuses inherent in the constitution of the Company have been carried of late years to an enormous extent, it is long since its injurious effects on the commerce of this country were distinctly perceived and pointed out. So far back as 1767, the Board of Trade laid a memorial before his Majesty in council, in which they state, "With respect to many particular regulations of the Oporto Company, which we think justly objected to by the merchants as highly grievous and oppressive, we have not thought it necessary to enter into a minute description of them, being of opinion that one general and fatal objection lies against them all; viz.—that they all conspire to establish in the Company a monopoly against your Majesty's subjects from which by treaty they have a right to be exempted."

But notwithstanding this authoritative exposition of the injury done to the English by this monopoly, and the experience which every subsequent year afforded of its mischievous influence, such has been the inveteracy of ancient prejudice, that it was not till the sessions of 1831 that we took the only step by which we could hope to rid ourselves of its evils, as well as a host of others, by equalising the duties on French and Portuguese wines, and putting an end to the absurd and injurious preference in favour of the latter established by the Methuen treaty.

England and Brasil are the only countries to which any considerable quantity of port wine is exported. Our imports amounted, at an average of the 8 years ending with 1841, to 26,370 pipes a year; of which, however, a portion is subsequently exported; while the exports from Portugal to all other countries, Brasil inclusive, have not recently exceeded 7,000 pipes. It was supposed, that the abolition of the discriminating duty in favour of port would make its consumption in this country gradually fall off, its place being filled by French and other wines; but though such a result may not improbably take place in the end, it has hitherto been hardly sensible. The falling off in the consumption of port in 1843 was wholly occasioned by the anticipation of a reduction being about to be made in the duty, and a consequent disinclination on the part of the dealers and the public to buy wine subject to the high duty.

*Sherry* is of a deep amber colour; when good, it has a fine aromatic odour; its taste is warm, with some degree of the agreeable bitterness of the peach kernel. When new, it tastes harsh and fiery; it is mellowed by being allowed to remain 4 or 5 years or longer in the wood; but it does not attain to its full flavour and perfection until it be kept for 15 or 20 years. It is a very strong wine, containing about 19 per cent. of alcohol. It is principally produced in the vicinity of Xeres, not far from Cadix, in Spain. It is very extensively used in this country as a dinner wine. Dry Sherry, or *amontillado*, when genuine and old, fetches a very high price. Perhaps no wine is so much adulterated as sherry. With the exception of Marsala, the consumption of sherry has been far more influenced than that of any other wine by the reduction of the duties in 1825. In 1842, the quantity retained for home consumption amounted to 2,261,786 gallons, being more than double the quantity retained for consumption at an average of 1823 and 1824!—(See post.)

*Claret*,—the term generally used in England to designate the red wines, the produce of the Bordelais. Of these, Lafitte, Latour, Château-Margaux, and Haut-Brion, are so generally esteemed, that they always sell at from 20 to 25 per cent. higher than any others of the province. The first mentioned is the most choice and delicate, and is characterised by its silky softness on the palate, and its charming perfume, which partakes of the nature of the violet and the raspberry. The Latour has a fuller body, and at the same time a considerable aroma, but wants the softness of the Lafitte. The Château-Margaux, on the other hand, is lighter, and possesses all the delicate qualities of the Lafitte, except that it has not quite so high a flavour. The Haut-Brion, again, has more spirit and body than any of the preceding, but is rough when new, and requires to be kept 6 or 7 years in the wood; while the others become fit for bottling in much less time.

Among the second-rate wines, that of Rozan, in the parish of St. Margaux, approaches in some respects to the growth of the Château-Margaux; while that of Gorce, in the same territory, is little inferior to the Latour; and the vineyards of Leoville, Larose, Bran-Mouton, and Pichon-Longueville, in the canton of Pauillac, afford light wines of good flavour, which, in favourable years, have much of the excellence of the finer growths. In the Entre-deux-Mers, the wines of Canon and St. Emilion in the vicinity of Libourne, are deemed the best, being of a full body and very durable. When new, these wines are always harsh and astringent; but they acquire an agreeable softness, and are characterised by a peculiar flavour, which has been not unaptly compared to the smell of burning wax. The aroma of the first growths is seldom fully developed till after they have been kept 8 or 9 years: but the secondary qualities come to perfection a year or two sooner. The colour often grows darker as the wine advances in age, in

consequence of the deposition of a portion of its tartar: but, when well made, and thoroughly fined, it seldom deposits any crust.

(These particulars are borrowed from the valuable work of Dr. Henderson, on *Ancient and Modern Wines*, p. 184. We have given, in a previous article—(see *Bordeaux*)—full and authentic details as to the trade in claret. We beg, also, to refer the reader to that article for some observations on the wine trade of France, and on the injury done to it by the restrictive system of commerce.)

There is generally a very good supply of claret in bond in the docks in London. Its price varies from about 15*l.* per hogshead for the inferior to 50*l.* and 54*l.* per hogshead for the superior growths. What are called cargo or shipping clarets may be bought at from 5*l.* to 10*l.* per hogshead. The finest case claret sells in bond at about 50*s.* per dozen; but parcels of very well flavoured wine may be bought at 25*s.*

*Champagne*, — so called from the province of France, of which it is the produce, — is one of the most deservedly esteemed of the French wines. The wines of Champagne are divided into the 2 grand classes of white and red wines; and each of these again into still and sparkling: but there is a great variety in the flavour of the produce of different vineyards. Sillery is universally allowed to be the best of the still wines. It is dry, of a light amber colour, has a considerable body, and a charming aroma. "Le corps," (says M. Jullien,) "le spiritueux, le charmant bouquet, et les vertus toniques dont il est pourvu, lui assurent la priorité sur tous les autres." — (*Topographie de tous les Vignobles*, p. 30.) Dr. Henderson agrees with Jullien, in considering it as one of the wholesomest of the Champagne wines. The sparkling wines are, however, the most popular, at least in this country. Of these, the wine of Ay, 5 leagues south from Rheims, is, perhaps, the best. It is lighter and sweeter than Sillery, and has an exquisite flavour and aroma. That which merely creams on the surface (*demi-mousseux*) is preferred to the full frothing wine (*grand-mousseux*). Being bright, clear, and sparkling, it is as pleasing to the eye as it is grateful to the palate.

"Cernis micanti concolor ut vitro  
Latex in auras, gemmeus aspic,  
Scintillet exultim; utque dulces  
Naribus illecebras propinet  
"Succi latentis proditor haultus!  
Ut spuma motu lactea turbido  
Crystallinum latis referre  
Mox oculis properet nitorem."

Hautvilliers, about 4 leagues from Rheims and 1 from Epernay, used formerly to produce wine that equalled, and sometimes surpassed, the wine of Ay. But it is no longer cultivated with the same care; so that, though still very good, it now only ranks in the 2d class.

The best of the red wines of Champagne are those of Verzy, Verzenay, Mailly, Bouzy, and St. Basle. "Ils ont une belle couleur, du corps, du spiritueux, et surtout beaucoup de finesse, de sève, et de bouquet." — (*Jullien*, p. 27.) The Clos St. Thierry, in the vicinity of Rheims, produces wine which, according to Jullien, unites the colour and the aroma of Burgundy to the lightness of Champagne.

The province of Champagne produces altogether about 1,100,000 hectolitres of wine; of which, however, the finest growths make but a small part. The principal trade in wine is carried on at Rheims, Aise, and Epernay. The vaults in which the vintages are stored are excavated in a rock of calcareous tufa to the depth of 30 or 40 feet. Those of M. Moët, at Epernay, are the most extensive, and few travellers pass through the place without going to see them. The briskest wines (*grands-mousseux*) keep the worst. — (*Jullien*, p. 34.)

*Burgundy*. — The best wines of this province, though not so popular in England as those of Champagne, probably because they are very apt to be injured by a sea-voyage, enjoy the highest reputation. "In richness of flavour and perfume, and all the more delicate qualities of the juice of the grape, they unquestionably rank as the first in the world; and it was not without reason that the dukes of Burgundy, in former times, were designated as the *princes des bons vins*." — (*Henderson*, p. 161.) M. Jullien is not less decided: — "Les vins des premiers crus, lorsqu'ils proviennent d'une bonne année, réunissent, dans de justes proportions, toutes les qualités qui constituent les vins parfaits; ils n'ont besoin d'aucun mélange, d'aucune préparation pour attendre leur plus haut degré de perfection. Ces opérations, que l'on qualifie dans certains pays de *soins* qui aident à la qualité, sont toujours nuisibles aux vins de Bourgogne." — (p. 104.)

Romané-Conti, Chambertin, the Clos Vougeot, and Richebourg are the most celebrated of the red wines of Burgundy. Chambertin was the favourite wine of Louis XIV. and of Napoleon. It is the produce of a vineyard of that name, situated 7 miles south from Dijon, and furnishing each year from 130 to 150 puncheons, from an extent of about 65 acres. It has a fuller body and colour, and greater durability, than the Romané, with an aroma nearly as fragrant.

The white wines of Burgundy are less numerous, and, consequently, less generally known, than the others; but they maintain the highest rank among French white wines, and are not inferior to the red either in aroma or flavour.

The entire annual produce of wine in Burgundy and Beaujolais may at present be estimated, at an average, at nearly 3,500,000 hectolitres, of which about 750,000 suffice for the consumption of the inhabitants. Since the Revolution, the cultivation of the vine has been greatly extended in the province. Many of the new vineyards having necessarily been planted in comparatively unfavourable situations, a notion has been gaining ground that the wines of Burgundy are degenerating. This, however, is not the case. On the contrary, the quantity of *bons crus*, instead of being diminished, has increased considerably; though, as the supply of inferior wines has increased in a still greater degree, the fine wines bear a less proportion to the whole than they did previously to the Revolution. — (*Jullien*, p. 90.)

The principal trade in Burgundy is carried on at Dijon, Gevrey, Châlons-sur-Saône, &c.

Besides the above, France has a great variety of other excellent wines. Hermitage, Sauterne, St. Péry, &c. are well known in England; and deservedly enjoy, particularly the first, a high degree of reputation.

Account of the Quantities and Value of the Wines exported from France in 1841; distinguishing between those of the Gironde and those of other Departments, and between those exported in Casks and Bottles; and specifying the Quantities of those sent to each County and their total Value.—(*Administration des Douanes* for 1841, p. 348.)

Exclusive of the above, there were exported from France, in the same year, 2,607,820 litres of *vins de liqueurs*, valued at 3,911,731 francs.

The total produce of the vineyards of France is estimated at about 35,000,000 hectolitres (770,000,000 Imp. gallons), worth 540,000,000 francs (21,600,000*l.*). We beg to refer the reader to the article *BORDEAUX*, for an account of the influence of the French system of commercial policy on this great department of industry.

Account of the Total Quantities of Wine exported from France during each of the 34 Years ending with 1841.

*Dispute as to the comparative Merit of Champagne and Burgundy.* — The question, whether the wines of Champagne or Burgundy were entitled to the preference, was agitated during the reign of Louis XIV. with extraordinary keenness. The celebrated Charles Coffin, rector of the University of Beauvais, published, during this controversy, the classical ode, partly quoted above, in which Champagne is eulogised, and its superiority vindicated, with a spirit, vivacity, and delicacy worthy of the theme. The citizens of Rheims were not ungrateful to the poet; but liberally rewarded him with an appropriate and munificent donation of the wine he had so happily panegyrised. Gréneau wrote an ode in praise of Burgundy; but, unlike its subject, it was flat and insipid, and failed to procure any recompence to its author. The different pieces in this amusing controversy were collected and published in octavo, at Paris, in 1712 — (See *Le Grand d'Aussy, Vie Privée des Français*, tom. iii. p. 39., and the *Biographie Universelle*, tom. ix. art. Coffin (Charles).) Erasmus attributes the restoration of his health to his having drunk liberally of Burgundy; and has eulogised it in the most extravagant terms. An epistle of his, quoted by Le Grand d'Aussy, shows that Falstaff and he could have spent an evening together less disagreeably than might have been supposed: — “Le premier qui enseigne l'art de faire ce vin (Bourgogne), ou qui en fit present, ne doit-il point passer plutôt pour nous avoir donné la vie que pour nous avoir gratifié d'une liqueur.” — (*Vie Privée des Français*, tom. iii. p. 9.)

*Consumption of French Wine in England. Discriminating Duties.* — Owing to the intimate connection subsisting between England and France for several centuries after the Conquest, the wines of the latter were long in almost exclusive possession of the English market: but the extension of commerce gradually led to the introduction of other species; and in the reigns of Elizabeth and James I., the dry white wines of Spain seem to have been held in the highest estimation. This, however, was only a temporary preference. Subsequently to the Restoration, the wines of France regained their former ascendancy. In 1687 their importation amounted to 15,518; in 1688, to 14,218; and in 1689, to 11,106 tons. It is exceedingly doubtful whether so much as a single pipe of port had ever found its way to England previously to this period — (*Henderson*, p. 313.); and it is most probable that the wines of France would have continued to preserve their ascendancy in our markets, had not their importation been artificially checked.

The trade with France had occasionally been prohibited previously to the accession of William III.; but it was not until 1693 that any distinction was made between the duties payable on French and other wines. But Louis XIV. having espoused the cause of the exiled family of Stuart, the British government, in the irritation of the moment, and without reflecting that the blow aimed at the French would infallibly recoil upon themselves, imposed, at the period above-mentioned, a discriminating duty of 8*l.* a tun on French wines, and in 1697 increased it to 33*l.* In consequence of this enormous augmentation of duty on French wines, the merchants began to import wine from Oporto as a substitute for the red wines of Bordeaux, excluded by the high duties. It is probable, however, that these discriminating duties would have been repealed as soon as the excitement which produced them had subsided, and that the trade would have returned to its old channels, had not the stipulations in the famous commercial treaty with Portugal, negotiated by Mr. Methuen in 1703, given them permanence. Such, however, was unluckily the case: for, according to this treaty, we bound ourselves to charge in future 33½ per cent. higher duties on the wines of France than on those of Portugal; the Portuguese, by way of compensation, binding themselves to admit our woollens into their markets in preference to those of other countries, at a fixed and invariable rate of duty.

Though very generally regarded at the time as the highest effort of diplomatic skill and address, the Methuen treaty was certainly founded on the narrowest views of national interest, and has proved, in no common degree, injurious to both parties, but especially to England. By binding ourselves to receive Portuguese wines for *two thirds* of the duty payable on those of France, we, in effect, gave the Portuguese growers a monopoly of the British market, and thereby attracted too great a proportion of the deficient capital of Portugal to the production of wine; while, on the other hand, we

not only excluded one of the principal equivalents the French had to offer for our commodities, and proclaimed to the world that we considered it better to deal with two millions of poor beggarly customers, than with thirty millions of rich ones, but we also provoked the retaliation of the French, who forthwith excluded most of our articles from their markets!

The injurious effects of the regulations in the Methuen treaty were distinctly pointed out by Dr. Davenant and Mr. Hume. The latter, in his *Essay on the Balance of Trade*, published in 1752, says, "Our jealousy and hatred of France are without bounds. These passions have occasioned innumerable barriers and obstructions on commerce, where we are commonly accused of being the aggressors. But what have we gained by the bargain? We lost the French market for our woollen manufactures, and transferred the commerce of wine to Spain and Portugal, where we buy much worse liquor at a much higher price! There are few Englishmen who would not think their country absolutely ruined, were French wine sold in England so cheap, and in such abundance, as to supplant ale and other home-brewed liquors. But, would we lay aside prejudice, it would not be difficult to prove that nothing could be more innocent; perhaps, more advantageous. Each new acre of vineyard planted in France, in order to supply England with wine, would make it requisite for the French to take an equivalent in English goods, by the sale of which we should be equally benefited."

In consequence of the preference so unwisely given to the wines of Portugal over those of France, — a preference continued, in defiance of every principle of sound policy and common sense, down to 1831, — the imports of French wine were for many years reduced to a mere trifle; and notwithstanding their increased consumption, occasioned by the reduction of the duties in 1825, the quantity of all sorts entered for consumption in 1841 did not exceed 353,740 gallons; while the consumption of Portuguese wines amounted in the same year to 2,387,017 gallons! This is the most striking example, perhaps, in the history of commerce, of the influence of customs duties in diverting trade into new channels, and altering the taste of a people. All but the most opulent classes having been compelled, for a long series of years, either to renounce wine, or to use port, the taste for the latter has been firmly rooted; the beverage that was originally forced upon us by necessity having become congenial from habit. It is probable, however, now that the discriminating duty in favour of port is abolished, that the excellence of the French wines will ultimately regain for them some portion of that favour in the English market they formerly enjoyed.

*Madeira* — so called from the island of that name — is a wine that has long been in extensive use in this and other countries. Plants of the vine were conveyed from Crete to Madeira in 1421, and have succeeded extremely well. There is a considerable difference in the flavour and other qualities of the wines of Madeira: the best are produced on the south side of the island. Though naturally strong, they receive an addition of brandy when racked from the vessels in which they have been fermented, and another portion is thrown in previously to their exportation. This is said to be required to sustain the wine in the high temperature to which it is subjected in its passage to and from India and China, to which large quantities of it are sent; it being found that it is mellowed, and its flavour materially improved, by the voyage. It does not, however, necessarily follow that the wines which have made the longest voyages are always the best. Much must obviously depend on the original quality of the wine; and many of the parcels selected to be sent to India are so inferior, that the wine, when brought to London, does not rank so high as that which has been imported direct. But when the parcel sent out has been well chosen, it is very much matured and improved by the voyage; and it not only fetches a higher price, but is in all respects superior to the direct importations. Most of the adventitious spirit is dissipated in the course of the Indian voyage.

Madeira wines may be kept for a very long period. "Like the ancient vintages of the Surrentine hills, they are truly *firmissima vina*, retaining their qualities unimpaired in both extremes of climate, suffering no decay, and constantly improving as they advance in age. Indeed, they cannot be pronounced in condition until they have been kept for 10 years in the wood, and afterwards allowed to mellow nearly twice that time in bottle; and even then they will hardly have reached the utmost perfection of which they are susceptible. When of good quality, and matured as above described, they lose all their original harshness, and acquire that agreeable pungency, that bitter sweetness, which was so highly prized in the choicest wines of antiquity; uniting great strength and richness of flavour with an exceedingly fragrant and diffusible aroma. The nutty taste, which is often very marked, is not communicated, as some have imagined, by means of bitter almonds, but is inherent in the wine." — (*Henderson*, p. 253.)

The wines of Madeira have latterly fallen into disrepute in England. The growth of the island is very limited — not exceeding 20,000 pipes, of which a considerable quantity goes to the West Indies and America. Hence, when Madeira was a fashionable wine in England, every sort of deception was practised with respect to it, and large

quantities of spurious trash were disposed of for the genuine vintage of the island. This naturally brought the wine into discredit ; so that sherry has been for several years the fashionable white wine. It is difficult, however, to imagine that adulteration was ever practised to a greater extent upon Madeira than it is now practised upon sherry. It is not, therefore, improbable, that a reaction may take place in favour of Madeira. The quantity entered for home consumption in 1827 amounted to 308,295 gallons, whereas the quantity entered for home consumption in 1842 amounted to only 65,909 gallons.

Malmsey, a very rich luscious species of Madeira, is made from grapes grown on rocky grounds exposed to the full influence of the sun's rays, and allowed to remain on the vine till they are over-ripe.

The trade in Madeira wine is carried on at Funchal, the capital of the island, in lat. 32° 37' N., lon. 17° 6' W. *Weights and measures same as at Lisbon.*

*Teneriffe wine* — so called from the island of that name — resembles Madeira, and is not unfrequently substituted in its place ; but it wants the full body and rich flavour of the best growths of Madeira.

*German Wines.* — The wines of Germany imported into England are principally produced on the banks of the Rhine and the Moselle. The Rhine wines constitute a distinct order by themselves. They are drier than the French white wines, and are characterised by a delicate flavour and aroma, called in the country *gäre*, which is quite peculiar to them, and of which it would, therefore, be in vain to attempt the description. A notion prevails, that they are naturally acid ; and the inferior kinds, no doubt, are so ; but this is not the constant character of the Rhine wines, which in good years have no perceptible acidity to the taste, at least not more than is common to them with the growths of warmer regions. Their chief distinction is their extreme durability. The wines made in warm dry years are always in great demand, and fetch very high prices.

The Johannisberger stands at the head of the Rhine wines. It has a very choice flavour and perfume, and is characterised by an almost total want of acidity. The vineyard is the property of Prince Metternich. The Steinberger ranks next to the Johannisberger. It is the strongest of all the Rhenish wines, and in favourable years has much flavour and delicacy.

The produce of certain vineyards on the banks of the Moselle is of superior quality. The better sorts are clear and dry, with a light pleasant flavour and high aroma ; but they sometimes contract a slaty taste from the strata on which they grow. They arrive at maturity in 5 or 6 years ; though, when made in a favourable season, they will keep twice that time, without experiencing any deterioration. — (*Henderson*, p. 226.)

*Tokay* — so called from a town in Hungary near which it is produced — is but little known in England. It is luscious, possessing at the same time a high degree of flavour and aroma. It is scarce and dear ; and very apt to be counterfeited.

*Marsala.* — The Sicilian white wine called Marsala, from the town (the ancient Lilybæum) whence it is shipped, and near which it is made, is now pretty largely consumed in England ; the entries for home consumption having increased from 79,686 gallons in 1823, to 393,028 in 1842 ; an extraordinary increase, particularly when it is considered that during the same period the consumption of most sorts of wine has been nearly stationary. Marsala is a dry wine : the best qualities closely resembling the lighter sorts of Madeira ; but the increasing demand for it seems to be owing as much to its cheapness as to any peculiarity of quality. It is, however, when good, an agreeable dinner wine. Marsala has been brought to its present state of perfection and repute by the care and exertions of 2 Englishmen, the Messrs. Woodhouse, established in Sicily, who have an extensive factory in the neighbourhood of Marsala. The wine is shipped in large quantities for America ; whence a considerable quantity is again conveyed to the West Indies, where it is not unfrequently disposed of as real Madeira.

With the exception of Marsala, very little wine either of Sicily or Italy is imported into England. The wines of those countries are, indeed, without, perhaps, a single exception, very inferior to those of France. The natives bestow no care upon the culture of the vine ; and their ignorance, obstinacy, and want of skill in the preparation of wine, are said to be almost incredible. In some districts, the art is, no doubt, better understood than in others ; but had the Falernian, Cecuban, and other famous ancient wines, not been incomparably better than the best of those that are now produced, they never would have elicited the glowing panegyrics of Horace.

*Wines of Greece and Cyprus.* — The soil in most parts of Greece and of the Grecian islands is admirably fitted for the growth of the vine ; and, in antiquity, they produced some of the choicest wines. But the rapacity of the Turks, and the insecurity of person and property that has always prevailed under their miserable government, has effectually prevented the careful cultivation of the vine ; and has occasioned, in many places, its total abandonment. It may, however, be fairly presumed, now that Greece has emancipated herself from the iron yoke of her oppressors, that the culture of the vine will attract

some portion of that attention to which it is justly entitled; and that, at no distant period, wine will form an important article of export from Greece.

Nowhere, perhaps, has the destructive influence of Turkish barbarism and misgovernment been so apparent as in Candia and Cyprus. While these 2 renowned and noble islands were possessed by the Venetians, they supplied all Europe with the choicest dessert wines. Bacci affirms, that towards the end of the 16th century, Candia sent annually 200,000 casks of malmsey to the Adriatic; whereas at present it hardly produces sufficient to supply the wants of its few impoverished inhabitants. — (*Henderson*, p. 243.) The wines of Cyprus, particularly those produced from the vineyard called the Commandery, from its having belonged to the Knights of Malta, were still more highly esteemed than those of Crete. In the earlier part of last century, the total produce of the vintage of the island was supposed to amount to above 2,000,000 gallons, of which nearly  $\frac{1}{2}$  was exported; but now the wine grown and exported does not amount to  $\frac{1}{10}$ th part of these quantities! The oppression of which they have been the victims, has reduced the peasantry to the extreme of indigence. The present population of the island is not supposed to exceed 60,000, — a number insufficient to have peopled one of its many ancient cities; and small as this number is, it is constantly diminishing by the inhabitants availing themselves of every opportunity of emigrating. Recently Cyprus has passed into the hands of Mehemet Ali; but unless the Pacha establishes a different government in it from what he has established in Egypt, the inhabitants will gain nothing by the change. — (*See Geog. Dict. art. Cyprus.*)

*Cape Wines.* — Of the remaining wines imported into England, those of the Cape of Good Hope form the largest proportion; the quantity annually entered for home consumption, at an average of the 3 years ending with 1842, being 422,937 Imperial gallons a year. The famous Constantia wine is the produce of 2 contiguous farms of that name, at the base of Table Mountain, between 8 and 9 miles from Cape Town. The wine is very rich and luscious; though, according to Dr. Henderson, it yields, in point of flavour and aroma, to the muscadine wines of Languedoc and Roussillon. But, with this exception, most of the Cape wines brought to England have an earthy disagreeable taste, are often acid, want flavour and aroma, and are, in fact, altogether execrable. And yet this vile trash, being the produce of a British possession, enjoys peculiar advantages in our markets; for while the duty on Cape wine is only 2s. 11d. a gallon, that on all other wines is 5s. 9d. The consequences of this unjust preference are doubly mischievous: in the first place, it forces the importation of an article of which little is directly consumed, but which is extensively employed as a convenient menstruum for adulterating and degrading sherry, Madeira, and other good wines; and, in the second place, it prevents the improvement of the wine; for, while the legislature thinks fit to give a bounty on the importation of so inferior an article, it is to be supposed that the colonists should exert themselves to produce any thing better? It is not easy to imagine a more preposterous and absurd regulation. The act enforcing it should be entitled, an act for the adulteration of wines in Great Britain, and for encouraging the growth of bad wine in the Cape colony!

*Consumption of Wine in Great Britain. Duties.* — We have repeatedly had occasion, in the course of this work, to call the reader's attention to the injurious operation of unequal and exorbitant duties. Perhaps, however, the trade in wine has suffered more from this cause than any other department of commerce. We have already endeavoured to point out some of the effects resulting from the inequality of the duties, or from the preference so long given to the inferior wines of Portugal and Spain over the superior wines of France. But the exorbitance of the duties was, if possible, still more objectionable than the partial principle on which they were imposed. It appears from the subjoined Table, that during the 3 years ending with 1792, when the duty on French wines was 3s. 9d., and on Portuguese 2s. 6d. per wine gallon, the consumption in Great Britain amounted, at an average, to 7,410,947 gallons a year, producing about 900,000*l.* of revenue. It is probable, had the increase taken place *gradually*, that these duties might have been doubled without any material diminution of consumption. But in 1795 and 1796 they were raised to 6s. 6d. per gallon on French, and to 5s. 8½d. per gallon on Portuguese and Spanish wine; and the consequence of this sudden and inordinate increase, as exhibited in the Table, was, that the consumption fell from nearly 7,000,000 gallons in 1795, to 5,732,283 gallons in 1796, and to 3,970,901 in 1797! But this unanswerable demonstration of the ruinous effect of heavy and sudden additions to the duties did not prevent them being raised, in 1804, to 11s. 5½d. on French, and to 7s. 8d. on Portuguese and Spanish wine. They continued at this rate till 1825; and such was their influence, that notwithstanding the vast increase of wealth and population since 1790, and the general improvement in the style of living, the total consumption of wine, during the 3 years ending with 1824, amounted, at an average, to only 6,248,707 gallons a year; being no less than 2,162,180 gallons under the annual consumption of the 3 years ending with 1792! It may, therefore, be truly said, making allowance for the increase of population, that *the consumption of wine in Great Britain fell off more than fifty per cent. between 1790 and 1824.*

On Mr. Robinson (now Lord Ripon) becoming Chancellor of the Exchequer, he resolved upon the effectual reduction of the wine duties; and took, in 1825, nearly 50 per cent. from the previously existing duties; and notwithstanding the spirit duties were at the same time reduced in a still greater degree, the consumption of wine in Great Britain has been increased in ordinary years from little more than 4,150,000 to from 6,000,000 to 7,000,000 Imperial gallons, while there has been no loss of revenue. We are, therefore, justified in affirming that this measure has been very successful, and that it is a most valuable example of the superior productiveness of low duties.\*

\* An article in the Edinburgh Review, No. 80., contributed to bring about this measure. See also an excellent tract on the *Wine Trade*, by Mr. Warre, published in 1824.

**Consumption of Wine in Ireland. Duties.**—In 1790, the duties on wine consumed in Ireland were considerably below the level of those imposed in Great Britain, and the average annual quantity of all sorts retained for home consumption in that country amounted to about 1,160,000 Imperial gallons, producing about 138,000*l.* a year of revenue. Had those to whom the government of Ireland was intrusted possessed the slightest knowledge of the merest elements of finance, or of the condition of the Irish people, they would not have attempted to add to the public revenue by augmenting the duties on wine. Owing to the limited number of the middle classes in Ireland, an increase of duty could not be expected to be productive; and though it had yielded 50,000*l.*, or even 100,000*l.* a year additional revenue, that would have been no compensation for the injury it was sure to do in checking the diffusion of that taste for luxuries and enjoyments so essential to the improvement of the people. But those who had to administer the affairs of Ireland were insensible to such considerations; and never doubted that 2 and 3 make 4 in the arithmetic of the customs as well as in Cocker's. Such, indeed, was their almost incredible rapacity, that in the interval between 1791 and 1814, they raised the duty on French wine from 33*l.* 7*s.* a tun to 144*l.* 7*s.* 6*d.*; and that on port from 22*l.* 4*s.* 8*d.* to 94*l.* 11*s.* 1*d.* This was a much more rapid increase than had taken place in England; and as the country was far less able to bear even the same increase, the consequences have been proportionally mischievous. In 1815, the quantity of wine retained for home consumption in Ireland had declined, notwithstanding the population had been doubled, to 608,000 Imperial gallons, or to about half the quantity consumed in 1790; and in 1834, the consumption had fallen to 467,000 gallons, while the revenue only amounted to 185,000*l.*

The reduction of the duties in 1835 has nearly doubled the consumption of wine directly imported into Ireland, and has added considerably to the revenue; but since 1814, when the duties on wine in Great Britain and Ireland were equalised, it has not been possible to state the consumption of wine in either with accuracy, on account of the transshipments from the former to the latter. It is, however, quite certain that the consumption of wine in Ireland, partly in consequence of the high duties, and partly of a change in the mode of living, does not now (1844) amount, as compared with the population, to half its amount in 1790.

**Adulteration of Wine.**—We have already alluded to this practice. It was prosecuted to a very great extent previously to the reduction of the duties in 1835, and is still very far from being suppressed. It has been affirmed, but we are inclined to suspect the statement of exaggeration, that at this moment more than a third part of all the sherry consumed in London is the produce of the *home presses*! Indeed, wines are every day offered for sale at prices at which every one conversant with the trade knows they could not be afforded were they genuine. Mr. Fleetwood Williams has given, in his pamphlet on the *Wine Trade* (1834), some curious details on this subject.

The imposition of the duties on an *ad valorem* principle, by allowing genuine wine to be sold at a low price, would put an effectual stop to the practices of the adulterators. The increase of the duties in the reigns of William and Anne first gave birth to this discreditable fraternity—(see a curious paper by Addison in the *Tatler*, No. 131.); and it will continue to flourish as long as the duties are maintained on their present footing.

The only security against being imposed upon, is to deal with respectable houses largely engaged in the trade; to whom a reputation for selling good wine is of ten times more importance than any thing they could expect to make by adulteration.

**Measures.**—According to the system of wine measures that prevailed down to 1826, the gallon contained 231 cubic inches; the tierce, 43 gallons; the puncheon, 54 gallons; the hogshead, 63 gallons; the pipe or butt, 136 gallons; and the tun, 252 gallons. But in the new system of measures introduced by the act 5 Geo. 4 c. 74., the Imperial standard gallon contains 277.274 cubic inches; so that the tierce = 35 (very nearly) Imperial gallons; the puncheon = 70 (very nearly) do.; the hogshead = 54 (very nearly) do.; the pipe or butt = 106 (very nearly) do.; and the tun = 210 (very nearly) do.—(See *WEIGHTS AND MEASURES*.)

A very great quantity of wine is sold to the consumer in dozens; much more, indeed, than is sold in any other way; and yet there is no regulation as to the size of bottles,—a defect which has occasioned a great deal of abuse. No one doubts the propriety of making all gallons, bushels, &c. of the same capacity; and why should not similar regulations be enforced in the case of measures so universally used as bottles?

Wine the produce of Europe may not be imported for home consumption, except in British ships, or in ships of the country of which the wine is the produce, or of the country from which it is imported, on forfeiture thereof, and 100*l.* by the master of the ship.—(3 & 4 Will. 4 c. 54.)

No abatement of duties made on account of any damage received by wine.—(3 & 4 Will. 4 c. 52.)

Wine from the Cape must be accompanied by a certificate of its production.—(See *ante*, p. 673.)

Wine exported to foreign port from the bonded warehouses must be shipped in vessels of not less than 70 tons burden.—(3 & 4 Will. 4 c. 57.)

**Wine for Officers of Navy.**—For the quantity of duty-free wine to be allowed to officers of the navy, and the regulations under which it is to be allowed, see *ante*, p. 679.

**Regulations as to mixing, bottling, &c. in Warehouses.**—1. Wines, when deposited in warehouses of special security, or in warehouses situated near the places of landing and shipping, and declared in the order of approval to be substantially built, and capable of affording general accommodation to the trade, may be allowed to be fitted up, fined, and racked, as often as the owners may deem necessary, the lees to be destroyed without payment of duty, the quantities destroyed being correctly ascertained for the purpose of being eventually deducted from the official accounts.

2. Bonded brandy may be allowed to be added to wine in the bonded stores for its preservation or improvement, and the whole to pay duty as wine upon being taken out for home consumption, provided the whole quantity of brandy contained in the wine, at the time of entry for home consumption, do not exceed 30 per cent.; and that a proper sample for the purpose of ascertaining the strength be allowed to be taken out by the proper officers.

3. Wines may be allowed to be mixed with wines of the same description as often as necessary for their preservation or improvement; provided that wine so mixed be kept separate from other wine, and that the packages containing the same be branded as *mixed wine*, and the brand or other marks of the original shipper be effaced.—*Treasury Order*, 20th of May, 1830.

Wine may be bottled for exportation in a bonded vault appropriated for the purpose, upon giving 24 hours' notice; but no foreign bottles, corks, or packages may be used, except those in which the wine may have been imported and warehoused, unless the full duties shall have been paid on the same; and not less than 5 dozen reputed quarts, or 6 dozen reputed pint bottles, shall be exported in each package; and if any surplus or sediment remain, it is to be immediately destroyed in the presence of the officer, or the full duties paid upon it.—(3 & 4 Will. 4 c. 57., and *Customs Min.* 31st of Dec. 1835.)

The brands or marks on the casks into which wines or spirits may be racked at the bonded warehouses are to be effaced, and no other brand or mark to be retained thereon than those which were on the casks when originally imported.—(*Treasury Order*, 29th of June, 1830.)

We have borrowed the following comprehensive and excellent table from the valuable Circular of Messrs. Shaw and Maxwell, wine merchants, issued in 1843. We have examined it with considerable attention, and believe it to be as nearly accurate as it can be made.

Amount of the Quantity of the different Descriptions of Wine entered for Consumption from 1784 down to 1842, specifying the Rates of Duty levied on each, the Total Amount of Duty, &c.

The consequence of such unequal, and, on brandy and coppers especially, such enormous duties, is only what might be anticipated: extensive smuggling, without distillation, and every kind of fraud against the revenue, and the honest dealer. As well as many of the most valuable and richest wines are not allowed to circulate, as well as the best collars in Scotland, and indeed, many of the most valuable minerals, as well as the most useful and beautiful manufactures of the country. The sale of these articles, which had not sold there, has been carried to other parts of the country, and

**WOAD** (Ger. *Waid*; Du. *Weede*; Fr. *Pastel*, *Gubde*, *Vouéde*; It. *Guadone*, *Guado*, *Glastro*; Sp. *Pastel*, *Glasto*), the *Isatis tinctoria* of botanists, a biennial plant, with a fusiform fibrous root, and smooth branchy stem, rising from 3 to 5 feet in height. Woad is indigenous to most parts of Europe; and was extensively used from a very remote period, down to the general introduction of indigo, in the dying of blue. It is still cultivated to a considerable extent in France; but in this country its cultivation is chiefly restricted to a few districts in Lincolnshire. After being bruised by machinery, to express the watery part, it is formed into balls, which ferment and fall into a dry powder, which is sold to the dyer. Woad is now seldom employed without a mixture of indigo. By itself, it is incapable of giving a bright and deep blue colour; but the colour which it does give is very durable. The best methods of conducting the fermentation and preparation of woad are still so very ill understood, that the goodness of any parcel of it can never be ascertained till it be actually used; so that it has the disadvantage of being purchased under the greatest uncertainty as to its true value. At the proper age, indigo plants yield about 30 times as much colouring matter, and of a far superior quality, as an equal weight of woad; so that there is no prospect that any improvement that may be made in its preparation will ever render it, either in goodness or cheapness, a rival of the former. — (*London's Encyc. of Agriculture*; *Baneroff on Colours*, vol. i. p. 167.) We have previously — (see *Indigo*) — given some account of the efforts made by the woad growers to prevent the use of indigo.

**WOOL.** See *Timber*.

**WOOL** (Ger. *Wolle*; Du. *Wol*; Sw. *Ull*; Fr. *Laine*; It. and Sp. *Lana*; Port. *Lã*, *Lãa*; Rus. *Wolna*, *Scherst*; Pol. *Wolna*; Lat. *Lana*), a kind of soft hair or down. The term is not very well defined. It is applied both to the fine hair of animals, as sheep, rabbits, some species of goats, the vicuña, &c.; and to fine vegetable fibres, as cotton. In this article, however, we refer only to the wool of sheep, — an article which has continued, from the earliest period down to the present day, to be of primary importance, having always formed the principal part of the clothing of mankind in most temperate regions.

*Species of Wool.* — It has been customary in this country to divide wool into 2 great classes — long and short wools; and these again into subordinate classes, according to the fineness of the fibre.

Short wool is used in the cloth manufacture; and is, therefore, frequently called clothing wool. It may vary in length from 1 to 3 or 4 inches; if it be longer, it requires to be cut or broken to prepare it for the manufacture.

The *felting* property of wool is known to every one. The process of hat making, for example, depends entirely upon it. The wool of which hats are made is neither spun nor woven; but locks of it, being thoroughly intermixed and compressed in warm water, cohere and form a solid tenacious substance.

Cloth and woollen goods are made from wool possessing this property; the wool is carded, spun, woven, and then, being put into the fulling mill, the process of felting takes place. The strokes of the mill make the fibres cohere; the piece subjected to the operation contracts in length and breadth, and its texture becomes more compact and uniform. This process is essential to the beauty and strength of woollen cloth. But the long wool of which stuffs and worsted goods are made is deprived of its felting properties. This is done by passing the wool through heated iron combs, which takes away the laminæ or feathery part of the wool, and approximates it to the nature of silk or cotton.

Long or combing wool may vary in length from 3 to 8 inches. The shorter combing

wools are principally used for hose, and are spun softer than the long combing wools; the former being made into what is called hard, and the latter into soft worsted yarn.

The fineness of the hair or fibre can rarely be estimated, at least for any useful purpose, except by the wool sorter or dealer, accustomed by long habit to discern those minute differences that are quite inappreciable by common observers. In sorting wools, there are frequently 8 or 10 different species in a single fleece; and if the best wool of one fleece be not equal to the finest sort, it is thrown to a 2d, 3d, or 4th, or to a still lower sort, of an equal degree of fineness with it. The best English short native fleeces, such as the fine Norfolk and Southdown, are generally divided by the wool sorter into the following sorts, all varying in fineness from each other:—viz. 1. Prime; 2. Choice; 3. Super; 4. Head; 5. Downrights; 6. Seconds; 7. Fine Abb; 8. Coarse Abb; 9. Livery; 10. Short coarse or breech wool. The relative value of each varies, according to the greater demand for coarse, fine, or middle cloths.

The softness of the fibre is a quality of great importance. It is not dependent on the fineness of the fibre; and consists of a peculiar feel, approaching to that of silk or down. The difference in the value of 2 pieces of cloth made of 2 kinds of wool equally fine, but one distinguished for its softness and the other for the opposite quality, is such, that, with the same process and expense of manufacture, the one will be worth from 20 to 25 per cent. more than the other. Mr. Bakewell showed that the degree of softness depends principally on the nature of the soil on which sheep are fed: that sheep pastured on chalk districts, or light calcareous soils, usually produce hard wool: while the wool of those that are pastured on rich, loamy, argillaceous soils, is always distinguished by its softness. Of the foreign wools, the Saxon is generally softer than the Spanish. Hard wools are all defective in their *felting* properties.

In clothing wool, the colour of the fleece should always approach as much as possible to the purest white; because such wool is not only necessary for cloths dressed white, but for all cloths that are to be dyed bright colours, for which a clear white ground is required to give a due degree of richness and lustre. Some of the English fine woolled sheep, as the Norfolk and Southdown, have black or gray faces and legs. In all such sheep there is a tendency to grow gray wool on some part of the body, or to produce some gray fibres intermixed with the fleece, which renders the wool unfit for many kinds of white goods; for though the black hairs may be too few and minute to be detected by the wool sorter, yet when the cloth is stoved they become visible, forming reddish spots, by which its colour is much injured. The Herefordshire sheep, which have white faces, are entirely free from this defect, and yield a fleece without any admixture of gray hairs.

The cleanness of the wool is an important consideration. The Spanish wool, for example, is always scoured after it is shorn; whereas the English wool is only imperfectly washed on the sheep previously to its being shorn. In consequence, it is said that while a pack of English clothing wool of 240 lbs. weight will waste about 70 lbs. in the manufacture, the same quantity of Spanish will not waste more than 48 lbs. Cleanness, therefore, is an object of much importance to the buyer.

Before the recent improvements in the spinning of wool by machinery, great length and strength of staple was considered indispensable in most combing wools. The fleeces of the long woolled sheep fed in the rich marshes of Kent and Lincoln used to be reckoned peculiarly suitable for the purposes of the wool-comber: but the improvements alluded to have effected a very great change in this respect; and have enabled the manufacturer to substitute short wool of 3 inches staple, in the place of long combing wool, in the preparation of most worsted articles. A great alteration has, in consequence, taken place in the proportion of long to short wool since 1800; there having been in the interim, according to Mr. Hubbard's calculations—(see *post*),—an increase of 132,053 packs in the quantity of the former produced in England, and a decrease of 72,820 in the quantity of the latter.

Whiteness of fleece is of less importance in the long combing than in clothing wool, provided it be free from gray hairs. Sometimes, however, the fleece has a dingy brown colour, called a *winter stain*, which is a sure indication that the wool is not in a thoroughly sound state. Such fleeces are carefully thrown out by the wool sorter; being suitable only for goods that are to be dyed black. The fineness of heavy combing wool is not of so much consequence as its other qualities.

The Merino or Spanish breed of sheep was introduced into this country about the close of last century. George III. was a great patron of this breed, which was for several years a very great favourite. But it has been ascertained that, though the fleece does not much degenerate here, the carcase, which is naturally ill formed, and affords comparatively little weight of meat, does not improve; and as the farmer, in the kind of sheep which he keeps, must look not only to the produce of wool, but also to the butcher market, he has found it his interest rather to return to the native breeds of his own country, and to give up the Spanish sheep. They have, however, been of considerable service to the flocks of England; having been judiciously crossed with the Southdown, Ryeland, &c.

*Deterioration or Change in the Character of British Wool.*—It appears to be sufficiently established, by the evidence taken before the House of Lords in 1828, and other authorities, that a considerable deterioration, or rather, perhaps, change, has taken place in the quality of British wool, particularly during the 30 preceding years. The great object of the agriculturist has been to increase the weight of the carcase and the quantity of the wool; and it seems very difficult, if not quite impossible, to accomplish this without injuring the fineness of the fleece. Mr. Culley says, that the Herefordshire sheep, that produce the finest wool, are kept lean, and yield  $1\frac{1}{2}$  lb. each; he adds, "if they be better kept, they grow large and produce more wool, but of an inferior quality." This would seem to be universally true. The great extension of the turnip husbandry, and the general introduction of a larger breed of sheep, appears, in every instance, to have lessened the value of the fleece. Speaking of the Norfolk fleeces, Mr. Fison, a wool sorter, says, that 25 years ago the weight was  $2\frac{1}{2}$  lbs. a fleece, and that now it is 3 lbs. or  $3\frac{1}{2}$  lbs. — (*Report*, p. 356.) But according to a Table furnished by the same gentleman, containing the results of his experience, it appears that of 15 tods, or 420 lbs., of clothing wool grown in Norfolk in 1790, 200 lbs. were prime, while, in 1828, the same quantity of Norfolk wool only yielded 14 lbs. prime! — (*Ibid*. p. 207.) The statements of other witnesses are to the same effect. — (*Ibid*. pp. 388. 640. and 644.) According to the estimate in Mr. Luccock's *Treatise on English Wool*, which has always enjoyed the highest reputation, the produce of all sorts of wool in England, in 1800, was 384,000 packs, of 240 lbs. a pack. But Mr. Hubbard, a very intelligent and extensive wool-stapler at Leeds, has shown, that, supposing Mr. Luccock's estimate of the number of sheep to be correct, the quantity of wool produced in 1828 could not, owing to the greater weight of the fleece, be estimated at less than 463,169 packs; and it is now (1844) believed to amount to fully 500,000 packs. It is, therefore, probable, notwithstanding the decline in the price of wool, that, taking into account the greater weight of the carcase, and the greater weight of the fleece, sheep produce more at present to the farmer than at any former period.

*Number of Sheep in Great Britain.*—It is not possible to form any accurate estimate either of the number of sheep or of the quantity of wool annually produced. With the exception of Mr. Luccock's, most of the statements put forth with respect to both these points seem much exaggerated. But Mr. L.'s estimate, which is considerably under any that had previously appeared, was drawn up with great care; and is supposed to approach near to accuracy. According to Mr. Luccock, the

Number of long woolled sheep in England and Wales in 1800, was	4,153,308	
of short woolled ditto	14,854,299	
Total number shorn		19,007,607
Slaughter of short woolled sheep per annum	4,321,748	
Carriou of ditto	211,037	
Slaughter of long woolled ditto	1,180,413	
Carriou of ditto	59,020	
Slaughter of lambs	1,400,560	
Carriou of ditto	70,028	
		7,140,166
Total number of sheep and lambs		36,147,763

In some parts of England there has been an increase in the number of sheep since 1800, and in others they have decreased. But we have been assured by competent judges, that, on the whole, the number has not materially varied in the interim.

During the last half century a very decided increase has taken place in the number of sheep in Scotland, and a very great improvement in the breed, particularly in the Highlands. In this district, many of the proprietors have let their estates in large farms to *store farmers*, who have introduced the Cheviot breed of sheep, instead of the small black-faced heath breed that was formerly the only one to be met with. We may remark, by the way, that a good deal of unmerited odium has attached to the patrons of this system; for, though it be true that, in a few instances, the peasantry were rudely ejected from their little possessions, there can be no doubt that it has, on the whole, been decidedly advantageous. Besides rendering large tracts of country more valuable to the proprietors and the public generally, the condition and habits of the peasantry have been materially improved. Instead of loitering away more than half their time, as was their former practice, they have now either become the servants of the large farmers, or have resorted to towns and villages, and been metamorphosed into industrious tradesmen, fishermen, &c. A very small proportion of the whole has emigrated; and the country is more populous at present than before the sheep farming system began.

In the *General Report of Scotland* (vol. iii. Appen. p. 6.), the number of sheep is estimated at 2,850,000; and allowing for the increase that has taken place since 1814, we may, perhaps, estimate the total number of sheep in that part of the empire at this moment at 3,500,000. And in consequence of the rapid extension, during the last dozen years, of the practice of turnip-feeding, both the weight of the carcase and of the fleece have been largely increased.

According to Mr. Wakefield, there is not a single flock of breeding sheep in the whole province of Ulster. — (*Account of Ireland*, vol. i. p. 341.) And though there be considerable flocks in Roscommon and other counties, we believe that, if we estimate the whole number of sheep in Ireland at 2,000,000, we shall be a good deal beyond the mark.

On the whole, therefore, if we are right in these estimates, the total number of sheep in Great Britain and Ireland may be taken at about 32,000,000. This estimate is 10,000,000 under that given by Dr. Colquhoun for 1812; but that learned person assigns no grounds whatever for his estimate, which is utterly inconsistent with all the really authentic information on the subject. It is curious enough to observe the German statistical writers referring to Colquhoun's statements, as if they were of standard authority. They would be about as near the mark, were they to quote the "Arabian Nights" in proof of any disputed historical fact.

Number of Sheep and Quantity of Sheep's Wool produced in England, according to Mr. Luccock's Tables, revised by Mr. Hubbard, and made applicable to 1835.

*N.B.* — The wool from slaughtered sheep and carrion not mentioned in this Table ; but allowed for above.

*British Trade in Wool.* — From 1660 down to 1825, the export of wool was strictly prohibited. A notion grew up towards the end of the 17th, and continued to gain ground during the first half of last century, that the wool of England was superior to that of every other country ; that long wool could not be produced anywhere else ; and that if we succeeded in keeping the raw material at home, we should infallibly command the market of the world for our woollen manufactures. In consequence, innumerable statutes were passed, the enactments in some of which were the most arbitrary and severe that can be imagined, to prevent the clandestine exportation of wool. Mr. John Smith was one of the first who, in his excellent work, entitled *Memoirs of Wool*\*, exposed the injustice and absurdity of this system, by proving that whatever advantages the manufacturers might gain by preventing the exportation of wool, were more than lost by the agriculturists. But in despite of Mr. Smith's reasonings, which were enforced by many later writers, and which experience had proved to be in all respects accurate, the prohibition of the exportation of wool was continued till 1825, when Mr. Huskisson happily succeeded in procuring the abolition of this miserable remnant of a barbarous policy. The improvement of machinery, by enabling short or clothing wool to be applied to most of those purposes for which long or combing wool had been exclusively appropriated, had annihilated the only apparently tenable argument on which the prohibition of exportation had ever been vindicated ; and even this, it will be observed, applied only to a small proportion of the whole wool produced in England.

Down to 1802, the importation of foreign wool into Great Britain had been quite free ; and, being the raw material of an important manufacture, the policy of allowing it to be imported free of duty is obvious. In 1802, however, a duty of 5s. 3d. a cwt. was laid on all foreign wool imported. In 1813, this duty was raised to 6s. 8d. ; and in 1819, Mr. Vansittart raised it to the enormous amount of 56s. a cwt., or to 6d. per lb. Had English wool sufficed for all the purposes of the manufacture, such a duty would have been less objectionable ; but the very reverse was the case. The use of foreign wool had become, owing to the deterioration, or rather, perhaps, to the change in the character, of British wool, and other circumstances, quite indispensable to the prosecution of the manufacture : and as our superiority over the foreigner in several departments of the trade was by no means decided, it is plain that the imposition of a duty which amounted to about 50 per cent. upon the price of a considerable quantity of the wool we were obliged to import, must, had it been persevered in, have ruined the manufacture. It occasioned, indeed, during the period of its continuance, a considerable decline of the exports of woollens, and was productive of other mischievous effects, from which the manufacture suffered for a considerable period after it was repealed.

The evidence as to the absolute necessity of employing foreign wool, taken before the Lords' committee, was as decisive as can well be imagined. Mr. Gott, of Leeds, one of the most extensive and best informed manufacturers in the empire, informed the committee, that, in his own works, he used only foreign wool. On being asked whether he could carry on an export trade to the same extent as at present, if he manufactured his cloth of British wool, Mr. G. replied, that, in certain descriptions of cloth, " *he could not make an article that would be merchantable at all for the foreign market, or even for the home market, except of foreign wool.*" We subjoin a few additional extracts from the evidence of this most competent witness.

" Can you give the committee any information with respect to the competition that now exists between foreigners and this country in woollen cloths?" — " I think the competition is very strong. In some instances the foreigner has, probably, the advantage ; and in others, the superiority of the British manufacture, I think, has greatly the advantage ; that would apply, I should say, particularly to the fine cloths of Great Britain compared with foreign cloths ; in some descriptions of low cloths, the foreigners are nearly on a footing, and in some instances, perhaps, superior to us."

" Speaking of the finer cloths, is the competition such as to render an additional duty on the importation of foreign wool likely to injure the export trade?" — " *I have no doubt,*

\* This learned and accurate work contains a great deal of information with respect to the progress of manufactures and commerce in England.

*speaking on my oath, that it would be fatal to the foreign cloth trade of the country.* I would say further, that it would be equally injurious to coarse manufactures of all kinds made of English wool. The competition now with foreigners is as nearly balanced as possible; and the disturbing operation of attacks of that description would necessarily enable the foreigner to buy his wool cheaper than we should do it in this country: the result would be, that foreigners would, by such a premium, be enabled to extend their manufactures, to the exclusion of British manufactures of all descriptions."

In another part of his evidence, Mr. Gott says,—"If 2 pieces of cloth at 10s. a yard were put before a customer, one made of British wool, the other of foreign wool, one would be sold, and the other would remain on hand: I could not execute an order with it. If any person sent to me for cloth of 7s. or 8s. a yard, and it were made of English wool, it would be sent back to me, and I should resort to foreign wool or foreign mixed with British, to execute that order."

On Mr. Gott being asked whether, in his opinion, the price of British wool would have been higher, had the duty of 6d. per lb. on foreign wool been continued, he answered,—"My opinion is, that the price of British wool would have been less at this time; the demand for British wool would have been very much less. *British manufactures would have been shut out of every foreign market; and the stock of wool would have accumulated, as it will do if ever that duty be imposed again.*"—(Mr. Gott's Evidence, pp. 292, 293.)

The view taken by Mr. Gott of the effect of the importation of foreign wool on the price of British wool was supported by the concurrent testimony of all the manufacturing witnesses examined by the committee. Blankets, flannels of all sorts, baizes, carpets, bearskins, &c. are made principally of English wool; and the command of foreign wool enables the manufacturers to use a considerable quantity of English wool in the manufacture of certain descriptions of cloth, which, if made entirely of it, would be quite unsaleable. On Mr. Goodman, a wool-stapler of Leeds, being asked whether, if a duty were laid on foreign wool, it would force the use of English wool in the manufacture of cloths, from which it is now excluded, he answered,—"Certainly not: we could not get people to wear such a cloth; they want a better, finer cloth; it is so much handsomer in its wear, and so much more durable."—(Report, p. 241.) Mr. Francis, of Heytesbury, declared, that there was no demand for cloth made wholly of British wool; that it was principally applicable to the manufacture of blankets, baizes, &c.; and that the exclusion of foreign wool would only injure the manufacture, without raising the price of British wool.—(p. 268.) Statements to the same effect were made by Mr. Webb (p. 270.), Mr. Sheppard (p. 294.), Mr. Ireland (p. 319.), and, in short, by every one of the witnesses conversant with the manufacture.

The history of the manufacture since 1828 has completely confirmed the accuracy of the statements made by Mr. Gott and the other witnesses. Very large quantities of foreign wool have been imported during the interval; but the price of British wool has, notwithstanding, maintained its proper level; and has, in fact, been at an average considerably higher since the reduction of the duty on foreign wool than previously.

*Foreign Wool imported into England.*—A very great change has taken place, within the course of the present century, both as respects the quantity of foreign wool imported, and the countries whence it is derived. Previously to 1800, our average imports of wool did not much exceed 3,000,000 lbs., mostly brought from Spain; the wool of which long maintained a high character. In 1800, our imports amounted to near 9,000,000 lbs.; and they have since gone on gradually increasing, till they now amount to between 55,000,000 and 75,000,000 lbs. ! Instead, however, of being principally derived from Spain, as was the case down to 1814, the greater part by far of this immense supply of foreign wool is at present furnished by Germany, the Australian colonies, and the East Indies. The late king of Saxony, when elector, introduced the breed of Merino sheep into his dominions, and exerted himself to promote the growth of this valuable race of animals. His praiseworthy efforts have been crowned with the most signal success. The Merino sheep seem to succeed better in Saxony and other German states than in Spain; and have increased so rapidly, that the Spanish wool trade has become insignificant compared with that of Germany ! The importations of German wool were quite trifling during the war—amounting, in 1812, to only 28 lbs.; but since the peace they have increased beyond all precedent. In 1814, they amounted to 3,432,456 lbs.; in 1820, they were 5,113,442 lbs.; in 1825, they rose to 28,799,661 lbs.; but this being a year of overtrading, they declined in 1826 to 10,545,232 lbs. Subsequently, however, they recovered from this depression, and, in 1836, amounted to 31,766,194 lbs. They have since, however, sunk very rapidly, principally in consequence of the rapidly increasing imports of colonial wool.

The breed of sheep that was carried out to New South Wales and Van Diemen's Land has succeeded remarkably well; and Australia is already, perhaps, the principal wool-growing country of the world. The imports into Great Britain have increased

account of the Quantities of Sheep and Lambs' Wool imported into the U. Kingdom during each of the 8 Years ending with 1842, specifying the Countries whence it was imported, and the Quantities brought from each.

with extraordinary rapidity. In 1833 they amounted to 3,516,869 lbs., in 1839, to 10,128,774 lbs., and in 1845 to 24,177,317 lbs. ! The imports of wool from India only began in 1833, when they amounted to the inconsiderable quantity of 3,721 lbs.; but such has been their increase in the interval, that in 1845 they amounted to 3,975,886 lbs. ! Of late years Russia has become of primary importance among the wool exporting countries.

**WOOLLEN MANUFACTURE**, the art of forming wool into cloth and stuffs. This has always ranked as an important branch of national industry; and, until surpassed by the cotton manufacture, was decidedly the most important of all the manufactures carried on in England.

*Rise and Progress of the British Woollen Manufacture. Exports.* — There can be no doubt that the arts of spinning wool, and manufacturing the yarn into cloth, were introduced into England by the Romans, the inhabitants being previously clothed only in skins. From the period of the Romans quitting England, down to the 10th century, there are no notices of the manufacture; and those relating to the period from the 10th to the 13th century are but few and imperfect. It is certain, however, that the manufacture of broad cloths was established soon after the year 1200, if not previously. — (*Smith's Memoirs of Wool*, i. 17.) But the woollen manufactures of Flanders being at this period, and long afterwards, in a comparatively advanced state, English wool was exported in large quantities to Bruges and other Flemish cities, whence fine cloths and other products were brought back in exchange. Edward III. took the most judicious measures for improving the English manufacture by inviting over Flemish weavers, fullers, dyers, and others, and protecting them from the assaults of the rabble. Shortly after the first immigration of Flemings, or in 1337, an act was passed, prohibiting the wear of any cloths made beyond sea, and interdicting the export of English wool. — (*Ibid.* i. 25.) But in these turbulent times such restraining acts were little better than a dead letter; and this, indeed, was soon after repealed. — (*Ibid.* i. 32. 39.) From this remote period the manufacture has always been regarded as of primary importance, and has been the object of the especial solicitude of the legislature. It may be doubted, however, whether it has derived any real advantage from the numberless statutes that have been passed in the view of contributing to its advancement. With the exception, indeed, of the prohibition of the export of English wool, which was finally put a stop to in 1660, the other acts, being mostly intended for the regulation of the manufacture, could not be otherwise than mischievous; and the benefit derived by the manufacturers from the prohibition was more apparent than real; inasmuch as it occasioned a diminished growth of wool, at the same time that it was impossible to prevent its clandestine exportation. Mr. Smith has proved that the manufacture made a far more rapid progress during the reign of Elizabeth, when wool might be freely carried out of the kingdom, than it ever did during any equal period subsequent to the restriction on exportation. Foreign wool began to be imported in small quantities in the 13th century.

At first, the manufacture seems to have been pretty equally distributed over the country. In an insurrection that took place in 1525, more than 4,000 weavers and other tradesmen are said to have assembled out of Laneham, Sudbury, and other towns in Suffolk. The manufacture had been previously introduced into Yorkshire. In 1533 an act was passed (34 & 35 Hen. 8. c. 10.), reciting, "that the city of York afore this time had been upholden principally by making and weaving of coverlets, and the poor thereof daily set on work in spinning, carding, dyeing, weaving, &c.;" that the manufacture, having spread into other parts, was "thereby debased and discredited;" and enacting, as a remedy for this evil, that henceforth "none shall make coverlets in Yorkshire, but inhabitants of the city of York!" This may be taken as a fair specimen of the commercial legislation of the time. Indeed, it was enacted, nearly at the same period, that the manufacture should be restricted, in Worcestershire, to Worcester and 4 other towns. Worsteds goods, so called from Worsted, now an inconsiderable town in Norfolk, where the manufacture was first set on foot, were produced in the reign of Edward II., or perhaps earlier; but Norwich soon after became, and, notwithstanding the competition and superior advantages of Bradford, is still, a principal seat of this branch of the manufacture. In an act of Henry VIII. (33 Hen. 8. c. 16.) worsted yarn is described as "the private commodity of the city of Norwich." In 1614 a great improvement took place in the woollen manufacture of the west of England, by the invention of what is called medley or mixed cloth, for which Gloucestershire is still famous. During the reign of Charles II., there were many, though unfounded, complaints of the decay of the manufacture; and, by way of encouraging it, an act was passed (30 Car. 2. st. i. c. 3.), ordering that all persons should be buried in woollen shrouds! This act, the provisions of which were subsequently enforced, preserved its place on the statute book for more than 130 years!

Towards the end of the 17th century, Mr. Gregory King and Dr. Davenant—*Descendant's Works*, Whitworth's ed. ii. 233.)—estimated the value of the wool shorn in England at 2,000,000*l.* a year; and they supposed that the value of the wool (including that imported from abroad) was quadrupled in the manufacture; making the entire value of the woollen articles annually produced in England and Wales, 8,000,000*l.*, of which about 2,000,000*l.* were exported. In 1700 and 1701, the official value of the woollens exported amounted to about 3,000,000*l.* a year. Owing to the vast increase of wealth and population, the manufacture must have been very greatly extended during last century; but the increase in the amount of exports was comparatively inconsiderable. At an average of the 6 years ending with 1789, the official value of the exports was 3,544,160*l.* a year, being only about 540,000*l.* above the amount exported in 1700. The extraordinary increase of the cotton manufacture soon after 1780, and the extent to which cotton articles then began to be substituted for those of wool, though it did not occasion any absolute decline of the manufacture, no doubt contributed powerfully to check its progress. In 1802, the official value of the exports rose to 7,321,012*l.*, being the largest amount they ever reached till 1833, when they amounted to 7,777,952*l.* They have not, however, been so high since; and though there be no reason for supposing that the manufacture, taken as a whole, has sensibly declined during the last few years, it certainly has not increased, and may be regarded as in a stationary state.

*Value of the Manufacture. Number of Persons employed.*—The most discordant estimates have been given as to both these points. For the most part, however, they have been grossly exaggerated. In a tract published in 1739, entitled *Considerations on the Running (Smuggling) of Wool*, the number of persons engaged in the manufacture is stated at 1,500,000, and their wages at 11,737,500*l.* a year. Dr. Campbell, in his *Political Survey of Great Britain*, published in 1774, observes,—"Many computations have been made upon this important subject, and, amongst others, one about 30 years since, which, at that time, was thought to be pretty near the truth. According to the best information that can be obtained, there may be from 10,000,000 to 12,000,000 sheep in England, some think more. The value of their wool may, one year with another, amount to 3,000,000*l.*; the expense of manufacturing this may probably be 9,000,000*l.*, and the total value 12,000,000*l.* We may export annually to the value of 3,000,000*l.*, though one year we exported more than 4,000,000*l.* In reference to the number of persons who are maintained by this manufacture, they are probably upwards of 1,000,000. Sanguine men will judge these computations too low, and few will believe them too high."—(ii. 158.) But the moderation displayed in this estimate was very soon lost sight of. In 1800, the woollen manufacturers objected strenuously to some of the provisions in the treaty of union between Great Britain and Ireland, and were allowed to urge their objections at the bar of the House of Lords, and to produce evidence in their support. Mr. Law (afterwards Lord Ellenborough), the counsel employed by the manufacturers on this occasion, stated, in his address to their Lordships, on information communicated to him by his clients, that 600,000 packs of wool were annually produced in England and Wales, worth, at 1*l.* a pack, 6,000,000*l.*; that the value of the manufactured goods was 3 times as great, or 19,800,000*l.*; that not less than 1,500,000 persons were immediately engaged in the operative branches of the manufacture; and that the trade collaterally employed about the same number of hands.—(*Account of the Proceedings of the Merchants, Manufacturers, &c.*, p. 34.)

It is astonishing that reasonable men, conversant with the manufacture, should have put forth such ludicrously absurd statements. We have already seen that the quantity of wool produced in England and Wales, in 1800, did not really amount to 400,000 packs; and the notion that three out of the nine millions of people then in the country were directly and indirectly employed in the manufacture, is too ridiculous to deserve notice, though it was generally acquiesced in at the time.—(See *Middleton's Survey of Middlesex*, 2d ed. p. 644.; *Adolphus's British Empire*, iii. 236, &c.)

Mr. Stevenson, who is one of the very few writers on British statistics to whose statements much deference is due, has given the following estimate of the value of the woollen manufactured goods annually produced in England and Wales, and of the interest, &c. of the capital, and the number of persons employed in the manufacture:—

Total value of manufactured articles	-	-	-	£18,000,000
Value of raw material	-	-	-	£6,000,000
Interest on capital, sum to replace its wear and tear, and manufacturers' profits	-	-	-	2,400,000
Wages of workmen	-	-	-	9,600,000
				£18,000,000

Number of people employed, 480,000, or perhaps 500,000.

But even this estimate requires to be materially modified. Taking Scotland into account, and allowing for the increase of population and of exportation since Mr. Stevenson's estimate was made, the total value of the various descriptions of woollens

annually produced in Great Britain may, at present, be moderately estimated at from 23,000,000*l.* to 25,000,000*l.*, or 24,000,000*l.* at a medium. We have further been assured by the highest practical authorities, that Mr. Stevenson's distribution of the items is essentially erroneous; and that, assuming the value of the manufacture to be 24,000,000*l.*, it is made up nearly as follows:—

Total value of manufactured articles	- - -	£24,000,000
Raw material, 110,000,000 lbs. British wool, at 1 <i>s.</i> 2 <i>d.</i> per lb.,	- - -	
and 50,000,000 do. foreign, at 2 <i>s.</i>	- - -	11,600,000 <sup>a</sup>
Wages	- - -	7,500,000
Oil, dye stuffs, soap, &c.	- - -	1,200,000
Profits, sum to replace wear and tear of capital, &c.	- - -	4,300,000
		£24,000,000

At present, the average wages of the people employed may be taken at about 24*s.* a year, making the total number employed 312,500. And, however small this may look as compared with former estimates, we believe it is fully up to the mark, if not rather beyond it.

Most of the innumerable statutes formerly passed for the regulation of the different processes of the manufacture have been repealed within these few years; and the sooner every vestige of the remainder disappears from the statute book, the better.

I. Account of the Quantity of the Different Descriptions of British Woollen Manufactures exported from the U. Kingdom in the Year 1843, and of their Total Declared Value; specifying the Quantities and Value of those sent to each Country.

Countries to which exported.	Cloths of all Sorts.	Napped Costings, Duffels, &c.	Kerseys.	Balances of all Sorts.	Stuffs, Woollen or Worsted.	Flannels.	Blankets and Blanketing.	Carpets and Carpeting. 1824	12,540	2,184	1832	2,204,464	235,207	1840	3,795,644	455,357
1825	76,961	11,467	1833	2,107,478	246,304	1841	4,205,321	529,148
1826	131,028	22,794	1834	1,961,814	238,544	1842	-	637,305
1827	255,143	57,362	1835	2,357,536	309,091			

The stationary, or rather declining, amount of the exports of woollen manufactures in the second of the above tables, strikingly contrasts with the rapid increase in the exports of yarn, as exhibited in the third. We believe, too, that the contrast would have been still greater had we been able to insert the returns for 1843; for, though the exports of manufactured woollens in that exceeded those of the preceding year, the increase in the export of yarn was comparatively much greater.—(See the valuable circular of Messrs. Gibson, Ord, and Co., Manchester, 19th January, 1844.)

This different progress of the exports of manufactured goods and yarn depends, no doubt, on various causes; but principally, we believe, on the change, previously noticed, that has taken place in the character of our wool, which fits it much better than formerly for being made into worsted yarn, which is almost the only description of yarn that is exported. The operation of this change is evinced in a still more striking manner by comparing the export of cloth, properly so called, with that of stuffs, in the undermentioned years:—

	1816.	1836.	1840.	1842.
Exports of cloth, pieces - - -	636,368	284,508	215,746	161,675
stuffs, pieces - - -	563,308	1,138,568	1,718,617	1,979,492

It is obvious that this continued and rapid fall on the one hand, and continued and equally rapid increase on the other, must be occasioned by the operation of some powerful and permanent cause; and none such can be assigned other than the decreasing suitability of British wool for being made into cloth; and its increasing suitability for being made into worsted yarn and stuffs. We do not think that the existing duty on wool has much influence either one way or other.

Latterly the stuff trade has been in a state of unexampled prosperity. This has been mainly occasioned by the change of fashion in this and other countries, by which stuffs made of a mixture of cotton and worsted have been largely substituted for cloths; and the home and foreign demand for them proportionally increased. In so far, indeed, as the extraordinary extension of the stuff trade depends on this change, it cannot, perhaps, be regarded as resting on any very solid foundation. But it is on the whole abundantly obvious that the export trade in cloth has seriously declined; and that it is only in the stuff trade, and in the production of yarn, that we have any very decided superiority over foreigners.—(For an account of the recent history of the woollen trade, see the 2d vol. of *Bischoff's History of the Woollen and Worsted Manufactures*; a useful work formed on the plan of *Smith's Memoirs of Wool*, but less learned and able.)

*Shoddy Trade.*—The greater number, perhaps, of our readers may never have heard of that branch of the woollen manufacture called the *shoddy trade*, which has grown up of late years, and is now of very considerable value and importance. It is principally carried on at Dewsbury in Yorkshire, in the centre of the clothing district. Shoddy cloth is fabricated either wholly or partly of old wool; and instead of being neglected, or used only as manure, old woollen rags are now everywhere carefully collected, and conveyed to Dewsbury. After being subjected to various processes, they are torn to pieces by the aid of powerful machinery, and reduced to their original state of wool; and this wool, being respun, either with or without an admixture of fresh wool, is again made into cloth! Formerly, shoddy cloth was used only for padding and such like purposes; but now, blankets, flushings, druggets, and table covers, cloth for pilot and Petersham great coats, &c., are either wholly or partly made of shoddy. The clothing of the army, and the greater part of that of the navy, consists principally of the same material, which, in fact, is occasionally worn by everybody. Large quantities of shoddy cloth are exported. Great improvements have been effected of late years, not only in the fabric of the cloth, but also in the dyes: this is especially seen in the cloth for soldiers' uniforms, which is no longer of a brick-dust colour, but makes a much nearer approach to scarlet. The beautiful woollen table covers are made wholly of shoddy, being printed by *aqua fortis* from designs drawn in London and Manchester, and cut on holly and other blocks on the spot. The analogy between this manufacture and that of paper is so striking, that it must force itself on the attention of every

one; the vilest and most worthless materials being converted in both into the most beautiful and useful fabrics. The shoddy trade is, in fact, one of the greatest triumphs of art and civilisation. Though of comparatively recent origin, it is rapidly extending itself. It is most active in summer, and is much more languid in winter. — (See *Geog. Dict. art. Dewsbury*.)

WRECK, in navigation, is usually understood to mean any ship or goods driven ashore, or found floating at sea in a deserted or unmanageable condition. But in the legal sense of the word in England, *wreck* must have come to land; when at sea, it is distinguished by the barbarous appellations of *flotsam*, *jetsam*, and *lagan*. — (See *Flotsam*.)

In nothing, perhaps, has the beneficial influence of the advance of society in civilisation been more apparent than in the regulations with respect to the persons and property of shipwrecked individuals. In most rude and uncivilised countries, their treatment has been cruel in the extreme. Amongst the early Greeks and Romans, strangers and enemies were regarded in the same point of view. — (*Hostis apud antiquos, peregrinus dicebatur*. — *Pomp. Festus*; see also *Cicero de Offic. lib. i. c. 12.*) Where such inhospitable sentiments prevailed, the conduct observed towards those that were shipwrecked could not be otherwise than barbarous; and in fact they were, in most instances, either put to death or sold as slaves. But as law and good order grew up, and commerce and navigation were extended, those who escaped from the perils of the sea were treated in a way less repugnant to the dictates of humanity: and at length the Roman law made it a capital offence to destroy persons shipwrecked, or to prevent their saving the ship; and the stealing even of a plank from a vessel shipwrecked or in distress, made the party liable to answer for the whole ship and cargo. — (*Pand. 47. 9. 3.*)

During the gloomy period which followed the subversion of the Roman empire, and the establishment of the northern nations in the southern parts of Europe, the ancient barbarous practices with respect to shipwreck were every where renewed. Those who survived were in most countries reduced to servitude; and their goods were every where confiscated for the use of the lord on whose manor they had been thrown. — (*Robertson's Charles V., i. note 29.*) But nothing, perhaps, can so strongly evince the prevalence and nature of the enormities, as the efforts that were made, as soon as governments began to acquire authority, for their suppression. The regulations as to shipwreck in the Laws of Oleron are, in this respect, most remarkable. The 35th and 38th articles state, that "pilots, in order to ingratiate themselves with their lords, did, like faithless and treacherous villains, sometimes willingly run the ship upon the rocks, &c.;" for which offence they are held to be accursed and excommunicated, and punished as thieves and robbers. The fate of the lord is still more severe. "He is to be apprehended, his goods confiscated and sold, and himself fastened to a post or stake in the midst of his own mansion house, which being fired at the four corners, all shall be burned together; the walls thereof be demolished; the stones pulled down; and the site converted into a market place, for the sale only of hogs and swine, to all posterity." The 31st article recites, that when a vessel was lost by running on shore, and the mariners had landed, they often, instead of meeting with help, "were attacked by people more barbarous, cruel, and inhuman, than mad dogs; who, to gain their monies, apparel, and other goods, did sometimes murder and destroy these poor distressed seamen. In this case, the lord of the country is to execute justice, by punishing them in their persons and their estates; and is commanded to plunge them in the sea till they be half dead, and then to have them drawn forth out of the sea and stoned to death."

Such were the dreadful severities by which it was attempted to put a stop to the crimes against which they were directed. The violence of the remedy shows better than any thing else how inveterate the disease had become.

The law of England, like that of other modern countries, adjudged wrecks to belong to the king. But the rigour and injustice of this law was modified so early as the reign of Henry I., when it was ruled, that if any person escaped alive out of the ship, it should be no wreck. And after various modifications, it was decided, in the reign of Henry III., that if goods were cast on shore, having any marks by which they could be identified, they were to revert to the owners, if claimed any time within a year and a day. By the statute 27 Edw. 3. c. 13., if a ship be lost and the goods come to land, they are to be delivered to the merchants, paying only a reasonable reward or SALVAGE (which see) to those who saved or preserved them. But these ancient statutes, owing to the confusion and disorder of the times, were very ill enforced; and the disgraceful practices previously alluded to continued to the middle of last century. A statute of Anne (12 Ann. st. 2. c. 18.), confirmed by the 4 Geo. 1. c. 12., in order to put a stop to the atrocities in question, orders all head officers, and others of the towns near the sea, upon application made to them, to summon as many hands as are necessary, and send them to the relief of any ship in distress, on forfeiture of 100*l.*; and in

case of any assistance given, salvage is to be assessed by 3 justices, and paid by the owners. Persons secreting any goods cast ashore, are to forfeit treble their value; and if they wilfully do any act by which the ship is lost or destroyed, they are guilty of felony without benefit of clergy. But even this statute seems not to have been sufficient to accomplish the end in view; and in 1753, a new statute (26 Geo. 2. c. 19.) was enacted, the preamble of which is as follows:—"Whereas, notwithstanding the good and salutary laws now in being against plundering and destroying vessels in distress, and against taking away shipwrecked, lost, or stranded goods, many wicked enormities have been committed, to the disgrace of the nation, and the grievous damage of merchants and mariners of our own and other countries, be it," &c.: and it is then enacted, that the preventing of the escape of any person endeavouring to save his life, or wounding him with intent to destroy him, or putting out false lights in order to bring any vessel into danger, shall be capital felony. By the same statute, the pilfering of any goods cast ashore is made petty larceny.

By statute 1 & 2 Geo. 4. c. 75. it is enacted, that any person or persons wilfully cutting away, injuring, or concealing any buoy or buoy rope attached to any anchor or cable belonging to any ship, whether in distress or otherwise, shall be judged guilty of felony, and may, upon conviction, be transported for 7 years.

We regret, however, to have to state that the plunder of shipwrecked property is still by no means uncommon on the British coasts. The late committee on shipwrecks state, that "there is on many parts of the coast a want of that moral principle which should inculcate a just regard for the rights of such property. It is looked upon as a chance gift, which every one has a right to scramble for as he can, notwithstanding the laws which have been passed, from the earliest period, to prevent or punish such depredations. The plunder of shipwrecked property on the coasts has been carried on to an enormous extent, and this seems to have arisen from there having been no persons on the spot, when a wreck had taken place, to look after the property." The committee state, that the establishment of the coast-guard has done much to repress these abuses. The latter, however, cannot legally interfere, except when the castaway articles are subject to customs duties; and the committee suggest that all abandoned property should be vested in the government in trust for those to whom it may belong, as is done in France and Holland. — (*Report of Committee of 1843*, p. viii.)

(For an account of the sums to be paid to those assisting in the saving of wreck, see art. *SALVAGE* in this Dictionary; see also the chapter on Salvage in Abbott's (*Lord Tenterden's*) work on the *Law of Shipping*.)

*Number of Shipwrecks.*—The loss of property by shipwreck is very great. It appears from an examination of *Lloyd's List* from 1793 to 1829, that the losses in the British mercantile navy only amounted, at an average of that period, to about 557 vessels a year, of the aggregate burden of about 66,000 tons, or to above 1-40th part of its entire amount in ships and tonnage. The following account of the casualties of British shipping in 1829 is taken from *Lloyd's List*:—

*On Foreign Voyages*—157 wrecked; 284 driven on shore, of which 224 are known to have been got off, and probably more; 21 foundered or sunk; 1 run down; 35 abandoned at sea, 8 of them afterwards carried into port; 12 condemned as unseaworthy; 6 upset; 1 of them righted; 27 missing, 1 of them a packet, no doubt foundered. *Coasters and Colliers*—109 wrecked; 297 driven on shore, of which 121 known to have been got off, and probably more; 67 foundered or sunk, 4 of them raised, 6 run down; 13 abandoned, 5 of them afterwards carried in; 3 upset, 2 of them righted; 16 missing, no doubt foundered. During the year, 4 steam vessels were wrecked; 4 driven on shore, but got off; and 2 sunk.

We are glad, however, to have to state that it would appear from the returns given in the Report of the Commons' Committee of 1843, on Shipwrecks (Appen. p. 52.), that these casualties are less frequent now than formerly. At all events, it would seem that at an average of the 3 years ending with 1835, when the mercantile navy comprised about 24,500 ships, 610 were annually lost, whereas, at an average of 1841 and 1842, when the mercantile navy had increased to about 28,700 ships, the annual loss amounted to 611 ships; the average burden of the lost ships being in both cases, as near as can be ascertained, 210 tons. Hence, if we estimate the value of the ships and cargoes at 20*l.* a ton, the loss of property in 1841 and 1842, from shipwreck only, will have been 2,566,200*l.* a year! The loss of life is not exactly known, but it may be taken at from 1,450 to 1,500 individuals a year.

These heavy losses might be materially diminished by building better and stronger ships, to which nothing, probably, would contribute so much as allowing them to be built in bond, as previously suggested (*antè*, p. 1111.). No doubt, however, the carelessness, ignorance, and incapacity of the masters is the great source of loss; and nothing, certainly, would do so much to obviate this as to make the obtaining of a certificate of fitness, after undergoing an examination by some public board, indis-

pensible to enable any individual to be appointed to the command of a ship (*ante*, p. 824.).

During the last war with France, 32 ships of the line went to the bottom, besides 7 fifty-gun ships, 86 frigates, and a vast number of smaller vessels. And the losses sustained by the navies of France, Spain, Holland, Denmark, &c. must have very greatly exceeded those of ours. Hence, as Mr. Lyell has observed, it is probable that a greater number of monuments of the skill and industry of man will, in the course of ages, be collected together in the bed of the ocean, than will be seen at one time on the surface of the continents. — (*Principles of Geology*, 2d edit. vol. ii. p. 265.)

## Y.

**YARD**, a long measure used in England, of 3 feet, or 36 inches. — (See **WEIGHTS AND MEASURES**.)

**YARN** (Ger. *Garn*; Du. *Garen*; Fr. *Fil*; It. *Filato*; Sp. *Hilo*; Port. *Fio*; Rus. *Pruska*), wool, cotton, flax, &c. spun into thread.

## Z.

**ZAFFER**, or **ZAFRE**. After the sulphur, arsenic, and other volatile parts of cobalt have been expelled by calcination, the residuum is sold, mixed or unmixed with fine sand, under the above name. When the residuum is melted with siliceous earth and potash, it forms a kind of blue glass, known by the name of smaltz — (see **SMALTZ**), — of great importance in the arts. When smaltz is ground very fine, it receives in commerce the name of *powder blue*. Zaffer, like smaltz, is employed in the manufacture of earthenware and China, for painting the surface of the pieces a blue colour. It suffers no change from the most violent fire. It is also employed to tinge the crystal glasses, made in imitation of opaque and transparent precious stones, of a blue colour. It is almost wholly brought from Germany. The duty of 1s. a cwt. produced in 1840 233*l.*, showing that 4,660 cwt. had been entered for consumption.

**ZEAL**, **INDIAN CORN**, or **MAIZE**. See **MAIZE**.

**ZEDOARY** (Ger. *Zithwer*; Fr. *Zédoaire*; It. *Zedoaria*; Sp. *Cedoaria*; Arab. *Judwar*; Hind. *Nirbisi*), the root of a plant which grows in Malabar, Ceylon, Cochin-China, &c., of which there are 3 distinct species. It is brought home in pieces of various sizes, externally wrinkled, and of an ash colour, but internally of a brownish red. Those roots which are heavy and free from worms are to be chosen; rejecting those which are decayed and broken. The odour of zedoary is fragrant, and somewhat like that of camphor; the taste biting, aromatic, and bitterish, with some degree of acrimony. It was formerly employed in medicine; but is scarcely ever used by modern practitioners. — (*Milburn's Orient. Com.*)

**ZINC**, or **SPELTER** (Ger. *Zink*; Fr. *Zinc*; It. *Zinco*; Sp. *Zinco*, *Cinck*; Rus. *Schpiawter*; Lat. *Zincum*), a metal of a brilliant white colour, with a shade of blue, composed of a number of thin plates adhering together. When this metal is rubbed for some time between the fingers, they acquire a peculiar taste, and emit a very perceptible smell. It is rather soft; tinging the fingers, when rubbed upon them, with a black colour. The specific gravity of melted zinc varies from 6·861 to 7·1, the lightest being esteemed the purest. When hammered, it becomes as high as 7·1908. This metal forms, as it were, the limit between the brittle and the malleable metals. Its malleability is by no means to be compared with that of copper, lead, or tin: yet it is not brittle, like antimony or arsenic. When struck with a hammer, it does not break, but yields, and becomes somewhat flatter; and by a cautious and equal pressure, it may be reduced to pretty thin plates, which are supple and elastic, but cannot be folded without breaking. When heated to about 400°, it becomes so brittle that it may be reduced to powder in a mortar. It possesses a certain degree of ductility, and may, with care, be drawn out into wire. Its tenacity is such, that a wire whose diameter is equal to  $\frac{1}{16}$ th of an inch, is capable of supporting a weight of about 26 lbs. Zinc has never been found in a state of purity. The word zinc occurs for the first time in the writings of Paracelsus, who died in 1541; but the method of extracting it from its ores was not known till the early part of last century. — (*Thomson's Chemistry*.) The compounds of zinc and copper are of great importance. — (See **BRASS**.)

*Manufacture of Zinc, &c.* — There used to be 2 smelting-houses for the preparation of zinc near Bristol, and 3 near Swansea, but they have been all abandoned, with the exception of 1 of the latter. The material used by the English manufacturer is blende, or black jack (sulphuret of zinc); it is commonly found with lead, and is procured of the best quality in Flintshire and the Isle of Man. Besides its employment in the manufacture of brass, bell metal, and other important compounds, zinc has of late years

been formed into plates, and applied to many purposes for which lead was formerly used, such as the roofing of buildings, the manufacture of water-spouts, dairy pans, &c. Foreign zinc, being less brittle, is better fitted for rolling than that of England.

The duties on spelter, which were formerly prohibitory, were reduced in 1832 to 2*l.* a ton on that formed into plates, or cakes, and to 10*s.* on what is crude; the duty on the latter being farther reduced in 1842 to 1*s.* per ton. In consequence of these reductions, considerable quantities are now imported, partly for home use, and partly for re-exportation to India and China. Foreign zinc is principally made in Upper Silesia; whence it is conveyed by an internal navigation to Hamburg. The freight from the latter to Hull and London is nominal merely; the wool-ships being glad to take it as ballast. Hainault near Namur, has also some part of the spelter trade. A good deal of spelter is shipped from Hamburg, for France and America.

Zinc is produced in the province of Yunan, in China; and previously to 1820, large quantities of it were exported from that empire to India, the Malay Archipelago, &c. But about that time the free traders began to convey European spelter (principally German) to India; and being, though less pure, decidedly cheaper than the Chinese article, it has entirely supplanted the latter in the Calcutta market: latterly, indeed, it has begun to be imported even into Canton. — (See TITENAG.) In 1840 the exports of foreign spelter from this country for India and China amounted to 80,885 cwts.; in addition to which considerable quantities were exported from Amsterdam, Rotterdam, &c. We subjoin an

Account of the Zinc or Spelter imported, exported, and retained for Home Consumption, and the Duties thereon, in 1841 and 1842.

# SUPPLEMENT.

ADELAIDE, a city of S. Australia, cap. of the British colony of that name, about 7 m. S.E. from its port, an inlet on the E. side of St. Vincent's Gulph, lat.  $34^{\circ} 57' S.$ , long.  $138^{\circ} 38' E.$  Though founded so recently as 1834, this is a well-built, prosperous, and rapidly increasing town. Some of the houses, and most part of the principal buildings, are of brick and stone. Pop. in 1846, 7,143; and now (November 1848) probably more than 10,000.

The river Torrens, on which Adelaide is built, loses itself in a marsh before reaching the sea, so that the city is about 7 m. distant from its port, an Inlet of St. Vincent's Gulph. This inland situation is a serious drawback on the trade of the city; and it would seem that a mistake was committed in not building it on, or much nearer to, the coast. This, we are aware, has been denied, though, as we think, upon very unsatisfactory grounds. There appears, indeed, to be but little doubt that in no very lengthened period most part of the commerce of the town will be transferred to the port; and that it will be preferred as a residence by all commercial people. In the rainy season the Torrens is much flooded, though it seldom overflows its banks, which are steep and lofty; but in the dry season it has no current, its bed being then formed into a series of pools or tanks.

Port Adelaide, 7 m. N.W. from the city, in a low and marshy situation, consists of a number of dwelling houses and warehouses, some of which are of stone, with wharves, partly belonging to government, and partly to the South Australian Company. Pop. in 1848 about 1800. The inlet of the sea, forming the harbour, opposite the entrance to which a light vessel is moored, stretches from the gulph, from which it is separated by a narrow neck of land, for about 8 m. southward surrounding Torrens' island. At its mouth is a sandy bar with 8 ft. water at ebb and 16 ft. at flood tide; this depth being considerably increased during S. and S.W. winds. Ships of 400 or 500 tons may, consequently, pass the bar in safety, and once over, there is depth enough for the largest vessel to the head of the harbour. (*Dutton, S. Australia*, p. 112.) Large vessels are, however, obliged to lie in mid channel; but projects were recently on foot, and are now, probably, being realised, for improving the harbour, either by carrying out piers into the deep water, or by establishing a new port about 2 m. nearer to the harbour's mouth, where the water is deeper, and the situation affords greater facilities for the accommodation of shipping. Port Adelaide has a custom-house; but vessels are exempted from all port charges in this and in the other ports of the colony. A railway planned to unite the city with the port, will, most likely, be completed at an early date.

The trade of Adelaide is already extensive; and it will, no doubt, continue to increase with the increase of the population and trade of the colony, of which it is the grand emporium. The mines of copper, lead, &c., discovered in its vicinity, appear to be of the richest description, and the ores furnished by them form at present the principal article of export. Wool is, also, an important article; and the shipments of it, which, in 1846, amounted to about 1,500,000 lbs.,\* are increasing with the same extraordinary rapidity, in this as in other parts of Australia. We subjoin the following statements with respect to the trade, shipping, &c. of Port Adelaide in the following years.

Imports and Exports at Port Adelaide.

**Demand for Labour.** — There is at present a great demand for labour in this, as in most other parts of Australia. In March 1848, blacksmiths, carpenters, masons, wheelwrights, coopers, &c., were accustomed to obtain from 7s. to 8s. a day; saddlers and millers from 5s. 6d. to 10s.; bullock-drivers and day labourers from 3s. 6d. to 4s.; domestic servants (besides board and lodging) — male, from 25d. to 32d., and females from 14d. to 22d. a-year. The retail prices of provisions in the colony at the same date were quoted as follows: — Bread, 1½d. per lb.; butter from 10d. to 1s.; cheese, 9d.; candles, 7d.; flour, 1½d.; beef and mutton, 2d. to 2½d.; rice, 2½d.; sugar, 6½d.; tea, 2s. 6d.; tobacco, 3s. 6d. per lb.; and lamp-oil, 3s. per gallon; wheat, 4s. to 5s. per bushel. Clothing may generally be had at but a small advance upon the home prices; but tools are often scarce and dear.

**ALIENS.** An act passed in 1844, the 7 & 8 Vict. c. 66., has given every reasonable facility for the naturalisation of aliens. It authorises the Secretary of State for the Home Department to grant certificates of naturalisation, on his receiving such evidence, in regard to any application for a certificate, as he may think necessary. A certificate, when granted, conveys (unless some special reservation be made in it) all the rights and capacities of a natural-born British subject, except that of being a member of either House of Parliament, and of being a privy councillor.

The following regulations have been issued by the Secretary of State in reference to this subject: —

"I. Upon an application to the Secretary of State for the grant of a certificate of naturalisation, it will be necessary that the applicant should present to one of H. M.'s principal secretaries of state a memorial praying for such grant, stating the age, profession, trade, or other occupation of the memorialist, the duration of his residence within the U. K., and of what friendly state he is a subject; whether he intends to continue to reside within this kingdom, and all other grounds on which he seeks to obtain any of the rights and capacities of a natural-born British subject.

"II. That no memorialist should make an affidavit before a magistrate, or other person authorised by law to administer an oath, verifying all the statements in his memorial.

"III. That a declaration should be made and signed by four householders at least, vouching for the respectability and loyalty of the memorialist, verifying also the several particulars stated in the memorial as grounds for obtaining such certificate; and that this declaration should be made in due form, before a magistrate, or other person authorised by law to receive such declaration, in pursuance of the act passed in the 5th & 6th years of His late Majesty King William IV."—*Home Office, 15th October, 1844.*

An act passed in 1848, 11 Vict. c. 30., empowers the principal secretaries of state and the lord lieutenant of Ireland to order aliens out of the kingdom on a representation being made to them that such a step would conduce to the public tranquillity. But despite the obvious expediency of vesting a discretionary power of this sort in the functionaries referred to, the act is limited to a year's duration. Probably, however, it will be made perpetual.

**AUCTIONS.** The duties on auctions, which had become partial from the numerous exemptions in favour of various articles, and oppressive from the severity with which they pressed on others, were repealed in 1845, by the 8 Vict. c. 15.

This act directs that in future all persons acting as auctioneers shall take out an annual licence costing 10*s.*, which shall enable them to sell all sorts of articles by auction, whether special licences be required for dealing in the same or not: it is enacted by clause 6. that a licence shall not be necessary in the case of sales under distress, where the sum does not exceed 30*l.*, and a few others. Any person acting as an auctioneer, and not producing, on being requested to do so by any officer of customs or excise or of stamps and taxes, his licence, or paying forthwith 10*l.* into the hands of the officer, may be committed to gaol for a month, besides being liable to the penalties incurred for acting without a licence. Auctioneers are farther directed, under a penalty of 20*l.*, to have their names and places of abode written in legible characters, and placed in some conspicuous part of the premises where auctions are held.

### BANKS.—BANKING.

An Account of the Rate of Interest charged by the Bank of England, from 1694 to 1848.

From Aug. 8, 1694 to Aug. 20, 1694 on Foreign bills	6 per cent.	From Feb. 15, 1838 to May 16, 1839 on bills and notes (55 days to run)	4 per cent.

**BANKS (SAVINGS).** It has been seen (Dictionary, p. 117.), that the public has sustained a considerable loss from having to pay a larger sum to the trustees of Savings Banks and Friendly Societies, on account of interest, than the dividends on the stock and other public securities purchased by the money received from them have amounted to. This source of loss has, however, been either entirely or in a great degree obviated by the act 7 & 8 Vict. c. 83., which has reduced the interest payable to the trustees of savings banks from *3l. 16s. 0½d.* to *3l. 5s.* per cent.; and which has also enacted that the rate of interest payable to depositors shall not exceed *3l. 0s. 10d.* per do. This act has further raised the maximum amount of the government annuity that may be purchased by depositors in savings banks and others from 20*l.* to 30*l.*

**BANK OF FRANCE.**—The Revolution of 1848 involved the Bank of France in difficulties, under which, had she been established on a less solid foundation, she must have broken down. She could not, however, avoid suspending cash payments under a decree of the provisional government of the 16th March, 1848; and she was also compelled to advance large sums to government, and to the city of Paris. To set some limit to the abuses that might have taken place under the suspension, the maximum circulation of the bank was fixed, by the decree now referred to, at 350,000,000 fr.; while, in the view of supplying a currency suited to the smaller class of payments, she was permitted to issue notes of 100 fr. The departmental banks were soon after consolidated with and made branches of the Bank of France. We subjoin a copy of the decree of the 27th of April, 1848, by which this amalgamation was effected.

Art. 1. The banks of France, of Rouen, Lyons, Havre, Lille, Toulouse, Orléans, and Marseilles are united.

Art. 2. The departmental banks above enumerated will continue in operation as branches of the Bank of France, conformably to the regulations stipulated in the decree of the 15th of May, 1808, and the ordinance of the 25th of March, 1841.

The present number of the administrators of the departmental banks is maintained, as also the boards of discount, organised for the service of several of them.

The number of shares, the possession of which is at present required as a guarantee from the directors, censors, administrators, and members of the councils of discount of those departmental banks, is provisionally maintained.

Art. 3. The shares of those banks are annulled, and the holders shall receive in exchange shares of the Bank of France at a nominal value of 1,000 fr. for a nominal value of 1,000 fr.

Art. 4. In order to execute the above article the Bank of France is empowered to issue 17,200 new shares, which will increase its capital to 85,100 shares of 1,000 fr.

Art. 5. By the cession of those new shares to the shareholders of the banks of Rouen, Lyons, Havre, Lille, Toulouse, Orléans, and Marseilles, the Bank of France shall become proprietor of the capital of those banks, and be made chargeable with their engagements. The reserve funds, existing in each of those banks, shall be added to the reserve fund of the Bank of France. The uniting of the landed and chattel property, resulting from the present article, shall be subjected to the fixed registry duty imposed on deeds of partnership.

Art. 6. The Bank of France is authorised to add to the maximum of circulation, fixed by the decree of the 15th of March last, the maximum of the circulation fixed for each of the departmental banks by the decree of the 25th of the same month.

From the date of the promulgation of the present decree

the notes issued by the banks, incorporated with the Bank of France, shall be received throughout the republic as a legal tender by all the branches of the public treasury and private individuals. The holders of said notes shall have to present them to the Bank of France, or to its branches, within the following six months, in order to exchange them for notes of that bank. Beyond that period those notes shall cease to be current as a legal tender, but the Bank of France and its branches shall not be exonerated from the obligation of exchanging them.

Art. 7. The inspectors of the finance department, on an order of the minister, may verify the situation of the branch banks.

Art. 8. In future the branch banks of the Bank of France shall bear the following denomination:—“Bank of France, Branch Bank of—.”

	Shares.	Fr.
Bank of Rouen	5,000	5,000,000
Lyons	2,000	2,000,000
Havre	4,000	4,000,000
Lille	2,000	2,000,000
Toulouse	1,200	1,200,000
Orléans	1,000	1,000,000
Marseilles	4,000	4,000,000
Bank of France	17,200	17,200,000
	67,900	67,900,000
	85,100	85,100,000

The banks of Bordeaux and Nantes were at first disposed strenuously to resist the project for their incorporation with the Bank of France. In the end, however, they gave way; and, in consequence, 6,150 shares, and an additional capital of 6,150,000 fr. was added to the shares and capital of the Bank of France, making at present (1849), the former 74,050, and the latter 91,250,000 fr. The maximum circulation of the departmental banks was at the same time added to that of the Bank of France.

On the whole, we are inclined to think that this conversion of the departmental banks into branches of the Bank of France is a considerable improvement. It gives an equality

of value to the paper currency, which it could not otherwise have had, and makes it equally serviceable in all parts of the republic. It is surprising, indeed, how soon the Bank of France has recovered from the severe shocks to which she was exposed in 1848, and to what a degree she has regained the public confidence. But despite the able management of the Bank, her intimate connection with the government, coupled with the insecurity of the latter, and the disordered state of the finances, preclude any confident expectations in regard to her permanent stability. She may exist for a longer or a shorter period; but unless the government be established on some more solid foundation, and the revenue and the public expenditure be brought nearer to a level, the existence of the Bank, and of a convertible paper currency, must be in the last degree precarious.

**BANKS OF GERMANY.**—We borrow from *Hunt's Commercial Magazine*, the following statements with respect to the German banks:—

*Banks of Germany.*—The Bank Royal of Prussia was founded at Berlin in 1765, upon the model of that of Hamburg. So it existed until 1846, when it was re-organised under a new charter, by which more extension was given to its operations. In accordance with this new constitution, which has been in force since the 1st January last, the issue of notes has been carried to fifteen millions of thalers (the thaler equal to 2s. 10½d. sterling). In 1850 this issue is to be raised to twenty-one millions of thalers. The capital of the bank is always to be, in proportion with the notes in circulation, two-sixths in silver, three-sixths in bills discounted, and the rest in loans on securities. The bank notes are from twenty-five to fifty thalers each. The share of the government in the bank amounts, at most, to 500,000 thalers. The shareholders are entitled to an annual interest of 3½ per cent. upon the capital, and, after deduction of the sum set apart for the reserve or rest, which is not to exceed 30 per cent. of the capital, one moiety of the surplus profits is apportioned to them in addition, and the other goes to the treasury. The bank has branches in a great number of cities, as Breslau, Königsberg, Danzig, Stettin, Magdeburg, Munster, Cologne, Memel, Posen, Stolpe, Elberfeld, Treves, Aix-la-Chapelle, Dusseldorf, Coblenz, Minden, Erfurt, Frankfurt-sur-Oder, Stralsund, Kottin, Liegnitz, and Oppeln, and thus forms a vast network of financial operations through all the kingdom.

The private bank of the noblesse of Pomerania was founded at Stettin, in 1824, by an association of noble proprietors, with a capital of 1,000,000 thalers. After the crisis of 1830, this capital was carried to 1,584,500 thalers. The operations of this bank embrace discount, loans upon lodgments of merchandise, loans upon public and private securities, current accounts, and deposits with interest. Formerly, it issued promissory notes to bearer; but this privilege was withdrawn from it in 1835. There is a circulation of about ninety millions of thalers of mortgage notes in Prussia (these are, in fact, for one hundred and five millions). They have been issued, at different periods, by associations of proprietary nobles in various parts of the kingdom, and carry interest at 3½ per cent.

The National Bank of Vienna was founded in 1815, to re-establish order in the finances of Austria, and more particularly for the re-purchase or the conversion of the paper money in circulation, the value of which was become almost nominal. The different creations of shares have raised its capital to about 89,000,000 florins. This capital is divided into 50,621 shares of 1500 florins each. The actual operations of the bank are discount; the issue of bank notes, a privilege which it enjoys exclusively throughout the Austrian empire; loans upon deposits, and negotiations of loans. The bank pays an annual interest of 6 per cent. upon the primitive capital, and a dividend, after deduction, of the reserve fund. Its privilege, or charter, extends to the year 1866. It has branches at Prague, Brünn, Troppau, Ogen, Tameswar, Kaschan, Lemberg, Trieste, Innsbruck, Goritz, Linz, and Hermsstadt.

The Bank of Extraordinary Credit of Vienna, was constituted in 1846 by imperial decree, and has for object to devote a part of the sums destined for the redemption of the national debt, to the purchase of certain shares in railway and other enterprises, in order to sustain useful undertakings, and communicate a greater impulse to them.

The Loan and Exchange Bank of Bavaria was founded at Munich, in 1835, by shares, under the surveillance and control of the government. It is privileged for ninety-nine years. The original capital was 10,000,000 florins, with liberty of increase to 20,000,000. In 1846, there was a new emission of shares of 500 florins. The net profits are divided as follows:—Three per cent. as dividend to the shareholders, and, of the surplus, three-fourths as extra dividend, and the remaining fourth carried to the reserve, until it shall reach to one-tenth of the capital. Three-fifths of the capital are employed in loans on mortgage. The other operations are discounts, loans on securities and ingots; the issue of bank notes, whose amount is limited to four-tenths of the capital, and three-fourths of it to be covered by a value of double the sum in mortgage credits, or in silver. The bank has a branch at Augsburg.

The Royal Bank of Bavaria, first established at Ansbach, and now at Nuremberg, is one of the oldest establishments of the kind. Its operations are discounts, deposits, loans upon personal and other securities. The government is entitled to half the profits. It has branches at Ansbach and Bamberg.

The Royal Bank of the Court of Wurtemberg, founded in 1802 at Stuttgard, limits its operations to discounts and loans.

The Bank of Leipsic was founded in 1839, under the auspices of the government, with a capital of 1,500,000 thalers, divided into shares of 250 thalers, receiving 3 per cent. interest. Its operations are deposits, loans, and discounts. It has the right of issuing notes of 20 and 100 thalers each, of which the two-thirds should be guaranteed by values to the amount in specie or ingots.

There exists, besides, at Dresden, a loan bank, which makes advances to land proprietors and farmers for the payment of taxes, tithes, &c. Leipsic has also an institution of this kind under the name of "Union of Credit for the hereditary lands of the Saxon nobility."

It was in agitation, in 1846, to found at Dessau a great central establishment, to answer the purpose of a vast banking system for the north of Germany. It was proposed to endow it with an accumulation of capitals to the extent of from 50,000,000 to 100,000,000 thalers. But this gigantic project has resolved itself into a private enterprise, established, in the beginning of 1847, under the title of the Provisional Bank of Anhalt-Dessau, with a capital of 2,500,000 thalers, divided in shares of 500 thalers. This establishment issues notes of 1, 5, 10, 20, 50, 100, 500, and 1000 thalers each. One-fourth the value of the bank notes in circulation should be covered by an equivalent sum in specie.

The Bank of Hamburg was founded in 1619. The minimum deposit of a member desiring to open an account, is 100 marcs banco in bar silver, or in a bill, for the same sum, of one of the members of the bank, which is then transferred from the account of the latter to that of the former. Transfers cannot take place for a less sum than 100 marcs, except some days before Christmas, or in the middle of July. Until now, for each marc of fine silver of Cologne, the depositor was accredited with 27½ marcs banco; while, in withdrawing his money for a similar sum, he was debited with 27½ marcs banco, so that the simple usage of the operation brought a cost of 9-20 per cent. A new regulation, which is to come into force on the 15th of next August, imports that the marc of fine silver of Cologne shall be credited 27½ marcs banco, and debited at a similar rate after deduction of 1 per mille. Independently of this sort of business, the bank lends upon Spanish and American dollars, and sometimes also on copper. These are its only operations.

The association of the new loan, established equally at Hamburg in 1839, possesses a capital of 100,000 marcs banco, and does business prohibited to the bank, principally loans on securities, public funds, &c.

**BRAZIL (EXPORTS OF).**—We have obtained from a quarter on which every reliance may be placed, the following Table.

Account of the Quantities and Values of the different Articles of native Produce exported from the various Ports of Brazil in 1844-45.

Freemen of Bristol are exempt from Town Dues.

BUENOS AYRES—PORT CHARGES.—The Argentine government has notified, that —

1. From the 1st of January 1847 national vessels sailing for ports beyond sea shall pay 3 dollars per ton.

2. Foreign vessels shall pay 4 dollars per ton, except those which, in virtue of existing treaties are assimilated to national vessels.

3. Foreign vessels shall pay, for the visit of the health officer, 25 dollars, and the same amount for the bill of health.

4. Foreign vessels belonging to nations having no consul, and whose roll is made out by the captain of the port, shall pay 40 dollars for it.

5. The duties fixed by the preceding articles shall be paid one-half on the entrance of the vessel, and the other half on her departure.

6. National and foreign vessels, which do not leave nor receive cargoes, shall pay one-half of the taxes here established.

7. Let this decree be communicated and published in the official register.

Account of the Quantities of the principal Articles of Produce exported from the Port of Buenos Ayres during the year ended the 30th of June 1849.

REMARKS.—This and the following returns have been compiled from the entries in the books kept at this consulate, and the quantities specified are those that have paid duty. The weights and measures stated are those in use at Canton. 1 catty is equal to 1½ lb. avoirdupois and 100 catties corre-

spond with 133½ lb. in England. 1 ching is 4 English yards nearly. The value given has been computed upon the average prices of the year in the Canton market. The French dollar have been reduced to sterling at 6s. 1d., the average exchange of the year.

But, in addition to the trade with Canton, we carry on a considerable trade with the ports of Shanghai, Amoy, and Ningpo, especially the first, which is becoming an important emporium, and is, in various respects, better situated for trade than Canton. We subjoin an abstract of the total British trade with China, exclusive of opium, in 1847 and 1848.

Statement of the British Import Trade into China during the years 1847 and 1848.

Remarks on Trade with China.—It is obvious, however, that these returns are most defective, from their omitting all reference to opium. Though not recognised by the Chinese laws, everybody knows that opium is by far the most important and valuable of all the foreign articles brought into the empire. In 1847, the imports of this drug

**A Return of the Quantities and Value of Merchandise Imported into and exported from the Port of Canton, by British Ships, during the year ended 31st December, 1848.**

Total of imports in British ships - - - - -	—	—			
At the exchange of 4s. 1d. per dollar - - - - -	—	£1,354,147			

amounted, according to the estimate of Mr. McGregor, late consul at Canton, to about 89,000 chests, worth, probably, about 25,000,000 dollars, or, taking the doll. at 4s. 4d., 5,416,000*l.* sterling! The omission of all reference to such an article as this in the trade returns is, to say the least, not a little singular, and goes far to render them all but worthless.

The previous accounts show that the trade between the U. Kingdom and China has latterly been decreasing, and it has, also, been unprofitable. It is believed, by many, that this untoward state of things would be obviated by reducing the duty on teas entered for home consumption in this country to 10*d.* or 1*s.* per lb. But though such reduction would be most desirable for the comfort and well-being of our people, we doubt whether it would have the anticipated effect of proportionally increasing our exports to China. The British trade between India and China is intimately mixed up with, or rather is part and parcel of, the trade between the U. Kingdom and China; and supposing we were, by effectually reducing the duties on tea, largely to increase its importation, it does not follow that that circumstance would occasion any greater demand for British produce in China. It might, it is plain, occasion an increase in the imports of opium, or cotton, or both, from India; or it might, without increasing imports, go to lessen the balance of payments, now so much against the Chinese, and the consequent drain of bullion from the empire, estimated by Mr. Alcock at 10,000,000 dollars a year.

At present, it would seem that the greatest portion of the exportable produce of China is applied to the purchase of opium. And as the taste for, and the consumption of, the drug appear to be rapidly extending, it is probable, that any addition to the exports from China would rather be expended upon additional supplies of opium, than upon additional supplies of cottons, woollens, hardware, or other British produce. The extraordinary demand for opium in China, is, in fact, the greatest drawback upon the trade with this country. It absorbs all the means at the disposal of the people, and makes them comparatively careless about other things.

A more intimate acquaintance with the tastes and habits of the Chinese, and greater facilities for the introduction of British goods into the interior of the empire, may probably lead, in the end, to an increased demand for them. But, at present, there does not seem to be much prospect of the outlet for them in China being materially increased. Their importation, in 1846, was completely overdone; and the markets have not yet recovered from the glut that was thereby occasioned.

The reader will find some valuable information in regard to the trade with China, in the elaborate Reports of Mr. Alcock, consul at Shanghai, in the papers on the Chinese trade laid before parliament in 1849.

**CATTLE.**—The duties imposed in 1842 on cattle, sheep, and hogs when imported, having been repealed in 1846, the quantities brought to this country have been, in consequence, materially increased. They have, however, decreased since 1847, and are too limited to have any material influence over prices. We subjoin

An Account of the Importation of Cattle, Sheep, and Hogs, during 1846, 1847, 1848, and 1849.

**CHAMPAGNE.**—An official report, made by the directors of the indirect taxes for the department of Marne, furnishes the following information as to the trade in champagne between the 1st of April, 1846, and the 1st of April, 1847. The produce is distributed among the arrondissements of Chalons, Epernay, and Rheims. On the 1st of April last there were, in the cellars of the wholesale dealers, 18,815,367 bottles of this wine, viz.: Chalons, 4,604,237 bottles; at Epernay, 5,710,753; and at Rheims, 8,500,377. The number of bottles sold and delivered between the 1st of April, 1846, and the 1st of April, 1847, were, at Chalons, 2,497,355; at Epernay, 2,187,553; at Rheims, 4,090,577; making a total of 8,775,485 bottles. These quantities were thus distributed:—

	To go Abroad.	To other Depts.	Within the Dept.
From Chalons - - -	<i>Bottles.</i> 1,074,214	<i>Bottles.</i> 755,175	<i>Bottles.</i> 969,066

**CINNAMON.**—The duty on this spice when exported from Ceylon was reduced in 1848 from 1s. to 4d. per lib.

## COFFEE. —

Account of the Imports of Coffee into the U. Kingdom in each of the 5 years ending with 1849, distinguishing between British Colonial and Foreign Coffee, of the Quantities entered for Consumption in each of the above-mentioned years and of the Revenue accruing thereon.

Imports.					
	W. Indies.	Ceylon.	India and Mauritius.	Foreign Countries.	Total.
1845	6,351,970	16,657,464	5,762,371	21,602,107	50,372,912
1846	6,237,764	17,735,406	5,337,095	24,485,386	51,813,651
1847	6,770,792	17,190,024	2,532,740	18,860,488	55,354,044
1848	-	-	-	21,082,945	57,053,420
1849	-	-	-	22,985,876	65,780,504

Entered for Consumption.				
	B. Possessions.	Foreign.	Total.	Revenue.
1845	20,792,859	15,525,236	34,518,095	717,271
1846	23,761,190	15,031,471	36,793,061	756,838
1847	27,007,419	10,453,924	37,441,373	746,456
1848	30,147,771	6,939,508	37,107,279	710,292
1849	29,769,730	4,661,244	34,510,974	645,210

It will be seen from the above table that the consumption of coffee was nearly stationary during the three years ending with 1848, but that it has declined considerably during last year (1849). This decline may, in part at least, be ascribed to the great rise that has taken place in the price of coffee, Ceylon having advanced from 30s. a cwt. in January, 1849, to 65s. in January, 1850. This rise of price has not, however, been the only cause of the decline of the consumption; for, in 1848, when prices were at the lowest, the quantities taken for home use were less than in 1847.

It is easy, however, to see that the substitution of chicory for coffee is the great cause of the declining or stationary state of the latter. Since the article on chicory in the Dictionary was written, it has been subjected, when imported, to a duty of 6d. per lib., plus 5 per cent., being the same that is laid on foreign coffee. But chicory raised at home continues to be exempted from all duty; and as it is grown here with quite as much facility as in any other country, the duty on imported chicory operates merely as a bounty on the production of British chicory, and subjects the coffee-grower to an unfair competition with an article exempted from duty.

Chicory may be sold, roasted and ground, for 2d. or 3d. per lib.; but as the cheapest species of coffee cannot be sold roasted for less than 1s. 1d., or 1s. 2d. per lib., the temptation to adulterate is obviously very great. And we are assured by those who have carefully inquired into the subject that the consumption of chicory is at present (1850) little, if at all, short of 12,500 tons a year; of which, probably, not more than 1,000 tons is sold as chicory, the rest being substituted for, or employed to mix with, or adulterate, coffee. Supposing we are nearly right in these statements, it will follow that were the 12,500 tons of chicory subjected to the same duty that is laid on British plantation coffee, that is, to 4d. per lib. plus 5 per cent., it would produce about 500,000*l.* a year, which may, consequently, be looked upon as the bonus paid to encourage the growth of chicory, and the practice of adulteration.

A state of things so fraught with injustice should not be tolerated; and to put all parties on the same equal footing one or other of the following plans should be adopted, viz. 1st, the chicory culture should be proscribed; or, 2d, its produce should be charged with a duty of 4d. per lib., plus 5 per cent.; or, 3d, British plantation coffee should be admitted duty free. In dealing with the subject we may adopt whichever of these plans may be thought preferable; but till one or other of them be adopted and carried into effect, our colonists are entitled to complain not merely of harsh, but of unfair and unjust treatment.

Chicory, however, though it be the most extensively employed, is not the only or the worst article used to adulterate coffee. Roasted rye, roasted carrots and parsnips, burnt treacle and such like articles are largely substituted for coffee in the inferior quarters of the metropolis, and still more in the mining and manufacturing districts. It is difficult to guard against frauds of this sort unless it be by buying coffee in the bean, or by dealing only with shops of the first character.

Various estimates have lately been put forth, some of them in the shape of advertisements, of the supply and consumption of coffee, making it appear that the last greatly exceeds the former. But the greater number of these estimates deserve very little attention. The statements in them regarding the consumption in most countries are at best little better than rough guesses; and though, owing to the deficient crop in Brazil, the supply from it in the present season will be reduced, there will probably be a considerable increase in the supplies from other quarters. But, independently of these considerations, it is quite obvious that the late rise of prices will effectually check the con-

sumption of coffee, and hinder any material discrepancy from taking place between the supply and the demand.

**COLLISION** (Fr. *Abordage*), in a general sense, is the act of any two or more bodies coming forcibly together; but in commercial navigation it means the shock of two ships coming into sudden and violent contact at sea, by which one or both may be more or less injured.

From the great increase of navigation, the risk of accidents by collision at sea has been proportionally augmented; and it is, therefore, of importance to be able satisfactorily to determine by whom the loss should, in such cases, be borne. This, however, is by no means an easy matter; and the laws of different countries, and the opinions of the ablest jurists, have differed widely with respect to it.

Every master of a ship is bound, as well by the duty he owes to his employers and to those on board his ship, as by positive rule, to keep a proper watch at sea, especially in channels much frequented by shipping, and to use every precaution to avoid coming into contact with other vessels. In order still better to provide against danger, and to obviate disputes, the Trinity House promulgated, on the 30th of October, 1840, the Rule of Navigation given below. And though not in itself a law, all masters not complying with this rule will, in ordinary cases, be held to be guilty of unseamanlike conduct, and their owners or themselves will be responsible for the consequences. But it is, at the same time, to be borne in mind, that no rule of this sort is to be regarded as inflexible; and that no master will be warranted in abiding by it when by doing so he must mainly incur danger. A. may be in his proper course; but if by pursuing it he will run a great risk of coming into collision with B., who is upon a wrong course, he is bound to alter his course so as to avoid the collision. The fact of one master being ignorant, careless, or in fault, is no reason why another should not use every means in his power to provide for the safety of his ship, and consequently of the lives and property entrusted to his care.

The conditions under which cases of collision take place may differ extremely. Thus, 1st, it may be occasioned by circumstances beyond the power of control, as by the violence of the wind or waves dashing or impelling the ships together; or, 2d, it may be merely accidental, as in a fog at sea or otherwise, without blame being imputable to either party; or 3d, it may be owing to the culpable negligence or misconduct of one party, or both. In adjudicating upon losses growing out of collisions that have taken place under such different circumstances, the conclusions must also be very different.

With respect to the first class of cases there is little difficulty; and all authorities agree that the loss should be borne by the party on whom it falls. In the second case the rule to be followed is not quite so obvious: according to the Roman law, the loss arising from all collisions where blame could not be imputed to either party was borne by the sufferer; and this principle has been ingrafted into the law of England. (*Marshall on Insurance*, c. 12. s. 2.) The law of Rome has not, however, been in this respect followed by most maritime states, the usual practice in them being, in cases of accidental collision without blame, to divide the damage equally between both parties. (*Ordonnance* of 1681, lib. iii. tit. xii. art. 10., with the Observations of Valin.) This, also, is the rule sanctioned by the law of England in cases where both parties are to blame, but where the blame cannot be discriminated. Those cases in which the blame is clearly ascribable to either party present no difficulty.

The leading doctrines of the law of England with regard to collisions have been clearly and succinctly stated by Lord Stowell. "In the first place," says his lordship, "a collision may happen without blame being imputable to either party, as when the loss is occasioned by a storm or any other *vis major*. In that case the misfortune must be borne by the party on whom it happens to light; the other not being responsible to him in any degree. Secondly, a misfortune of this kind may arise where both parties are to blame, where there has been a want of due diligence or of skill on both sides: in such a case the rule of law is, that the loss must be apportioned between them, as having been occasioned by the fault of both of them. Thirdly, it may happen by the misconduct of the suffering party only; and then the rule is, that the sufferer must bear his own burden. Lastly, it may have been the fault of the ship which ran the other down, and in this case the innocent party would be entitled to an entire compensation from the other." (2 *Dodson's Admiralty Reports*, 83.)

We may add, that the rule of the equal division of the damage where both vessels are to blame has been, since Lord Stowell's time, fully recognised and finally established by a decision of the House of Lords, on an appeal from Scotland.

Various authorities have spoken disparagingly of the rule now referred to, and have called it a *judicium rusticorum*. But its policy has been successfully vindicated by Valin. "C'étoit," says he, "le moyen le plus propre à rendre les capitaines ou maitres des navires extrêmement attentifs à éviter tout abordage, surtout ceux des bâtimens

faibles et plus susceptibles d'être incommodés par le moindre choc, en leur rendant toujours présent la crainte de supporter la moitié du dommage qu'ils en pourraient recevoir. Et si l'on dit qu'il auroit été plus simple et plus court de laisser pour le compte particulier d'un chacun le dommage qu'il auroit reçu, comme provenant d'un cas fortuit; la réponse est qu'alors les capitaines de gros navires n'auroient plus craint de heurter les bâtimens d'une beaucoup moindre force que le leurs; rien donc de plus juste que la contribution par moitié."—(*Commentaire sur Ordonnance de 1681*, ii. 179, ed. 1776.)

In apportioning the damage in cases where both parties have been in fault, the question occurs, whether the damage done to the cargo shall be taken into account or left out in the estimate on which the apportionment is to be made. This knotty point has been differently decided in different countries; but, according to the existing law of England, it would be included in the estimate. It is, however, to be observed, that the statutes by which the liability of owners is limited to the value of the ship and freight apply to cases of damage by collision. (For further observations on this curious and important subject, in addition to Valin and the other authorities already referred to, the reader may consult the valuable chapter on collision added by Mr. Serjeant Shee to his edition of Lord Tenterden's work on the Law of Shipping.) We subjoin the

#### RULE OF NAVIGATION ISSUED BY THE TRINITY HOUSE.

The attention of this Corporation having been directed to the numerous severe, and in some instances fatal, accidents which have resulted from the collision of vessels navigated by steam, and it appearing to be indispensably necessary, in order to guard against the recurrence of similar calamities, that a regulation should be established for the guidance and government of persons entrusted with the charge of such vessels; and whereas,

1. "The recognised Rule for Sailing Vessels is, that those having the wind fair shall give way to those on a wind;

"That when both are going by the wind, the vessel on the starboard tack shall keep her wind, and the one on the larboard tack bear up strongly, passing each other on the larboard hand;

"That when both vessels have the wind large or a-beam, and meet, they shall pass each other in the same way on the larboard hand, to effect which two last-mentioned objects the helm must be put to port;

And as steam-vessels may be considered in the light of vessels navigating with a fair wind, and should give way to sailing vessels on a wind of either tack, it becomes only necessary to provide a rule for their observance when meeting other steamers, or sailing vessels going large.

Under these considerations, and with the object before stated, this Board has deemed it right to frame and promulgate the following rule, which, on communication with the Lords Commissioners of the Admiralty, the Elder Brethren find has been already adopted in respect of steam-vessels in her Majesty's service; and they desire earnestly to press upon the minds of all persons having charge of steam vessels the propriety and urgent necessity of a strict adherence thereto: viz.

II. "Rule for Steam Vessels on different Courses. When such vessels must inevitably or necessarily cross so near that, by continuing their respective courses, there would be a risk of their coming in collision, each vessel shall put her helm to port, so as always to pass on the larboard side of each other.

"A steam-vessel passing another in a narrow channel must always leave the vessel she is passing on the larboard hand." By order.

Trinity House, London,  
30th October, 1840.

J. HERBERT, Secretary.

CORN LAWS.—*Remarks on the Abolition of the Corn Laws.*—The time that has elapsed since the introduction of the new system is much too short to admit of any accurate estimate being formed of its practical working. The imports during the past year (1849) have been much larger than was anticipated. But this seems to have been principally a consequence of our high prices during the two preceding years, and of the unusually productive harvest of 1848, on the Continent, and in the U. States; and it is besides certain that a considerable portion of the imports of last year have entailed a loss on the importers. On the whole, we are not inclined, from any thing that has since occurred, materially to modify the estimate given in the Dictionary, of the future price of corn. We supposed, that under the new system, it would probably average, during the next few years, from 45s. to 48s. a quarter. And the additional information since obtained from the principal corn exporting countries, appears to warrant the conclusion that, speaking generally, corn cannot be bought from them and sold here, with a reasonable profit, at less than the above rates. That in an unusually productive year here and on the Continent, prices may fall considerably under this level, to 35s. a quarter, or lower, is not improbable. On the other hand, however, their rise would be equally great under the opposite circumstances, or in years like 1846–47, when there is a bad harvest here and in Europe generally. But if we refer to average prices, that is, to the prices for some continuous ten or twelve years, the oscillations on the one side are compensated by those on the other; and we apprehend, that the medium will not be very different from 45s. or 48s. a quarter. And, supposing that it does not exceed the least of these sums, or 45s., it follows, seeing that the average prices during the ten years ending with 1845, were 57s. 11d. a quarter, that the abolition of the corn laws will have occasioned a fall of 10s. or 13s. a quarter in the price of corn.

Now, it is of importance to bear in mind that the average price of corn fell, in the interval between 1814 and 1846, above 30s. a quarter; and yet, despite this enormous

fall, and contemporaneously with it, there was an extraordinary improvement of agriculture, and a great rise of rent. And when such has been the case, it appears visionary to suppose that agriculture should be seriously injured by a fall of 10s. or 12s. a quarter below the average prices that ruled previously to 1846.

At the same time, it were idle to deny that there must necessarily be a great deal of conjecture in all speculations in regard to the future price of grain. At present there are many indications of a gradual rise of prices, depending partly on the rapid increase of population in Europe and the New World, and partly on the fall in the value of the precious metals, that may be expected from the vast increase of their supplies from Russia and America; but it is possible that these causes of high price may be overcome by others of a contrary tendency, by improvements in the practice of agriculture here and in other countries, the use of more efficient manures, and an endless variety of other circumstances. Hence it will by no means follow, should the ordinary price of corn a few years hence be lower than was anticipated in 1846, that such decline is either to be wholly or principally ascribed to the repeal of the corn laws. It may have originated in wholly different circumstances,—in changes that could neither be foreseen nor provided against. But though a return to any thing like the old system of protection be alike undesirable and impossible, still, should there be at any time so very abundant a season in this country and in the north of Europe, as to threaten such a fall of prices as might give a serious shock to the industry of the husbandman, the crisis may be averted or mitigated by some temporary expedient. It is not, however, very probable that it will be necessary to interpose in the way now alluded to. Instead of being unfavourable to the agriculturists, the chances are that they will gain by the late change. They have greater capital, skill, and industry, and richer customers than those of any other country; and being aware that they must, in time to come, rely wholly on these to preserve their place in society, and not on the miserable resource of custom-house regulations and parliamentary majorities, the rapid improvement of agriculture may be confidently expected. And, apart from this powerful stimulus, the new measure gives the agriculturists increased security, and identifies their interests in opinion, as well as in fact, with those of the public.

At the same time, we are ready to admit that, had it been practicable, we should have much preferred seeing this great question settled by the adoption of a measure for opening the ports, under a fixed duty of 5s., 6s., or 7s. a quarter on wheat, and proportionally on other grain, accompanied with a corresponding drawback. We make this statement on general grounds, and without any reference to the peculiar burdens that affect the agriculturists, though these should neither be forgotten nor overlooked. The question is, may not these oscillations of high and low prices that are so injurious, the former to the consumers, and the latter to the growers, be mitigated by the interference of the legislature? In our view of the matter, this important question must be answered in the affirmative. In scarce years a reasonable duty on imports would have no influence over prices, but would fall wholly on the foreigner, and be deducted from the large extra profit he is then sure to make. On the other hand, when the home crops are unusually abundant, the duty would help to prevent the markets from being overloaded, and prices from being reduced so low as to be injurious to agriculture; while, if such a contingency should notwithstanding take place, the drawback would come into operation, and assist in relieving them of the surplus. We have seen nothing in the shape of argument to satisfy us that the arrangement now suggested, would not have the anticipated effect, that is, that it would not give greater steadiness to prices, and therefore be for the advantage of all classes. We say of *all classes*; for either unusually high or unusually low prices are disadvantageous to the public. Our present system protects us in as far as possible against the former, but it does not protect us against the latter; and is, consequently, less advantageous than the system we have ventured to recommend, which would secure both objects.

It may be said, perhaps, that a fall of prices is always advantageous, and that they cannot in fact be too low; and such is unquestionably the case when the fall is occasioned by an increased facility of production, or by a permanent reduction in the cost of the supplies. But the low price that we have referred to, and have exclusively had in view in these statements, is of a different description. It originates in the accidental occurrence of a peculiarly luxuriant harvest; and, whilst it entails a serious loss on the growers, it cannot be permanent. It is a mistake to suppose that a temporarily low price of this sort can be really advantageous to any class of the community. To whatever extent the manufacturers may profit by it in the reduced price of their food, they will, most likely, lose proportionally through the reduced demand of the agriculturists for their peculiar products. All the leading interests of a great country like this are intimately connected; and it is contradictory to suppose that one or two can permanently flourish at the cost of the others. The hardship that high prices of corn entail on the manufacturing and commercial classes is not compensated by their advantage

to the agriculturists; nor is the injury which low prices entail on the latter, balanced by the benefits they confer on the former. Steadiness of price, whether the average rate be low or high, is most conducive to the interests of all classes; and we think it sufficiently plain that it would be more likely to be realised by imposing a reasonable duty on corn when imported, accompanied with a corresponding drawback, than by any other means.

Considerations such as those now stated, were totally lost sight of when the question of the corn laws came to be discussed in 1846. The pertinacity with which the agriculturists opposed every approach to a more liberal system, roused a spirit which would not be satisfied with any thing short of a complete abandonment of restrictions. The time for compromise and arrangement was, unhappily, allowed to go by, and government had to deal with an unreasoning necessity: *Cum ventre humano tibi negotium est, nec rationem patitur, nec aequitate mitigatur, nec ulla prece flectitur populus.* — (Seneca, de Brev. Vitæ, c. 18.) What was practicable became of more consequence than what was either just or proper. And even had it been possible to effect an arrangement of the question in the way now stated, the pernicious trade of agitation would most likely have continued to flourish; the object and influence of the duty would have been misrepresented; and neither landlords nor farmers would have felt any confidence in the permanence of the new arrangements. Under these circumstances, their unconditional repeal was, if not really, at all events practically, the best, or rather the only safe, course that could be adopted in dealing with the corn laws.

It would be singular, however, if in a measure so carried, there should be no defects. But neither these nor its peculiar advantages can as yet be fairly appreciated. They will, however, be gradually disclosed; and it will be the business of the legislature to obviate the former and to secure the latter.

It is not a little remarkable that the immense entries of last year, amounting, including flour and meal, to nearly 12,000,000 quarters, should not have reduced prices far more than they actually have done. Their modified influence in this respect has been owing to a variety of causes, but principally, perhaps, to the greatly increased consumption of corn by the manufacturing and commercial classes, occasioned partly by their comparatively prosperous condition, partly by the reduced supply of potatoes, and partly, also, we believe, by our last harvest being less productive than was supposed. But it is not very likely that the importations of last year will often be equalled, much less exceeded. Their limited effect in reducing prices ought, consequently, to give confidence to the agriculturists. Indeed, the average price of wheat last year (1849) amounted, despite the vast importations, to 44s. 3d. a quarter, being 1s. 6d. above the average price of 1834 and 1835, when the protective system was in its greatest vigour!

Account of the Quantities of Corn, Meal, and Flour Imported in 1848 and 1849, with the Quantities entered for Consumption, and the Duties in these Years.

\* The consumption of the several species of Corn, exhibited above, for the year 1848, includes not only the "Quantities charged with Duty," but also those quantities entered previously to the 1st. March, 1848, which were exempted from duty under the temporary Act 11 Vict. c. 64.

**COTTON MANUFACTURE.** The subjoined table, taken from the carefully compiled and comprehensive annual statement of Messrs. George Holt & Co., eminent cotton brokers of Liverpool, dated 31st of December, 1849, shows, in a very striking manner, the progress of the manufacture in this country, and the fall in the price of cotton wool.

It is seen from the subjoined statements that the cotton crop of the U. States in 1846-47, was much less abundant than it had been for several years previously; and this falling off in the grand source of supply had a most unfavourable influence over the cotton manufacture in this country. Happily, however, the crop of the U. States in 1847-48 regained its former level; and the crop of 1848-49 was the largest ever known, having reached the prodigious amount of 2,720,526 bales. But it is not supposed that the crop of 1849-50 will exceed 2,250,000 or 2,300,000 bales.

Statement of the Imports into, the Exports from, and of the Consumption, Prices, &c. of Cotton Wool in Great Britain, in different Years, from 1816 to 1849, both inclusive.

The following estimate, by Messrs. Dufay and Co. of Manchester, though some of the items it may, perhaps, be a little questionable, sets in a very striking light the beneficial influence of a low price and an abundant supply of the raw material over the interests of the cotton manufacturers.

Estimate of the Difference in Pounds sterling of the Sums accruing to the Cotton Manufacturers, &c. of the U. Kingdom, during 1846, 1847, and 1848, to pay for the Expenses of Fuel, Machinery, Druggs for Dyeing, Finishing, and Bleaching, Interest of Capital, and every kind of Wages, Profit, &c., after deducting the actual Cost of the Raw Material.

	1846.	1847.	1848.		1846.	1847.	1848.
Cotton consumed in Great Britain	598,960,000	489,277,720	550,000,000	Average cost of cotton in each year	12,463,750	11,668,314	9,739,800
Waste in spinning this, at 10% per lb.	59,896,000	48,927,772	55,000,000

**GALACZ, THE DANUBE, &c.** The anticipations in which we ventured to indulge in the Dictionary (See **GALACZ**), in regard to the probable increase of the trade of the Danube, have been more than realised. The high prices of corn in France, Italy, and England, in 1846 and 1847, gave an extraordinary stimulus to the export trade of Galacz and Ibraila, or Brahilow. The exports of wheat from both ports in 1847, amounted to no fewer than 570,978 quarters, worth on board ship 875,603*l.*; the exports of Indian corn during the same year were 937,720 quarters, worth 1,172,150*l.*; and among the other exports were about 320,000 quarters of barley, and 42,000 cwt. of tallow, with a variety of inferior articles. The total value of the exports from the two ports during the above year, amounted to the very large sum of 2,368,472*l.*, of which about two-thirds were from Ibraila. The latter is the port of Wallachia, but the exports from it are partly also from Bulgaria, being conveyed to the port by the vessels which navigate the Danube and its tributaries. The exports from Galacz are principally the produce of Moldavia, being in great part conveyed to the port by the Sereth and the Pruth.

We may also avail ourselves of this opportunity to state that there has been an equal, or even greater, increase in the exports from Bulgaria, independently of those that come down the Danube to Ibraila. About six or eight years ago, the entire exports of wheat from Varna and the other Bulgarian ports between the Gulph of Bourghas and Kustenjee, did not certainly exceed 200,000 quarters, whereas in 1847 they amounted to 896,000 quarters! And it is necessary to bear in mind that this is exclusive of the exports, which are very considerable, from Tulcha, a port of Bulgaria, on the Danube, about 40 miles W. of the entrance to the Sulinah mouth. We subjoin the following statements in regard to the trade of Galacz, Ibraila, and Varna, the capital of Bulgaria, in 1847. (See next page.)

The port of Varna is situated on the W. coast of the Black Sea, at the bottom of a rather small bay, about 9 m. N.W. Cape Guleta, the latter being in lat. 43° 10' N., long. 27° 58' E. The ordinary anchorage is to the S.E. of the town, in 7 or 8 fathoms, bottom sand and oaze. It is open to all winds between E. and S.S.E. Vessels load and unload by means of lighters, it being dangerous to approach within  $\frac{1}{4}$  m. of the shore.

Varna has about 15,000 or 16,000 inhabs. It is famous in Turkish history for the great victory gained in its vicinity in 1444 by the Turks, under their sultan Achmet II., over the Hungarians, whose king, Ladislaus, was killed in the battle.—(*L'Art de Vérifier les Dates*, Part. 2de. v. 250, 8vo ed.)

Both hard and soft wheat are shipped from Varna, the value of the former being from 35 to 50 per cent. greater than that of the latter. An export duty is charged on wheat when exported, and being a fixed duty of about 2*s.* 8*d.* a quarter, it is high when prices are low, and low when they are high.

It may be worth while, perhaps, to mention that the export trade of Wallachia and Moldavia did not become considerable till after the treaty of Adrianople, dictated by the Russians in 1829. Previously to that epoch, corn and provisions could only be sent to Turkey for consumption; wool being the only article that could be sent to other countries. Since 1829 the export of all articles to all parts of the world has been permitted under low duties. The vast sums that have been received for exports during the last 3 or 4 years in the Danubian provinces and in Bulgaria, have given an extraordinary stimulus to all sorts of improvement. Whatever, therefore, may be said of the policy of Russia in other parts, here, at all events, it has been highly conducive to the interests of commerce and of civilisation.

\* Tallow is here divided into two qualities, called tallow and chervise. The latter is the clean fat of the carcases and marrow boiled, and is much used in Constantinople for culinary purposes: tallow is the fat of the intestines, feet, &c. boiled. It is generally sold in parcels, consisting of ½ chervise

and ½ tallow. For the Constantinople market chervise is worth 10 per cent. more than tallow, but for other European markets tallow is worth as much as chervise. — (Consular in the Trade of the Danube, p. 2.)

GLASS. We are glad to have to state that the glass manufacture has been emancipated from all fiscal restraints, the duties on glass having been abolished by the act 8 Vict. c. 6., which took effect from the 5th of April, 1845. The beneficial influence of this liberal and most judicious measure is already obvious in the increased cheapness

and greater variety of descriptions of glass in the market; and there can be no doubt that its advantages will become still more and more obvious from the facilities it gives for the introduction of improvements, and, consequently, for ameliorating the quality as well as reducing the cost of one of the most useful and admirable of the products of art and industry.

### GOLD (PRODUCE OF) IN RUSSIA AND THE U. STATES.

Account of the Produce in Gold of the Mines of the Oural and of the Washings of Siberia since 1837, with its Value in Sterling.

	In the Oural Mountains.	In the Siberian Washings.	Total.	Quantity of fine Gold.	In Troy Weight.	Value at the Rate of 113-031 Grains Troy per 41 st.

1846	314-65	1,362-88	1,677-53	1,526-65	66,986-01	3,414,427

The gross produce of the mines and washings in 1847 amounted to very near 1781 poods, being equal to about 3,700,000*l.* sterling; and their produce in 1848, and we believe also in 1849, was still greater. And it will be observed, that this and the other sums mentioned above are derived from the official returns, which take no account of the quantities produced which have not paid duty, though these are admitted to be very considerable.

This extraordinary increase in the supply of gold could hardly fail, even were there no increase in the supplies from other quarters, to reduce its value; at least, this would certainly be the case, should the produce of the Siberian washings increase for the next ten or twelve years as rapidly as it has done during the last ten or twelve. But vast as the increase from this source has been, it appears highly probable that it will be, if it has not already been, exceeded by the supplies from California. There is still, it is true, much discrepancy in the accounts from that region; but after making every allowance for exaggeration, there can be no doubt that the sands of many of the Californian rivers, and the soils in various parts of the country, are richly impregnated with gold, large quantities of which have been collected and exported. In 1848, the exports from California were estimated at from 800,000*l.* to 1,000,000*l.*; and in 1849, they have been estimated, apparently with a good deal of care, at about 4,000,000*l.* And it is plain, unless this estimate be very greatly exaggerated (which we do not think is the case), that should the supply be maintained at this level for a few years, it will, combined with the increased supplies from Russia, increase the total annual supply of gold to an amount unknown at any former period. And as there is not, and cannot well be, any corresponding increase in the demand for gold, its value will sustain a corresponding fall. And hence we think that a rise in the prices of most articles may be fairly anticipated. This rise will, probably, be slow; but should eight or nine millions of pounds sterling of gold be henceforth annually added to the existing stock of the commercial world, a repetition of the effects consequent on the first discovery of the American mines will most likely be experienced. And we have elsewhere stated our reasons for thinking that such a contingency, or that a gradual and considerable fall in the value of gold, would be of the greatest advantage to this country.—(*Principles of Political Economy*, 4th ed. part iii. c. 7.)

Were the supply of silver to increase in the same proportion as that of gold, the value of both would be equally depressed, so that, though they fell as compared with other things, they would continue to bear the same relation to each other. It does not, however, appear, that the supply of silver is increasing equally with that of gold; and already there are indications of the value of the latter declining as compared with that of the former. But we are not thence to conclude that the supply of silver is continuing stationary; on the contrary, there can be no doubt that it also is increasing, though less rapidly than the supply of gold. The coinage of silver in the different Mexican mints amounted, as seen in the subjoined statement, in 1848, to 18,239,560 *dols.* or taking the dollar at 4*s.* to 3,647,912*l.* And if to the supply of coined silver from Mexico, we add the quantities not brought to the mints, and the further supplies afforded by Peru, Bolivia, Chili, and other American countries, and by Europe, it will be seen that the entire supply is very large indeed, and that it has materially increased of late years. The demand for it is, however, much more extensive than that for gold; so that an increase of its supply has less effect on its value. And, therefore, unless some unlooked-for increase in the supply of silver should speedily occur, its value may be expected to rise as compared with gold.

Account of the Coinage of Gold and Silver in the Mints of the Mexican Republic during the Years 1847 and 1848.

**GRIMSBY (GREAT).** We have been obligingly furnished by the secretary to the Dock Company, Charles Neate, Esq., with the following statements in regard to the important works now in progress at this place. They are already considerably advanced; and, if completed on the proposed plan, will be of the greatest advantage, not merely to Grimsby, but to the shipping engaged in the trade on the E. coast of England, and to the manufacturing districts of Yorkshire and Lancashire.

"In its present condition the Port of Grimsby possesses but very limited resources for the accommodation of shipping or merchandise. It has a floating basin of about ten acres area with 17 feet water, but this, being approached by a shallow creek, is only available for entrance at or near the time of high water, and is further deficient in proper quays and warehouses.

"These defects, however, will entirely cease with the completion of the works now in progress, which are designed upon a large and comprehensive scale, commensurate with the natural advantages afforded by the situation of Grimsby, and capable, with these, of raising it to high importance.

"Grimsby, lying on the south side of the Humber estuary, which at this point is seven miles in breadth, possesses the double advantage of close proximity to the open sea and of complete shelter from its violence; the latter being afforded by that projecting arm on the north side of the Humber mouth, which, terminating in Spurn Head, encloses a very capacious and secure roadstead, extensively frequented by ships of all classes, and especially valuable to the coasting traders. The entrance to the new docks will be within a mile of these roads.

"The new works, which project half a mile into the river, and reclaim from it 130 acres of land, will comprise a dock of 30 acres in extent, two entrance locks, and a tidal entrance basin 15 acres in area, in addition to space for the construction of graving docks, building ships, &c. The thirty-acre dock, affording quay-room for nearly a mile in length, will be surrounded by landing sheds and warehouses, whilst, a branch of the railway will extend along its sides. Of the two locks leading into it, one will be sufficiently large to admit the largest steam frigate in the navy. The constant depth of water in the dock will be amply sufficient for any full laden vessel whatever, and the average depths of water at the entrance to the locks will be 8 feet at low and 26 feet at high water. The entrance basin, to be formed by two piers, together about 1,700 feet in length, and provided with landing slips, will be frequented especially by those steamers which do not require to enter the docks, and which, under ordinary circumstances, will remain afloat in it at all times of the tide.

"Grimsby is a terminus of the Manchester, Sheffield, and Lincolnshire, and of the East Lincolnshire Railways, which place it in direct and ready communication with London, Sheffield, Manchester, and Liverpool. With the exception of Hull, which is 20 m. higher up the Humber than Grimsby, it is the only port on this part of the east coast of England."

**GUTTA PERCHA**, a vegetable product, in various respects similar to caoutchouc or India rubber, but much harder and less elastic, obtained from trees found in the forests of Borneo, Malacca, Singapore, &c. It does not appear to have been known to the British public previously to 1843; but it has since been largely imported, and is now used for a great variety of purposes. On being immersed in boiling water, or heated, it becomes plastic, and is easily moulded into any shape, recovering, when cold, its original hardness. Being impervious to water, it has been extensively employed in the manufacture of soles for shoes; it is also made into whips, frames for pictures and mirrors, driving straps for machinery, pipes for conveying water, and various other articles.

The trees from which it is usually obtained, called the Percha (whence its name) and Tuban, are of a large size, being 60 or 70 feet in height, and from 2 to 3 feet in diameter. It might, no doubt, be obtained by periodically bleeding the trees; but the natives cut them down, and then make incisions in the bark, whence the gum exudes into cocoa-nut shells, or other rude instruments placed for its reception. It is stated in an interesting article on Gutta Pereha in the *Journal of the Indian Archipelago* (No. I. p. 24.), that 6,918 piculs (8,235 cwt.) were shipped from Singapore for England in the interval between the 1st of July, 1845, and the 1st of July 1847; and that to obtain this quantity, estimating the average produce of a tree at 10 cetties (13½ lb.), no fewer than 69,180 trees must have been sacrificed! In consequence of this destruction of the sources of supply, it is said to be already becoming scarce. It is imported in the shape of blocks and of scraps like leather clippings. It is usually adulterated with sawdust, leaves, and other impurities; but these, being merely entangled in its fibres, may be easily separated from the gutta by immersing or softening it in boiling water, and then picking them out. — (See *Journal* referred to above, and Low's "Sarawak," &c., p. 50.)

**ICE.** — The sale of ice and snow preserved in the caverns of Vesuvius and on the more elevated parts of *Ætna*, has long been a considerable branch of trade in Naples, Catania, and the adjoining towns; but it was reserved for the Americans to carry the trade in ice to an extent which could not previously have been anticipated. The extreme heat of the summer in the New England States occasions a natural demand for ice, which the extreme cold of the winter gives the means of supplying. The fresh water lakes adjoining Boston and other large towns being deeply frozen in winter, large ice-houses are filled with the ice taken from them, which is retailed in summer at a low price. This practice had not, however, been long established till it occurred to some ingenious speculators to attempt to realise a profit by shipping ice to the southern parts of the Union and the West Indies: and the speculation having succeeded, the trade was subsequently extended to the Spanish Main and South America, and more recently to Europe, India, and China! The business has, in fact, become of the first importance; numerous companies and a very large amount of tonnage being now engaged in the ice trade from Boston. And owing to the greater skill and economy with which the business is at present conducted, the ice which used a few years ago to cost 6 cents. per lib. in New Orleans and the Havannah, may now be had for 1 cent.; and there has been a like fall in its price in India and other more distant places. An immense warehouse has recently been constructed at Calcutta for the reception of the ice brought by the ships, whence it is supplied in the quantities required for the public accommodation. This singular fabric has triple walls, five distinct roofs, incloses about three-fourths of an acre, and is fitted to hold upwards of 30,000 tons of ice! It is said that a similar dépôt is about to be formed at Canton. Our readers do not require to be told that in some late years London has been a considerable market for American ice. This, however, is only a casual occurrence, depending principally on the circumstance of an unusually hot summer having followed an unusually mild winter, which, on the one hand, occasions a large demand for ice, while, on the other, it lessens or annihilates the home supply. And the same may be said generally in regard to the demand of other European countries. The ice shipped from America is principally obtained from Fresh Pond, Spy Pond, and Wenham Pond, in an elevated position, about 18 miles from Boston, to which it is conveyed by railway; but it is also obtained from various other ponds and lakes. It is kept stored up in large warehouses adjoining the lakes till it is required for shipment. The holds of the ships used for the conveyance of ice have a space between the planking of the ship and the ice boxed in and usually filled with sawdust or some other substance reckoned a non-conductor of heat. Formerly the ice was packed with straw and hay, in boxes or thin lumber made air-tight; but now this mode of packing is comparatively little used. The ice is beautifully transparent and free from air cells, and is usually cut into blocks about a foot thick. The shipments during the course of 1847 amounted to 75,000 tons. (See art. *Boston* in this work; and an article in the *American Almanac* for 1849.)

Owing to the mildness of our winters we have sometimes little or no frost, and when it is most severe, ice in this country rarely exceeds two or three inches in thickness; and is usually, also, a good deal stained with impurities. Occasionally a supply of ice is brought from Norway, but it wants the solidity and transparency of the American ice.

	Fy. Mds.							

LABUAN, a small island off the N. W. coast of Borneo, a dependency of the British crown, about 6 m. distant from the nearest point of the mainland, and 30 m. N. from the city of Borneo or Bruni, lat. 5° 12' N., long. 115° 19' 36" E. It is from 25 to 30 m. in circ., flat, and covered with wood. The anchorage, on the S. side of the island, is protected by a greater and three smaller islands; and the town of Victoria has been commenced at the embouchure of a rivulet in a small bay, at the head of the anchorage. Coal of good quality is found on the island, and it is well supplied with fresh water. It was ceded by the Sultan of Borneo to Great Britain in 1844; and the celebrated Sir James Brooke, who negotiated its cession, has since been appointed its governor. When it came into our possession it was uninhabited; but its situation is such that, provided it be moderately healthy, it can hardly fail to become an important emporium. It lies near the best route for shipping from the Straits of Singapore to China, and, while it is extremely well situated for carrying on trade with the W. and N. coasts of Borneo and the Philippine islands, it will serve as a harbour of refuge, and as a convenient station for the steamers and other ships of war required to put down the piracy that has been, to the great injury of commerce, carried on to so great an extent from the ports and rivers of Borneo, and of some of the adjacent islands. In this respect its abundant supply of coal will be of the greatest service. In war the possession of Labuan will give us the entire command of the Chinese sea. (Brooke's Journal, and a paper by Mr. Craufurd in Keppel's Borneo, ii. p. 144. and p. 209.)

As regards the suppression of piracy, the possession of Labuan has already been of the most essential service. The steamers refitted at it have inflicted a severe chastisement on some of the piratical hordes by which the neighbouring seas have been infested; and, whatever may be said to the contrary, the suppression of piracy is indispensable as a preliminary step to the introduction of civilisation into Borneo and the surrounding islands. It is probable that in prosecuting hostilities against the pirates, other parties may be made to suffer for offences of which they have not been guilty. But this is a contingency inseparable from all sorts of hostilities; and it is right that those who suffer pirates to get an asylum on their shores, should be made to feel that by thus harbouring them, and enabling them to prosecute their schemes of robbery and blood, they make themselves responsible for the consequences. It is mere drivelling to suppose that the interests of humanity require that pirates and their abettors should be tenderly treated. They will not leave off their atrocities at the bidding of *soi-disant* peace societies. The chastisement they have received at the hands of Sir James Brooke and Captain Keppel, is the only discipline suited to their habits and deserts.

Borneo, or Bruni, on the adjacent shore of the mainland, the residence of the Sultan of Borneo Proper, has been termed the Venice of the East. It contains from 30,000 to 40,000 inhabitants, mostly Malays, and really seems as if it floated on the waves. It is situated on an estuary, and though built with little regard to regularity, it is intersected crosswise by two main streets, which divide it into four portions, one only of which stands on dry land. The houses in the other three parts are of wood built on piles, which support them above the water, with streets, if so they may be called, to admit the passage of canoes. The steamer which conveyed Sir James Brooke to Borneo, when Labuan was ceded, anchored in the main street in the centre of the town! "The greatest novelty at Bruni," says Mr. Marryat, from whom we have borrowed these details, "is the floating bazaar. There are no shops in the city, and the market is held every day in canoes. These come in at sunrise every morning from every part of the river, laden with fresh fruit, tobacco, pepper, and every other article which is produced

in the vicinity; a few European productions, such as handkerchiefs, check-cotton prints, &c., also make their appearance. Congregated in the main street, the canoes are tacked together, forming lanes through which the purchasers in their own canoes paddle, selecting and bargaining for goods with as much convenience as if the whole were transacted on *terra firma*. Iron is here so valuable that it is used as money. One hundred flat pieces an inch square are valued at a dollar, and among the lower classes these iron pieces form the sole coin. They are unstamped, so that any person appears to be at liberty to cut his own iron into money; but whether such is really the case, I cannot vouch." (Marryat's Borneo, &c., p. 113.)

But though deficient in iron the gold mines of Borneo are amongst the richest in the world. Sir Stamford Raffles estimated that in his time about 32,000 Chinese labourers were employed in these mines on the W. coast of Borneo; and it is not easy to say how productive they might become, were the miners in a condition to prosecute their undertakings in safety, and to bring the resources of science and of capital to their aid. Antimony is also found in abundance in Borneo, especially in the district of Sarawak, of which Sir James Brooke is now rajah; and the diamonds of Borneo rival those of India and Brazil. But independently of its coal, and of its precious and other metals, its vegetable products might alone furnish the materials of an extensive commerce. The sago palm grows in great perfection in many parts of the island, and sago is largely exported in a rough state to Singapore. The areca nut, rattans, gutta percha, gumbenjamin, camphor, birds' nests, &c., are also considerable articles of export; and sugar, pepper, and all the products of tropical regions, might, with a little care, be raised to any extent in most parts of this vast island. The numbers and ferocity of the savages by whom it is occupied present, indeed, formidable obstacles to its improvement. But civilisation is beginning to make its way amongst them; and, though probably slow, its progress cannot well be arrested.

LEECHES.—A tract published at Paris in 1845, by M. Joseph Martin, leech merchant, contains a great variety of curious and instructive details in regard to the natural history of leeches, the trade carried on in them, and the frauds of the dealers. They are, we believe, much more extensively used in medical practice in France than in England; and, at all events, their consumption in the former seems to be quite immense. Notwithstanding the exhaustion of some of the marshes and ponds in different parts of the country, whence supplies of leeches were formerly procured, great numbers are still obtained at home. By far the largest portion of the necessary supplies is, however, brought from abroad; principally from Germany, Spain, Sardinia, Turkey in Europe, Algiers, Asia Minor, &c. In the French Custom-house the imports are estimated at 500 leeches per kilog.; but M. Martin affirms that 1000 leeches do not, at an average, weigh more than a kilog. Hence the numbers and values of the leeches imported into France during each of the 5 years, ending with 1847, will be,

## LIGHT DUES.

The *Madrid Gazette* of the 15th April, 1849, has published the following royal decree, dated 11th of the same month, regulating the future payment of light dues in the Spanish ports:—

Art. 1.—In place of the variable charges at present recovered in the ports of the Peninsula and the adjacent island under the denomination of light-house and harbour-light dues, for the future one general light duty will be demanded at all ports having a custom-house, payable at the same time as the other navigation charges, agreeably to the regulations contained in the following articles:—

Art. 2.—Spanish merchant vessels proceeding from national possessions by sea, or from foreign ports, to pay 1 real per ton.

Art. 3.—Foreign merchant vessels proceeding from the same, will pay 5 reals per ton; but His Majesty's government reserving the power of altering this rate according to the amount of dues paid by Spanish ships in foreign ports.

Art. 4.—To be exempted from this duty:—

1st. Spanish ships returning from the same countries in ballast.

2nd. Those of all flags which enter Spanish ports and exit therefrom in ballast.

3rd. Those which enter the same through stress of weather, whenever these do not discharge or take in cargo at the said

ports. Should the latter be done, then the integral duty must be paid; the vessels so paying thereby becoming exempt from a renewal of the same charges in the other ports to which they may be ultimately bound with part of their cargo. This rule will be equally observed with respect to the ships, which, without being forced by stress of weather, should enter two or more ports to discharge the goods contained in their manifests.

Art. 5.—National vessels engaged in the coasting trade will pay for each voyage, going or coming, half a real per ton. To be exempted:—

1st. Vessels not measuring more than 20 tons.

2nd. Those of larger measurement which do not make a voyage of more than 20 maritime leagues.

3rd. The latter are exempt of the said charges, when touching at intermediate ports, before arriving at their destination, whatever may be the distance of the latter from the place where their manifests were originally issued.

4th. Those returning in ballast from the ports to which they may have been bound.

Art. 6th and last.—The light duty, to be considered as a temporary measure, and will be reduced to an amount sufficient to provide for the expenses of conservation and service, after covering the cost of establishment.

## MANILLA.

Port Charges.—On foreign vessels, 2 rs. per ton, and one-half on such as neither load nor unload cargo, beside fees amounting from \$5 to \$15, according to the size of vessels.  
Export Duties.—Spanish commodities, by Spanish vessels, pay 7 per cent. ad valorem, and 8 by foreign. Foreign commodities, by foreign vessels, 16 per cent., and 7 by Spanish;

in general, being 8 per cent. under national flag from Singapore, and 9 from China. Spirits and strong liquors, produce of Spain, by Spanish vessels, 10 per cent., and 15 by foreign; if by foreign produce, by Spanish vessels, 30 per cent., and 60 by foreign. Cider and beer, produce of Spain, by Spanish vessels, 3 per cent., and 10 by foreign; if they be foreign

produce, by Spanish vessels 20, and 25 foreign. All Spanish wines, by national vessels, 5 per cent., and 8 by foreign. Foreign wines, by Spanish vessels, 40 per cent., and 50 by foreign, except champagne, which pays, by Spanish vessels, 1 per cent., and 14 by foreign. Cotton twist, grey, black, blue, and purple—knives, or bolos, such as the natives use—ready-made clothes, boots, shoes, preserved fruits, confectionery and vinegar, by Spanish vessels, 20 per cent., and 30 by foreign. British and other foreign cotton and silk manufactures, made in imitation of native cloths, chiefly stripes or checks of black, blue, and purple colours, Madras and Bengal, grey, white, and printed cottons, towels, table napkins, and table cloths, 15 per cent., by Spanish vessels, and 25 by foreign. Biche de mer, rattans, diamonds, tortoise-shell, mother-o'-pearl shell, and birds' nests, 1 per cent. by Spanish vessels, and 2 by foreign. Machinery of all sorts for the promotion of the industry of the country, cotton twist of red, rose, yellow, and green colors, gold and silver, coined or uncoined, plants and seeds, fruit. Tropical productions similar to those of the Philippines, also arrack and gunpowder, are prohibited. Opium is only admitted to be deposited for re-exportation. Swords, fowling-pieces, muskets, pistols, and warlike stores may be deposited for re-export, and cannot be introduced without the special licence of government; but cannon and dress swords are admitted.

**Report Duties.**—Consumption and produce of every description to Spain, by national vessels, pay 1 per cent., and 2 by foreign. Elsewhere, 1 1/2 by Spanish vessels, and 3 by foreign. Stamp, by national vessels to whatever destination, 1 per cent., and 2 by foreign. Bikes, by Spanish vessels, free, and 4 per cent. by foreign. Manufactured tobacco, and articles of Manila hemp, free by all flags. Gold dust, gold leaf, and silver in bars, free.

**Import Duties.**—One per cent. of value, and 2 per cent. at the exportation, with 1 per cent. more if the commodities should be kept there more than twelve months. Two years being the longest time allowed for it.

**Port and Customs-house Regulations.**—Vessels newly arrived are not to communicate with the shore until having been visited by the port captain's boat; and within thirty hours after this visit, a manifest must be presented, stating packages, merchandise, and the vessel must remain at anchor ten days in transit without stowing, whether for consumption, re-export, and without being obliged to land, or incurring any charge on the same, except gunpowder, pocket pistols, and forbidden arms. **Terms for Sales and Purchases.**—Sales and purchases must be duty paid, at three to five months' credit, nominally at 2 1/2 per cent. discount for prompt payment, and exports are bought for cash.

**Account of the Exports of Sugar (clayed and not clayed) from Manilla during each of the 10 Years ending with 1844.**

MELBOURNE, the cap. of the British colonial territory of Port Phillip in Australia, occupying the S.E. portion of that continent, stretching through 9 degs. of long., from Cape Howe on the E. to the Glenelg river on the W. The town is situated on the N. bank of the Yarra-Yarra river, about 9 m. (following its windings) from its mouth in the basin of Port Phillip, lat. 37° 49' 25" S., lon. 140° 57' 30" E. Pop. (1846) 10,954. It was founded in 1837, and now extends for 2 m. in length by 1 do. in breadth, along the banks of the river. But its site is unfortunate; for the river, being obstructed by a bar and shallows, is not generally navigable for vessels of more than 60 tons burden; and it has the further disadvantage of being low, and liable to be flooded by the overflowing of the river during the wet season. It has been proposed to facilitate the trade of the town by removing the bar at the mouth of the river, and deepening its channel; but this would be a very expensive undertaking, and one of which the success would be not a little doubtful. The excavation of a ship canal from the deep water in the bay to Melbourne has also been proposed; and it, probably, would be the preferable plan. It seems, however, most likely that the trade of the town, and even the greater part of its population, will ultimately centre at Williams-town, a village a few miles distant, on a headland extending into the bay, opposite to which all large vessels coming to Melbourne are obliged to anchor. The principal objection to Williamstown is the scarcity and bad quality of the fresh water; but this serious defect might, it is said, be obviated by sinking wells, or by conveying hither a supply of water from some of the adjacent streams.

The basin of Port Phillip, which receives the Yarra-Yarra and other rivers, is a large circular bay, or inlet of the sea, whence the colony derives its name. It has a narrow entrance, not more than 1 1/2 m. in width, partly occupied with rocks and shoals. A lighthouse has been erected near the extremity of Point Lonsdale, on the W. side of the entrance, lat. 38° 16' S., long. 144° 40' E., and another on Point Gelibrand, near the head of the bay, between Williamstown and the mouth of the Yarra-Yarra river, lat. 37° 52' S., long. 144° 55' E. The bay is about 40 m. in depth from S. to N., and where widest is about 40 m. from E. to W. It is said to cover an area of above 500 sq. m., and might accommodate all the navies of all the countries in the world.

The whole trade of the colony, which is already very extensive, and is increasing with extraordinary rapidity, is at present (1848) carried on from this basin. And from its advantageous situation, and its stretching so far inland, it is probable it will always continue to enjoy the largest share of the trade, though, no-doubt, it will be partly, also, carried on from other parts. Geelong, at the head of a deep bay on the W. side of the basin, has a considerable trade. We subjoin an

**Account of the Quantities and Values of the Articles, the Produce of New South Wales, exported from the District of Port Phillip in 1846.**

Articles.	Quantities.	Value.	Articles.	Quantities.	Value.
Beef	563 tons.	41,465	Provisions (Beef and Pork)	22,616 cwt.	418,329
Beer	510 gall.	24	Hams	300 No.	21
Bones, horns and hoofs	66 tons	386	Tongues	201	15
Butter	15,000 lbs.	1,570	4,445		2,611
Cheese	36,322	750	Slabs (Not Cattle)	9,370	342
Candles	22 tons.	896	Soap	59 tons.	1,709
Flour	85	267	Starch	15 cwt.	20
Grain (wheat)	6,829 bush.	1,394	Tallow	2,940 cwt.	5,019
Leather, unmanufactured	72 cwt.	949	Timber	37,511 Sec.	751
Live Stock (Horned Cattle)	4,982 No.	15,121	Whalebone	27 cwt.	229
Sheep	31,107	13,463	Wool	6,406,360 lbs.	351,441
Oil, Black	50 tons.	1,000	Sundries		454
					408,613

Including other articles (re-exports) the total value of the exports from Oporto in 1846 amounted to \$26,2012. In 1847 the total value of the exports had increased to 608,5112. The increase in the stock of sheep and cattle having, of late years, been much more rapid in this district than in that of Sydney, its trade has increased with comparative rapidity.

**MEXICO.** The following regulations introduced in the new tariff of this republic came into operation on the 1st day of February, 1846.

1. No change shall be made in the despatching of ships for foreign ports, the present regulation remaining in force.

2. All the ports at which importation is at present allowed shall continue open.

3. All goods now duty free shall enjoy the same advantage, no matter in what ships they may be imported.

4. The following articles remain strictly prohibited:—All spirits, except brandy, rum, gin, and such others as are specified in the tariff, which may come in bottles or cases, not containing more than four pounds in each lot; starch; aniseed; sugar of all classes; rice; raw cotton, save in case of special licence, when the duty will be specified; indigo; copper and tin ware, firearms and swords, according to the law of the 30th of September, 1840; sulphur; men's, women's, and children's boots and shoes; stamped buttons of all metals; coffee; wax; nails of all sizes; copper plates and utensils for domestic use; tortoiseshell; epaulettes of all metals; Spanish leather; tin and tin plates; engravings and paintings and figures of an obscene kind; brags; lace and spurs, as are made in the republic; gold and metal lace; all leather, with the exception of those kinds not worked in the country, and that are used in manufactures; coarse flax; wheat flour, except in Yucatan; cottons of all kinds and numbers; ditto, thread; ditto, mixed with linen; soap of all kinds; toys and children's playthings; earthenware; books and pamphlets that are prohibited by authority; molasses; butter woods of all kinds; exciseable ships' boats; and numbers; and submitted in Tamaulipas and Matamoros by the law of June 3d, 1840; saddles; gold leaf, true or false; coarse cloths; parchment; lead; powder, except the finer kinds and that used in mines; pioushaves; robes (women's shawls) and imitations; ready-made clothes of all kinds, including ecclesiastical costumes, with the exception of military coats; covered bottoms of all kinds; shirts and drawers, woven of cotton, silk, or wool; carpets; nightgowns; gloves; stockings; pocket-handkerchiefs, hats, and byrons; common salt; salt-petre; acetates; tallow of all kinds; tobacco in all classes, which can alone be imported by the tobacco administration; cotton goods, plain or fancy, brown or white, pure or mixed, not exceeding 30 threads of warp and wool in the square of one Mexican inch at each side; cotton goods, like serge, &c., pure or mixed, not exceeding 30 threads in the same square; cotton goods, plain or colored striped, not exceeding 35 threads in the same square, of fast colours (by fast colours is meant such as not only resist water or sun, but as cannot, when faded, be mistaken for other goods); salin port, not including hams or saltmeats; wheat and all kinds of grain with the exception of staples, according to the law of the 19th of March, 1837; shoes and slippers; sarapes or blankets of all kinds.

The duties on goods not specified in the schedule shall be 20 per cent. on the declared value as at present, and the same basis will be used in calculating interim duties. Harbour and municipal duties remain as they now are.

All long goods mentioned in this tariff not being 1 vara in width shall pay the specified duty, and those more than a yard wide shall pay by the square vara.

Importation Duties.		Doll. etc.
Olive oil	6 0 per 100 lb.	
Brandy or gin in bottles or jars, not exceeding four liquid pounds, including the weight of the package	16 0	
Rum, arrack, ditto	18 0	
Brandy, without allowance for absorption or leakage	18 0	
Sweet and bitter almonds	6 0 per 100 lb.	
Natron dry in oils	14 0 per lb.	
Cod or ling, dry fish	4 0 per 100 lb.	
Chest, of tinagoy	6 0	
Chest, from other places	8 0	
Guano of all kinds	1 0 per lb.	
Peas and all dried fruits	3 0 per 100 lb.	
Pine and common pepper	8 0	
Vinegar	2 0	
White wine of all kinds in casks, without allowance for leakage	6 0	
Ditto, in bottles	8 0	
Red wine, in casks	5 0	
Ditto, in bottles	6 0	
Sauces	3 0	
Wet or iron wire	2 0	
Spermaceti candles	23 0	
Iron of all kinds in bars, round, square, or flat	11 0	
Ditto, worked and smelted	3 0	
Papal same as at present	2 0 each	
Hats, in leaf	8 0	
Ditto, made of all kinds and materials	8 0	
Tin, of all kinds and shapes	41 0 per 100 lb.	

All articles of ironware, mercury, and hardware, which were prohibited by the law of August 14th, 1815, can be imported, excepting those that are specially prohibited. And even those, as well as those legally introduced, shall be classified as much as possible, a duty being imposed on them per quintal of 100 lb. rough weight, viz. ironware per 100 lb. from 6 dollars to 10 dollars, and mercury and hardware, from 6 dollars to 40 dollars.

## OPORTO.

The port charges, including tonnage duties, on a vessel of 500 tons, amount to about 40 dollars. The pilotage is 20 cents in cargo pay for lights 300 reis per cent., instead of 50 reis, in order to encourage the export trade. (Commission 2 per cent., and *del credere* 2 per cent.)

**Pilot Regulations.**—These were published at Oporto in 1841. They declare that the navigation over the bar of the

	Doll. etc.
Glass, delfware, glassware of all kinds and forms, colours, and shapes, with the exception of window glass by weight	6 0 per 100 lb.
New and old furniture of all kinds, and wools, plain or ornamental, painted, varnished, or gilt	16 0
Common carriages with two wheels	100 0 each
Ditto, with four wheels	100 0
Cabriolets with two wheels	40 0
Carriages, with two seats	120 0
Ditto, four seats, or more	200 0
Coaches, landaus, and other carriages of two or more seats	300 0
Diligences and omnibuses of any number of seats	100 0

These duties apply to all as well as to new carriages, and none can be admitted to ply on public roads, if the wheels be not of the dimensions prescribed by law.

Canvas, linen, or hemp	0 7 per vara.
Ribbons	0 60 per lb.
Flax or hemp thread	4 0 per 100 lb.
Rough hemp	1 0
Linen thread	3 0
Linen or white cloth, brown or coloured, or linen or tow of the same linen	0 6 per vara.
The same not exceeding 36 threads per square, of a quarter of the Mexican inch at each side	0 7
Ditto, of more than 36 threads	0 9
Ditto, printed or striped	0 8
Ditto, white, brown, or coloured, washed or damaged	0 71
Ditto, bordered or worked	0 14
All these goods, if mixed with cotton, shall be considered as cotton only.	
Carpets and sacking	0 75 per vara.
Chambrases	0 75
Rough wool	4 0 per 100 lb.
First quality cloth	1 0 per vara.
Woven goods, plain, white, or coloured	0 12
Ditto, fancy damask, barred and square, of all colours	0 15

The same woven goods, not mixed with metal or silk thread, are on pay duty as if solely of wool.

Silks.—Blond in cases	12 0 per lb.
New silks	1 0
Spun ditto	0 0
Washed ditto	3 0
Woven goods of all kinds composed of silk only	3 0
All goods mixed with silk pay the following duties:—	
Cotton and silk	1 30 per lb.
Linen and silk	1 00
Wool and silk	2 0
Silks mixed with metal pay by valuation.	
Tapes	0 75

Woven goods, white or brown, exceeding 30 threads of warp and wool in one quarter of a Mexican square inch at each side	0 15 per vara.
Ditto, coloured and twilled, exceeding 30 threads in the same square	0 15
Ditto, plain or (say), not fast colours, exceeding 30 threads in the same square	0 15
Ditto, white twilled, plain damask, embroidered, open work, or velvet worked	0 15
Coloured goods, such as flannel, cottons, drills, and ducks, are, excepted, and to pay	0 11
Chain and printed goods of fast colours, 35 threads in the square with	0 10
Ditto, painted	0 10
Network, mixed with wool, including package	0 20 per lb.
Men and women's stockings	1 00 per dozen.
Children's ditto	0 50
Plain white muslin, embroidered or open work, exceeding 30 threads in the square, warp and wool	0 15 per vara.
Muslin, lawn, and other cotton goods, open work, white or coloured, without restriction of the number of threads	0 15
Printed pocket handkerchiefs, fancy or square, of fast colours, fit in 36 threads to one vara in the said square with	0 15
Ditto, plain white, the longer white, or of fast colour, exceeding 30 threads per square	0 15
Ditto white, with embroidered corners	0 15
Ditto white and coloured, with open work	1 15
Point or other laces, including the cases	2 0

No alteration has been made in the export duty on silver, which amounts, with the circulation or inland duty, to 10 per cent.

Plain calicoes, and white plain cotton goods of all descriptions, are not released from prohibitory duties, but the reduction of duty on prints and muslin and on linen is equal to 20 per cent. at Vera Cruz. Hardware, heretofore prohibited, can now be introduced at a reasonable duty.

Douros must be conducted by pilots regularly appointed, and their number shall be nineteen of the first and second classes, besides supernumerary pilots.

The outward and inward pilotage of every vessel over the bar to be confined to the nineteen pilots of the first and second classes; the pilotage in the river by the supernumerary pilots. Pilots are prohibited to stipulate for the sum to be received

when they board vessels in distress, and are bound to give immediate assistance, under pain, in case of the slightest delay, of suspension from their functions; or, in case of misconduct, to more severe punishment.

The pilots are obliged to reside at St. José de For; and all vessels, except small craft, are bound to take over the bar a supernumerary pilot.

When a supernumerary pilot is on board a vessel exercising his functions, and cannot bring it into port, he must remain on board such vessel; the master or owner of which to pay him the whole of his due, and a ration per day, until he is landed at Operta. In case of dispute, the Portuguese consuls are required to make the foreign master fulfil the above regulation.

The pilotage rates for the entrance or the departure of vessels, in ordinary cases, are fixed as follows:—

		Rials.	Dolls.	Cts.
Small craft	-	-	0	90
Fishing boats	-	-	1,300	= 1 36
Steam vessels	-	-	2,400	= 2 71
Sloops	-	-	3,500	= 3 96
Three-masted schooners and brigs	-	-	4,000	= 4 52
Also to each pilot boat (including the crew)	-	-	2,400	= 2 71
To each supernumerary pilot boat	-	-	1,200	= 1 36
To each pilot, per day, outside the bar	-	-	800	= 0 90

The gratification to pilots is optional. The remuneration

due, in extraordinary cases, to pilot boats outside the bar, is to be rated in accordance to the difficulty of the pilage and the danger incurred.

The first pilot, and, in his absence, the second, will be charged to hold council with the others as to the possibility of the entrance or departure of the vessels, and decide by the majority of voices. A pilot who, in the execution of the decision of the council, does not conform to such decision, will immediately be suspended from his functions, and be responsible for all indemnifications, and subject also to corporal punishment.

When an accident happens on account of a pilot refusing to conform to the above rules, the pilot cannot demand, for his defence, the opposition of the captains or proprietors of vessels to the free exercise of his functions, except this opposition was manifested with violence; in which case, the pilot must immediately proceed, as to cover his responsibility.

The first pilot is bound to sound the bar at least every fourteen days, and to make known the result to the intendents of the marine, as well as any change that may take place in the river.

Any pilot losing a vessel, in consequence either of intemperance or incapacity, will be punished according to the full extent of the law. Every pilot is bound to have by him the regulations of signals appropriated for the service of the Douro.

**PASSENGERS.**—The following important statute, enacted in 1849, extends to all vessels conveying passengers to any place out of Europe, except H. M.'s ships of war, ships of war in the service the E. I. Company, and H. M.'s mail steamers:—

ACT OF 1849, THE 12 & 13 VICT. c. 23, FOR REGULATING THE CARRIAGE OF PASSENGERS IN MERCHANT VESSELS.

*From and after 1st of October, 1849, certain Acts repealed.*—The existing laws relating to the carriage of passengers by sea, viz. the 5 & 6 Vict. c. 107; 8 & 9 Vict. c. 14; 10 & 11 Vict. c. 103; 11 & 12 Vict. c. 6; shall from and after the 1st of October, 1849, be severally repealed, and from that date this act shall take effect and have the force of law: provided nevertheless, that all acts and provisions repealed by the said recited acts or any of them shall remain repealed; and provided also, that any fine, forfeiture, or penalty to which any person may have become liable under the said recited acts shall and may be sued for and recovered, and that any right of action which may have accrued to any person by virtue of the said recited acts, and that any bond which may have been given thereunder to H. M., may be enforced in such and the same manner in all respects as if this present act had not been passed: provided also, that nothing in this act shall be held to invalidate any order in council made by H. M. in council, in pursuance of the powers given by the last-recited act, but the same shall remain in force until altered or revoked by any order in council made under the provisions of this act.—§ 1.

Clause 2. enacts that this act shall be called "Passengers Act, 1849."

Clause 3. defines the terms used in the act.

*To what Vessels and Voyages this Act shall extend.*—This act shall extend to every "passenger ship" proceeding on any voyage from the U. K. to any place out of Europe, and not being within the Mediterranean Sea, and on every colonial voyage as herein-after described, but shall not extend to any of H. M.'s ships of war, nor to any ships in the service of the Lords of the Admiralty, nor to any ship of war or transport in the service of the E. I. Company, nor to any steam-vessel carrying the royal mails or carrying mails under contract with the government of the country to which such steam-vessel may belong.—§ 4.

Clause 5. enacts that the Commissioners of Emigration shall carry this act into execution.

Clause 6. directs all emigration officers and assistants to act under the Commissioners, &c.

Clause 7. enacts that the duties of emigration officer may be performed by his assistant, or officer of customs in certain cases.

Clause 8. enacts that facilities be given to the proper officers for the inspection of all ships fitting for passengers.

Clause 9. enacts that no "passenger ship" be cleared out without a certificate from the emigration officer first obtained.

*Number of Passengers to be limited both by Tonnage and Space.*—No ship shall be allowed to clear out or shall proceed on her voyage with a greater number of persons on board (including the master and crew, and cabin passengers, if any,) than in the proportion of one person to every 2 tons of the registered tonnage of such ship, nor whatever may be the registered tonnage of such ship, with a greater number of passengers on board, exclusive of *bond fide* cabin passengers, than in the following proportions to the space occupied by such passengers and appropriated for their use, and unoccupied by stores, not being their personal luggage; (that is to say,) on the main deck, and on the deck immediately below the same, or in any compartment of either, appropriated as aforesaid, one passenger for every 12 such clear superficial feet; or if such ship is destined to pass within the tropics, and the duration of the intended voyage, computed as after-mentioned, exceeds 12 weeks, one passenger for every 15 clear superficial feet: provided always, that no passenger shall in any case be carried on an orlop deck; and if there shall be on board of any ship at or after the time of clearance a greater number either of persons or of passengers than in the proportions respectively before mentioned, the master of such ship shall be liable, on conviction, to the payment of a penalty not exceeding 5*l.* nor less than 2*l.* sterling for each person or passenger constituting any such excess.—§ 10.

*Computation of Children.*—For the purposes of this act 2 children, each being under the age of 14 years, shall be computed either as one person or as one passenger, as the case may require, except in the case after mentioned, but children under the age of 1 year shall not be included in such computation.—§ 11.

*Two Lists of Passengers to be made out.*—The master of every ship, whether a "passenger ship" or otherwise, carrying passengers on any voyage to which this act extends, shall, before demanding a clearance for such ship, sign two lists, made out according to the form contained in schedule (A.) hereto annexed, setting forth in the manner therein directed the name and other particulars of the ship, and of every passenger on board thereof; and the said lists, when signed, shall be delivered to the officer of the customs from whom a clearance of the said ship shall be demanded, and such officer shall thereupon countersign and return to the said master one of such lists, to be called "the master's list;" and the said master shall exhibit such list, with any additions which may from time to time be made thereto, as herein directed, to the chief officer of H. M.'s customs at any port or place in H. M.'s possessions, or to H. M.'s consul at any foreign port at which the said passengers or any of them shall be landed, and shall deposit the same with such chief officer of customs, or such consul, at the final port or place of discharge.

*Lists of additional Passengers taken on board after Clearance.*—If at any time after such lists shall have been signed and delivered as aforesaid there shall be taken on board any additional passenger, in every such case the master shall, according to the form aforesaid, add to "the master's list" the names and other particulars of every such additional passenger, and shall also sign a separate list, made out according to the form aforesaid, containing the names and other particulars of every such additional passenger; and such last-mentioned list, when signed, shall, together with "the master's list" to which such addi-

ation shall have been made, be delivered to the chief officer of customs as aforesaid, and thereupon such officer shall countersign "the master's list," and shall return the same to the said master, and shall retain the separate list; and so on in like manner whenever any additional passenger or passengers may be taken on board; or if no officer of customs shall be stationed at the port or place where such additional passenger or passengers may be taken on board, the said lists shall be delivered to the officer of customs at the next port or place at which such vessel shall touch or arrive, and where any such officer shall be stationed, to be dealt with as before mentioned.—§ 13.

**All Passenger Ships to be surveyed.**—No "passenger ship" shall be allowed to clear out or proceed on her voyage unless she have been surveyed, under the direction of the emigration officer at the port of clearance, but at the expense of the owner or charterer thereof, by one or more competent surveyors, to be duly authorised and approved of by the said Colonial Land and Emigration Commissioners for each port at which there may be an emigration officer, and for other ports by the Commissioners of Customs, nor unless it be reported by the same, or by some other authorised surveyor, that such "passenger ship" is in their opinion seaworthy, and fit in all respects for her intended voyage: provided always, that the precautions for ascertaining the seaworthiness of ships and their fitness for their intended voyages respectively shall be the same for foreign as for British ships.—§ 14.

**Construction of Decks and Berths in "Passenger Ships."**—In every "passenger ship" every deck on which passengers may be carried shall be at least 1½ in. in thickness, and shall be supported by beams of adequate strength, forming part of the permanent structure of the ship, and firmly secured with hanging and lodging knees, and shall be properly laid upon such beams, or substantially secured thereto, at least 3 in. clear above the bottom thereof, to the satisfaction of the emigration officer at the port of clearance, and that between every such deck and the deck immediately above it there shall be a height of at least 6 ft.; and further that there shall not be more than two tiers of berths on any one deck in any such "passenger ship," and that the interval between the floor of the berths and the deck or platform immediately beneath them shall not be less than 6 in., and that the berths shall be securely constructed, and of dimensions not less than after the rate of 6 ft. in length and 18 in. in width for each passenger; and that persons of different sexes above the age of 14, unless husband and wife, shall not be placed in the same berth; and that no berth occupied by passengers during the voyage shall be taken down until 48 hours after the arrival of such ship at the port of final discharge, unless all the passengers shall have voluntarily quitted the ship before the expiration of that time.—§ 15.

**Light and Ventilation.**—For the purpose of ensuring a proper supply of light and air in every "passenger ship," the passengers shall at all times during the voyage (weather permitting) have free access to and from the between decks by the whole of each hatchway situate over the space appropriated to the use of such passengers: provided always, that if the main hatchway be not one of the hatchways appropriated to the use of the passengers, or if the natural supply of light and air through the same be in any manner unduly impeded, it shall be lawful for the emigration officer at the port of clearance to direct such other provision to be made for affording light and air to the between decks as the circumstances of the case may, in the judgment of such officer, appear to require; and in case of noncompliance with any such directions the owner, charterer, or master of such ship shall be liable, on such conviction as herein-after is mentioned, to the payment of a penalty not exceeding 50*l.* nor less than 20*l.*: provided also, that no "passenger ship" having on board as many as 100 passengers shall clear out or proceed on her voyage without having on board an adequate and proper ventilating apparatus, to be approved by the emigration officer at the port of clearance, and fitted to his satisfaction.—§ 16.

**Passenger Ships shall carry Boats.**—Every "passenger ship" shall carry a number of boats according to the following scale:—

Two boats for every ship of 100 tons, and upwards:

Three boats for every ship of 125 tons and upwards, in case the number of passengers shall exceed 50:

Four boats for every ship of 500 tons and upwards, in case the number of passengers shall exceed 500:

Provided always, that one of such boats shall in all cases be a long boat, and one shall be a properly fitted life boat, and that each of such boats shall be of a suitable size, to be approved by the emigration officer at the port of clearance, and shall be seaworthy, and properly supplied with all requisites for use; provided also, that there shall likewise be on board two properly fitted life buoys, kept ready at all times for immediate use.—§ 17.

Clause 18. enacts that no "passenger ship" be cleared out until properly manned.

**Certain Articles prohibited as Cargo.**—No "passenger ship" shall clear out or proceed on her voyage if there shall be on board as cargo any gunpowder, vitriol, guano, green hides, or any other article likely to endanger the safety of the ship or the health or lives of the passengers, or if any part of the cargo be on deck.—§ 19.

**Computation of Voyages.**—For the purposes of this act the following shall be the number of weeks deemed to be necessary for the voyage of any ship carrying passengers from the U. K., to the under-mentioned places respectively:—

To N. America, except the W. coast thereof, 10 weeks:

To the W. Indies, 10 weeks:

To any part of the E. coast of the continent of Central or S. America, northward of the 25° S. L., except British Guiana, 12 weeks:

To the W. coast of Africa, 12 weeks:

To the Cape of Good Hope, or the Falkland Islands, or to any part of the E. coast of S. America, S. of 25° S. L., 15 weeks:

To the Mauritius, and to the W. coast of America, S. of the equator, 18 weeks:

To Ceylon, 20 weeks:

To W. Australia, 20 weeks:

To any other of the Australian colonies, 22 weeks:

To New Zealand, and to the W. coast of America N. of the equator, 24 weeks:

Provided nevertheless, that for the like purposes it shall be lawful for the said Colonial Land and Emigration Commissioners, by any notice in writing issued under the hands of any two of such commissioners, and published in the London Gazette, to declare what shall be deemed to be the length of the voyage from the U. K. to any of the said above-mentioned places, or to any other port or place, anything herein contained to the contrary notwithstanding.—§ 20.

**Provisions and Water to be provided by Owners or Charterers, &c.**—No "passenger ship" shall be allowed to clear out or to proceed on her voyage until there be supplied, by and at the expense of the owner or charterer thereof, and properly stowed away on board under hatches for the use of the passengers during the voyage, pure water, and wholesome provisions in a sweet and good condition, of a quality to be approved by the emigration officer, and in quantities sufficient to afford the allowances to each passenger as hereafter prescribed; and if any person shall fraudulently obtain a clearance for any "passenger ship" which shall not be then stored with the requisite quantities of such water and provisions as aforesaid, he shall be liable, on conviction, to the payment of a penalty not exceeding 100*l.* nor less than 50*l.*—§ 21.

**Water Tanks or Casks.**—In every "passenger ship" the water to be laden on board, as herein required, shall be carried in tanks or casks to be approved by the emigration officer at the port of clearance: provided always, that such casks shall be sweet and tight, of sufficient strength, and properly charred inside, and shall not be made of fir or soft wood staves, nor be capable severally of containing more than 300 gall. each.—§ 22.

**Provisions and Water to be surveyed before clearing out.**—Before any "passenger ship" be cleared out the emigration officer at the port of clearance shall survey, or cause to be surveyed by some competent person the provisions and water required to be placed on board for the consumption of the passengers, and shall ascertain that the same are of good quality and in a sweet and good condition, and shall also ascertain, that over and above the same there is on board an ample supply of water and stores for the victualling of the crew of the ship and all other persons, if any, on board: provided nevertheless, that if

any "passenger ship" be destined to call at any intermediate port or place during the voyage for the purpose of taking in water, and if an engagement to that effect be inserted in the bond herein-after mentioned, then it shall be sufficient to place on board at the port of clearance such supply of water as may be requisite, according to the rate herein mentioned, for the voyage of the said ship to such intermediate port or place, subject to the following conditions; viz.

1st, That the emigration officer signify his approval in writing of the arrangement, to be carried amongst the papers of the ship, and exhibited to the chief officer of customs, or to H. M.'s consul, at such intermediate port or place, and to be delivered to the chief officer of customs, or to H. M.'s consul, on the arrival of the said ship at the final port or place of discharge.

2dly, That if the length of either portion of the voyage, whether to such intermediate port or place or from such in-

termediate port or place to the final port or place of discharge, be not prescribed under the provisions of this act, the emigration officer at the port of clearance shall in such case declare the same:

3dly, That the ship shall have on board, at the time a clearance is demanded, tanks or water casks, of the description herein-before mentioned, sufficient for storing the quantity of water required for the longest of such portions of the voyage as aforesaid.

**Dietary Scale for the Voyage.**—In addition to and irrespective of any provisions of their own which any passengers may have on board, the master of every "passenger ship" shall make to each passenger during the voyage, including the time of detention, if any, at any port or place before the termination of such voyage, the following issues of pure water and sweet and wholesome provisions; viz. of water at least 2 quarts daily, and of provisions after the rate per week of 2½ lbs. of bread or biscuit, not inferior in quality to what is usually called navy biscuit, 1 lb. of wheaten flour, 5 lbs. of oatmeal, 2 lbs. of rice, 2 oz. of tea, ½ lb. of sugar, and ½ lb. of molasses: provided always, that such issues of provisions shall be made in advance, and not less often than twice a week, the first of such issues to be made on the day of embarkation: provided also, that potatoes, when good and sound, may be substituted for either the oatmeal or rice, in the proportion of 5 lbs. of potatoes to 1 lb. of oatmeal or rice; and that in ships clearing out from the port of Liverpool, or from Irish or Scotch ports, oatmeal may be substituted in equal quantities for the whole or any part of the issues of rice.—§ 24.

**Colonial Land and Emigration Commissioners empowered.**—It shall be lawful for the said Colonial Land and Emigration Commissioners for the time being, from time to time, by any notice for that purpose, issued under the hands of two of such Commissioners, and published in the "London Gazette," to substitute for any of the articles of food above mentioned, any other articles of food, as to the said Commissioners shall seem meet, and any such notice from time to time to alter, amend, or revoke, as occasion may require: provided always, that all the requirements and provisions in this act contained respecting the articles of food herein-before mentioned shall extend and are hereby extended to the case of such substituted articles.—§ 25.

**Cook and Cooking Apparatus to be approved by Emigration Officer.**—No "passenger ship" carrying as many as 100 passengers shall clear out or proceed on her voyage unless there be on board a seafaring person who shall be rated in the ship's articles as passengers' cook, to be approved by the emigration officer at the port of clearance, and engaged for the purpose of cooking the food of the passengers, nor unless a convenient place for that purpose shall have been set apart on deck, and a sufficient cooking apparatus, properly covered in and arranged, shall have been provided to the satisfaction of the said emigration officer, together with a proper supply of fuel adequate in his opinion for the intended voyage.—§ 26.

**No Ship carrying a certain Number of Passengers to proceed on her Voyage without a Medical Practitioner on board.**—It shall not be lawful for any "passenger ship" having on board as many as 50 persons, if the length of the intended voyage, computed as before mentioned, shall exceed 12 weeks, nor whatever may be the computed duration of the voyage, for any "passenger ship" having on board as many as 100 persons, except she be bound to N. America, (including in both cases the master and crew, and cabin passengers, if any,) to clear out or proceed on her voyage, unless there be on board, and rated on the ship's articles, some person duly authorised by law to practise in the U. K. as physician, surgeon, or apothecary, and whose name shall have been notified to the emigration officer at the port of clearance, and not objected to by him; and further, that no "passenger ship" bound to N. America having on board as many as 100 persons, exclusive of the master and crew, and cabin passengers, if any, shall clear out or proceed on her voyage without having on board, and rated on the ship's articles, such duly authorised medical practitioner, whose name shall have been notified to the emigration officer at the port of clearance, and not objected to by him: provided nevertheless, that if in any ship bound to N. America there be appropriated on every deck on which passengers may lawfully be carried instead of 12 clear superficial feet as herein-before required, 14 clear superficial feet unoccupied by stores not being the personal luggage of the passengers, for each passenger on board, counting for this purpose each child above the age of one year as one passenger, then and in such case, but not otherwise, it shall be lawful for such ship to clear out and proceed to sea without having on board a medical practitioner as aforesaid.—§ 27.

**As to Supply of Medicines.**—In every "passenger ship" there shall be furnished and laden on board, at the expense of the owner or charterer thereof, a medicine chest containing a supply of medicines, instruments, and other things proper and necessary for diseases and accidents incident to sea voyages, and for the medical treatment of the passengers during the voyage, including an adequate supply of disinfecting fluid or agent, together with printed or written directions for the use of the same respectively; and that such medicines and other things shall be good in quality, and, in the judgment of the emigration officer at the port of clearance, sufficient in quantity for the probable exigencies of the intended voyage, and shall be placed under the charge of the surgeon, when there is one on board, to be used at his discretion.—§ 28.

**Medical Inspection of Passengers and Medicines.**—Except as herein-after provided, no "passenger ship" shall clear out or proceed on her voyage until some medical practitioner, to be appointed by the emigration officer at the port of clearance, have inspected the medicine chest of the said ship, and also all the passengers about to proceed in her, and shall certify to the said emigration officer that the said ship contains a sufficient supply of medicines, disinfecting fluid or agent, instruments, and other things requisite for the medical treatment of the passengers during the intended voyage, and that none of the passengers appear to such medical practitioner likely, by reason of being affected by any infectious or other disease, to endanger the health of the other persons about to proceed in such vessel: provided always, that such medical inspection of the passengers shall take place either on board the vessel, or, at the discretion of the said emigration officer, at such convenient place on shore before embarkation as he may appoint; and that the master, owner, or charterer of the ship, shall pay to such emigration officer, on account of such medical examination, a sum at the rate of 30s. for every 100 persons examined: provided also, that in case on any particular occasion the emigration officer shall be unable to obtain the attendance of such medical practitioner, it shall be lawful for the master of any such ship to clear out and proceed on her voyage, on receiving from the said emigration officer written permission for the purpose.—§ 29.

**Diseased Passengers may be relanded.**—In case any such medical practitioner shall notify to the emigration officer at the original port of clearance, or at any other port or place in the U. K., into which the vessel may subsequently put, or in case the said emigration officer shall be otherwise satisfied, that any person about to proceed in any such "passenger ship" as aforesaid is likely, by reason of being affected by any infectious or other disease, to endanger the health of the other persons on board, it shall be lawful for such officer to reland or cause to be relanded any such person, and such members of his family, if any, as may be dependent on him, or as may be unwilling to be separated from him, together with their clothes and effects; and no "passenger ship" shall clear out or proceed on her voyage so long as any such diseased person shall be on board.—§ 30.

*Passengers so relanded may recover Passage Money.*—Any person being a passenger who shall be so relanded, or any emigration officer on his behalf, shall be entitled to recover, by summary process, in manner herein provided, the whole of the monies which have been paid by such person or on his account for his passage in such "passenger ship," from the party to whom the same may have been paid, or from the owner, charterer, or master of such ship.—§ 81.

*Return of Passage Money and Compensation to Passengers.*—If any passenger, or person acting on his behalf, shall have contracted with the owner, charterer, or master of any ship, whether a "passenger ship" or otherwise, or with any person acting on behalf of such owner, charterer, or master, for a passage for such passenger, or for him and his family, in any ship proceeding on any voyage to which this act extends, and such passenger, or such passenger and his family, shall be at the place of embarkation at the time appointed for that purpose in and by such contract, and such passenger shall apply for such passage, and shall, on demand, pay or tender such part of the passage money not already paid as shall be payable under such contract previously to embarkation, and if, owing to the previous departure of the ship in which such passage shall have been engaged, or to the want of room therein, or to the neglect, refusal, or other default of the owner, charterer, or master thereof, or of the party with whom such passage shall have been contracted for, such passenger shall not obtain a passage in such ship, or shall not, together with all the immediate members of his family who may have contracted for a passage as aforesaid, obtain, within 48 hours from the expiration of the day named in such contract, a passage in some other equally eligible ship to the same port, and in the meantime be paid subsistence money, at the rate herein-after mentioned, such passenger shall be entitled to recover, in manner herein-after provided, all monies which shall have been paid by or on his account for such passage, from the party to whom the same may have been paid, or from the owner, charterer, or master of such ship, and also such further sum, not exceeding 10*l.*, in respect of each such passage, as shall, in the opinion of the justices of the peace who shall adjudicate on the complaint, be a reasonable compensation for the loss or inconvenience occasioned to such passenger or his family by the loss of such passage.—§ 82.

*Subsistence in case of Detention.*—If any ship, whether a "passenger ship" or otherwise, shall not actually put to sea and proceed on her intended voyage on the day appointed for sailing in and by any contract made by the owner, charterer, or master of such ship, or by his or their agent, with any passenger who shall on that day be on board the same, or ready to go on board and proceed on such intended voyage, then in every such case the owner, charterer, or master of such ship, or his or their agent, shall pay to every such passenger, or if such passenger shall be lodged and maintained in any establishment under the superintendence of the said Colonial Land and Emigration Commissioners, then to the emigration officer at the port of embarkation, subsistence money after the rate of 1*s.* for each passenger in respect of each day of delay, until the actual clearing out and final departure of such ship on such voyage, and the same may be recovered in manner herein-after mentioned: provided always, that if any such ship be unavoidably detained, either by wind or weather, and the passengers be maintained on board in the same manner as if the voyage had commenced, no such subsistence money shall be payable.—§ 83.

*In case of Wreck, &c., Passengers to be provided with a Passage by some other Vessel.*—In case any "passenger ship" be wrecked or otherwise destroyed, or shall by any other cause whatsoever be prevented from landing her passengers at the place they may have respectively contracted to land, or in case such ship shall put into any port or place in a damaged state, and shall not, within a reasonable time, according to the circumstances of each case, but not exceeding 6 weeks in any case, be ready to proceed with her passengers on her intended voyage, after having been first efficiently repaired, and in all respects put into a sound and seaworthy condition, then and in any of such cases such passengers respectively shall be provided with a passage by some other equally eligible vessel to the port or place at which they respectively may have originally contracted to land; and in default thereof such passengers respectively, or any emigration officer on their behalf, shall be entitled to recover, by summary process, as herein-after mentioned, all monies which shall have been paid by or on account of such passengers or any of them for such passage, from the party to whom the same may have been paid, or from the owner, charterer, or master of such ship, and also such further sum, not exceeding 10*l.*, in respect of each such passage, as shall in the opinion of the justices of the peace who shall adjudicate on the complaint be a reasonable compensation for any loss or inconvenience occasioned to any such passenger, or his or her family, by reason of the loss of such passage: provided always that no policy of assurance effected in respect of such passages, or of such passage and compensation monies, by any person hereby made liable in the events aforesaid to provide such passages, or to pay such monies, shall be deemed to be invalid by reason of the nature of the risk or interest sought to be covered by such policy of assurance.—§ 84.

*Wrongfully landing Passengers.*—The master of any ship, whether "passenger ship" or otherwise, shall not land or cause to be landed any passenger, without his previous consent, at any port or place other than the port or place at which such passenger may have contracted to land.—§ 85.

Clause 36. enacts that passengers are to be maintained for 48 hours after arrival.

Clause 37. reserves to passengers all right of action.

*Ships putting back to replenish Provisions, &c.*—If any "passenger ship" shall, after having obtained her clearance, be detained in port for more than 7 days, or shall, after having been to sea, put into or touch at any port or place in the U. K., it shall not be lawful for any such "passenger ship" to proceed on her voyage until there shall have been laden on board, at the expense of the owner, charterer, or master of such ship, such further supply of pure water, wholesome provisions of the requisite kinds and qualities, and medical stores, as may be necessary to make up the full quantities of those articles herein before required for the use of the passengers during the whole of the intended voyage, nor until the master of the said ship shall have obtained from the emigration officer or his assistant, or, where there is no such officer, or in his absence, from the officer of customs at such port or place, a certificate to the same effect as the certificate herein before required to enable the ship to be cleared out; and in case of any default herein the said master shall be liable, on conviction, as herein-after mentioned, to the payment of a penalty not exceeding 100*l.* nor less than 50*l.*; and further, if the master of any "passenger ship" so putting into or touching at any port or place as aforesaid shall not within 24 hours thereafter report his arrival, and the cause of his putting back, and the condition of his ship and of her stores and provisions, to the emigration officer, or, as the case may be, to the officer of customs at the port, and shall not produce to such officer the official or "master's list" of passengers, such master shall for each offence be liable to the payment of a penalty not exceeding 10*l.* nor less than 2*l.*—§ 38.

*H. M. may issue Orders in Council, &c.*—It shall be lawful for H. M. and her successors, by any order in council, to prescribe such rules and regulations as to H. M. or her successors may seem fit, for preserving order, and for securing cleanliness and ventilation, on board of "passenger ships" proceeding from the U. K. to any port or place in H. M.'s possessions abroad, and the said rules and regulations from time to time in like manner to alter, amend, and revoke, as occasion may require; and that any copy of such order in council contained in the "London Gazette," or purporting to be printed by the Queen's printer, shall throughout H. M.'s dominions be received in all legal proceedings as good and sufficient evidence of the making and contents of any such order in council.—§ 39. (For Order in Council, see post.)

*Surgeon or Master to exact Obedience to Rules and Regulations.*—In every such "passenger ship" it shall be lawful for the medical practitioner on board, aided and assisted by the master thereof, or in the absence of such medical practitioner, for the master of such ship, to exact obedience to all such rules and regulations as aforesaid; and any person on board who shall neglect or refuse to obey any such rule or regulation, or who shall obstruct the medical practitioner or master of such ship in the execution of any duty imposed upon him by any such rule or regulation, shall be liable for each offence to the payment

of a penalty not exceeding 2*l.*; and it shall be lawful for any two justices of the peace in any part of H. M.'s dominions before whom any person shall be convicted of such obstruction as aforesaid to order such person, in addition to the penalty herein-before mentioned, to be confined in the common goal for any period not exceeding one month.—§ 40.

**Colonial Land and Emigration Commissioners to prepare an Abstract of Act and Orders in Council.**—The said Colonial Land and Emigration Commissioners shall from time to time prepare such abstracts as they may think proper of the whole or part of this act, and of any such order in council as aforesaid; and 6 copies of the said abstracts, together with 3 copies of this act, shall, on demand, be delivered by the principal officer of customs at the port of clearance to the master of every "passenger ship" proceeding from the U. K. to any port or place in H. M.'s possessions abroad; and such master shall, on request made to him, produce one copy of the act to any passenger on board, for his perusal, and, further, shall post, previous to the embarkation of the passengers, and shall keep posted so long as any passenger shall be entitled to remain in the ship, in at least 3 conspicuous places between the decks on which passengers may be carried, copies of such abstracts; and such master shall be liable to a penalty not exceeding 40*s.* for every day during any part of which by his act or default such abstracts shall fail to be so posted; and any person displacing or defacing such abstracts so posted shall be liable to a penalty not exceeding 40*s.*—§ 41.

**Sale of Spirits prohibited.**—It shall not be lawful, in any "passenger ship," to sell to any passenger during the voyage any spirits or strong waters; and if any person shall during the voyage, directly or indirectly, sell or cause to be sold any spirits or strong waters to any such passenger, he shall be liable for every such offence to the payment of a penalty not exceeding 20*l.* nor less than 5*l.*—§ 42.

Clause 43. orders that the owners or charterers of all "passenger ships" shall give bond for the due performance of the requirements of the act and of any order in council, and also for payment of penalties.

Clause 44. enacts that no person to act as a passage broker in respect of passengers to N. America without a licence.

Clause 45. directs how passage brokers' licences may be obtained.

Clause 46. enacts that licences taken out in pursuance of act 5 & 6 Vict. c. 107., unless forfeited, to continue in force until 1st February 1850.

**Contract Tickets to be given in respect of Passages to N. America.**—If any owner, charterer, or master of a ship, or any passage broker or passage dealer, agent, or other person, shall receive any money from any person for or in respect of a passage or intended passage from the U. K. to any port or place in N. America, the person so receiving such money shall give to the party from whom the same shall have been received a contract ticket in plain and legible characters, and made out upon a printed form, which shall be in all respects according to the form in the Schedule (H.) hereto annexed, or according to such other form as may from time to time be prescribed by the said Colonial Land and Emigration Commissioners, by any notice issued under their hands and published in the "London Gazette," and shall also comply with all the directions contained on the face of such form, and in default thereof shall be liable to a penalty not exceeding 10*l.* nor less than 5*l.*, in respect of each passenger on account of whose passage such money shall have been received, to be sued for and recovered as herein-after is mentioned: provided always, that such contract ticket shall not be liable to any stamp duty.—§ 47.

**Penalty for inducing any one to part with Contract Ticket.**—Any owner, charterer, or master of a ship, or any passage broker or other person, who shall fraudulently alter or cause to be altered, after it is once issued, or shall induce any person to part with, render useless, or destroy, any such contract ticket as aforesaid, during the continuance of the contract which it is intended to evidence, shall be liable in each case to a penalty not exceeding 5*l.* nor less than 2*l.* to be recovered as herein-after mentioned.—§ 48.

Clauses 49—59. relate to the imposition and recovery of penalties.

**Colonial Voyages defined.**—For the purposes of this act the term "colonial voyage" shall signify any voyage from any port or place within any of such possessions (except the territories under the government of the E. I. Company) to any other port or place whatever, of which the duration, computed as herein-after mentioned, shall exceed 3 days.—§ 60.

**Extension of the Act to Colonial Voyages.**—Except as herein-after excepted, the provisions of this act shall apply, so far as the same are applicable, to all ships carrying passengers on any such "colonial voyage," provided always, that as to ships carrying passengers on any "colonial voyage," the provisions of this act shall not extend or apply so far as they relate exclusively to passengers from the U. K. to N. America, and so far as they relate to the following matters; (namely,)

The giving of a bond to Her Majesty;  
The keeping on board copies of the act, and abstracts of any order in council;  
The return of passage money, and compensation in case the

party cannot be forwarded by the appointed ship, or in case of wreck;  
The payment of subsistence money in case of detention:

Provided also, that as to ships carrying passengers on any "colonial voyage," whereof the duration computed in the manner herein-after mentioned shall be less than 3 weeks, in addition to the matters lastly herein-before excepted, the provisions of this act shall not extend or apply so far as they relate to the following subjects; (namely,)

The construction or thickness of the decks  
The berths;  
The height between decks;  
Lights and ventilation:

Manning;  
Passengers' cook and cooking apparatus;  
The surgeon and medicine chest;  
The maintenance of passengers for 48 hours after arrival:

Provided also, that in the case of such last-mentioned voyage, whereof the computed duration is less than 3 weeks, the requirements of this act respecting the issue of provisions shall not, except as to the issue of water, be applicable to any passenger who may have contracted to furnish his own provisions.—§ 61.

**Governor of Colonies may by Proclamation, &c.**—It shall be lawful for the governor of any of H. M.'s possessions abroad, by any proclamation to be by him issued for that purpose, to declare the rule of computation by which the length of the voyage of any ship carrying passengers from such possession to any other place shall be computed for the purposes of this act, and to substitute for the articles of food and provisions specified in this act such other articles of food and provisions as shall be a full equivalent for the same, and also to declare what medicines, medical instruments, and other matters shall be deemed necessary for the medical treatment of the passengers during such "colonial voyage." Provided always, that every such proclamation be transmitted by the governor by whom the same may have been issued to H. M., for H. M.'s confirmation or disallowance: Provided also, that on the production in any other of H. M.'s possessions abroad of an attested copy of any such proclamation under the hand of the governor of the colony wherein the same may have been issued, and under the public seal of such colony, such attested copy shall, in the colony wherein the same shall be so produced, be received as good and sufficient evidence of the issuing and of the contents of any such proclamation.—§ 62.

**Provisions for Survey of Ships in the Colonies, &c.**—It shall be lawful for the governors of any such possessions respectively to authorise such person or persons as they may think fit to make the like survey and examination of "passenger ships" sailing from such possessions respectively as is herein-before required to be made by two or more competent surveyors in respect of "passenger ships" sailing from the U. K., and also to authorise any competent person to act as medical practitioner on board any "passenger ship" proceeding on a "colonial voyage" in those cases where a medical practitioner would be required by this act if the ship were a "passenger ship" proceeding from the U. K.—§ 63.

**Power to the Governor-General of India in Council to adopt this Act.**—Nothing herein-before contained shall apply to any of the territories or places under the government of the E. I. Company, or to any of the governors appointed by the said Company, nor shall any thing herein-before contained affect the

powers now vested in the Governor-General of India in council to make laws and regulations whereby the provisions of this act, or such of them as to the said Governor-General of India in council shall seem expedient, shall or may be extended to the territories and places under the government of the said Company, or for or in respect of which the said Governor-General in council has now by law a power of legislation, but it shall be lawful for the Governor-General of India in council, from time to time, by any act or acts to be passed for that purpose, to declare that this act, or that any part thereof, shall extend and apply to the carriage of passengers upon any voyage from any ports or places within the territories of the E. I. Company, to be specified or described in such act or acts, to any other places whatsoever, to be also specified or described in such act or acts, and also in like manner to authorise the substitution, as respects such voyages, of other articles of food and provisions for those herein-before enumerated, and to declare the rule of computation by which the length of any such voyage shall be estimated, and to determine the persons or officers who shall be entitled to exercise or perform the powers, functions, or duties herein-before given to or imposed upon the emigration officers or officers of customs in the U. K., and to authorise the employment on board any ship of a medical practitioner duly qualified by law to practise as a physician, surgeon, or apothecary within such territories or places as aforesaid; and to declare for the purposes of this act the space necessary for passengers in ships that may clear out from any port or place within the territories or places under the government of the E. I. Company, and the age at which two children shall be considered equal to one passenger in ships that may clear out from any port or place as aforesaid, and also to declare in what manner, and before what authorities, and by what form of proceedings the penalties imposed and the sums of money made recoverable by this act shall be sued for and recovered within any places or territories under the government of the E. I. Company, and to what uses such penalties shall be applied; and from and after the passing of such Indian act or acts, and whilst the same shall remain in force, all such parts of this act as shall be adopted therein shall apply to and extend to the carriage of passengers upon such voyages as in the said Indian act or acts shall be specified: Provided always, that the said Indian acts shall be subject to disallowance and repeal, and shall in the same manner be transmitted to England to be laid before both Houses of Parliament, as in the case of any other laws or regulations which the said Governor-General in council is now by law empowered to make. — § 64.

Schedules referred to in the foregoing Act.

SCHEDULE (A) referred to in the 12th Section of this Act.

Form of Passenger List.

Ship's Name.	Master's Name.	Tons per Register.	Aggregate Number of Superficial Feet in the several Compartments set apart for Stowage Passengers.	Total Number of Stature Adults, exclusive of Master, Crew, and Cabin Passengers, the Ship can legally carry.	Where Bound.

I hereby certify, that the provisions actually laden on board this ship, according to the requirements of the Passengers Act, are sufficient for \_\_\_\_\_ passengers, computed according to the Act.

(Signed) \_\_\_\_\_ } Master.

Date \_\_\_\_\_

Name and Descriptions of Passengers.

Ports of Embarkation.	Names of Passengers.	Adults.		Children between 14 and 1.		Number of Infants under 12 Months.	Profession, Occupation, or Calling of Passenger.	State whether English, Scotch, or Irish.	Port at which Passengers have contracted to land.
		Age.		Age.					
		M.	F.	M.	F.				

Summary.

	Number of Souls.				Equal to Stature Adults.
	English.	Scotch.	Irish.	Total.	
Adults -					
Children between 14 and 1 -					
Infants -					
Total -					

We hereby certify, that the above is a correct list of the names and descriptions of all the passengers who embarked at the port of \_\_\_\_\_

(Signed) \_\_\_\_\_ } Master.

(Counter-signed) \_\_\_\_\_ } Officer of Customs.

N.B.—Lists should be ruled in the same form for any additions to the list after the ship first clears out; and similar certificates be submitted to such additions, according to the requirements of the Act.

SCHEDULE (B) referred to in the 45d Section of this Act.

Form of Bond to be given by Owner or Charterer and Master.

Know all men by these presents, that we,

are held and firmly bound unto our Sovereign by the Grace of God of the U. K. of G. Britain and Ireland, Defender of the Faith, in the sum of 1000*l*. of good and lawful money of U. Britain, to be paid to our heirs and successors, to which payment, well and truly to be made, we bind ourselves and every of us, jointly and severally, for and in the whole, or heirs, executors, and administrators, and every of them, jointly by these presents. Sealed with our seals.

Dated this \_\_\_\_\_ day of \_\_\_\_\_ in the \_\_\_\_\_ year of the reign of \_\_\_\_\_ said Majesty, and in the \_\_\_\_\_ year of our Lord 18 \_\_\_\_\_.

Whereas by an act passed in the \_\_\_\_\_ year of the reign of H. M. Queen Victoria, intituled "An Act for regulating the Carriage of Passengers in Merchant Vessels," it is amongst other things enacted, that be any "passenger ship" shall clear out or proceed on any voyage to which the provisions of the said act shall extend, the owner or charterer, or in the absence of such owner or charterer, one good and sufficient person on his behalf, to be a proved by the chief officer of customs at the port of clearance, shall with the master of the said ship enter into a bond to \_\_\_\_\_ Majesty, \_\_\_\_\_ hours and \_\_\_\_\_ shillings, in the sum of 100*l*.

Now the condition of this obligation is such, that if the ship whereof \_\_\_\_\_ is master, bound to \_\_\_\_\_ is in all respects sea-worthy, and (and if the said ship

\* The clause within brackets is to be inserted only when

19. No loose hay or straw shall be allowed below for any purpose.
20. No smoking shall be allowed between decks.
21. All gambling, fighting, riotous or quarrelsome behaviour, swearing, and violent language, shall at once put a stop to. Swords and other offensive weapons shall, as soon as the passengers embark, be placed in the custody of the master.
22. No sailors shall be allowed to remain on the passenger-deck, among the passengers, except on duty.
23. No passenger shall go to the ship's cook-house without special permission from the master, nor remain in the forecastle among the sailors on any account.
24. In vessels not expressly required by the said "Passengers

Act, 1849," to have on board such ventilating apparatus as therein mentioned, such other provision shall be made for ventilation, as shall be required by the emigration officers, at the port of embarkation, or in his absence by the officers of customs.

25. And to prevent all doubts in the construction of the Order in Council, it is hereby further and read that the term "United Kingdom" and "passenger ship," shall have the same significations as are assigned to them respectively in the said "Passengers Act, 1849."

And the Right Hon. Earl Grey, one of H. M. principal secretaries of state, is to give the necessary directions hereon accordingly.

Wm. L. BAKER.

QUARANTINE.—MALTA.—Regulations as to Quarantine in observance at the Lazaretto of Malta, as established by the Board of Health, 7th December, 1846, for arrivals from the Levant, and from various ports in Barbary.

A bill of health shall be considered as full, when the country from which a vessel arrives is actually infected with plague; it shall be considered as suspected after the expiration of 41 days from the last case of plague; and clean after the expiration of 1 year and 1 day from the last case of plague.

Bills of health of vessels arriving from Egypt and Syria are never to be considered clean.

**Foul Bill of Health.**—For merchant vessels and goods, 91 days after the unloading of susceptible articles; for steam vessels, 15 days after the landing of passengers and their effects in the Lazaretto; for ships of war, 17 days after the landing of passengers and their effects in the Lazaretto; for passengers arriving either in steam vessels, ships of war, or merchant vessels, admitted in the Lazaretto, 17 days after exposing their effects to ventilation; for vessels carrying pilgrims, 25 days; for pilgrims, 25 days after being landed and their effects placed in deputation in the Lazaretto.

**Suspected Bill of Health.**—For merchant vessels and goods, 15 days after the unloading of susceptible articles; for steam vessels and ships of war, 15 days after the landing of passengers and effects in the Lazaretto; for passengers landed from steam vessels, ships of war, or merchant vessels, 15 days in the Lazaretto, after exposing their effects to ventilation; for vessels carrying pilgrims, 30 days; for pilgrims, 30 days after their effects being placed in deputation.

**Clean Bill of Health.**—For merchant vessels and goods, 12 days after the unloading of susceptible articles; for steam vessels, ships of war, and passengers admitted in the Lazaretto, 9 days after their effects being exposed to ventilation.

Periods of Quarantine actually in observance in pursuance of the preceding Regulations at this time.

In cases where the voyage has been performed in less than 12 days, the quarantine shall then be for as many days more as are required to complete the 12 days, and in no case to be less than 3 days.</p>					

QUARANTINE.—PORTUGAL.—We extract the following regulations in regard to quarantine in the Portuguese ports, from a Decree issued 26th November, 1845.

"Art. 108. All captains and masters of vessels entering any port of Portugal, and islands adjacent, are bound:—

"Sec. 1. To hoist in some conspicuous situation of their vessel a yellow flag, when ordered so to do, and not lower it until admitted to practice.

"Sec. 2. To allow no communication whatever between their vessels and other ships, or with the land, until admitted to practice.

"Sec. 3. To comply with the sanitary regulations, and adhere to such instructions as they may receive from the health officers of the port.

"Sec. 4. To anchor the ship at the ground pointed out to them for quarantine; and, to lay to, even deep anchor to them for quarantine; and, when ordered so to do in compliance with the regulations.

"Sec. 5. To present themselves at the Pratique office when directed so to do by the health officer, and proceed therein in their own boats, which are to bear a yellow flag or streamer, to show that they are in a suspected state, and not to allow any communication.

"Sec. 6. To present all the ship's papers to the pratique-officers, and truly to answer on oath or otherwise any interrogatories or questions that may be put to them, stating every fact and occurrence that may have come to their knowledge, which it may be desirable to be known with reference to the public health.

"Art. 138. All ships or vessels of any nation entering any of the ports of Portugal and islands adjacent, coming from or

bound to any place whatever, must be provided with a proper bill of health, showing not only the sanitary condition of the port of departure and of any other touched at, or put into, but also of the crew, and the manner of their being all the time of leaving, respecting any case of constraint or otherwise uncontrollable, agreeably to the terms of this decree.

"Art. 139. Bills of health granted at any of the ports of Portugal and islands adjacent, shall be null and void, and issued by a physician duly appointed by the Board of Health of the port. In foreign ports, bills of health may be issued by the Portuguese consular agents to ships bound for any Portuguese port.

"Bills of health granted by the proper authorities of foreign ports must be endorsed by the resident Portuguese consular agent.

"Art. 140. Bills sailing from foreign ports where there is no such resident agent, relative to be provided with a proper bill of health from the competent authorities of the place, and to have the same endorsed by a Portuguese consular agent at any other port which the ship may subsequently touch at, or put into.

"Art. 141. Any ships or vessels detained at the port of landing, or leaving any other they may have put into, on any account, 8 days after the date of the bill of health, or of any endorsement thereon, must have the same renewed or re-ordered.

"Art. 142. Bills of health having any intermission, omission, or alteration whatever, will be deemed suspicious, and subject

the vessel to quarantine, and the captain to judicial proceedings.

"Art. 143. All captains and masters of vessels are forbidden:—

"Sect. 1. To destroy, abandon, or otherwise neglect to present at the port of arrival, the bill of health they may have received at that of departure.

"Sect. 2. To take or have on board more than the original bill of health issued at the port of departure.

"Sect. 3. To receive on board their vessels any sailor who may seem to be suffering from any of those contagious or epidemic disorders which subject vessels to quarantine.

"Sect. 4. To receive on board any clothes, apparel, or goods, without first ascertaining their origin, and that they have not been worn or used by any persons suffering from any contagious disorder, nor come from any infected place.

"Art. 144. All captains, master mariners, or commanders of vessels, are bound to note down in their logbook every case of illness or death happening on board their vessels during the voyage, together with the symptoms observed to have attended the same.

"But when there is a surgeon belonging to the ship, it will then be his duty to comply with the foregoing, as to the captain.

"Art. 145. Captains or commanders of all vessels are bound to note down in their logbook the performance and fulfilment of the provisions of this decree for the security of the public health, all communications shall be made to the authorities, and the captain or commander shall be held responsible for the occurrence whatever that may directly or indirectly concern the public health.

"Art. 102. Every individual on board of a vessel, who shall communicate with the shore before the visit of the pratique boat, will although admitted to pratique immediately after, be fined from 50,000 reis to 200,000 reis, independent of any heavier punishment he may have incurred as breaker of quarantine; and if the contravention shall be from the shore to the ship, the fine to be paid will only be one half, and the person will have to remain and follow the face of the vessel.

"Sect. 1. These penalties are applicable to every individual

who shall knowingly admit or receive any person or things from any vessel previous to being visited.

"Sect. 2. Pilot and Custom house officers, in the performance and discharge of their respective duties, are hereby excepted from the operation of the penalties aforesaid, but will, of course, have to proceed and remain with the vessel till admitted to pratique.

"Sect. 3. Should the vessel be put into quarantine, the transgressors will have to undergo the same in the lazaretto, and afterwards be imprisoned and delivered over to the competent judge, to be punished according to law.

"Sect. 4. The period intervening between the arrival of the vessel of the port and admission to pratique, is held as equivalent to a term of quarantine, for all the purposes of the penalty of the pains and penalties incurred in the foregoing provisions.

"Art. 203. Any captains, masters, or commanders of vessels who shall present a bill of health with any erasure, interpolation, or any other similar alterations, that may induce suspicion of its having been falsified, will be prosecuted the presumed fabricator, and incur the punishment awarded by the laws to the falsificators of public documents.

"Any individual who shall through ignorance or omission anywise risk or endanger the public health, or who shall infringe or allow any infringement of the legislative enactments or regulations and provisions tending to preserve the same, will be punished with a fine of 50,000 reis. And all captains or masters of merchant vessels who shall be guilty of health, or one with any irregularity, will be included in the provision of this article, although the ship may not be placed in quarantine; but the fine will only be 10,000 reis if the vessel is at once admitted to pratique, 15,000 reis if subjected to a quarantine of observation, and 20,000 reis if the vessel has to perform strict quarantine.

"When the captain or master shall be enabled to show satisfactorily at the Pratique Office that any irregularity in his bill of health arose from accident or circumstances over which he had no control, he will be relieved from all liability."

**RAILWAYS.** — The summer and autumn of 1845 and the earlier portion of 1846 witnessed the rise and development of a most gigantic railway speculation or mania. Various circumstances conspired to bring this about. The vast advantages which railways conferred on the country generally, and especially on the districts through which they passed, strongly recommended them to the public patronage and support. Most branches of industry were also, in 1845, in a more than ordinarily prosperous condition; and large dividends (whether really derived from profits is questionable) being paid by some of the principal lines, their stock rapidly rose to a high price. These circumstances inflamed the cupidity of the public, who began to imagine that speculation in railway shares afforded the shortest and easiest means of acquiring wealth. Hence, an extraordinary stimulus was given to all sorts of projects, which were multiplied with an almost inconceivable rapidity. Of these a few were well devised and judicious; and were patronised by gentlemen of wealth, respectability, and experience. But the great majority were of a totally opposite description, being got up by parties anxious only to profit by the credulity of the public, and founded on plans which could not be executed, or which, if executed, would be ruinous. And yet such was the disposition of the public to take *omne ignotum pro magnifico*, that shares in these swindling devices, for such was their real character, were greedily bought up at high premiums, which, of course, went into the pockets of the members of parliament, attorneys, and engineers, by whom the traps had been set and the hooks baited. It is difficult, indeed, to imagine any more disgraceful exhibition of fraud and quackery on the one part, and of folly and voracity on the other, than was displayed during the autumn of 1845 and the spring of 1846, by the manufacturers and buyers of railway shares. Some 700 or 800 new projects, requiring, it was stated, a capital of about as many hundred millions, were spawned during this gambling saturnalia; and of these it would be a high estimate to say there were 150 which held out any legitimate prospect of remunerating their projectors. The great majority of the others were never, indeed, intended to do more than to transfer the money of the unwary dupes who bought shares into the pockets of the crafty directors by whom they were issued; and, thus far, some of them answered the views of their projectors. Luckily, however, this was not the case with others; not a few of those who dug the pit-falls having themselves fallen into them.

But despite the number of schemes that were abandoned, the number of those that were carried forward, and received the sanction of the legislature, was astonishingly great. In proof of this we borrow from the *Times* of the 10th of October, 1847, the Table, on the next page, compiled by Mr. Spackman for that journal.

It appears from this table that, in the course of 1845 and 1846, no fewer than 347 acts were carried through parliament, authorising the construction of 7,654 miles of railway, at an estimated cost of 190,344,087*l.* sterling.

Under any circumstances, such gigantic, and generally ill-advised, undertakings must have involved the parties in vast loss. In this case the depressing influence of the heavy railway calls on the money market, having been increased by the failure of the potato crop of 1846, occasioned the greatest difficulty in obtaining pecuniary accommodations, and led to the crisis of 1847. In consequence many of the projects for which acts had been obtained have been suffered to sink into oblivion, while others have been, or are to be very imperfectly carried out. An extraordinary fall has, also, taken place in the value of the stock even of the best lines. And this is not

## Summary of Railway Legislation from 1826 to 1847.

Liabilities still resting on the public in respect of railway projects not completed															

to be wondered at. The recklessness evinced by many companies in engaging in hazardous, and sometimes ruinous subsidiary projects has, however, been a comparatively venial offence. Recent disclosures have shown that leading directors, in whose sagacity and honesty the public reposed all but unlimited confidence, have been, in fact, nothing but gigantic swindlers; their sole object (in which it is to be hoped they may be disappointed) having been to enrich themselves by defrauding and robbing their constituents and the public. And these disclosures have also shown, that, if the boards of directors associated with the parties now referred to did not actively assist them in their villainous schemes, they, at all events, opposed no obstacle of any kind to their development. Hence the just discredit that at present attaches to all railway companies. Some of them have put forward detailed statements of their affairs; but these, how accurate soever, command, and really deserve, very little confidence. This ignorance is, however, alike prejudicial to the public interests, and to those of all really well managed companies, and is at once an incentive to and a cloak for all sorts of nefarious practices. We do, therefore, hope that some fit tribunal may be established for inquiring into the past and present state and management of railway companies; that their true history and real condition may be set forth; that honest men may not suffer in the public estimation from the practices of others of a different character; that those, how high soever their rank or great their fortune, who have swindled the public, may be not merely exposed but punished; and that the disgrace and ruin that would follow from a recurrence of the mania of 1845-46 may be averted.

Among the greater lines of railway now (1849) existing, may be specified that from London by Manchester, Liverpool, and Carlisle, to Glasgow and Edinburgh; this is one of the greatest public works ever executed in any country, and is a striking result of the wealth, science, and civilisation of modern times. The railway from London to Bath and Bristol, and thence to Exeter, is also a magnificent work; and is, in some respects, superior to any other in the kingdom. Among the other leading railways may be specified those from London to Southampton, Brighton, and Dover; the Eastern Counties; Midland; North Midland; and North of England Railways; and those from Liverpool to Manchester; from Carlisle to Newcastle; from the latter to Edinburgh; from Edinburgh to Glasgow and Ayr, with a host of others.

*Traffic on Railways.*—Comparative Statement of the Traffic on all the Railways in the U. Kingdom for the five Years ending 30th June, 1845, 1846, 1847, 1848, and 1849, together with the Length of Railway open at the Termination of each Period:—

Year ending 30 June,	Miles open on 30th June in each Year.	No. of Passengers conveyed.	Receipts from Passengers.	Receipts from Goods Traffic.	Total Receipts.
1845	2,543	23,791,255	5,976,341	2,235,373	6,203,714
1846	2,765	43,790,983	4,725,215	2,440,333	7,165,548
1847	2,947	61,339,153	5,145,508	2,569,983	7,715,491
1848	4,678	27,965,070	5,739,398	2,313,169	8,052,567
1849	5,447	60,396,139	6,103,973	5,094,925	11,200,901

**Accidents.**—By an analysis of the returns made to the railway department, it appears that of the 206 persons killed, and 195 injured, on all the railways open for public traffic in G. Britain and Ireland during the year ending 30th June, 1849, there were—

8	Passengers killed, and	98	Injured from causes beyond their own control.
14	Passengers killed, and	7	{ injured, owing to their own misconduct or want of caution.
18	Servants of companies or of contractors killed, and	27	Injured from causes beyond their own control.
124	Servants of companies or of contractors killed, and	54	{ injured owing to their own misconduct or want of caution.
43	Trouspassers and other persons, neither passengers nor servants of the company killed, and	9	{ injured by improperly crossing or standing on the railway.
<b>Suicide 1</b>			
<b>Total 206 killed, and</b>		<b>195 injured.</b>	

The total length of railway authorised by parliament up to 31st December, 1849, amounted to 12,026 miles, of which there were open at that date 5,996.

The number of persons employed on all the railways open for traffic on the 1st of May, 1849, amounted to 52,688  
And the number employed on those in course of construction to 188,177

Making a total of 240,865

The total capital (in shares and loans) authorised by parliament up to 31st December, 1848, amounted to 343,890,700  
Of which there was paid up at that period 300,173,000

## TRADE WITH THE TRANSCAUCASIAN TERRITORIES AND IN THE CASPIAN SEA.

Exports from Russia of the principal Articles:—

	1847.	1848.
	<i>St. Roub.</i>	<i>St. Roub.</i>
Grain - - - - -	178,137	111,741
Silk manufactures - - -	62,387	35,691
Silk - - - - -	86,428	65,456
Raw hides - - - - -	105,299	143,235
Metal goods - - - - -	35,318	29,535
Metal - - - - -	80,115	47,114
Building wood - - - - -	15,460	40,544
Precious metals - - - -		2,538,967

## Imports (principal Articles).

	1847.	1848.
	<i>St. Roub.</i>	<i>St. Roub.</i>
Cotton manufactures - - -	1,589,377	2,063,376
Silk - - - - -	588,781	815,459
Raw silk - - - - -	450,471	379,664
Sugar and sugar candy - -	314,444	248,101
Furs - - - - -	103,545	110,618
Skins - - - - -	36,858	85,166

N.B. The imports always considerably exceed the exports.

## KLAUCHA TRADE.

In 1848 the amount of manufactured goods bartered at fixed prices for 156,217½ boxes of fine tea of the Chinese, was 6,549,918 silver roubles, and the principal articles comprised of—

Russian manufactured cloths - - -	<i>St. Roub.</i>
Russian fur goods - - - - -	2,336,441
Foreign fur goods - - - - -	1,141,913
Cotton manufactures - - - - -	198,796
Leaves manufactures - - - - -	932,438
Jewels and other leather - - -	86,000
	314,405

The Klačhta Customs' duty yielded, in 1848, 5,541,386 st. roub., which was 324,033 more than in 1847. From this duty is to be deducted 73,643 st. roub. allowed as premiums or drawback on the Russian cotton goods bartered.

In 1848 were forwarded from Klačhta into the interior of Russia:—

Flourery (tea) or paper - - -	<i>Poods.</i>
Ordinary tea - - - - -	69,677
Brick tea - - - - -	183,752
	116,249

Equal to about 16,000,000 lb. English.

	<i>St. Roub.</i>
The Customs' duties amounted to - -	25,427,105
Excise on Krim salt - - - - -	321,064
Two per cent. on foreign goods for the	
Neva bridge, now building - - - -	944,670
Extra duty for the benefit of sundry cities	975,971
Warehouse rent - - - - -	242,558
Fright and passage-money derived from	
the Odessa steamers - - - - -	50,680
	26,230,148

Less premiums on Russian manufactures - - - - - 164,808

Less expenses of collection and maintaining frontier guard (10 per cent.) - - - - - 2,185,410

Net income - - - - - 2,330,918

Time, 1st Jan. 1850. - - - - - 22,969,320

**STADE-DUTIES.**—We are glad to have to state that an arrangement was effected with Hanover in 1844, by which these duties have been reduced, and placed on an improved footing. British vessels, and those belonging to countries having reciprocity treaties with Hanover, are no longer obliged to *leave-to* in passing the guard-ship opposite Brunshausen, but may proceed direct to Hamburg, and pay the duties in the toll-office in that city. These are specified in the schedule annexed to a bulky paper laid before parliament in 1844; but for some unknown, though certainly very bad reasons, these duties are not computed, even in the translation of this paper, in English, but in German weights, measures, and monies, and are consequently unintelligible to 99 out of every 100 English merchants and ship-masters. We should have translated them had they not been too voluminous for insertion in this place; and it is the less necessary as summaries of them may readily be had in Hamburg. Still, however, this arrangement is merely an attempt to improve what is in its nature incurably bad. The toll on the Elbe is an outrage on all commercial nations; and instead of being modified, should be wholly repealed.

**STEAM VESSELS (REGULATION OF).** The following statute, the 9 & 10 Vict. c. 100., for regulating the built, navigation, &c. of steam vessels, and for obliging sea-going vessels of more than 100 tons to carry boats, came into operation on the 1st of January, 1847:—

*Iron Steamers of 100 Tons Burden and upwards to be divided by Water-tight Partitions.*—All steam vessels built of iron of 100 tons burden or upwards, built after the passing of this act, shall be divided by transverse water-tight partitions, so that the fore part of the vessel shall be separated from the engine room by one such partition, and so that the after part of such vessel shall be separated from the engine room by another such partition.—§ 2.

*Sea-going Vessels to be provided with Boats.*—From and after the 1st of January, 1847, no vessel, the tonnage of which shall be 100 tons or upwards, shall proceed to sea from any port whatsoever unless it be provided with boats duly supplied with all requisites for their use, of the dimensions set forth in the following table; but the dimensions in the table are not to be considered applicable to vessels engaged in the whale fishery:—

Tonnage of Vessels.	Number of Boats.	Long Boat, Launch, or Pinnace.				Other Boats.							
		Length.		Breadth.		Length.		Breadth.		Length.		Breadth.	
		<i>Fet.</i>	<i>Ft. In.</i>	<i>Fet.</i>	<i>Ft. In.</i>	<i>Fet.</i>	<i>Ft. In.</i>	<i>Fet.</i>	<i>Ft. In.</i>	<i>Fet.</i>	<i>Ft. In.</i>	<i>Fet.</i>	<i>Ft. In.</i>
850 and upwards - - -	4	36	5 0	24	7 0	22	5 6	18	5 6	16	5 6	14	5 0
650 to 850 - - - - -	4	24	7 0	22	6 6	18	5 6	-	-	14	5 0	-	-
550 to 650 - - - - -	3	20	6 6	18	5 6	-	-	-	-	14	5 0	-	-
350 to 550 inclusive -	2	18	6 0	-	-	-	-	-	-	14	5 0	-	-
100 to 350 - - - - -	2	-	-	-	-	16	5 6	-	-	-	-	-	-

and a Punt or small Boat.

and no vessel carrying more than 10 passengers shall proceed to sea on any voyage unless, in addition to the boats hereto-before required, it shall also be provided with a boat fitted up as a life boat with all requisites for its use, together with 3 life buoys.—§ 3.

*Steam Vessels, in addition to being such other Boats as the Admiralty may direct.*—Every steamer built after the passing of this act, and which shall proceed to sea with passengers, shall, in addition to the boats specified in the foregoing table, and in lieu of a boat fitted up as a life boat, be provided either with such boats as are usually called paddle-box boats, or with such other boats as may be directed in lieu thereof by the Lords of the Admiralty for the time being.—§ 4.

*No Steamer to proceed to Sea without a Hose.*—No steam vessel of 100 tons burden or upwards shall proceed to sea unless it be provided with a hose for the purpose of extinguishing fire capable of being connected with the engine of the vessel.—§ 5.

*Mode of ascertaining Tonnage.*—For the purposes of this act the tonnage of vessels shall be ascer-

tained according to the rules of admeasurement prescribed by any act of parliament for the time being in force regulating the admeasurement of the tonnage and burden of the merchant ships of the U. Kingdom.—§ 6.

*Penalties on Masters, &c. neglecting to provide Boats, Hose, &c.*—If any steam vessel as aforesaid proceeded to sea without being provided with such hose as aforesaid, or being an iron steam vessel without being so divided as aforesaid, or if any steam or other vessel of 100 tons burden or upwards proceeded to sea without being so provided with boats as aforesaid, or if any such boats be lost or rendered useless in the course of the voyage through the wilful fault or negligence of the owner or master, or if in case of any of such boats being accidentally lost or injured in the course of the voyage, the master or other person having charge of the vessel wilfully neglect to replace or repair the same on the first convenient opportunity, then and in every case where the owner shall appear to be in fault he shall forfeit a sum not exceeding 100*l.*, and in every case where the master or other person having charge of the vessel shall appear to be in fault he shall forfeit a sum not exceeding 50*l.*—§ 7.

*Officers of Customs not to clear out Vessels not complying with these Provisions.*—It shall not be lawful for any officer of customs to clear out any steam vessel as aforesaid for any voyage to parts beyond the seas without being provided with such hose as aforesaid, or being an iron steam vessel without being so divided as aforesaid, nor to clear out any steam or other vessel of 100 tons burden or upwards for any voyage to parts beyond the seas unless the same be provided with such boats as are here before required.—§ 8.

*Penalty on Masters, &c. not observing the Regulations as to passing and repassing other Vessels.*—Every steam vessel when meeting or passing any other steam vessel shall pass as far as may be safe on the port side of such other vessel; and every steam vessel navigating any river or narrow channel shall keep as far as is practicable to that side of the fairway or mid-channel of such river or channel which lies on the starboard side of such vessel, due regard being had to the tide and to the position of each vessel in such tide; and the master or other person having the charge of any such steam vessel, and neglecting to observe these regulations, or either of them, shall for each and every instance of neglect forfeit and pay a sum not exceeding 50*l.*—§ 9.

*Admiralty to make Regulations respecting the Exhibition of Lights.*—The Lords of the Admiralty may from time to time make regulations requiring the exhibition of such lights by steam vessels in such manner, within such places, except the River Thames above Yantlett Creek, and under such circumstances as the said lords may think fit, and may from time to time make any other regulations revoking or altering any previous regulations.—§ 10.

*Such Regulations to be published in the Gazette.*—The said lords shall cause such regulations, as soon as convenient, after the same shall have been made, to be published in four successive London Gazettes, and the same shall be deemed to be in force from the date of the last of such publications until the same be altered or revoked, and such alteration or revocation shall have been twice published in manner as aforesaid.—§ 11.

*Vessels, &c. within 20 Miles of the Coast to exhibit Lights at Night.*—The master or other person having the charge of any steam vessel which shall be in any river or narrow channel in Great Britain or Ireland, or the adjacent islands, or upon the sea within 20 miles of any part of the coast of Great Britain or Ireland, shall, whether under weigh or at anchor, between sunset and sunrise exhibit such lights within such places, in such manner, and under such circumstances as by the said regulations herein-before authorized to be made by the said Lords of the Admiralty shall be required, and in default thereof shall forfeit and pay a sum not exceeding 20*l.* for every night in which such default shall be made; and the owner of any steam vessel in which such light shall not be exhibited as aforesaid shall not be entitled to recover any recompence or damage whatsoever which may be sustained by such vessel in consequence of any other vessel running foul thereof during the night.—§ 12.

*Penalty on Masters, &c. neglecting to observe Regulations.*—If any damage to any person or property be sustained in consequence of the nonobservance as respects any steam vessel of the rules contained in the two enactments relative to the passing of steam vessels and to the exhibiting of lights herein-before contained, the same shall in all courts of justice be deemed in the absence of proof to the contrary to have been occasioned by the wilful default of the master or other person having the charge of such steam vessel, and such master or other person shall be subject in all proceedings, whether civil or criminal, to the legal consequences of such wilful default.—§ 13.

*Before the 30th of April and 31st Oct. in every Year Owners to transmit Declarations to the Board of Trade.*—On or before the 30th of April and the 31st of October in every year the owners of every steam vessel shall transmit to the Committee of the Privy Council for Trade (Board of Trade) the two following declarations in writing, viz.:—

First, a declaration of the sufficiency and good condition of the hull of such steamer under the hand of a shipwright surveyor, to be approved by the said committee:—

Second, a declaration of the sufficiency and good condition of the machinery of such steam vessel under the hand of an engineer, to be approved in like manner by the Board of Trade; such declarations bearing date of some day in the said months of April or October respectively:

And the Board of Trade shall register such declarations, and shall transmit to the owners of such steam vessels respectively certificates under the hand of one of the secretaries or assistant secretaries of the said committee of the registry of such declarations: provided always, that if the owners of any such vessel shall certify to the said board that such vessel has been, during the whole of such month of April or of October respectively, and still is, in foreign parts, so that it is impossible to obtain the above declarations, bearing date as is above prescribed, and shall at the same time transmit to the said board the required declarations, dated not more than 7 days before such vessel last sailed or departed from any part of the U. K., then and in every such case the said board shall register such declarations, and shall transmit to the owners of such last-mentioned steam vessels respectively certificates of the registry of such declarations: provided nevertheless, that this enactment shall not extend or apply to any steam vessels employed as herein-after mentioned during the continuance of such employment, (that is to say,) whilst employed in the royal mail service, or the conveyance of the royal public mails or despatches under contract with and under the superintendence of the Lords of the Admiralty.—§ 14.

*Certificate may be granted though Declaration be not made in April or October.*—Whereas it may happen that by reason of the steam vessel or the machinery thereof being under repair during either of the months of April or October it may be impracticable to make such declarations as are before required in either of the said months: be it enacted, that in such case it shall be lawful for the owners of such steam vessels at any time to make a representation to that effect to the Board of Trade, and to transmit therewith such declarations as are before required, and it shall be lawful thereupon for the said board, if they be satisfied of the truth of such representation, to register such declarations notwithstanding they shall not bear date in either of the months of April or October; and the said board shall transmit to the owners of such steam vessels certificates of the registry thereof in manner before provided, and such certificates shall have the like force and effect and be used for all the same purposes and in the same manner as if the said certificates referred to declarations made in April or October.—§ 15.

*Officers of Customs not to clear out Vessels except upon Production of Certificate of Registry.*—From

and after the 1st of June, 1847, it shall not be lawful for any steam vessel, except as is herein-before excepted, to proceed to sea, unless the owner thereof shall have duly transmitted to the Board of Trade such declarations, and shall have received from the said board such certificates of the registry thereof as are before mentioned; and it shall not be lawful for any officer of customs to clear out any steam vessel carrying passengers for any voyage to parts beyond the seas, unless upon the production of the certificate of the registry of the declarations which shall most recently have been made in respect of such steam vessel, and unless such declarations have been so made within 6 calendar months of the application for clearance.—§ 16.

*Penalty on Owners of Vessels for not transmitting Declarations.*—If any steam vessel proceed to sea with passengers, the owner whereof has not duly transmitted to the Board of Trade such declarations, and received from the said board such certificates of the registry of such declarations as are before mentioned, the owner of such steam vessel shall forfeit a sum not exceeding 100*l.*—§ 17.

*Persons forging Certificate or Declaration guilty of a Misdemeanour.*—Any person who shall knowingly or willfully make or assist in making a false or fraudulent declaration or certificate, or who shall knowingly or willfully forge, counterfeit, or fraudulently alter, or shall aid and assist in forging, counterfeiting, or fraudulently altering, or who shall attempt to forge, counterfeit, or fraudulently alter, any declaration or certificate provided for by this act, or any words or figures in any such declaration or certificate, or the signature to any such declaration or certificate, shall be deemed to be guilty of a misdemeanour.—§ 18.

*Accidents and Damages to Steamers to be reported to the Board of Trade.*—Whenever any steam vessel shall have sustained or caused any serious accident occasioning loss of life or property, or received any material damage affecting her sea-worthiness, either in her hull or her engine, by grounding or by collision with any other vessel, or by any other means, the master or other person having the charge of such vessel shall, as soon as conveniently may be, transmit, through the post office, by letter addressed to the Board of Trade, and signed by such master or other person, a report of such accident or damage, and the probable occasion thereof, stating therein the name of the vessel, the port to which she belongs, and the place where she is, in order that the said board may if they think fit investigate the matter; and should the owner or owners of any steam vessel, from her nonappearance or otherwise, have reason to apprehend that such steam vessel is wholly lost, he or they shall, as soon as conveniently may be, in like manner send notice thereof to the said board; and every owner, master, or such other person as aforesaid who shall neglect to send such notice as hereby is required within a reasonable time after any such accident shall have happened shall, for every such offence, forfeit and pay a sum not exceeding 50*l.*—§ 19.

*In Cases of Accident Board of Trade may appoint Inspectors to report.*—Whenever any steam vessel shall have sustained or caused any serious accident occasioning loss of life and property, or received any material damage affecting her sea-worthiness, either in her hull or her engine, by grounding or by collision with any other vessel, or by any other means, it shall be lawful for the Board of Trade to appoint any proper person or persons as inspector or inspectors to inquire into and to report upon such accident; and it shall be lawful for every person so authorised at all reasonable times, upon producing his authority, if required, to go on board and inspect any such steam vessel and the machinery thereof, and every part thereof respectively, not detaining or delaying the vessel from proceeding on her voyage, and to make such inquiries as to the nature, circumstances, and causes of such accident as he or they may think fit.—§ 20.

*Inspectors may call for the Production of Evidence.*—The said inspectors or any of them shall be, and are hereby empowered, by summons under their or his hands or hand, to require the attendance of all such persons as they or he shall think fit to call before them or him upon any question or matter connected with or relating to the execution of any of the powers and duties vested by this act in the said inspectors, and also to make inquiries and to require answers or returns thereto in relation to any such matters, and for the purpose aforesaid to administer oaths, and to examine all persons upon oath, and to require and enforce the production upon oath of all log-books, accounts, agreements, or other papers or writings in anywise relating to every such matter as aforesaid; or, in lieu of requiring or administering an oath, the said inspector or inspectors may, if he or they think fit, require every such person to make and subscribe a declaration of the truth of the matters respecting which he shall be or shall have been examined or interrogated; provided always, that no such person shall be required, in obedience to any such summons, to travel more than 10 miles from his actual abode at the time of receiving such summons, unless tender shall be made him of such reasonable expences in respect of his attendance to give evidence, and his journey to and from the place where he shall be required to attend for that purpose, as would be allowed to any witness attending on subpoena to give evidence before any of H. M. Courts at Westminster, and in case of any dispute as to the amount of such expences, the same shall be referred by the inspectors to one of the masters of H. M. Court of Queen's Bench, who is hereby required to ascertain and certify the proper amount of such expences on a request made to him for that purpose under the hand or hands of such inspector or inspectors.—§ 21.

Clause 22. Imposes a penalty of *£*4, or, in default of payment thereof, imprisonment for not more than 2 calendar months, on persons obstructing inspectors in the execution of their duty.

Clause 23. enacts that penalties may be summarily recovered before 2 justices.

Clause 24. enacts that offences on the high seas shall be deemed to have been committed in the place into which the offender is brought, or in which he is found.

Clause 25. orders penalties to be levied by distress.

Clause 26. enacts that in default of distress justices may commit the offender to prison, there to remain without bail for any term not exceeding 3 months, unless the penalty or forfeiture, and costs, be sooner paid and satisfied.

Clause 27. directs how distress is to be levied.

*Indictments to be preferred by direction of the Board of Trade or Commissioners of Customs.*—No indictment shall be preferred for any offence against this act unless under the direction of the Board of Trade, or of the Commissioners of H. M. Customs; and no suit or proceeding shall be commenced for the recovery of any penalty or forfeiture for any such offence unless in the name of H. M.'s Attorney General for England or Ireland, or in the name of the Lord Advocate of Scotland, or in the name of some public officer under the direction of the Lords of the Board of Trade, or of the said Commissioners respectively.—§ 30.

The other clauses are of no public importance.

**STEAMERS' LIGHTS.**—In pursuance of the above act, the Lords of the Admiralty have ordered "that lights shall be exhibited by all steam vessels, except in the river Thames, above Yauntlett Creek, between sunset and sunrise, as follows, viz:—

When under weigh—

1. Bright white light at the foremost head.
2. Green lights on the starboard side.
3. Red lights on the port side.

When at anchor.—A common bright light.

The following conditions are to be observed, viz:—

1. The mast-head light to be visible at a distance of at least 5 m. in a clear dark night, and the lantern to be so constructed as to show a uniform and unbroken light over an arc of the horizon of 30 points of the compass, viz. from right ahead to 3 points abaft the beam on each side of the ship.

2. The coloured side-lights to be visible at a distance of at least 2 m. in a clear dark night, and the lanterns to be so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass, viz. from right ahead to 2 points abaft the beam on their respective sides.
3. The side-lights to be moreover fitted with inboard screens, of at least 3 feet in length, to prevent them from being seen across the bow. The screens to be placed in a fore and aft line with the inner edge of the side-lights.
4. The lantern used when at anchor to be so constructed as to show a good light all round the horizon.

**SUGAR.**—We have given in the Dictionary (p. 1242. and p. 1244.) statements exhibiting the production and consumption of sugar in the commercial world in 1848. But the subjoined statement, which is, we believe, nearly accurate, showing the production of sugar in 1828 and 1847, is not less interesting. It exhibits a wonderful increase, and, provided nothing be done to check the growth of sugar in Cuba and Brazil, it goes far to negative all expectation of any thing like a permanent or considerable rise in the price of sugar. The presumption, indeed, is quite the other way.

Comparative Account of Sugar produced for European, American, and Australian Consumption in 1828 and 1847.

\* The figures in this Return are not precisely accurate; but the errors are inconsiderable.

The consumption of the U. Kingdom amounted in 1844, previously to the reduction of the duties, to about 207,000 tons; whereas, according to the above return, it amounted to 310,425 tons (inc. refined sugar) in 1848, and to 299,877 tons in 1849. This, however, is not a real but only an apparent diminution. In July, 1848, 26,274 tons of foreign sugar were entered for consumption to secure its admission at a duty of 18s. 6d. a cwt., 12,000 tons of which were in the warehouse at the commencement of

1849, and must, therefore, be included in the consumption of that year. And it is farther to be observed that while molasses equivalent to about 15,000 tons sugar were entered for consumption in 1848, the entries of the latter in 1849 were equivalent to about 21,000 tons. Hence it is plain that the consumption has been considerably greater in the last (1849) than in the previous year, though the increase has not been so great as might have been anticipated.

We may further state, in illustration of the beneficial influence of the reduction of the duties, that while, in London and other parts of the country, the sales of sugar by the grocers who supply the higher classes have been but little extended, the sales of those who principally deal with the lower classes have augmented from 40 to 50, and, in some cases, to 80 and 100 per cent. ! This is the best proof of the salutary as well as of the powerful influence of the reduction of the duties.

ACT 10 VICT. c. 5., ALLOWING THE USE OF SUGAR IN THE BREWING OF BEER, PASSED  
23 FEBRUARY 1847:

*Brewers of Beer for Sale may use Sugar in brewing.*—From and after the passing of this act any brewer of beer for sale may use sugar in the brewing or making of beer, any thing in any act or acts of parliament to the contrary notwithstanding.—§ 1.

*Brewers not to use Molasses or Sugar except in the State in which it has been imported.*—Nothing in this act shall extend or be deemed or construed to extend to allow any brewer of beer for sale to use any molasses in the brewing or making of beer, or any sugar other than sugar on which the full duties of customs have been paid, and in the state in which the same has been imported into this kingdom, and without the same having been previously diluted with water or other liquor, or having undergone any process or manufacture to alter the same: provided also, that nothing in this act contained shall extend or be deemed or construed to extend to prevent any such brewer from making use, in the brewing and making of beer, of beer colouring made from sugar under the regulations after mentioned, or of refined sugar, or of sugar candy, or of bastard sugar, on which the full duties of customs have been paid, or which have been manufactured in the U. K. from materials on which the duty of customs has been paid, and which are respectively entitled to the drawbacks thereon granted on exportation.—§ 2.

*Penalty on Brewers making use of Sugar other than aforesaid, or taking into his possession any Molasses, Honey, &c.*—If any brewer of beer for sale after the passing of this act makes use of any molasses, sugar, honey, syrup, composition, or extract of sugar, except sugar on which the duty of customs has been paid as aforesaid, and made use of in the manner herein before allowed, (except beer colouring made from sugar under the regulations after mentioned, or refined sugar, or sugar candy, or bastard sugar as aforesaid), or if any such brewer receives or takes into his custody or possession any quantity of molasses, honey, syrup, composition, or extract of sugar (except as aforesaid), every such brewer shall forfeit and lose for every such offence respectively the sum of 200l.—§ 3.

*Brewers may make for their own Use Beer Colouring from Sugar, and use it in brewing.*—Every brewer of beer for sale may prepare and make for his own use in some part of his brewery or entered premises, from any sugar allowed to be made use of by him in the brewing or making of beer as aforesaid, a liquor or other preparation for darkening the colour of worts or beer, and may have the same in his custody and possession and use it in brewing, by mixing with or putting the same into worts or beer, under such regulations as the commissioners of excise may direct, any thing in the act 56 G. 3. c. 58., or in the act 7 & 8 G. 4. c. 59., to the contrary notwithstanding; but if any such brewer prepares or makes any liquor or preparation for darkening the colour of worts or beer, from any other ingredient or ingredients than as aforesaid in whole or in part, or in any other manner than as aforesaid, or receives or has in his custody or possession, or uses in brewing, any liquor or preparation for darkening the colour of worts or beer prepared or made by any other person (except roasted malt prepared, received, and used as directed by act 5 & 6 Vict. c. 30.), or otherwise in any other respect than as aforesaid, every such brewer so offending shall incur the respective penalties and forfeitures in the said two first recited acts imposed on brewers receiving into or having in their custody or possession, or making or using in brewing, or mixing with worts or beer, any liquor, material, or preparation for darkening the colour of worts or beer; and the said recited acts, and the several clauses, provisions, penalties, and forfeitures therein contained, so far as the same are now in force and are not contrary to or expressly provided for by this act, shall remain and continue in force to all intents and purposes.—§ 4.

*Brewers using Sugar to enter in the Book delivered by the Excise the Quantity of Sugar intended to be used in the next Brewing.*—Every brewer of beer for sale who uses sugar in the brewing or making of beer as aforesaid shall enter or cause to be entered in the book which by the respective laws now in force in Great Britain and Ireland is directed to be delivered to him by the proper officer of excise for the purpose of his entering therein, amongst other things, the quantity in bushels of malt which he uses in the brewing of beer, or intends to use in his next brewing, the quantity in pounds weight avoirdupois of sugar which he intends to use in his next brewing, together with the day when such brewing is intended to be made, and such entry shall be so made before any part of such sugar is used, or any water or other liquor put to or mixed therewith; and every such brewer shall at the time of making such entry write or cause to be written in such book or paper the date when such entry is made; and if any such brewer refuses or neglects to make such entry as aforesaid, or cancels, obliterates, or alters any such entry, or uses or puts to or mixes any sugar with water or other liquor before such entry is made as aforesaid, he shall for every such offence forfeit and lose the sum of 200l.—§ 5.

*Brewers using Sugar to pay Licence Duty in proportion to Quantity used.*—Every brewer of beer for sale who uses sugar in the brewing or making of beer as aforesaid shall, for the purpose of fixing and regulating the rate and amount of duty to be paid by such brewer for the licence to be taken out by him under the 6 G. 4. c. 81., be deemed to have brewed one barrel of beer for every 50 lbs. avoirdupois of sugar used by such brewer in brewing, and shall for every licence to be taken out by him as a brewer of beer for sale pay such amount of duty, according to the rate by the said act imposed on brewers of beer only for sale, as is correspondent to the quantity of beer which he shall be deemed to have brewed as aforesaid.

*After passing of this Act Drawback granted by 11 G. 4. & 1 W. 4. c. 51. repealed, and new Drawbacks granted.*—From and after the passing of this act the drawback granted on beer exported by the 11 Geo. 4. & 1 Will. 4. c. 51. shall be repealed, and the same is hereby repealed accordingly, and in lieu thereof there shall be granted and paid for and upon every barrel of 36 gallons, and so in proportion for any greater quantity of beer brewed or made by any licensed brewer of beer for sale in the U. K. in the brewing of which beer the worts used before fermentation were of not less specific gravity than 1·084, and not greater specific gravity than 1·081, and which beer shall be duly exported from any part of the U. K. to foreign parts as merchandise, a drawback of 5s. and five per cent. thereon; and for and upon every barrel of 36 gallons, and so in proportion for any greater quantity of beer brewed or made by any entered and licensed brewer of beer for sale in the U. K., in the brewing of which beer the worts used before fermentation were of not less specific gravity than 1·081, and which beer shall be duly exported

from any port of the U. K. to foreign parts as merchandize, a drawback of 7s. 6d. and five per cent. thereon.

*After passing of this Act Beer may be exported on Drawback according to the Specific Gravity of the Worts used and specified in Notice of Shipment.*—From and after the passing of this act any person may export and ship as merchandize from any port in the U. K. any beer brewed or made by any licensed brewer of beer for sale in the U. K., such beer being in not less quantity at one time than 36 gallons, and having been brewed or made from worts of not less specific gravity than 1·054, or of not less specific gravity than 1·081, according as the same shall be specified in the notice of shipment required to be given by the 1 Will. 4. c. 51., and upon such notice being duly certified as is in the said act mentioned a debenture expressing the quantity of beer so shipped, and the amount of drawback payable in respect thereof, shall be made out and delivered to the person exporting the said beer as directed by said act.

Clause 9. repeals so much of the 11 G. 4. & 1 W. 4. c. 51. as requires oath to be made on debenture for obtaining drawback.

*Declaration to be made by Exporter, &c. on Debenture for obtaining Drawback.*—Before any debenture is paid, the exporter of the beer therein mentioned, or his principal clerk or manager, together with the brewer thereof, or his foreman or manager, shall make and subscribe a declaration on the said debenture, before the excise export surveyor, or officer acting as such, that the quantity of beer therein mentioned was put on board the ship and exported therein as merchandize to be sent beyond the seas, and no part thereof for the ship's use, and that according to the best of his and their knowledge and belief the same had been brewed or made from malt or sugar, or malt and sugar, on which the full duties of excise and customs respectively had been charged or paid, and shall also specify in such declaration the time when and the place where, and the brewer, being an entered or licensed brewer of beer for sale, by whom such beer was made, and, if so, and per cent. per barrel or on every 36 gallons of the beer so exported be the drawback claimed, that the specific gravity of the worts before fermentation from which such beer was brewed was not less than 1·054, and, if 7s. 6d. and per cent. per barrel or on every 36 gallons of the beer so exported be the drawback claimed, that the specific gravity of the worts from which such beer was brewed was not less than 1·081, such specific gravities being for the purposes of this act taken and ascertained by the saccharometer, or such other instrument and by such means as the commissioners of excise may direct, water being taken for that purpose as 1·000 at the temperature of 60° by Fahrenheit's thermometer; and if any such declaration is false or untrue in any particular or respect, the person making such false or untrue statement shall forfeit the sum of 200*l.*, and the debenture on which the same has been made shall be null and void to all intents and purposes, and, if unpaid, payment thereof shall be withheld, or, if paid, the amount thereof may be recovered in the same manner, and by the same ways, means, and methods, as any duty of excise or penalty may be sued for and recovered under any laws of excise.

Clause 11. enacts that the drawbacks granted by this act shall be under the management of the commissioners of excise, and subject to the excise laws respecting exportation on drawback. And that all penalties imposed by this act may be sued for, mitigated, recovered, distributed, and applied as any other penalties under the laws of excise.

**STAT. 11 & 12 VICT. c. 100., PERMITTING THE DISTILLATION OF SPIRITS FROM SUGAR, MOLASSES, AND TREACLE.**

Clause 1. repeals the act 10 & 11 Vict. c. 6., and parts of the acts 4 Geo. 4. c. 94., and 6 Geo. 4. c. 60.

Clause 2. enacts that licensed distillers may distil from sugar only, or from potatoes only, or from molasses only, or from treacle, or from any of these materials and malt or grain mixed.

*Charge on annual account when Sugar only is used, and when Sugar mixed with Grain, &c. is used in the brewing the Worts.*—In the annual account on which a charge of duty may be made on a distiller, by the acts 4 Geo. 4. c. 94., and 6 Geo. 4. c. 80., when spirits are distilled from sugar only, he shall be chargeable and charged with duty after the rate of one gallon of proof spirits for every 100 gallons of the worts or wash attenuated during the period of such annual account for every 4 degrees of the gravity specified in the notice or notices given by such distiller of the gravity of the worts intended to be made by him during such period in his distillery; and when the spirits are distilled from sugar and any mixture of such materials as before specified, he shall be chargeable and charged with duty after the rate aforesaid for and in respect of the worts made from sugar, and for and after the rate or proportion of one gallon of proof spirits for and in respect of every 100 gallons of the worts or wash attenuated during the period of such annual account for every 5 degrees of the gravity specified in such notice or notices as aforesaid in respect of the worts made from grain, molasses, and treacle; and for the purpose of ascertaining what proportion of the whole worts made during the period comprised in such annual account has been made from sugar, and what from grain, molasses, and treacle, it shall be calculated that the quantity of sugar necessary to make one gallon of worts at the gravity specified in such notice is the quantity in pounds weight avoirdupois of solid extract per Imperial gallon, as indicated by the saccharometer and such tables as are approved of by the commissioners of excise for that purpose, with 5 per cent. added for moisture and impurities in the sugar to such indicated weight, and the total number of gallons of worts made from sugar shall be so calculated from the quantity of sugar removed from the store-room in the presence of the proper officer to the mash tun or other vessel, as in this act after-mentioned, and actually used in brewing or making the worts distilled during the period of such annual account, and such quantity of worts being deducted from the whole quantity of worts made during the period comprised in such account, the residue shall be deemed and taken to have been made from grain, molasses, and treacle.—§ 3.

Clause 4. enacts, that no distiller shall distil from other materials than malt and grain, except as provided by this act and 3 & 3 W. 4. c. 74., under a penalty of 200*l.* and forfeiture of materials, spirits, &c.

*Notice to be given by the Distiller of his Intention to use Sugar, &c.*—Every distiller who is desirous of distilling spirits from worts or wash made or brewed from any of the materials as aforesaid, or from any mixture of the materials, as before specified, under the provisions of this act, shall, 6 days before he commences to brew any such worts or wash, give notice in writing to the proper officer surveying his distillery of his intention so to do, specifying in such notice which of the particular materials aforesaid, or what mixture of the materials, as before specified, he intends to use, and that the same be not mixed with any other materials whatever; and if at any time after such notice has taken effect any other materials for distillation than according to such notice are used in the distillery of such distiller, or are found in any place in or about such distillery, other than the rooms or places entered for keeping such materials, then and in every such case such distiller shall incur the penalty of 200*l.*, and all materials found contrary hereto shall be forfeited.—§ 5.

*Distiller may change his Materials, on Notice.*—If any distiller who has given any such notice is desirous of commencing or recommencing to use any other of the materials aforesaid, or any other of the mixtures of materials in this act before specified, and other than as mentioned in the notice by him before given, such distiller may do so at any time (such time being at the close of a distilling period, and at least 7 days distant from the time when such distiller began to use such materials under the notice last given by him), on giving 6 days previous notice in writing to the proper officer of his intention so to do.—§ 6.

*No Sugar or Molasses to be received by Distillers except from the Customs Warehouse, &c.*—No distiller of spirits using sugar or molasses for the distillation of spirits shall receive into his custody or possession any such sugar or molasses except from the warehouse in which the same was warehoused under the laws and regulations of the customs, and in the same state, and in the same hogsheads, puncheons,

casks, bags, or packages, with the same marks and numbers thereon, in which the same was cleared and delivered from such warehouse on payment of the duty; and all such sugar or molasses shall be accompanied with a certificate from the proper officer of customs, setting forth the name of the warehouse or place from which the sugar or molasses is removed, and the name of the distillery and distiller where and to whom the same is to be carried, and the kind or quality of such sugar or molasses, and the number of hogsheads, puncheons, casks, bags, and packages in which the same is contained, together with the marks and numbers thereon respectively, with the tare and net weight of each, and the amount and rate of duty paid on such sugar or molasses, together with the date of such payment; and every distiller who receives into his custody or possession any sugar or molasses except as aforesaid, or without the same being accompanied with such certificate as aforesaid, shall for every such offence incur the penalty of 200*l.*, and all such sugar or molasses shall be forfeited. — § 7.

*No Treacle to be received by Distillers except from the Refiner or Manufacturer.* — No distiller of spirits using treacle for the distillation of spirits shall receive into his custody or possession any such treacle except from the warehouse of the sugar refiner or manufacturer of such treacle from sugar or molasses, and in the same state, and in the same hogsheads, puncheons, or casks (none of them being less than of the content of 50 gallons), with the same marks and numbers thereon, in which the same was first prepared and packed in warehouse; and all such treacle shall be accompanied with a certificate from the sugar refiner or manufacturer by whom the same was made or prepared, setting forth the name of the warehouse or place where such treacle was made and from which the same was removed, and the name of the distillery and distiller where and to whom the same is to be carried, and the number of hogsheads, puncheons, or casks, and bags, or packages, in which the same is contained, together with the marks and numbers thereon respectively, with the tare and net weight of each, and every distiller who receives into his custody or possession any treacle except as aforesaid, or without the same being accompanied with such certificate as aforesaid, shall for every such offence incur the penalty of 200*l.*, and all such treacle shall be forfeited. — § 8.

*Distiller using Sugar, Molasses, or Treacle, to provide Storehouses, &c.* — Every distiller intending to use sugar, or molasses, or treacle in the distillation of spirits, shall provide and keep a separate and convenient and secure storehouse or room for each (if so required by the commissioners of excise) at his distillery, to be approved of by the commissioners of excise, for the purpose of depositing, storing, and securing therein the sugar, molasses, or treacle received by him for the distillation of spirits, and every such storehouse or room, when so approved of, shall be especially entered by such distiller for the purpose aforesaid, and the proper collector or supervisor of the district shall provide and affix proper locks and fastenings thereto, at the expense of such distiller, who may, if he please, affix other locks and fastenings thereto, the keys of which last-mentioned locks he may keep; and in such separate storehouse or room every such distiller shall keep all sugar, molasses, or treacle received by him as aforesaid, to be deposited therein in the presence of an officer of excise, and on such notice as after mentioned; and no such sugar, molasses, or treacle shall be delivered or removed out of any such storehouse or room except in the presence of an officer of excise, and on such notice as after mentioned, and except for the purpose of being conveyed immediately to the mash tun, or to such other vessel as with the approbation of the commissioners of excise is ordered for that purpose, to be there immediately dissolved and used in the manufacture of spirits; and if any such distiller refuses or neglects to provide such storehouse or room, or to make entry thereof as aforesaid, or refuses or neglects to pay for any lock, key, or fastening for securing the same provided and fixed by such collector or supervisor as aforesaid, or obtains admission or entrance into any such storehouse or room or has the means of so doing, or deposits any sugar, molasses, or treacle therein, or removes any sugar, molasses, or treacle therefrom, except in the presence of and upon due notice to the proper officer of excise, and except for such purpose as aforesaid, or does not deposit in a separate and secure storehouse or room as aforesaid all sugar, molasses, or treacle received by him, every such distiller shall for every such offence incur the penalty of 200*l.*, and all sugar, molasses, and treacle deposited or removed contrary hereto shall be forfeited. — § 9.

*Distiller to give 12 Hours Notice of receiving Sugar, &c., and produce the same in the same State, with the Certificate, to be deposited in the Storehouse.* — Every distiller using sugar, molasses, or treacle for the distillation of spirits, shall, before receiving any such sugar, molasses, or treacle, give 12 hours previous notice in writing to the officer surveying his distillery of the time of arrival of such sugar, molasses, or treacle; and every such distiller shall, on the attendance of the officer on such notice, produce to him all the sugar, molasses, or treacle, as the same have been received by him, in the same state, and in the same hogsheads, puncheons, casks, bags, or packages, with the same marks and numbers thereon, as the same was cleared and delivered from the customs warehouse on payment of duty, if sugar or molasses (or as the same was prepared and packed in the warehouse of the sugar refiner or manufacturer thereof if the same be treacle), and such distiller shall at the same time deliver up to such officer the certificate which he accompanied such sugar, molasses, or treacle, on being required by the officer, and such distiller shall weigh or cause to be weighed, and shall give the officer all necessary assistance in taking account of all such sugar, molasses, and treacle, in such manner as the commissioners of excise may direct; and such officer, after due examination, and on being satisfied therewith, shall permit such distiller to deposit the same in a separate locked-up storehouse or room, as before mentioned; and if any such distiller receives any such sugar, molasses, or treacle without having given such notice, or fails to produce such sugar, molasses, or treacle, or to deliver up such certificate as aforesaid, or makes any alteration in the quantity or quality of such sugar, molasses, or treacle, or in the hogsheads, puncheons, casks, bags, or packages containing the same, or in the marks or numbers thereon, from that which the same respectively were when such sugar or molasses was cleared and delivered from the customs warehouse, or when such treacle was prepared and packed in the warehouse of the sugar refiner or manufacturer thereof, and before such officer as aforesaid has seen such sugar, molasses, or treacle weighed or taken account of and deposited as aforesaid, every such distiller so offending shall incur the penalty of 200*l.*, and all such sugar, molasses, and treacle shall be forfeited. — § 10.

*Six Hours Notice before removing from the Storehouse to the Mash Tun.* — When any distiller using sugar, molasses, or treacle in the distillation of spirits, is desirous of taking or removing any sugar, molasses, or treacle out of such storehouse or room as aforesaid, for the purpose of the same being conveyed to the mash tun, or to such other vessel as, with the approbation of the commissioners of excise, is entered for that purpose, to be there dissolved and used in the manufacture of spirits, such distiller shall give 6 hour previous notice in writing to the officer surveying the distillery of the time when and the quantity of sugar, molasses, or treacle which he is desirous of removing as aforesaid; and every such officer receiving such notice shall attend in pursuance thereof at the time therein mentioned, and shall unlock the storehouse or room from which such sugar, molasses, or treacle is to be removed, and shall see weighed out therefrom the quantity of sugar, molasses, or treacle expressed in such notice, or such part thereof as the distiller may desire; and all such sugar, molasses, or treacle shall be delivered from such storehouse or room in the original package only; and all such sugar, molasses, or treacle shall then be conveyed by the distiller directly from such storehouse or room to the mash tun, or to such other vessel as aforesaid in the distillery of such distiller, to be there dissolved and used in the manufacture of spirits, or shall forthwith be deposited again by such distiller in such separate storehouse or room as aforesaid, under the lock of the officer, until the same is again removed on like notice as aforesaid; and if any distiller removing any sugar, molasses, or treacle does not convey the same directly from the storehouse or room to the mash tun, or to such other vessel as aforesaid, and there dissolve and use the same in the manufacture of spirits, or does not forthwith deposit the same again as aforesaid, or removes or disposes of the same otherwise than as aforesaid, every such distiller so offending shall for every such offence forfeit and lose the sum of 200*l.*, and all sugar, molasses, and treacle so removed, which are not conveyed,

dissolved, and used, or again deposited as aforesaid, and all sugar, molasses, and treacle which are found deposited in any other place in the distillery, or in any premises adjoining thereto, except in the separate storehouse or room, or mash tun or such other vessel as aforesaid, shall be forfeited. — § 11.

*Officer to keep Account of Stock in the Storehouse.* — The proper officer of excise shall, in such manner and at such times as the commissioners of excise may direct, keep an account, by way of debtor and creditor, of the sugar, molasses, or treacle in stock in each separate storehouse or room provided by every distiller using sugar, molasses, or treacle in the distillation of spirits as aforesaid, and shall in such account credit such stock with the full quantity of sugar, molasses, or treacle which is from time to time deposited in such storehouse or room as aforesaid, and shall debit such stock with the full quantity of sugar, molasses, or treacle which is from time to time weighed by him and removed from such storehouse or room for the purpose of the same being conveyed to the mash tun or to such other vessel entered for that purpose, to be there dissolved and used in the distillation of spirits; and if at any time, upon striking a balance on such account, the quantity of sugar, molasses, or treacle in such storehouse or room as aforesaid is found to exceed the quantity which by the stock account kept by such officer as aforesaid ought to be in such storehouse or room, every such distiller shall be deemed and taken to have deposited sugar, molasses, or treacle therein without the same having been deposited in the presence of and upon due notice to the proper officer of excise, and all such excess of sugar, molasses, or treacle shall be forfeited; and if the quantity of sugar, molasses, or treacle in such storehouse or room as aforesaid is found to be less than the quantity which by the stock account kept by such officer as aforesaid ought to have been in such storehouse or room, every such distiller shall be deemed and taken to have removed sugar, molasses, or treacle therefrom without the same having been removed in the presence of and upon due notice to the proper officer of excise; and every such distiller shall, over and above all other penalties, forfeit the penalty of 20*l.*: provided always, that such last-mentioned penalty shall not be incurred if such deficiency be proved to the satisfaction of the commissioners of excise to have arisen from unavoidable accident or loss. — § 12.

*Distiller to provide Scales and Weights, and assist the Officer in weighing the Sugar, &c.* — Every distiller using sugar, molasses, or treacle in the distillation of spirits, and providing such storehouses or rooms as aforesaid, shall keep sufficient and just scales and weights therein, and shall, when required by any officer of excise, arrange and place all sugar, molasses, or treacle deposited in such storehouse or room so as to enable such officer easily and conveniently to weigh and take an account of the same; and such distiller shall, by himself or his servants, assist the officer, when required, in weighing and taking an account of all such stock, and in weighing and taking an account of all sugar, molasses, or treacle received and deposited in such storehouse or room, or removed therefrom for the purpose of being conveyed to the mash tun or other vessel entered for that purpose; and if any such distiller keeps any false, unjust, or insufficient scales and weights, or by any art, device, or contrivance prevents or impedes such officer from taking a just and true account of such stock or commodities, he shall incur the penalties and forfeitures now in that respect imposed by the laws of excise in such case made and provided; and if any such distiller does not arrange and place such stock as aforesaid, or does not assist such officer as aforesaid, he shall for each and every such last-mentioned offence incur the penalty of 100*l.* — § 13.

*Allowance to Distiller on Spirits made from Worts or Wash, &c.* — For encouraging the use of sugar in the distillation of spirits, it is enacted, that every distiller who, under the regulations of this Act, distils spirits from worts or wash brewed or made from sugar only, or from molasses only, or from any mixture of these materials and treacle or malt or grain, shall, at the close of every brewing and distilling period, be entitled, under such regulations, provisions, and restrictions as after mentioned, to an allowance after the rate specified in the annexed schedule (A.) for every cwt. avoirdupois of the sugar actually used by him in the brewing or making of the worts or wash from which the spirits were distilled during such period, and to an allowance after the rate specified in the annexed schedule (B.) for every cwt. avoirdupois of the molasses actually used by him in the brewing or making of the worts or wash from which the spirits were distilled during such period, such respective allowances being severally granted for and in respect of the duty charged upon the sugar or molasses respectively deposited in such storehouse or room as aforesaid, and afterwards removed therefrom to be conveyed to the mash tun or other vessel entered for that purpose, and actually dissolved there, and used in making the worts or wash from which the spirits distilled during such period and charged with duty have been made. — § 14.

*Distiller who claims the Allowance to deliver on Account of the Quantity of Sugar or Molasses used.* — Every distiller who uses sugar or molasses in the distillation of spirits, and claims the allowance aforesaid, shall from time to time, and at the end of every distilling period, deliver to the proper officer an account in writing of the quantity of sugar and molasses removed from his locked-up storehouse or room, and conveyed to the mash tun or such other vessel and actually dissolved there, and used in brewing or making worts or wash distilled during such period; and such officer shall thereupon transmit such account, and at the same time make a return in writing, signed by such officer, to the collector of excise, specifying the quantity of sugar and molasses which appears by the stock account kept by such officer of the sugar and molasses in such storehouse or room to have been removed therefrom for the purpose of being conveyed to the mash tun or other vessel, to be used in the distillation of spirits during such period, and of the quantity of proof spirits with which such distiller has been charged with duty for such worts or wash as aforesaid, and whether such worts or wash had been made from sugar only, or from molasses only, or from any mixture of these materials and treacle or malt or grain; and every such distiller, or the principal manager of his distillery, shall make and subscribe a declaration to the truth of the account so delivered by him as aforesaid, in the form or to the effect following: —

"I A. B. (distiller, or principal manager of the distillery of C. D. as the case may be), do solemnly declare, that within the day of \_\_\_\_\_ and ending on the day of \_\_\_\_\_ both inclusive, there were actually removed from locked-up storehouse or room situate at \_\_\_\_\_ distillery, and conveyed to the mash tun or to the vessel entered for that purpose at the said distillery, the quantity of pounds weight of sugar [or molasses, or both, as the case may be], and no more, and that within the said period there were actually dissolved and used in the distillation of spirits \_\_\_\_\_ pounds weight of sugar [or molasses, or both, as the case may be], and no more, and that all the duties of customs on the whole of the sugar [or molasses, or both, as the case may be], so dissolved and used were duly paid, and that all the spirits distilled in the aforesaid period have been duly brought to charge and charged with duty by the proper officer."

\_\_\_\_\_

And if such declaration be untrue in any particular, the distiller by whom or on whose behalf such declaration has been made shall forfeit all such allowance, and also the sum of 200*l.* — § 15.

*The Collector on receiving such Account and Declaration, to pay the Allowance according to the Quantity of Sugar and Molasses actually removed.* — The collector of excise who receives such account and declaration thereto, and the return in writing aforesaid, shall, on being satisfied therewith, pay or allow to such distiller, in such manner as the commissioners of excise may direct, in respect of the sugar used, a sum after the rate specified in schedule (A.) for every cwt. avoirdupois of sugar which appears by such account and return in writing to have been actually used in the brewing or making of the worts or wash from which the spirits were distilled during such period; and in respect of the molasses used, such collector shall, in like manner, allow a sum after the rate specified in schedule (B.), for every cwt. avoirdupois of molasses which appears by such account and return in writing to have been actually used in the brewing or making of the worts or wash from which the spirits were distilled during such period: provided always, that in every case of such allowance, if the distiller has been charged with or owes any duty or duties, or is liable to the payment of any penalty or penalties adjudged against such distiller for any offence against this act, or any other act relating to the revenue of excise, such collector may from time to time apply the amount of every such allowance, or a sufficient part thereof, in satisfaction of such duty or duties, penalty or penalties, or any of them.

## SCHEDULES to which the foregoing Act refers.

## SCHEDULE (A.)

Articles.	From the passing of the Act to 10 July, 1849.	From 10 July, 1849, to 10 July, 1850.	From 10 July, 1850, to 10 July, 1851.	From and after 10 July, 1851.
Allowances to be paid to distillers for and in respect of sugar used in the distillation of spirits; viz.:— For and in respect of every 112 lbs. of sugar actually used in the brewing or making of the worts or wash	£ s. d. 0 11 10½	£ s. d. 0 10 10½	£ s. d. 0 9 10½	£ s. d. 0 8 2½

## SCHEDULE (B.)

Articles.	From the passing of the Act to 10 July, 1849.	From 10 July, 1849, to 10 July, 1850.	From 10 July, 1850, to 10 July, 1851.	From and after 10 July, 1851.
Allowances to be paid to distillers for and in respect of molasses used in the distillation of spirits; viz.:— For and in respect of every 112 lbs. of molasses actually used in the brewing or making of the worts or wash	£ s. d. 0 4 1	£ s. d. 0 3 9	£ s. d. 0 3 3	£ s. d. 0 3 0

SYDNEY.—We subjoin the following official statements in relation to the trade of Sydney and N. S. Wales.

Account of the Quantities and Value of the Articles exported from the Colony of N. S. Wales (excl. of Port Phillip), during 1846.

Articles.	Quantities.	Value.
Butter and cheese	21 tons 17 cwt. 14 lbs.	£ 1,265
Candles, tallow	121,064 lbs.	1,390
Carts and waggons	116 No.	1,220
Coals and coke	5,367 tons.	3,889

## TARIFF OF SPAIN:—

Article I. The government will reform the existing Tariff of importation into the kingdom for foreign produce, fruits, and manufactures, and for the produce of our colonies, according to the annexed Basis No. 1.

Article II. The cotton manufactures specified in the subjoined Tariff marked No. 2. are hereby allowed to be imported, paying at their importation, the duties fixed in the aforesaid Tariff.

The Government will point out the custom-houses through which the above-mentioned manufactures will only be allowed to be imported.

## No. 1.

Basis for the Reform of the Tariff of Importation of Foreign Produce, Fruits, and Manufactures, and of the Produce of our Colonies.

## First Basis.

Machinery and instruments for agricultural, mining, and manufacturing uses will pay from 1 to 14 per cent. ad valorem.  
Raw materials, not growing abundantly in Spain, and necessary to national industry, whatever may be their form or increase of their value in future, will pay from 1 to 14 per cent. ad valorem.

Timber for ships' masts will be comprised in the preceding article.

Raw materials similar to those abundantly produced in Spain, productive agents under equal circumstances, such as coals and coke, and foreign manufactures which may compete with equal ones now manufactured in Spain, will pay from 25 to 50 per cent.

Foreign articles required for home use, and which national industry does not produce, will pay up to 15 per cent. Only in every exceptional case, this maximum will be carried up to 30 per cent.

The duties at present levied upon colonial articles produced in foreign countries will be opportunely abolished.

The produce of Spanish possessions will pay as follows:  
Cuba and Porto Rico sugar will pay 8 reals (1s. 7d.) per arroba.

Añil sugar, 2 reals (4d.) per arroba.  
Cuba and Porto Rico coffee, 8 reals (1s. 7d.) per arroba.

Refined and half-refined sugar worked in the Peninsula, when exported to a foreign country, will have a drawback of 8 reals (1s. 7d.) per arroba of refined sugar.

All other goods, proceeding from the Spanish possessions in Asia, will pay, as a general rule, only one-fifth part of the duties payable on similar foreign goods.

The differential flag duty will be 20 per cent. This proportion will be greater on those articles which fiscally contribute to support our navigation.

The importation of the following articles will continue to be prohibited:—

Arms, projectiles, and ammunition for the purposes of war, including all sorts of gunpowder.

Quicksilver.

Hydrographic charts published by the Marine Depot and republished abroad. Maps and plans of Spanish authors whose right of property should not have expired.

Cinabar.

Vessels of wood under 400 tons measurement, of 30 quintals to each ton.

Corn, flour, biscuit, bread, and paste for soup, provided their importation be not specially allowed by a corn-law.

Books and printings in the Castilian language, of Spanish authors, unless imported by the authors themselves having the right of property.

Mass-books, breviaries, and prayer-books, and books for daily devotions. The prohibition will not be applied to dictionaries and vocabularies which may not be detrimental to the right of property enjoyed by Spanish authors in conformity with the existing laws.

Military insignia, distinctions, and accoutrements.  
Funnings, figures, and any other objects offensive to morals or ridiculing the Catholic religion.

## Common salt.

## Tobacco.

## Shoes and boots.

Made-up clothes, excepting those imported by travellers for their private use.  
Pharmaceutical preparations prohibited by sanitary regulations.

## Second Basis.

The following articles will pay a moderate duty on their exportation from the kingdom:—

Alcohol, or ore not containing silver.  
Black copper after having past once through the furnace.

Litharge, containing less than one ounce of silver per quintal.  
Lead in pigs.

Silk in pods.  
Timber for the construction of vessels: the government being authorized to adopt such measures as it may deem necessary to prevent any detriment to the building of the royal and merchant navies, or to the interest of forest-owners.

The exportation from the kingdom of the following articles will continue to be prohibited:—

Cork (unprepared) from the province of Orense.  
Litharge, containing one ounce or more of silver per quintal.

Argentiferous ore.  
Lead, containing twenty-four "adarmes" or more of silver per quintal.

Rags of cotton, hemp, or flax, and old clothes from these articles.

## Third Basis.

Foreign goods, and those of our colonies, after having paid the entry duties, according to the tariff, become naturalized, and subject to the payment of the same export, consumption, import, or other due, which, under whatever denomination, may be levied on similar goods, the produce of the country.

## Fourth Basis.

Custom-houses and depots will be established in such parts of the coast and frontier as the government may consider most expedient for the wants of agriculture, industry and commerce, and conciliating these with the interest of the public treasury, and appointing to each their due qualification. The officers to be employed therein, their salaries and expenses, will be submitted to the cortes, for approval in the budget.

## Fifth Basis.

One or more general depots may be established for the admission of every kind of produce, goods, and effects.

## Sixth Basis.

No exemption nor reduction of duties will be granted in favour of any industry, public establishment, company, nor person of any class whatever.

## Seventh Basis.

In the custom-house regulations which will be drawn out by the government, the coining, rules, and forms for the clearing of vessels and merchandise, will be specified, as also the fines or penalties which will be incurred by the infraction or non-observance of the same.

The incidental questions which may arise with regard to these regulations, will be resolved by the government, without occasioning any expenses or losses to the parties interested.

## No II.

The duties marked in this Tariff will be levied on the textures comprised in their respective classes, whether imported in pieces, dresses, slips, collars, capes, or in any other shape.

The double stuffs generally used for trousers, jackets, and other men's clothes, or for other purposes, plain, striped, or with other patterns, of cotton only, are prohibited.

The textures of silk, wool, and hemp, having a mixture of cotton in a greater quantity than one-third, will continue to be prohibited, unless they contain twenty threads in one-fourth of a Spanish inch; those having this or a greater number will be admissible, paying in their respective class as follows:

Plain or serged textures, in checks or other patterns, with a mixture of silk or wool, or of both, used generally for waist-coats, known generally as casimirs, goat's hair, or otherwise.

If the silk predominates visibly, or the wool, they will pay the duty marked for the stuffs of these respective articles.

If the cotton be the greatest proportion, having visibly the lesser part of silk or wool, the square vara 14 reals (2s. 9d.) 35 per cent.

Plain textures striped, and figured with a mixture of

thread or hemp, generally used for trousers and other summer clothing, known as drills, cuties, or any other name, — 16 reals (5s. 2d.) 35 per cent.

Ditto with a mixture of wool, called casimirs, pascowens, &c., square vara 30 reals (6s.) 35 per cent.

Simple textures, plain or serged, painted, called muslin-de-laine or otherwise.

If the wool be in greater proportion, they will pay as the textures of this article, and if cotton, square vara 6 reals (1s. 7d.) 35 per cent.

If any texture of a new invention should be presented for importation which cannot be classed under any of the foregoing heads, it will pay an ad valorem duty of 40 per cent.

Therefore we command all tribunals, justices, chiefs, governors, and other authorities, civil, military, and ecclesiastical, of whatever class and dignity they may be, to keep and cause to be kept, fulfilled and executed, the present law in all its parts.

Given at San Ildefonso, this 17th of July, 1846.

<b>SPIN COTTON.</b>					
From No. 60 to 80	—	10	0	2 0	40
From No. 80 upwards	—	12	0	2 7½	35
<b>TWISTED COTTON.</b>					
Twisted Cotton of two threads, for sewing and embroidery, from No. 60 upwards	—	15	0	2	40
Ditto of three threads, from No. 60	—	20	0	4 0	40
<b>COTTON TEXTURES.</b>					
<b>First Class.</b>					
Raw or white, of 36 threads upwards, counted in the warp, in one-fourth of an inch	—	16	0	3 25	35
Ditto, ditto, dyed	—	18	0	3 7½	35
Ditto, ditto, striped, worked pattern in the loom, or stamped	—	24	0	4 1½	35
<b>Second Class.</b>					
Muslins and Scotch Cambrics, plain, white, striped, and stamped, from 15 to 25 threads, counted in the warp, in one-fourth of a Spanish inch	—	40	0	8 0	35
Ditto, ditto, from 25 threads upwards, ditto	—	60	0	12 0	35
<b>Third Class.</b>					
Muslins, open worked, and figured in the loom, up to 15 threads, counted in the warp, in one-fourth of a Spanish inch	—	28	0	8 7½	35
Ditto, ditto, from 15 to 25 ditto	—	32	7	0 0	35
Ditto, ditto, from 25 upwards	—	50	0	10 0	35
<b>Fourth Class.</b>					
Muslins, embroidered by hand, up to 15 threads, counted in the warp, in one-fourth of a Spanish inch	—	60	0	12 0	35
Ditto, ditto, from 15 to 25 ditto	—	100	0	10 0	35
Ditto, ditto, from 25 upwards, ditto	—	160	1	12 0	35
<b>Fifth Class.</b>					
Clear textures, as lawns, book-muslin, muslin, japonais, clear muslins, &c., plain or figured, white or stamped, to 15 threads, counted in the warp, in one-fourth of a Spanish inch	—	50	0	10 0	35
Ditto, ditto, from 15 to 25	—	70	0	14 0	35
The same embroidered will pay as unembroidered muslins.					
<b>Sixth Class.</b>					
Quiltings and Piques, white and coloured, of all classes	—	80	0	10 0	35
Ditto, ditto, embroidered	—	100	1	0 0	35
<b>Seventh Class.</b>					
Velvetines, plain and figured	—	20	0	4 0	40
"Vetudilles," ditto, ditto	—	32	0	6 4½	40
<b>Eighth Class.</b>					
Plain Geese	—	60	0	12 0	35
Figured ditto	—	80	0	16 0	35
<b>Ninth Class.</b>					
Nets, plain, stamped, open worked, figured, or flowered in the loom, in pieces, strips, handkerchiefs, capes, lengths, collars, or any other shape	—	100	1	0 0	35
Ditto, ditto, embroidered by hand	ad val.				35
<b>Tenth Class.</b>					
Laces, inlittings, edges, plain and figured in the loom, embroidered, &c.	—	125	1	6 0	35
Ditto, ditto, embroidered by hand	—	250	2	10 0	35
<b>Eleventh Class.</b>					
Chintzes, lustres, cristalines, and other stuffs which are used for making artificial flowers, of 30 threads upwards	—	70	0	14 0	35
Ditto, ditto, cut and prepared in leaves, seeds, &c. &c. for making flowers	—	140	1	8 0	35
<b>Twelfth Class.</b>					
White handkerchiefs, painted or stamped ditto, from 30 threads upwards	—	20	0	6 0	35
White embroidered handkerchiefs	ad val.				35

**TARIFF OF UNITED STATES.**—We regret to have to state that the doubts we expressed in the Dictionary (p. 917.), in regard to the continuance of the present liberal tariff (that of 1846) in the U. States, appear to be in a fair way of being realised. It was supposed that America had renounced the protective system, but such is not the case; and she still continues to be a "city of refuge," not merely to the poor and destitute population of the old world, but, also, to all the exploded errors and absurdities of the mercantile system. If the principles laid down in the late report of Mr. Meredith, the secretary to the Treasury of the U. States, were fully carried out, they would annihilate the whole foreign trade of the Union. Neither Mr. George Rose, nor Lord Bexley, nor their more modern successors in this and other European countries, ever promulgated such anti-commercial theories as this republican functionary. It would be an insult to the good sense of our readers to enter into any lengthened examination of Mr. Meredith's doctrines. They are, in fact, a mere farrago of ten times refuted sophisms. Were they good for any thing they would not merely justify Congress in prohibiting all importation of foreign articles, but they would justify the legislatures of each of the different states comprised in the Union, in prohibiting all importation from the others.

Should the protectionists in Congress succeed, as is not unlikely, in imposing higher duties on iron, cotton goods, and other leading articles of importation, it is some satisfaction to know that this policy will be ten times more injurious to themselves than to any one else. The Americans may have prohibition; but they cannot have it except at a high price. Suppose that, in the event of their importation being free, cotton goods of the value of 2,000,000*l.* or 3,000,000*l.* were annually imported into the Union; and suppose that an *ad valorem* duty of 50 per cent. is laid on them when imported: a duty of this magnitude would, perhaps, satisfy Mr. Meredith and his party; but it may be doubted whether it would give the same satisfaction to the American people. Inasmuch as the Americans have to import large supplies of foreign cottons, it is plain that the price at which they are sold must determine the price at which the native fabrics are also sold. And it consequently follows, that the same addition of 50 per cent. made by the duty to the price of imported cottons will be made to those produced at home. Hence, if we estimate the entire consumption of cottons in the U. States, were there no duties, at 5,000,000*l.* a year, a duty of 50 per cent. would raise their price or cost to the American public to 7,500,000*l.* It is, therefore, evident that an individual who might, in the absence of duties, have bought a quantity of cotton for 20*s.*, will not be able to buy the same quantity after the imposition of the duty for less than 30*s.*! This is the way in which protective duties always operate. They may enrich A; but if they do, it must be at the expense of his fellow-citizens, B, C, D, &c. Jonathan will hardly, we think, be caught by such a worthless bait. If he be, he has less practical sagacity than he has got credit for.

The same reasoning applies to the case of iron and of all other products. But iron has this peculiarity, that it is not merely a manufactured article; it is, at the same time, the most indispensable of all the means and instruments of manufacturing industry. Mr. Meredith is not, however, aware of this. He says he is anxious to make America a great manufacturing country; and, to give effect to his wishes, he proposes to load the most essential of manufacturing agents with a duty that will nearly double its price. Will this specimen of Hibernian logic satisfy friend Jonathan? Had Mr. Meredith's zeal for the growth of manufactures been alloyed with even a homœopathic dose of common sense, he would have proposed, not the increase, but the total repeal of the duties on all descriptions of iron. If he succeed in his *feilo-de-se* attempt to add to the duties on it, he will do the most that can be done to retard the progress of manufacturing industry in the Union, and to disable it from withstanding the competition of foreigners.

These proposals of the government may be relished in the New England and other Northern States; but we hardly think they will meet with much favour in the Southern and Western parts of the Union. The Americans need not flatter themselves with the idea that they can export without, at the same time, importing. At all events, the cotton-planters of Carolina, Alabama, Louisiana, &c., are aware of this, and so, no doubt, are the corn-growers of the Western States. They know that such as are their imports from, so will be their exports to, England. We have, it is true, done all we could, by our raving and proceedings in regard to slavery, to disgust the free traders of the Southern States, and to make them join the protectionists of the north. But it is to be hoped that we may at length learn wisdom by experience, and rest satisfied with the irreparable injury we have done to our own sugar colonies without seeking to inflict a similar injury on the cotton-planters of the Union. We are more interested than the Americans in the growth of cotton; and are, therefore, more interested than they in the maintenance of that order of things in the Carolinas, Alabama, &c., which is necessary to the growth of a large supply of cotton at a cheap rate.

Though the injury which the Americans will inflict on themselves by agreeing to the anti-commercial measures now proposed be incomparably greater than any they will inflict on others, still it would be idle to deny that they will be injurious to us. The U. States is the most extensive market for our iron and cottons, and, by imposing high duties on their importation, the demand for them will, no doubt, be narrowed. This, it must be allowed, is rather a shabby return for the important advantage we have conferred on the Union by opening our ports to her corn and flour at a mere nominal duty. It is true that, in doing so, we consulted our own not her advantage. But whatever motives may be assigned for our conduct, the measure has been highly advantageous to the Americans; and might and should have made them pause in that course of policy on which they appear to be so much inclined to enter. But they had as well not trust too much to our forbearance. Freedom of importation is, speaking generally, the best rule to follow; but there are no absolute rules or principles in politics, or, indeed, in most other things. The Americans formerly compelled us, by their retaliatory proceedings, to make, greatly against our will, though greatly for our advantage, important changes in our navigation laws. And are they quite sure, since they will not follow our example, that we may not diverge a little from the course on which we have entered, to profit by their example? Suppose

we laid a discriminating duty of 3s. or 4s. a quarter on corn and flour imported from America, to continue as long as the proposed new duties (if passed) on cotton goods, iron, &c., imported into the Union are to continue, what could the Americans say against such a duty? To be consistent, Mr. Meredith should write a report in its favour. And yet it would be far more severely felt in the States than the duties they propose to lay on imports will be felt here. The Americans must come to us for iron and cottons, and must, therefore, themselves pay the duties imposed on them. But we may supply ourselves with corn in fifty other places besides the Union; and hence the duty on it would fall entirely on the U. States grower and exporter, and not on the English consumer. Whether such a course on our part would or would not be expedient depends on considerations to which it is needless here to allude. But Jonathan had as well be cautious, and not go too far in the way of provocation. Retaliatory proceedings are not to be resorted to on trifling occasions. But they have been, and no doubt may again be, employed, with the best effect, to punish shortsighted selfishness, to procure increased facilities for commerce, and to accelerate the progress of universal opulence.

**TOBACCO TRADE.**—A few years ago, the American government, at the suggestion of the tobacco planters, sent an agent to Europe to make inquiries into the state of the tobacco trade, in the view of procuring increased facilities for the introduction of the tobacco of the U. States into this part of the world. Mr. Dodge, the agent, has since published an interesting and elaborate Report; a summary of which appeared, a few months ago, in a New Orleans paper. And we now take leave to lay this summary, with but little alteration, before our readers.

**Holland.**—By the Dutch tariff of 1845, the import duty on unmanufactured tobacco of the U. States is equal to 38 American cents per 100 kilog. (224 lbs.), with a transit duty of 4 cents per 100 kilog. This transit duty is a matter of great consideration; for in consequence of the many facilities of intercommunication, a large portion of Germany obtains supplies through Holland, and, consequently, a low rate of transit duty is very desirable. The exports of unmanufactured tobacco from the U. States to Holland, from 1st October 1841, to 30th June, 1846, 4½ years, were 138,134 hhds., valued at 5,680,973 dol.—averaging annually 29,081 hhds., of the value of 1,195,994 dol. It is estimated, that the indirect imports of American tobacco into Holland, for the same period, was 5,000 hhds., annually,—making a total annual average import of 34,081 hhds., which is an increase since 1835 of 10,023 hhds. a year. This immense trade is carried on principally in American bottoms. The growth and manufacture of tobacco are very much encouraged.

**Belgium.**—The duty is 47 c. per 224 lbs. avoirdupois. For 4½ years, from 1841 to 1846, our exports, direct and indirect, to Belgium, amounted to 32,658 hhds., giving an annual average of 6,574 hhds., and showing an annual increase since 1835 of 4,511 hhds. These exports are made in American bottoms. The cultivation is free, and likewise the manufacture is open to any one upon payment of a small patent tax. The tobacco manufacturers are numerous, and the greater part of the manufactured tobacco is smuggled into France.

**Denmark.**—The duty is equal to 1 dol. 4 c. per 100 lbs. The export to Denmark averages 208 hhds. a year, which shows a diminution in the trade. The cultivation, manufacture, and sale of the article are free.

**Sweden and Norway.**—According to the tariff of 1835, which is still in force, the duty on tobacco is 12c. per lb. This is an enormously high tax, yet the trade has slightly increased. For the period before mentioned, from 1841 to 1846, we exported direct to Sweden and Norway, 7,387 hhds., making an average of 1,566 hhds. Most of the imported tobacco is required for the consumption or manufacture of the country; very little is exported.

**Russia.**—At one time the consumption of tobacco in this country was capitally punished; but the use of it has been rapidly on the increase since the French invasion in 1815. The direct export of our tobacco to Russia for 4½ years, amounted to 801 hhds., being an annual average of 169 hhds.; the indirect importation into the country, by way of England, is considerable. The duty on tobacco is very severe, being 3 dols. 75 c. per 36 lbs.; but, notwithstanding this discouraging duty, the use of tobacco is annually increasing, and the manufacture of the article augmenting.

**England.**—During the 4½ years, from October 1, 1841, to June 30, 1846, the imports of tobacco into England, Scotland, and Ireland, from the U. States, were 151,598 hhds., making an annual average of 31,551 hhds. It is estimated, that about 13,000 hhds. are annually exported to the Continent, making the consumption in Great Britain about 20,000 hhds. a year, which is an increase of 2,000 hhds. over the average from 1830 to 1835. We give the following extract from Mr. Dodge's report upon the legislation of England upon this article:—

The net produce of the customs and excise was as follows:—

	Dollars.
Leaf tobacco (average of 15 years, from 1820 to 1832) . . . . .	15,469,694
Manufactured and cigars (average of 10 years, from 1824 to 1835) . . . . .	178,559
Snuff (from 1824 to 1835, 10 years) . . . . .	518
Licences to manufacturers (1835) . . . . .	29,178
Licences to retailers (1835) . . . . .	199,198
	<hr/> 15,877,078

The total amount of net revenue to the British government from tobacco, not including the excise, was in 1826, 3,257,102. sterling; and in 1837, 3,417,663. sterling; 11-18ths of which are derived from the tobacco of the U. States.

The following statements are contained in an address made by a tobacco convention held in Washington in May 1840, to the tobacco planters of the Union:—

The annual average consumption of our tobacco in Great Britain for the said three years ending the 1st day of October 1838, was about 18,000 hhds., which cost here an average of 9 dols. per 100 lbs., and paid to the British crown a tax of 3s. sterling,—equal to 7½ cents per lb., or 800 per cent. duty; that is to say, 1 hhd. of tobacco, weighing 1,300 lbs., for which you received 108 dols. for growing, preparing, and transporting to market, pays a direct tax to the British government of 573 dols. for the privilege of being sold to her citizens, besides other taxes which she exacts from her own citizens for manufacturing and retailing it to the consumers. And the official tables show the gross amount of revenue derived by the British government from 18,000 hhds. of our tobacco, imported in the year 1837, to have been

16,653,466 dols., which is about the sum derived by the U. States from import duties, on imports of every description, from the whole world.

Our diplomatic agents have since 1897 been sedulously endeavouring to urge upon England a reduction of her high duties upon tobacco, but as yet without success.

Mr. Dodge, in 1840, stated that the revenue which Great Britain obtained upon 18,000 hhd. of American tobacco, "was more than enough to pay seven important items in their civil and diplomatic lists," viz:—

1. Civil list	444,065	18	4
2. Annuities, and pensions for civil, naval, military, and judicial services	578,966	4	2
3. Salaries and allowances	194,043	8	2
4. Diplomatic salaries and pensions	189,140	16	0
5. Courts of Justice	574,432	17	5
6. Miscellaneous	331,786	14	9
7. Interest on exchange bills	536,687	17	10
	5,548,144	18	8

which, at 4 dols. 85 c. the pound sterling, is equal to 16,328,800 dols.

**France.**—Our direct exports to France for the period before mentioned, 4½ years, were 89,576 hhd., making an annual average of 18,858 hhd. She also obtains large supplies from depots at Gibraltar and London. The purchase of tobacco is monopolised by the government, under the operation of the system of the *régie*. In 1837 this monopoly produced to the French treasury a revenue of 11,012,333 dols. Tobacco is cultivated to a considerable extent in six of the departments. Strenuous exertions have been made by our government to obtain some relaxation of this system, but without any avail.

**Spain.**—The same monopoly exists in this country; and the net product of the revenue from tobacco is estimated at 4,900,000 dols., being about half its gross amount; all contracts by individuals or companies, for supplies, are made with the *régie*. The quantity exported from the U. States to Spain, for 4½ years, was 16,433 hhd., being 3,460 hhd. a year. Large quantities are smuggled into the country through Gibraltar.

**Austria.**—Tobacco is here also a government monopoly, which very seriously affects the trade. The quantity imported from us, for the period before mentioned, was 8,528 hhd., or 1,800 hhd. a year.

**Sardinia.**—Here, also, the same monopoly, so restrictive of consumption, prevails. The annual exports from the U. States amount to 225 hhd., besides large quantities imported indirectly and smuggled.

**The Hanse Towns.**—With these cities, Bremen and Hamburg, a large commerce is carried on, particularly the former, which engrosses nearly the whole tobacco trade. During the 4½ years ending in 1846, the exports of tobacco from the U. States to the Hanse Towns amounted to 300,040 hhd., worth 8,489,378 dols., making a yearly average of 42,114 hhd., of the value of 1,787,328 dols.—The amount consumed in Bremen and Hamburg annually, is about 1,000 hhd.; leaving 41,000 hhd. for the consumption of the interior of Germany (Austria excepted) of American tobacco.

Unremitting but unsuccessful efforts were made by Mr. Dodge to induce the Zollverein to modify their tariff of duties on our tobaccos, which averages about 75 per cent. on their first cost.

We have some interesting facts, as the result of Mr. Dodge's investigations. The duty on tobacco in every country of Europe (except in the Hanse towns, where only 1,000 hhd. are consumed), is *specific*, being the same whether the tobacco costs 1 dol. or 5 dols. The exports of tobacco from the U. States to Europe in 1845, were 147,108 hhd., of the value of 7,500,000 dols., and the revenue derived from it by the several European States, was about 59,857,984 dols., being about 600 per cent. on the first cost of the article. "The duties range from 75 to near 3000 per cent. upon the cost of the article in our ports, and furnish a commentary upon the theory of free trade as understood in Europe, showing that their professions of reciprocity mean, if any thing, that they will obtain all they can from us, and grant us nothing in return."

In striking contrast with this enormous revenue from duties on tobacco, are our duties on imports from Europe. The whole amount of imports in 1845 was 117,254,564 dols., and the duties levied upon that amount were 26,653,809 dols. net—not 20 per cent.

From a table compiled from the records of government, showing the exports of unmanufactured tobacco from 1821 to 1847, the value, number of hogheads, and average value per hoghead, we condense the following amount for periods of 7 years, beginning with 1821 and closing with 1847:—

Average.	hhd.	Value.	Value per hhd.
First 7 years	81,003	5,854,227	73 53
Second 7 years	85,982	5,555,247	73 53
Third 7 years	107,375	9,112,928	85 92
Fourth 5½ years	147,484	7,961,594	53 95

We have shown that the foreign duties on 7,900,000 dollars' value of tobacco, amount to 59,857,000 dols.

According to Mr. Dodge, of the 36 States of Europe, there is in 34 freedom of competition in every species of industry exercised in the article of tobacco. The following States have adopted the system of monopoly or *régie*, viz.; France, Spain, Austria, Sardinia, Roman States, and the Duchy of Parma. In Britain, Spain, Sardinia, and Parma, the cultivation is absolutely prohibited; in the other States it is only restrained. In the States subject to the *régie*, the manufacture, sale, and import, are absolutely interdicted to individual enterprise. Portugal, Naples, Tuscany, Poland, and a part of Switzerland, have adopted the *farming* system.

The effect of abolishing the monopolies, and reducing the duty to a moderate standard, would be, it is supposed, to increase the consumption fourfold. Mr. Dodge is of opinion, that 422,344 hogheads would be exported to and consumed in Europe, under a moderate system of duties.

Account of the Quantities of Tobacco Imported in 1848 to 1849, and of the Quantities entered for Consumption, and of the Revenue accruing thereon in these years:—

Tobacco.	Imports in 1848.	Imports in 1849.	Entered for Consumption, 1848.	Entered for Consumption, 1849.	Gross Duty in 1848.	Gross Duty in 1849.
	Lbs.	Lbs.	Lbs.	Lbs.	\$	\$
Unmanufactured	34,090,300	41,546,848	27,098,314	27,480,621	4,967,379	4,329,217
Manufactured and Snuff	1,512,714	1,905,908	206,890	205,066	97,655	96,814

## UNITED STATES.—

An Account of the Quantities of the principal Articles of domestic Produce exported from the U. States during each of the 6 Years ending with 1848.

	1842.	1843.	1844.	1846.	1847.	1848.

The following tables show the debt of the U. States, and also of each separate State, as far as it can be ascertained:—

Statement of the Debts of the United States on the 1st of October, 1848.		
Treasury Notes of 1812	\$130,926.06	Five per Cent. Stock issued in payment of Mexican indemnity, military bounty scrip, &c. per act of Feb. 11, 1847.
Of the principal and interest of the old Funded and Unfunded Debt, and of the principal and interest of the debt of the corporate cities of the district of Columbia	127,524.68	Loan of March 31, 1848, including the amount to be paid in after Oct. 1, 1848
Outstanding Treasury Notes of issues of 1837 and 1845	1,080,000.00	
Outstanding Treasury Notes of issues of 1857 and 1845, funded	167,389.51	
Loan of 1842 at 6 per cent.	179,718.00	
Loan of 1843 at 5 per cent.	8,570,346.03	
Loan of 1844 at 5 per cent.	6,504,331.35	
Loan of 1845 at 6 per cent.	4,999,149.43	
Loan of 1847 at 6 per cent. (including outstanding Treasury Notes and notes to be issued under that act, and exclusive of the amount of stock issued under that act for notes issued before 1846)	28,000,350.58	
		\$966,778,400.41

\* This includes the whole amount negotiated and authorized, to which may be added about \$36,000 for Mexican indemnity of bounty scrip.

The debt since 1840 has been as follows:—

1841	\$ 6,737,298	1845	16,801,847
1842	15,023,426	1846	36,256,438
1843	26,798,536	1847	45,639,459
1844	26,143,096	1848	65,778,450

The following table exhibits the debts of the separate States, and the annual interest. It may not be strictly accurate, but it is as nearly so as possible. It will be seen that Pennsylvania occupies the most prominent place in this table, the gross amount of her debts being over \$40,000,000.

	Total Debt.	Ann. Interest on Debt.		Total Debt.	Ann. Interest on Debt.
Maine	\$979,000	\$45,000	Louisiana	16,238,131	78,914

Florida	NIL	—	— 1846	224,023,527	9,350,052
Alabama	10,385,928	545,361			
Mississippi	7,571,707	136,000			

#### COMMERCE OF THE LAKES AND WESTERN RIVERS.

1. *Commerce of the Lakes.*—By a report from the Bureau of Topographical Engineers, in November, 1843, it appeared that, in 1841, the moneyed value of the Lake commerce was,—

Of exports	—	—	—	\$32,342,541
Of imports	—	—	—	23,483,441
Floating value of Lake commerce in 1841	—	—	—	\$65,825,982

The enrolled and licensed Lake tonnage for the year 1841 was 56,263 tons, and the number of mariners then employed, 3,750.

In 1846, the moneyed value of the commerce of some of the Lake harbours—that of the others being unknown—was as follows, to wit:—

Oswegatchie (district)	—	\$160,565	Lake Erie.	
Lake Champlain.			Buffalo (port)	—
Whitehall	—	6,327,480	Conneaut (port)	—
Plattsburg (district)	—	1,160,844	Ashtabula (port)	—
Burlington (district)	—	3,777,736	Fairport (Grand River)	—
Lake Ontario.			Cleveland (port)	—
Sacket's Harbour (district)	—	2,735,091	Sandusky (district)	—
Dexter (port)	—	484,875	Monroe (district), including Toledo	—
Salmon River or Port Ontario	—	423,734	Detroit	—
Oswego	—	9,602,980	Erie	—
Big Sodus	—	89,306	Black River (port)	—
Rochester	—	213,996	Vermilion (port)	—
Pultneyville	—	20,432	Lake Michigan.	
Niagara (district)	—	606,863	Chicago	—
			Total	\$123,820,821

The above table gives the consolidated returns of both exports and imports. It is supposed that half the amount would not be an exaggerated statement of the net moneyed value of the Lake commerce. The amount for 1846 would then be \$61,914,910; and for 1841, by the same computation, \$32,912,991. This shows an annual average increase of 17.68 per cent., and that the Lake commerce has nearly doubled itself in five years.

The registered, enrolled, and licensed tonnage of the Lakes, by the official reports of the Treasury Department, was, for the year 1846, 106,836 tons; showing that in five years the tonnage of the Lakes was nearly doubled, and that during that period the annual average increase was 17.98 per cent.

The number of clearances and entries at ports on the Lakes in 1846 was 15,845, and the quantity of imports and exports was 3,861,088 tons. In 1841, the imports and exports amounted to 2,071,809 tons. This shows an annual average increase of 17.27 per cent., and also that the amount was nearly doubled in five years.

There were 3,861,088 tons of merchandise carried on in the Lakes in 1846; and the American Lake tonnage, during the same year, was 106,836 tons. About 30,000 tons of British tonnage are supposed to be actively employed in the trade. There are, then, 136,836 tons of shipping employed in the transportation of 3,861,088 tons of merchandise, which will require each ton to make 28.21 trips the season. The total tonnage of the Lakes is estimated to be worth \$6,000,000; and the annual expenses for wages, wood, coal, repairs, &c. (exclusive of interest and insurance), are computed to amount to \$1,750,000.

The number of passengers on the Lakes, "in all directions," for the year 1846, is estimated to be not less than 250,000, and the average charge upon each passenger to be \$5.00; giving, for the value of the passenger trade of the Lakes, \$1,250,000. The number of mariners upon the Lakes in 1846 was, by returns of the Treasury Department, 6,972.

2. *Commerce of the Western Rivers.*—From official returns of the Treasury Department, it appears that the steamboat tonnage of the Western rivers in 1843 was 126,378 tons, and in 1846 was 249,055 tons. The value of this commerce in 1842 may be stated at \$50,866,903. In 1846, the official return is \$62,906,719; showing an increase in four years of \$11,639,816, or an annual average increase of 154 per cent. This is the direct river commerce.

The value of the "way commerce" was stated by the Cincinnati memorial to be, in 1842, \$70,000,000; which in 1846, at an increase of 54 per cent. per annum, would be \$88,100,000. The passenger trade of these rivers in 1846 is estimated at \$3,181,962. The total commerce, of all kinds, of the Western rivers may, then, be stated at (net value) \$151,498,701.

The total cost of all the river tonnage, including flat-boats, &c., in 1843, was \$10,522,940. In 1846, at 54 per cent. increase, it would have been \$12,942,855. The yearly expense of maintaining this tonnage in 1843 is stated to be \$15,039,779 for steam, and \$1,380,000 for all other tonnage, making a total of \$16,419,709. This, at an annual increase of 54 per cent., would give \$20,196,343 for the cost in 1846.

In 1842, there were 20,418 persons employed on these boats, and in 1846, at the same rate of increase, there would be 25,114.

Colonel Abert considers the value of the trade of the Western rivers, as above stated, for 1846, too small; as the annual rate of increase is larger than 84 per cent. He makes two other estimates; one of which gives the value for 1846, \$190,524,368, and the other, \$176,634,468. The mean of these two estimates, \$183,609,726, he assumes as the net value of the commerce of the Western rivers; that is, the Mississippi and its direct and indirect tributaries, for the year 1846. The population depending upon these rivers, as a means of communication with a market, was in 1846 between six and seven millions, and that depending upon the Lakes in the same year was nearly three millions.

3. *Probable Extent of Steam Navigation on the Western Waters, including the Rivers, Bayous, &c., connected with the Mississippi by Channels navigable for Steamers.*

*Mississippi and its Branches, Bayous, &c.*

Bayou Bour	150	Little River	65		

4. *Length of Lake Coast.*

The entire line of Lake coast extends about 5,000 miles, 2,000 of which are the coast of a foreign power. The following Table gives the dimensions of the Lakes.

	Length.	Greatest Width.	Average Width.
Lake Champlain	105	12	8
— Ontario	180	52	40
— Erie	240	57	38
— St. Clair	18	25	12
— Huron (not including Bay of Georgian)	270	105	70
— Michigan	340	83	56
— Superior	430	135	100
Bay of Georgian	130		45

These lakes may be considered as connected throughout their whole extent. Lake Champlain connects with Lake Ontario by means of the River Richelieu, the lock and dam navigation of St. Lawrence River, the Ottawa River, the Rideau Canal through Canada, and the Champlain and Erie Canals of New York. Lake Ontario is connected with Lake Erie by means of the Welland Canal through Canada, and by means of the Oswego and Erie Canals through the State of New York. Lake Erie is connected with Lake St. Clair by the deep and navigable Strait of Detroit, 25 miles long. Lake St. Clair is connected with Lake Huron by the deep and navigable Strait of St. Clair, 33 miles long. Lake Huron is connected with Lake Michigan by the deep and wide Strait of Mackinaw, and with Lake Superior by the Strait of St. Mary's, 46 miles long. This strait is navigable throughout, except for about 1 mile of its length, immediately adjacent to Lake Superior, where, from rocks and the extreme rapidity of the current, navigation ceases. These difficulties can, however, be easily surmounted by a canal of not more than a mile long, with locks to overcome a fall of about 21 feet. The only additional obstruction to this immense extent of inland navigation is in St. Clair Lake, on approaching the St. Clair Strait. This obstruction consists of an extensive bar, but not of great width, over which not more than 7 feet water, in depressed conditions of the Lakes, can be counted upon. This shoal consists of an indurated marl, and there is but little doubt, that, if a channel were once dredged through, it would remain a durable improvement.

The tributaries of the Mississippi are connected with the Lakes by various continuous lines of canal or railroad. There are likewise, by canals and railroads, means of communication between the Lakes and the seaboard. The different lines of canals and railroads are given in detail by Colonel Abert, in his interesting and able report.

The amount expended for the improvement of Lake harbours and Western rivers from 1806 (when the first appropriation was made), to the last appropriation of 1845, inclusive, is,—

For the Lake harbours	-	-	-	-	-	\$2,720,500
For the Western rivers	-	-	-	-	-	2,758,900
						\$5,479,400

—(American Almanac for 1849.)

**WHALE-FISHERY.**— A project is now on foot for inspiring new energy into the British South Whale-fishery, by establishing a Joint-Stock Company for its prosecution, which is to carry on its operations from the Auckland Islands. These islands, which were discovered in 1806 by a ship belonging to the Messrs. Enderby, the enterprising founders of the Company, are situated in the S. Ocean, lat.  $50\frac{1}{2}^{\circ}$  S., long.  $160^{\circ} 12'$  E., about 160 m. S. from South Island, N. Zealand. The group consists of one principal island, nearly the size of the Isle of Man, and of some smaller islands. They are of volcanic formation, are well watered, and are in most parts covered either with large timber trees or with luxuriant fern, being, in respect of soil and productions, very similar to N. Zealand, of which they may be regarded as an outlying portion. They contain several excellent harbours, and appear to be in all respects extremely well fitted for a station for the ships employed in the Whale-fishery in the Southern Ocean. The charter incorporating the Company has already received the royal signature, so that it may be presumed it will shortly commence operations. It would be premature to anticipate what may be its probable success; but the fact of the whale fishery carried on from Australia and New Zealand having latterly declined is not of very favourable augury.

We borrow from *Hunt's Commercial Magazine* the following details with regard to the Whale Fishery of the U. States in 1847, and previous years.

THE WHALE FISHERY OF THE UNITED STATES IN 1847.

The following Table exhibits the Quantity of Sperm and Whale Oil and Whalebone imported into the several Ports of the U. States engaged in this branch of commercial enterprise during 1847:—

Imports of Sperm and Whale Oil and Whalebone into the U. States in 1847.
